DISCLAIMER

Although every effort has been made to ensure the accuracy of the information in the University Catalog, students and others who use the Catalog should note that laws, rules, and policies change from time to time and that these changes may alter the information contained in this publication. Changes may come in the form of government statutes, rules, and policies adopted by the Board of Trustees of the University, or by the President or designee. More current or complete information may be obtained from the appropriate department, school, or administrative office.

The information this document contains was accurate when it was published and placed on the Internet. Fees, deadlines, academic requirements, courses, degree programs, academic policies, and other matters described in this Catalog may change without notice.

The Catalog is updated regularly. Students are subject to the provisions of the most recent Catalog; however, if the student maintains continuous enrollment, every effort will be made to ensure the continuity and consistency of their degree program. If a student does not maintain continuous enrollment, their degree program is subject to change in alignment with the most recent provisions in the Catalog.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The bureau may be contacted at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, <https://www.bppe.ca.gov/>, (888) 370-7589 (phone), or (916) 263-1897 (fax).

Message from the President

Dear Student,

On behalf of our entire community, welcome to National University. At NU you will be part of the Navigator family – a connected, engaged, and inspired community of students from across the country and around the globe. From day one you will have the support of your fellow students, alumni, faculty, and staff, all here to help you soar toward your education and professional goals.

National University's holistic approach to student support, well-being, and success – called Whole Human Education™ – is about supporting the entire student. Our "5 Pillars of Support" form the core of this approach, providing financial, academic, emotional, career, and family assistance needed for you to succeed in higher education, while you also fill many other important roles in your workplace and family. We understand how to meet students where they are and help them get on a pathway to possibility. We are committed to helping our students change their lives, improve the future of their families, and positively impact their communities.

You have joined an institution that remains steadfast in its mission to provide current and future generations of diverse students the best opportunities for quality education through next-generation education and credential-rich education. NU achieves this promise to our students by offering convenient 4- and 8-week courses, year-round enrollment, flexible online classes, and career-focused programs designed for working adults – taught by professors with real-world experience. Further, innovative data and technology, proactive advising, free tutoring, and many other support resources of the university will provide the scaffolding you may need as you build toward your future, whether that is a new skill, a promotion at work, a more fulfilling career, or simply a sense of personal accomplishment.

NU, one of the nation's largest private nonprofit universities, comprises seven schools and colleges. We offer more than 190+ online and on-campus programs, and we serve more than 40,000 students across the United States and abroad. NU boasts a growing global network of over 220,000 alumni. With over 50 years of educational excellence, we are proud to share that 25 percent of our students are affiliated with the U.S. military, we are the largest conferrer of graduate degrees to minority students in the U.S., and more than 50 percent of our graduates are women. As one of the largest Minority Serving Institutions in the U.S., two-thirds of NU's graduates are racially diverse, approximately 40 percent of our learners are first-generation college students, and 30 percent of our bachelor's degree completers are Latino students.

Again, welcome to the NU Navigator family. We will champion your success every step of the way, from your first class to your triumphant walk across the stage at commencement, to your future success as an NU alumni. Best wishes on your journey to future possibilities! #NUFam, #WingsUpNU

Sincerely,

Mark D. Milliron, Ph.D.

About the University

Mission

To deliver accessible world-class student experiences by providing quality programs and services that ensure student success through meaningful learning.

Vision

Our vision is to be an inclusive and innovative university serving life-long learners who contribute to the positive transformation of society.

Values

Our values are the guiding principles and fundamental beliefs that help us function as one team as we work toward achieving our common mission.

- **Quality** - Academic quality is paramount to student success. To best achieve this value, we offer a highly supportive student experience that guides learners on their educational journey to the completion of a degree or certificate program.
- **Innovation** - Contribution of new knowledge is central to the purpose of a modern university. Our valued commitment to innovating within higher education advances opportunities for our students, and all students, within higher education.
- **Collaboration** - Partnering to meet the needs of students provides the most relevant and valued outcome. Whether with potential employers, community agencies, or partnering across disciplines within our own University, we are committed to working together toward student success.
- **Diversity** - We are enriched by the extraordinarily diverse student body, faculty, and staff. Diversity of background, orientation, and thought are necessary and valued elements of a learned society. We proactively seek and support diversity within our entire enterprise.
- **Access** - We believe that access to education is a fundamental right. Barriers to access can be finances, preparation, or simple logistics. We aspire to remove barriers to access as a means of creating social justice and a path toward a more productive life for our students.

Distance Learning at the University

In the distance-learning environment, students and faculty interact via the *NCUOne* Learning Management System (LMS). The University uses a personalized teaching model wherein students and faculty interact asynchronously during a course to achieve learning outcomes. Faculty members function as instructors, facilitators, guides, consultants, and evaluators. A complete list of salaried faculty and their qualifications can be found in the Senior Administration & Faculty section.

All degree programs include a set of fundamental courses and a set of related specialization courses allowing the student to select coursework closely associated with their educational and career goals. Students complete a degree plan, guided by faculty and supported by traditional texts, technology, and electronic resources and databases. Where appropriate, students must satisfy

general education and/or content area requirements. Elective courses are divided into specializations at the undergraduate level and specializations at the graduate level. Students choose from a carefully selected array of courses that support program objectives.

The University utilizes its own proprietary Learning Management System (LMS), *NCUOne*, to provide an enriched online experience for students. *NCUOne* is tailored to the University's unique one-to-one teaching model and graduate program focus.

Facilities

As an online university, the University does not have a physical campus or equipment other than its state-of-the-art computing and networking resources to meet the needs of students working at a distance. Prospective students are informed of the computer capacity requirements for successful access to all University systems and learning resources.

University Building Locations

- 9388 Lightwave Avenue, San Diego, CA 92123 (Administrative/Legal Headquarters)

Accreditation & Academic Alignment

- The University is regionally accredited by the WASC Senior College and University Commission (WSCUC)
- The University Master of Business Administration (MBA), Master of Science in Organizational Leadership (MSOL), Doctor of Business Administration (DBA), and Doctor of Philosophy in Business Administration (PhD-BA), and Doctor of Philosophy in Organizational Leadership (PhD-OL) programs in the School of Business and Economics are accredited by the Accreditation Council for Business Schools and Programs (ACBSP)
- The University offers the first primarily distance-based Master of Arts in Marriage and Family Therapy (MAMFT) program accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE)
- The University offers the first primarily distance-based Doctor of Philosophy in Marriage and Family Therapy (PhDMFT) program accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE)
- The PhDMFT and MAMFT programs are accredited by the International Family Therapy Association (IFTA) accrediting body, International Accreditation Commission for Systemic Therapy Education (IACSTE)
- The Society for Human Resource Management (SHRM) has recognized the University's Human Resources Management specialization for the MBA program as fully aligned with SHRM standards
- The University's Master of Social Work (MSW) program is fully accredited by the Council on Social Work Education (CSWE)
- The baccalaureate degree programs in nursing, master's degree programs in nursing, Doctor of Nursing Practice program, and post-graduate APRN certificate programs at National University are accredited by the Commission on Collegiate Nursing Education (<http://www.cceneaccreditation.org>).
- The JFK School of Law at National University is accredited by The Committee of Bar Examiners of the State Bar of California.
 - Study at, or graduation from, this law school may not qualify a student to take the bar examination or be admitted to practice law in jurisdictions other than California. A student who intends to seek admission to practice law outside of California should contact the admitting authority in that jurisdiction for information regarding its education and admission requirements. For more information go see: <https://law.nu.edu/accreditation>
- The Association for Advancing Quality in Educator Preparation (AAQEP) has fully accredited 10 specializations under the Master of Education (MEd), the Master of Education in Educational Leadership (MEEDL), 11 specializations under the Educational Specialist (EdS), the Education Specialist in Educational Leadership (EdS-EDL), 11 specializations under the Education Doctorate (EdD), the Education Doctorate in Educational Leadership (EdD-EDL),

11 specializations under the Doctor of Philosophy in Education (PhD-ED), and the Doctor of Philosophy in Educational Leadership (PhD-EDL)

- Accredited MEd Specializations: Curriculum and Teaching, E-Learning, Early Childhood Education, English Language Learning, Instructional Leadership, Organizational Leadership, Reading Education, School Safety/Security, Special Education, Trauma-Informed Educational Practices
- Accredited EdS, EdD and PhD Specializations: Curriculum and Teaching, E-Learning, Early Childhood Education, English Language Learning, Instructional Leadership, Organizational Leadership, Reading Education, School Safety/Security, Social Emotional Learning, Special Education, Trauma-Informed Educational Practices

Institutional Learning Outcomes

Institutional Learning Outcomes					
Students graduating from National University will be able to:					
Oral Communication	Written Communication	Quantitative Reasoning	Critical Thinking	Informational Literacy	Research Skills
Bachelor's <i>Articulate</i> scholarly beliefs, opinions, and concepts across a wide range of contexts	Bachelor's <i>Provide</i> written scholarly beliefs, opinions, and concepts across a wide range of contexts	Bachelor's <i>Provide</i> interpretation, representation, calculation, application, and analysis of data and information in authentic contexts	Bachelor's <i>Analyze</i> own and others' assumptions and arguments	Bachelor's <i>Use</i> resources needed in order to support a decision or address a problem	Bachelor's <i>Demonstrate</i> research skills necessary to complete the culminating experience for the degree.
Master's <i>Verbally provide</i> scholarly beliefs, opinions, and concepts across a wide range of contexts	Master's <i>Relate</i> written scholarly beliefs, opinions, and concepts across a wide range of contexts	Master's <i>Analyze</i> interpretation, representation, calculation, and analysis of data and information in authentic contexts	Master's <i>Evaluate</i> own and others' assumptions and arguments	Master's <i>Determine</i> resources needed in order to support a decision or address a problem	Master's <i>Determine</i> research skills necessary to complete the culminating experience for degree
Doctoral <i>Verbally relate</i> scholarly beliefs, opinions, and concepts across a wide range of contexts	Doctoral <i>Interpret</i> written scholarly beliefs, opinions, and concepts across a wide range of contexts	Doctoral <i>Assess</i> interpretation, representation, calculation, application, and analysis of data and information in authentic contexts	Doctoral <i>Synthesize</i> own and others' assumptions and arguments	Doctoral <i>Integrate</i> resources needed in order to support a decision or address a problem	Doctoral <i>Integrate</i> requisite research skills necessary to complete the culminating experience for degree

University Breaks and Holiday Closures

The University offices are closed on the following dates and students are notified through the University's messaging system of such closures:

Break/Holiday	Upcoming Closure Dates
New Years Day	Monday, January 1, 2024
Martin Luther King Jr. Day	Monday, January 15, 2024
Presidents Day	Monday, February 19, 2024
Memorial Day	Monday, May 27, 2024
Juneteenth	Wednesday, June 19, 2024
Independence Day	Thursday, July 4, 2024
Labor Day	Monday, September 2, 2024
Veteran's Day	Observed Monday, November 11, 2024
Thanksgiving	Thursday & Friday, November 28 & 29, 2024
Winter Break	Wednesday, December 25, 2024, through Tuesday, December 31, 2024

Commencement Calendar

The current commencement calendar and general information about the University's commencement process and ceremony schedule can be found at <https://www.nu.edu/national-university-2024-commencement/>.

Student Support Services

Enrollment Services

Enrollment Services is comprised of the following teams:

Admissions - This area makes the initial contact with interested parties and prospective students to explain University programs and systems of delivery. Admissions Advisors assist prospects through the application process. Please contact admissions@nu.edu or 866-776-0331 for information.

Enrollment - This department provides final admissions support, collects required admissions documents prior to a student being accepted into the University, and has a primary goal of transitioning applicants into enrolled students. The Re-Entry Team is specifically geared towards re-enrollment of past graduates and non-completers of the University. Please contact 1-888-628-6911.

New Student Advisor - The New Student Advisors supports student from the time that they enroll and through their first week of class ensuring that student have everything that they need to be successful such as orientation or and walk to class. The New Student Advising team ensures that students are prepared for class and help them become acclimated to being a student.

Office of the Registrar

The Office of the Registrar is the official record-keeper of the University and is responsible for maintaining the accuracy and integrity of all academic records of current and former students. The Office provides for a variety of services to current and former students and external and internal constituencies. Responsibilities, assignments, and services include but are not limited to, reviewing, evaluating, and determining basis for admission; transfer credit evaluation and application; record maintenance; transcript processing; university withdrawal and dismissal; enrollment reporting; student record verifications; grade change processing; degree conferral, diploma processing, and guiding students through the publishing process of dissertations; policy management and catalog publication; and FERPA compliance. The official custodian of records at the university is the University Registrar. Additionally, the Office of the Registrar leadership serves as a member of various University Committees

University Transcripts

Official Transcripts

An official transcript is a copy of the student's permanent academic record and is issued by the University Registrar. The transcript will include all courses completed and grades received while attending the University. Official transcripts can be ordered at any time, however, degree information will not be provided until the degree has been conferred. The transcript will be signed and dated by the registrar, and display the University seal.

Official transcripts can be ordered by visiting the University's transcript ordering portal. The cost of a paper transcript is \$5.00 and the cost for an electronic transcript is \$7.00 for each transcript. If a student needs an official transcript expedited, there will be an additional cost to the student.

Official transcripts are printed on blue security paper and contain the University name, address, and telephone contact information, the school logo, and are signed by the University Registrar or designee. All official electronic transcripts are processed through a secure third-party transcript servicer.

NOTE: In the event of a school closure, the University will work with the Bureau for Private Post-Secondary Education (BPPE) of California to ensure that a custodian of records is established at the time of the school closure. The designated custodian of records will be responsible for permanently preserving and managing the University's student transcript records.

Unofficial Transcripts

An unofficial transcript is an uncertified copy of a student's academic record and includes all courses completed and grades received while attending the University. The unofficial transcript record is available free of charge to all students and alumni in good standing with the University by requesting it from the student or alumni web page.

The unofficial transcript is a document that is unsigned and carries no school logo. The unofficial transcript will contain the University name, address, and telephone contact information, and will be marked as an unofficial transcript issued to the student. A transcript legend page approved by the University Registrar is available as an optional printed page. All information fields are password protected and non-changeable. The University takes all necessary security measures to protect and secure the address, transcript status, course grades, and legend information.

Active students can download a copy of their unofficial transcripts from the *NCUOne* portal. Inactive students or alumni can request an unofficial transcript from the [Office of the Registrar – Form Center](#). A paper copy of the unofficial transcript is not available to be mailed to students or alumni.

Transcripts for Closed Schools

The University is the custodian of records for the schools and programs listed below. If you attended one of these schools and would like to request an official transcript, click on the school name to be redirected to the transcript ordering portal for that institution:

- [Patten University](#) (1978 - 2020)
- [Oakland Bible Institute](#) (1944 - 1978)
- [New College of California](#) (Law Programs)
- [John F. Kennedy University](#) (Law and Flexcourse Programs)

Academic and Finance Advising

Academic and Finance Advisors, working in school-related teams, provide students with academic and financial support for their individual degree programs, and through frequent and scheduled contact with individual students, help support students as they matriculate through their program. Academic and Finance Advisors assist students with understanding policy and procedure that affect students' academic experience as well as providing support with regards to the students' financial account. Information about contacting Academic and Finance Advisors is found on each Course Registration Information (CRI) issued upon registering a student in a course at the University. The contact information for Academic and Finance Advisors is listed on the right-hand side on *NCUOne*.

Disability/ADA Services

In compliance with the Americans with Disabilities Act, the University assists qualified students with the opportunity to gain equal access to information and course contact through a process called academic accommodation. With the assistance of an academic accommodation (usually a time extension), a student who is otherwise qualified should be as successful as a student without a disability. For additional information, see the [Student Rights & Responsibilities](#) section.

Center for Teaching and Learning (CTL)

The Center for Teaching and Learning (CTL) at the University is dedicated to ensuring every student's academic success and providing faculty the necessary tools and resources to excel in teaching. The ultimate goal of the CTL is the creation of a culture of engagement.

Access the Center for Teaching and Learning from the *NCUOne* homepage. Students can find resources and support within the center to aid in ensuring academic success. Also, faculty can find tools and resources to assist in the teaching process.

Academic Success Center (ASC)

The National University Academic Success Center (ASC) provides innovative services and resources that set the example for providing world-class support to online students and faculty. The ASC team is devoted to providing an inclusive and trustworthy environment where students are empowered to develop the skills needed to be successful in their course of study. Live real-time support is available via chat and text message. You may email or submit questions to the Ask a Coach service 24 hours a day, 7 days a week. For more information, visit the [Academic Success Center website](#).

Writing Support – Available seven (7) days a week

Writing Coaches provide support for all stages of the writing process (APA, paragraph development, synthesis, legal writing, and research writing) through interactive live individual and small group sessions and asynchronous recorded coaching sessions.

Statistics and Math Support – Available seven (7) days a week

Statistics and Math Coaches are available to help students at all proficiency levels build confidence as they develop quantitative reasoning skills (statistics, algebra, math, and quantitative analysis) through interactive live individual and small group sessions and asynchronous recorded coaching sessions.

Proofreading Service

This paid service aims to provide students with a trustworthy editing resource to support diverse writing needs with a focus on APA, formatting, and grammar. Students can select from a menu of 30-minute, 1, 2, and 3-hour sessions. Students who have a completed dissertation can schedule a complimentary 3-hour proofreading session.

Contact Information:

[ASC Chat](#) – Chat with a coach live.

Text: 928-440-1325

Email: asc@nu.edu

The Commons

The Commons is the internal virtual space for the University community – students, faculty, and team members – to meet, contribute, and share ideas and support outside of the program courses. The Commons gives you the opportunity to be directly connected to your University communities through *NCUOne*.

As an online university with the 1:1 teaching model it hasn't been easy for our students and faculty to meet. The Commons was created to provide students, faculty, and team members with an opportunity to connect and engage, virtually.

The Commons allows you to:

- Follow various communities
- Virtually meet your faculty and students
- Share experiences and support
- Read what others are doing and thinking
- Receive school announcements
- Follow conversations about issues in your field

- Start a conversation on a topic of interest
- Receive email alerts when new activity occurs in the communities you belong in

University Library

The University Library provides high-quality resources to support both the university curriculum and lifelong learning. The collection includes thousands of peer-reviewed journals, as well as newspapers, magazines, videos, e-books, dissertations, and more. The free Interlibrary Loan service allows users to request and electronically receive articles, book chapters, reports, or other resources when not available in full-text. University alumni have continued access to a growing collection of journals and databases following graduation.

Library staff members are available to help students, faculty, and staff with using the Library and its resources. Live real-time support is available via chat, phone, and text message. You may also send an email or submit questions to the Ask a Librarian service 24 hours a day, 7 days a week and you will receive a timely and comprehensive response during the posted business hours. Finally, you may schedule one-on-one appointments with a reference librarian to discuss search strategies for your research assignment, thesis, or dissertation.

Self-help resources are available anytime on the [Learn the Library Guide](#). These include library guides, recorded workshops, tutorial videos, and Frequently Asked Questions. Quick Start Videos, including the Library Website Quick Tutorial and Search Like an Expert, are a great starting point for learning how to use the library resources. Additionally, Library staff members present live workshops focused on navigating the Library website, searching in the databases, using reference management tools, and conducting scholarly research. All live workshops are published on the Library Events calendar. Join a live session to ask questions and engage with library staff members and fellow peers.

Library access is provided from the *NCUOne* home page. Simply click the Library link at the top of the screen. Or, you may visit <http://library.nu.edu/>.

Alumni Services and Benefits

Students who were awarded a degree from the University are considered graduates or University alumni. The University alumni have continued access to a number of journals and databases in the University Library. Other alumni benefits include:

- Alumni Communities including Social Media Alumni Groups, Alumni Association App and the Commons
- Alumni Events including volunteer opportunities in your community
- Alumni Features, Highlights & Blog Opportunities
- Friends and Family Preferred Tuition Rate
- Student and Alumni Store

Many more benefits are in the works and coming in the near future related to help publishing and collaborating on research. Further details about the University Alumni program can be found at <https://www.alumni.nu.edu/>. Please email alumni@ncu.edu for any further questions or ideas. The University does not offer job placement assistance and cannot guarantee job placement upon program/course completion or upon graduation.

Admissions Requirements

Notice of Nondiscrimination

The University does not permit discrimination or harassment on the basis of race, ancestry, national origin, religious creed, age, sex, gender, gender identity, gender expression, sexual orientation, color, physical or mental disability, marital status, military or veteran status, or medical condition, under any program or activity under its control. In a continuing effort to enrich its academic environment and provide equal educational and employment opportunities, the University actively encourages applications from members of all groups that are under-represented in higher education.

General Admissions Requirements

The University offers programs for bachelor's degree completion, master's, and doctoral degrees in specializations designed to meet the needs of adult students and professionals. Meeting the admission requirements is an indicator that the student is qualified to enter and pursue the degree program chosen. The University emphasizes that a student's success depends upon applying oneself to the degree program studies.

State regulatory information is available at <https://www.nu.edu/state-authorization/>.

Online Requirements

National University offers many programs in an online format. In an online course, students will be able to view the syllabus, complete assignments and assessments, engage with varying course materials (videos, interactive presentations, assigned reading), participate in threaded discussions, interact with peers and the instructors, as well as review instructor feedback. Students should log in on the first day of class and anticipate checking their online course multiple times per week. Students are provided access to online courses beginning on the Sunday before the term begins through three weeks after the term ends. Students should ensure they have a reliable internet connection and a reliable computer to access their course.

As of August 2021, the following are the minimum system requirements that are needed to successfully access your courses on the Brightspace (D2L) platform.

Technical Requirements

Windows Users

- Recommended OS: Windows 8, 10
- Supported OS: Windows 7
- Secure High-Speed Internet connection (e.g.: DSL, Cable, etc.)
- Soundcard & Speakers
- Screen Resolution: 1280 X 1024 or better
- Recommended Browsers: Firefox, Chrome
- Supported Browsers: Chrome 90+, Edge 90+, Firefox 88++
- Headset with microphone using USB/wired connection

Mac Users

- Recommended OS: OS X 10.14

- Supported OS: OS X 10.12+
- Secure High-Speed Internet connection (e.g.: DSL, Cable, etc.)
- Soundcard & Speakers
- Screen Resolution: 1280 X 1024 or better
- Recommended Browsers: Firefox 88+, Safari 14+
- Headset with microphone using a USB/wired connection

Mobile Users

- Recommended OS: Android 9+, IOS 14+, Chrome OS 90+
- Supported OS: Android 5+, IOS 11+
- Recommended Browsers: Chrome, Safari
- Secure High-Speed Cell Service, Mobile Hotspot or Wi-Fi Connection
- Headset with microphone

Brightspace Pulse:

- Android™ 6.0 (2015 release) or later on tablets or phones
- iOS® 13.0 or later on iPhone®, iPad®, and iPod® touch

Latest Supported Browsers:

- Chrome 112+ (released March 2023)
- macOS Safari 16+ (released September 2022)
- Android Chrome 107+ (released October 2022)
- iOS Safari 16+ (released September 2022)
- Firefox 112+ (released April 2023)

Unsupported Technologies:

As of December 31, 2020, Adobe no longer supports Flash Player and has blocked Flash content from running in Flash Player on January 12, 2021. For more information, refer to Adobe Flash Player End of Life.

Notes:

Satellite & Cellular Internet Connections: If this is the only connection you have access to, please note that you may experience sporadic issues while working in your online courses. If you report these problems to the IT Helpdesk, we will attempt to address them with your Satellite or Cellular connection provider.

Wireless Routers/Connections: While working in your online courses via a wireless router or wireless connection you may experience problems such as various error messages. If you contact the IT Helpdesk, please be aware that part of the troubleshooting process may be to have you bypass your wireless router or connection. If bypassing the wireless router resolves the problem you are experiencing, you will either need to continue to bypass the router or contact the router's manufacturer's support to further diagnose the source of this problem.

Notes:

Web browsers listed have been validated with the online course platform. A student risks running into problems with the course software if they choose to use a non-supported browser.

National University maintains a Technical Requirements web page that is updated frequently with Windows and Macintosh hardware and software requirements, including both recommended and supported web browser software. For further information, please check <http://kb.nu.edu/app/answers/detail/aid/120>

Application Requirements

A completed application (available online at <https://apply.ncu.edu>) must be accompanied by:

- All official transcripts sent from the previous degree-awarding institution
- Credentials evaluation through an official agency for applicants with international credentials from an academic institution outside of the United States (see the Credential Evaluation policy)

Additionally, a Social Security Number (SSN) is required to be recorded on a student's education record if the student has or will receive U.S. Federal Title IV funding, U.S. Federal Veterans Affairs funding, and/or U.S. educational tax credit/T-1098. Students who have not or will not be receiving these types of funding will need to complete the Social Security Number Override Verification Form if the student prefers to have the Social Security Number omitted from the student's education record. Should the University be made aware that U.S. Federal Title IV funding, U.S. Federal Veterans Affairs funding, and/or U.S. educational tax credit/T-1098 has or will be disbursed to a student, the student's SSN will be added to the student's education record by the Office of the Registrar. If this occurs, the student will be notified by the Office of the Registrar that the SSN Override has been administratively rescinded.

Note: Applications are good for 365 days from the date of completion for the original program of interest. New applications are required if there is a change in the program of interest.

Admissions & Evaluation Procedures

Applications may be submitted using the online application form at <https://apply.ncu.edu> or by contacting Enrollment Services at 866-776-0331 for assistance. Additional documents may be submitted by mail, fax, or email. Fields are available on the online application form to securely store credit card information and social security information, which should never be transmitted by email.

Applicants must request official transcripts be sent directly to the University from prior colleges and universities during the application process. Acceptance may be granted based on unofficial transcripts. However, all official, sealed transcripts must be received from U.S. institutions within 90 days of the start of the first course, and from foreign institutions within 180 days of the start of the first course.

Applicants using academic documents issued by non-U.S. academic institutions for admissions consideration may be required to have these official documents sent directly from the academic institution to the credential-evaluating agency. Please refer to the section entitled Credential Evaluation for current information regarding accepted Credential Evaluation agencies and procedures involved.

Incomplete applications and those without official transcripts or credentials evaluations for applicants with international credentials will not be evaluated. Certain programs may require additional information or documents. Applications missing all required documents will be considered incomplete and will not be evaluated.

Acceptance Requirements

As of 3/1/2023 the Acceptance Policy has been updated. Student enrolling prior to March 1st, can contact the Registrar for the previous policy.

Program acceptance requirements vary by degree-level, School, and program of study. Minimum requirements for acceptance are outlined below. Please refer to School and program sections for additional, program-specific admissions, evaluation, and application requirements or procedures.

Undergraduate Programs

Applicants for admission to an undergraduate program must meet the following requirements:

- Must have graduated from a regionally or nationally accredited high school, passed a high school level proficiency test, or have documented home school completion (please see [Basis for Admissions policy](#) for more information about home school documentation).
- Students who have completed a program but the conferral date has not yet occurred must provide a Letter of Completion. Degree conferral dates must be within six months from the date of application to NU.

Please review program page for program-specific admissions requirements.

Post-Baccalaureate Certificates

Applicants for admission to an post-baccalaureate program must meet the following requirements:

- Admission to a Post-Bachelor's Certificate program requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution.
- Students who have completed a program but the conferral date has not yet occurred must provide a Letter of Completion. Degree conferral dates must be within six months from the date of application to NU.

Please review program page for program-specific admissions requirements.

Graduate Applicants

Applicants for admission to a graduate program, must meet the following requirement.

- Hold a bachelor's degree or higher from an institutional accreditor approved by the US Department of Education.
- Students who have completed a program but the conferral date has not yet occurred must provide a Letter of Completion. Degree conferral dates must be within six months from the date of application to NU.

Please review program page for program-specific admissions requirements.

Post-Master's Certificates Applicants

Applicants for admission to a post-master's program, must meet the following requirement.

- Hold a master's degree or higher from an institutional accreditor approved by the US Department of Education.
- Students who have completed a program but the conferral date has not yet occurred must provide a Letter of Completion. Degree conferral dates must be within six months from the date of application to NU.

Please review program page for program-specific admissions requirements.

Doctoral Programs Applicants

Applicants for admission to a graduate or post-baccalaureate program, other than the Doctor of Nursing Practice and Juris Doctor, must meet the following requirement.

- Hold a master's degree or higher from an institutional accreditor approved by the US Department of Education.
- Students who have completed a program but the conferral date has not yet occurred must provide a Letter of Completion. Degree conferral dates must be within six months from the date of application to NU.

Please review program page for program-specific admissions requirements.

Basis for Admissions

As of 3/1/2023 the Basis for Admissions Policy has been updated. Student enrolling prior to March 1st, can contact the Registrar for the previous policy.

NU accepts students on a continual basis. Application for admission can be submitted online any time during the calendar year via www.nu.edu. The Office of the Registrar reviews each applicant file to ensure that the prospective students meet the institutional and program-specific basis for admission requirements. Please refer to School and program sections of this catalog for program-specific admissions requirements and procedures.

Basis for Admissions

Undergraduate Basis for Admissions

All prospective students must provide the following documentation to meet basis for admission to the University:

- Official transcripts from a regionally or nationally accredited high school, high school level proficiency test, or have documented home school completion.

-OR-

- Official Associate of Arts or Associate of Science degree from a regionally or nationally accredited institution posted transcript that can be degree-verified through the National Student Clearinghouse (NSC). Except where prohibited by accreditation.

Note: Students that intend to use VA funding must submit Official transcripts from all regionally or nationally accredited institutions attended.

Unofficial and official transcripts submitted for basis of admissions to NU must include the following information at a minimum:

- Student's full name
- Name of school
- Course and/or term dates
- Earned and attempted credit totals
- Grade point average (GPA)
- Name of degree
- Degree conferral date (if applicable)
- All pages of the transcript

Students who completed Home School instruction must also include:

- List and description of courses completed by grade level
- Grades earned for the courses completed
- Number of credits earned for each course
- Names of textbooks utilized in courses
- Signed by person who administered curriculum
- A letter from their state Department of Education or local school district confirming home school registration.

To be considered official, transcripts must be submitted to the Office of the Registrar in a sealed envelope from the institution via mail or electronically through a third-party transcript processor (e.g., , Parchment, National Student Clearinghouse,).

Note: Degree audit reports and grade reports are not considered unofficial transcripts. All prospective students who wish to receive transfer credit from coursework completed outside the United States must provide official transcripts and official evaluations from an approved agency as needed for official evaluation. Once a student is considered officially admitted, they may receive financial aid.

Note: Students who provide an attestation of conferral for a degree conferral date that has not yet occurred are not permitted to attend courses until official documentation is received. Degree conferral dates must be within six months from the date of application to NU.

Graduate Basis for Admissions

All prospective students must provide the following documentation to meet basis for admission to the University:

- An unofficial degree posted transcript that can be degree-verified through the National Student Clearinghouse (NSC). Except where prohibited by accreditation.

-IF-

- An unofficial transcript is unable to be verified through NSC, an official degree posted transcript is required.

-OR-

- A signed attestation of conferral and an unofficial transcript that can be degree-verified through the National Student Clearinghouse (NSC)

Note: Some programs at National University require degrees conferred from regionally accredited institutions. Please refer to program pages for program specific basis for admissions requirements.

Note: Students that intend to use VA funding must submit Official transcripts from all regionally or nationally accredited institutions attended.

Unofficial and official transcripts submitted for basis of admissions to NU must include the following information at a minimum:

- Student's full name
- Name of school
- Course and/or term dates
- Earned and attempted credit totals
- Grade point average (GPA)
- Name of degree
- Degree conferral date (if applicable)
- All pages of the transcript

To be considered official, transcripts must be submitted to the Office of the Registrar in a sealed envelope from the institution via mail or electronically through a third-party transcript processor (e.g., Parchment, National Student Clearinghouse,

Note: Degree audit reports and grade reports are not considered unofficial transcripts. All prospective students who wish to receive transfer credit from coursework completed outside the United States must provide official transcripts and official evaluations from an approved agency as needed for official evaluation. Once a student is considered officially admitted, they may receive financial aid.

Note: Students who provide an attestation of conferral for a degree conferral date that has not yet occurred are not permitted to attend courses until official documentation is received. Degree conferral dates must be within six months from the date of application to NU.

Provisional Basis for Admission

Undergraduate Provisional Basis for Admissions

Provisional basis for admission may be granted to prospective students that provide an unofficial copy of their transcript that is unable to be verified through NSC. A student that is admitted on a provisional basis is only granted basis for admissions status

once all required documentation that meets the program and accreditation requirements has been received by NU. Students who are provisionally admitted to a program are not eligible to receive financial aid until documentation has been provided and basis for admissions has been met.

Undergraduate students may take courses during provisional acceptance while the Office of the Registrar awaits receipt of official transcripts from regionally and nationally accredited institutions.

Provisional Basis for Admission Deadlines

Students who are granted provisional basis for admission must provide required documentation for Basis for Admission within 60 days of their first date of attendance in an NU course (or date of admission). Please see program description for program specific requirements.

The University will administratively dismiss students who do not provide the required official documentation prior to the 61st day of enrollment unless they are currently in a course. Students who are actively attending a course will be administratively dismissed after the course ends.

Students who have been administratively dismissed for failure to provide official documentation within the allotted time frame will not be allowed to return to the University until all official documentation has been provided.

Graduate Provisional Basis for Admissions

Provisional basis for admission may be granted to prospective students that provide an unofficial copy of their transcript that is unable to be verified through NSC. A student that is admitted on a provisional basis is only granted basis for admissions status once all required documentation that meets the program and accreditation requirements has been received by NU. Students who are provisionally admitted to a program are not eligible to receive financial aid until documentation has been provided and basis for admissions has been met.

Graduate students may take courses during provisional acceptance while the Office of the Registrar awaits receipt of official transcripts from regionally and nationally accredited institutions.

Provisional Basis for Admission Deadlines

Students who are granted provisional basis for admission must provide required documentation for Basis for Admission within 60 days of their first date of attendance in an NU course (or date of admission). Please see program description for program specific requirements.

The University will administratively dismiss students who do not provide the required official documentation prior to the 61st day of enrollment unless they are currently in a course. Students who are actively attending a course will be administratively dismissed after the course ends.

Students who have been administratively dismissed for failure to provide official documentation within the allotted time frame will not be allowed to return to the University until all official documentation has been provided.

International Basis for Admission Requirements

All prospective students with internationally awarded degrees must provide the following documentation to meet basis for admission to the University:

- English proficiency (See the [How to Demonstrate English Proficiency](#) for more information)
- An official credential evaluation that meets the following requirements:

- Evaluation completed by an approved credential evaluation agency
- Submitted to NU in a sealed envelope from the agency or via secure email delivery to transcripts@nu.edu
- Degree level
- Program of study or major and U.S. equivalency statement
- Degree conferral date
- With information that matches that of the prospective student (e.g., birthdate, name, passport, etc.)

Note: Name change documentation is required if a prospective student's name differs from the name that is listed on official documentation from approved credential evaluation agency.

International Provisional Basis for Admission

The University will provisionally accept internationally awarded degrees as the basis for admission provided an unofficial Course-by-course evaluation report from an NU-approved credential evaluation agency is provided. NU will accept credential evaluations from evaluation agencies accredited by the National Association of Credential Evaluation Services (NACES), or agencies approved by the California Commission on Teacher Credentialing (CCTC) at the time of enrollment. During the enrollment process, NU will work with an applicant to determine which approved evaluation agency may be recommended for their personal situation.

All official transcript evaluations completed by approved credential evaluation agencies are due 60 days after the start of the student's first course.

- An official course-by-course evaluation report is defined as:
 - Being received in a sealed envelope from the agency or via secure email delivery to records@nu.edu
 - Includes institution name, completed courses, grades, dates of attendance, GPA, and a US equivalency.
 - With a conferred date
 - With information that matches that of the Applicant

Undergraduate Credit from Foreign Institutions

The University may accept transfer or waive credit if an official course-by-course evaluation report from an approved evaluation agency is supplied. NU will accept course-by-course evaluation reports from evaluation agencies accredited by the National Association of Credential Evaluation Services (NACES) or agencies approved by the California Commission on Teacher Credentialing (CCTC) at the time of enrollment.

Graduate Credit from Foreign Institutions

The University may accept transfer or waive credit if an official course-by-course evaluation report from an approved evaluation agency is supplied. NU will accept course-by-course evaluation reports from evaluation agencies accredited by the National Association of Credential Evaluation Services (NACES) or agencies approved by the California Commission on Teacher Credentialing (CCTC) at the time of enrollment.

English Proficiency

English is the language of instruction at the University, and University students work with English-speaking faculty. The programs rely heavily on writing; therefore, students must be able to communicate effectively in written English. Applicants who do not hold a conferred degree from a secondary or post-secondary school where English was the primary language of instruction are required to demonstrate English proficiency. The University catalog describes current testing procedures and current requirements for writing competency. The University does not provide language services.

How to Demonstrate English Proficiency

Official Test Scores

- Testing of English as a Foreign Language (TOEFL) – The University accepts internet-based (iBT) and paper-based (pBT) TOEFL test results and requires a minimum score of 79 for iBT and 550 for pBT
 - Go to www.ets.org/toefl for complete information
 - Test results must be sent directly to the University registrar's office
 - When test results are ordered or applicant takes a test for the first time, the University School Code of 4572 must be noted
- International English Language Testing System – ACADEMIC VERSION ONLY (IELTS) - The University requires a score of 6.5 on the academic version of IELTS
 - Go to www.ielts.org for complete information
 - Test results must be sent directly to the University registrar from IELTS
- Pearson Test of English (PTE) – The University requires a score of 53
 - Go to www.pearsonpte.com for complete information
 - Test results must be sent directly to the University registrar's office from PTE

If the applicant has already taken the TOEFL, IELTS, or PTE test results cannot be more than two (2) years old. The applicant contacts the appropriate testing agency and has the results sent to the University Enrollment Team from the testing agency. Test scores must be submitted prior to acceptance and enrollment being granted.

Proficiency Score Thresholds for Tests Accepted by the University			
TOEFL iBT	TOEFL pBT	IELTS	Pearson PTE
79	550	6.5	53

Exemption

If within two years prior to applying for admission to the University, potential students have completed a minimum of 15 academic semester credit hours with a cumulative GPA of 3.0 or better from a secondary or postsecondary institution where English was the primary language of instruction, they will not be required to demonstrate English proficiency through an official exam.

Exception

The Dean's Office may consider applicants who can demonstrate exceptional levels of proficiency via documentation regarding employment history or prior academic work for an exception to the University's English proficiency requirements.

Address for Submission of Transcripts

Transcripts should be sent to the Office of the Registrar for processing at:

Office of the Registrar
National University
9388 Lightwave Ave
San Diego, CA 92123

Transcripts sent electronically can be emailed to transcript@ncu.edu

Acceptance to the University

Upon receipt of the application for admission materials, the Office of the Registrar will evaluate the application file and supporting documentation. The academic evaluation includes a review of the applicant's educational intent, program of interest, prior college work, professional experiences, and University requirements.

Applicants will be notified of their admission status and the requirements for the degree program upon completion of the academic evaluation.

Letter of Acceptance

The Enrollment Specialist generates a Letter of Acceptance and Enrollment Agreement to the potential student and a link is included in the notification of acceptance. The letter contains, at a minimum, the following information:

- The program to which the applicant is being accepted
- The terms of acceptance (financial responsibility, etc.)

Policy

Applicants have up to 90 days from the date of application to accept their enrollment and register for a course. The course must begin within 150 days of the application date.

Upon acknowledgement of the degree plan and receipt of the initial payment, the student is enrolled in the University. Tuition payment options are specified in the Catalog (see [Financial Policies](#)) and on the course request.

All payment arrangements for the first course(s) must be made before the first course(s) will be issued. Those students wanting to use student financial aid must complete all required eligibility paperwork and make the required payment arrangements before the first course(s) will be issued. Students with provisional basis for admissions must meet official basis for admissions requirements to be eligible for financial aid.

Students who do not become vested in a course with a start date that occurs within 150 days of their application date are considered "no starts".

Transfer Credit

As of 3/1/2023 the Transfer Credit Policy has been updated. Student enrolling prior to March 1st, can contact the Registrar for the previous policy.

Transfer Credit Eligibility

National University accepts credits from regionally and nationally accredited institutions. It may also accept credits from institutions that are accredited by an agency which is a member of Council for Higher Education Accreditation (CHEA) or from collegiate institutions which are accredited by non-CHEA member agencies provided they are recognized by the Department of Education. Transfer credits from institutions that are accredited by an agency which is a member of CHEA are only accepted provided that the academic quality of the institutions can be verified and the credits otherwise comply with National University guidelines. Transfer credits from agencies which are not CHEA members are subject to additional scrutiny to validate that their academic programs adhere to the standards of institutions accredited by CHEA members.

Requests for course transfer credit must be made along with the admissions application so that an appropriate degree plan can be developed and accepted by the student. Requests by the student for consideration of additional transfer credit can be made at any time prior to degree conferral provided the maximum number of transfer credits permissible has not already been accepted by the University.

The Office of the Registrar, School Dean, or designee must approve all requests for transfer credit. Transfer courses are evaluated for currency and relevancy to NU degree programs, and whether they meet academic standards. The Admissions and Evaluation team will document which courses are accepted in transfer and which University requirements the course satisfies.

Any credit hours to be considered for transfer into a National University academic program must:

- Have been completed at a regionally or nationally accredited academic institution, an institution accredited by an agency which is a member of CHEA, or from a collegiate institution accredited by a non-CHEA member agency provided it is recognized by the Department of Education;
- Be equivalent to the degree program requirements, including specified electives;
- Appear on an official transcript from the institution where they were earned;
- Meet required minimum grade requirements for transfer credit eligibility outlined by degree or program-level (remedial college credits are not accepted as transfer credit);
- Have been completed within the specified number of years for transfer credit eligibility outlined by degree or program-level.

Note: If a student submits a transcript for basis for admission and the transcript has pending coursework or grades not posted to courses, those courses will not be evaluated for transfer credit until an official transcript is submitted with final grades for those courses. NU is not responsible for duplication of transferable courses that the student may have taken and received credit from a prior institution.

Undergraduate

Undergraduate Transfer Credit Policy

The School Dean or designee uses the following criteria to evaluate proposed transfer credits at the undergraduate level:

- Completed at regionally or nationally accredited post-secondary institution
- Do not exceed a maximum of 90 lower and upper division semester credits or 135 lower and upper division quarter credits unless programmatic accreditation requires otherwise.
- Earned with a grade of "C-" or better unless otherwise indicated by program or accreditation.

The following chart shows the maximum number of credits that are allowed to transfer in an NU undergraduate program by type of credit.

Type of Credits	Maximum number of credits allowed in an NU Undergraduate program
Lower Division (towards an Associate Degree)	58.5 quarter credits (39 semester credits)
Lower Division (towards a Bachelor's Degree)	103.5 quarter credits (69 semester credits)
Upper Division	40.5 quarter credits (27 semester credits)
Extension division from a regionally accredited institution	36 quarter credits (24 semester credits)
Vocational/Technical Courses	18 quarter credits (12 semester credits)

Physical Education Courses	9 quarter credits (6 semester credits)
----------------------------	--

Undergraduate Credit from Foreign Institutions

The University may accept transfer or waive credit if an official course-by-course evaluation from an approved credential evaluation agency is supplied. NU will accept credential evaluations through any evaluation agency accredited by the National Association of Credential Evaluation Services (NACES). In addition, credential evaluations by the American Association of Collegiate Registrars and Admissions Officers (AACRAO) are also accepted.

Prior Learning Credit

National University recognizes knowledge is acquired in many different ways. In addition to the traditional classroom setting, mastery of college-level knowledge and skills may occur as a result of nontraditional learning experiences such as employment, military training and experience, noncollegiate training programs, advanced high school courses, and self-development. The University awards applicable credits earned for nontraditional prior learning, however, credit is not awarded simply for experience but for measurable college-level learning which includes knowledge, skills and competencies students have obtained as a result of their prior learning experiences. College credit may be granted on a case-by-case basis for prior learning only when it can be documented and falls within regular credit course offerings.

The maximum number of credits acceptable for non-collegiate learning is a cumulative total of up to 135 quarter credits (90 semester credits) for an associate degree or baccalaureate degree unless programmatic accreditation requires otherwise.

This maximum total is cumulative of all non-collegiate coursework. The credits may be from the following sources:

- A maximum of 22.5 quarter credits (15 semester credits) may be earned for:
 - Excelsior College Examinations
 - Council for Adult Experiential Learning (CAEL) Portfolio
 - Departmental examinations at National University (Credit by Examination).
- A maximum of 45 quarter credits (30 semester credits) of lower-division credit may be allowed for clinical courses for a registered nurse who is a graduate of a three-year hospital nursing school. Up to 22.5 quarter credits (15 semester credits) of additional lower-division credit may be granted for academically equivalent coursework.

American Council On Education (ACE) Credit Transfer

- A maximum of 67.5 quarter credits (45 semester credits) may be earned at the lower-division by
- College-Level Examination Program (CLEP) examinations.
- A maximum of 45 quarter credits (30 semester credits) may be earned at the lower-division level
- for Advanced Placement Examinations (AP) or International Baccalaureate Examinations (IB).
- DANTES independent study/credit by examination courses
- Credit recommended in the National Guide to Credit Recommendations for Non-Collegiate
- Courses (American Council on Education [ACE])
- A maximum of up to 135 quarter credits (90 semester credits) may be allowed for military
- experience and military schools that have been evaluated by ACE. An additional 9 quarter credits
- of correspondence credit is available to active or veteran Marine Corps students.
- Local, state, and federal law enforcement training recommended by ACE and such credit as is listed on a transcript from a regionally accredited college

More information on testing sites and preparation for CLEP exams exam or Excelsior College exams can be found at <http://www.nu.edu/testingservices>. Students can also contact the Testing Center at 858.541.7951 or email testingservices@nu.edu.

Prior Learning Credit Categories

The University awards credit for:

A. College Level Examination Program (CLEP) www.collegeboard.com/clep

In accordance with American Council on Education (ACE) guidelines, successful completion of CLEP subject examinations credits can be applied to meet general education, preparation for the major, or general lower division elective credit. In order to receive credit for CLEP examinations, an official CLEP transcript must be received by the Office of the Registrar.

Students who have taken a CLEP general examination prior to 2002 may use the credit toward general education requirements, as it applies, up to a maximum of 27 quarter credits or 18 semester credits. National University does not accept transfer credits for the mathematics general CLEP examination.

B. Advanced Placement (AP) Exams www.collegeboard.com

As recommended by ACE, for AP Exams passed. An official transcript must be received for credit to be awarded. The AP Code for National University is 0470.

C. International Baccalaureate (IB) www.ibo.org

To students who successfully obtain the International Baccalaureate Diploma demonstrating the completion of Higher-Level Examinations. No credit is awarded for IB standard-level passes. An official transcript must be received in order to award credit.

D. Defense Activity for Non-Traditional Education Support (DANTES)/DANTES Subject Standardized Tests (DSST) <http://getcollegecredit.com>

Credit for successful completion of DSST can be applied toward general education, preparation for the major, or general elective credit. Most tests grant 4.5 quarter credits (3 semester credits). DANTES Subject Standardized Tests (DSST) demonstrates college-level learning acquired outside of the college classroom. DSST are available to military personnel through the Base Education Services Officer. The DANTES code for National University is 7858.

E. Excelsior College Examinations

Credit for successful completion of an Excelsior College Examination can be applied toward general education, preparation for the major, or general lower-division elective credit. Most examinations grant 4.5 or 9 quarter credits (3 or 6 semester credits). The Excelsior College Examinations assess college-level competence acquired in non-campus settings in more than 40 arts and sciences, business, education, and nursing subjects.

F. SOPHIA Learning LLC. Courses sophia.org

In accordance with published ACE guidelines, successful completion of SOPHIA courses can be applied. In order to receive credit for SOPHIA courses, an official SOPHIA transcript must be received by the Office of the Registrar. Students should submit a Concurrent Enrollment e-Form four weeks prior to the start of a course to ensure the transferability of any external coursework.

G. StraighterLine Courses Straighterline.com

In accordance with published ACE guidelines, successful completion of StraighterLine courses can be applied. In order to receive credit for StraighterLine courses, an official StraighterLine transcript must be received by the Office of the Registrar. Student should submit a Concurrent Enrollment e-Form four weeks prior to the start of a course to ensure the transferability of any external coursework.

Prior Learning Credit Equivalency Chart

The chart below outlines the minimum score required, amount of credit, and what the credit is allowed for at the University, sorted by the specific prior learning credit category.

Paralegal Transfer Credit Policy

Students may receive credit for up to thirty percent (30%) of their legal specialty courses by transferring in coursework taken at another college or university, if approved by the Program Director or a qualified faculty member. Students transferring from American Bar Association (ABA) approved programs for which there is an existing articulation agreement may receive credit for up to fifty percent (50%) of their legal specialty coursework. Approval can be obtained by:

- An articulation agreement established through National University and the student's prior college or university, or
- Submission of a petition for transfer credit by the student to the Office of the Registrar, which will include:
 - The name of the prior college or university,
 - Whether or not the prior program is ABA approved, and
 - For each course taken in the prior program for which credit is sought:
 - The name of the course,
 - The course description,
 - The course syllabus,
 - Documentation of the number of hours the course was offered in synchronous and/or asynchronous format, if not included in the syllabus, and
 - Certification of the student's final grade in the course (typically via a transcript from the prior institution).

Petitions will be reviewed by the Program Director or a qualified faculty member. Credit will only be granted if the course is equivalent in content, length, and nature to a National University course, the student has earned a grade of C or better, and the course was taken within the last ten (10) years. Additionally, students must still complete at least nine (9) semester credits or the equivalent of legal specialty courses through synchronous instruction and may be further limited in transfer credits to satisfy this requirement.

Post-Baccalaureate Certificate Transfer Credit Policy

The School Dean or designee uses the following criteria to evaluate proposed transfer credits at the graduate-level:

- Completed within five (5) years prior to acceptance at the University, while enrolled at a regionally or nationally accredited institution
- Credits must be earned with a grade of "B" or better or an equivalent satisfactory grade
- A maximum of three (3) semester credits may be transferred from a graduate-level program to the University's Post-Baccalaureate certificate programs
- Must be equivalent to coursework as demonstrated by the transfer course description

Note: The Applied Behavior Analysis (ABA) Post-Baccalaureate Certificate may accept a maximum of 12 semester credit hours in transfer credit toward the certificate program for graduate coursework completed toward graduate degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content to the required course work in the Applied Behavior Analysis (ABA) Post-Baccalaureate Certificate.

Note: Credits earned at the University have the same time limits stated above for migration and application to current programs and degree plans, based on the date the corresponding course grade was posted.

Graduate

Master's Programs

The School Dean or designee uses the following criteria to evaluate proposed transfer credits at the graduate level; exceptions may be made at the Dean's discretion:

- Completed within seven (7) years prior to acceptance at NU unless programmatic accreditation requires otherwise.
- Credits must be earned with a grade of "B" or better or an equivalent satisfactory grade unless otherwise indicated by program or accreditation.
- A maximum of twelve (12) semester credits or eighteen (18) quarter credits may be transferred from a graduate-level program. Many graduate programs have lower transfer limits. Please consult program description for program specific transfer limits.
- No more than nine (9) semester credits or thirteen and a half (13.5) quarter credits can be applied to specialization courses. Many graduate programs have lower transfer limits. Please consult program description for program specific transfer limits.
- Must be equivalent to content in the required NU course as demonstrated by the transfer course description and/or syllabus

Post-Master's Certificate Programs

The School Dean or designee uses the following criteria to evaluate proposed transfer credits at the doctoral-level:

- Completed within seven (7) years prior to acceptance at NU unless programmatic accreditation requires otherwise.
- Credits must be earned with a grade of "B" or better or an equivalent satisfactory grade unless otherwise indicated by program or accreditation.
- A maximum of three (3) semester credits or four and a half (4.5) quarter credits may be transferred from a doctoral-level program. Please consult program description for program specific transfer limits.
- Must be equivalent to content in the required NU course as demonstrated by the transfer course description and/or syllabus

Note: Credits earned at NU have the same time limits stated above for migration and application to current programs and degree plans, based on the date the corresponding course grade was posted.

Juris Doctor Program

For information about the Juris Doctor program's transfer credit limits please see the [Juris Doctor Catalog and Handbook](#).

Education Specialist Programs

The School Dean or designee uses the following criteria to evaluate transfer credits at the Education Specialist level:

- Completed within seven (7) years prior to acceptance at NU unless programmatic accreditation requires otherwise.
- Credits must be earned with a grade of "B" or better or an equivalent satisfactory grade unless otherwise indicated by program or accreditation.
- A maximum of twelve (12) semester credits or eighteen (18) quarter credits may be transferred from an advanced graduate or doctoral-level program. Please consult program description for program specific transfer limits.
- No more than nine (9) semester credits or thirteen and a half (13.5) quarter credits can be applied to specialization courses. Please consult program description for program specific transfer limits.
- Must be equivalent to content in the required NU course as demonstrated by the transfer course description and/or syllabus

Note: Credits earned at NU have the same time limits stated above for migration and application to current programs and degree plans, based on the date the corresponding course grade was posted.

Note: Students who complete NU's EdS program may be eligible to apply up to 30 credits from the EdS program to NU Sanford College of Education Doctoral programs. School Dean (or their designee) approval is required to determine number of applicable credit credits from EdS to the selected doctoral program.

Doctoral Programs

The School Dean or designee uses the following criteria to evaluate transfer credits at the doctoral level; exceptions may be made at the Dean's discretion:

- Completed within seven (7) years prior to acceptance at NU unless programmatic accreditation requires otherwise.
- Credits must be earned with a grade of "B" or better or an equivalent satisfactory grade unless otherwise indicated by program or accreditation.
- A maximum of twelve (12) semester credits or eighteen (18) quarter credits may be transferred from a doctoral-level program. Please consult program description for program specific transfer limits.
- No more than nine (9) semester credits or thirteen and a half (13.5) quarter credits can be applied to specialization courses. Please consult program description for program specific transfer limits.
- Must be equivalent to content in the required NU course as demonstrated by the transfer course description and/or syllabus

Note: Credits earned at NU have the same time limits stated above for migration and application to current programs and degree plans, based on the date the corresponding course grade was posted.

Note: Students enrolled in the Dissertation Completion Pathway (DCP) will be eligible to transfer in all doctoral coursework as long as it aligns to the chosen program of study, culminated in doctoral candidacy, and the student was not dismissed for academic reasons. The DCP leadership will conduct a transcript review to ensure program alignment and students have achieved doctoral candidacy at a previous institution for a degree program and specialization offered at NU to determine transfer of credit applicability.

Note: Students who complete a Master's degree program at NU may be eligible to satisfy a maximum of 6 doctoral credits in their doctoral program using credits from their conferred Master's degree. Students must receive written verification from the School Dean (or their designee) at the time of application to their doctoral program that courses from the conferred Master's degree meet requirements for the doctoral program.

Example: MBA-5102 could be used to satisfy BTM-7101.

Graduate Credit from Foreign Institutions

The University may accept transfer or waive credit if an official course-by-course evaluation from an approved credential evaluation agency is supplied. NU will accept credential evaluations through any evaluation agency accredited by the National Association of Credential Evaluation Services (NACES). In addition, credential evaluations by the American Association of Collegiate Registrars and Admissions Officers (AACRAO) are also accepted.

Military Transfer Credit

As recommended by the American Council on Education (ACE), United States military training, testing, and other appropriate academic experience may be considered for transfer into a National University degree program. Except for military training courses specifically designated by ACE as equivalent to graduate coursework, military transfer credit will be limited to undergraduate programs.

NU will accept the minimum semester credits, levels of study, and subject areas recommended by the American Council on Education (ACE) on all military training courses, selected Military Occupation Specialties (MOS) and Ratings.

The maximum amount of transfer credit granted for military education is 135 quarter credits (90 semester credits). An additional nine (9) credits of correspondence coursework may be granted for active or veteran students who served in the Marine Corps.

Acceptable Transcripts and Credits

Military training and experience must be documented on an official military transcript system supported by ACE credit recommendations. These include AARTS (Army American Council on Education Registry Transcript System), SMARTS (Sailor Marine American Council of Education Registry Transcript System), CCAF (Community College of the Air Force), USCGI (United States Coast Guard Institute), or similar.

College transcripts sent directly to the Army National Guard Institute or other partnership agency and forwarded to NU with the original envelope showing that it was not received by the student may be accepted as official transcripts.

The recommended ACE credit must appear on an official transcript from the institution where they were earned. Work that is not documented on an official military transcript system may be considered on an individual basis when proper military documentation of military course completion is presented to NU for assessment.

Coursework Credits

Transfer credit for military or veteran applicants at the undergraduate level toward bachelor's degrees are accepted by NU on the following basis:

- Undergraduate credits must be completed at a regionally or nationally accredited post-secondary institution and must be earned with a grade of "C-" or better
- Military training or coursework must have been evaluated by an outside agency (i.e. ACE, institutions of higher learning) for academic content and semester credit equivalency
- Courses accepted in transfer must relate to the program and degree being pursued and must be equivalent to the degree program requirements, including specified electives

Military Experience Credits

Credit for military experience may be awarded based on Army MOS, Navy Ratings, Marine Corps MOS, and/or Coast Guard Ratings. The School Dean or designee shall determine the equivalency and transfer credit for each MOS or rating matched to a bachelor's degree program or concentration.

Credit awarded based on a rating or MOS may not duplicate any credits given for military training. Credit awarded is limited to primary ratings and duty ratings with a minimum of one-year experience. Credit for Army MOS will be limited to levels 30-50 and will not include secondary MOS. Similar levels will be effective for other services.

Transcript Evaluation for Students Using VA Education Benefits

In addition to transcripts needed to meet basis for admissions requirements, for students electing to use VA Educational Benefits, such as GI Bill®, NU will inquire about all previous education and training, and request transcripts from students for all prior institutions. This includes transcripts for military training, traditional college coursework, and vocational training. A copy of an unofficial transcript is sufficient for the purpose of an initial evaluation. Transcripts for education and training from prior institutions will be evaluated and credit will be granted, as appropriate, per the University's Transfer Credit Policy.

Transfer Credit Articulations and Crosswalks

The University has several partnerships with schools and organizations that allow students to satisfy University program requirements with previously completed coursework and certifications. To learn more about the specific requirements necessary to receive transfer credit, please click on the specific institutional and organizational partnerships linked below.

Transferability of Credits and Credentials Earned at Our Institution

The transferability of credits you earn at the University is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree, diploma, or certificate you earn in your educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree, diploma, or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending the University to determine if your credits or degree, diploma, or certificate will transfer.

Non-Degree Applicants

Applicants who want to enhance their personal and professional knowledge but do not intend to pursue a degree, can enroll as a Non-Degree student. The application process for non-degree studies follows the standard admissions process outlined above. Non-degree applicants must provide unofficial transcripts to demonstrate that they have the appropriate academic background for the course level requested (e.g., students requesting a Bachelor-level course must have a high school diploma).

There is no limit on the number of courses a student can take while in a non-degree status. For tuition information specific to Non-Degree applicants, please see [Tuition and Fees - Non Degree Tuition](#). The Academic and Finance Advisor will advise the applicant if there are prerequisites for the course requested.

If the student later applies for admission to a degree program, they will be required to complete the admissions application for the degree program of interest and submit all required documentation for admissions. The student will be evaluated as a new applicant and must meet tuition requirements, graduation requirements, and policies in effect at the time of application to the degree program. In addition, non-degree coursework completed at the University will be evaluated during the admissions process.

Note: Non-Degree students will be reported to the National Student Clearing House as attending less than half-time and are not eligible to receive financial aid or have their loans placed in deferment status.

Matriculation

Students admitted to a degree program at the University are considered matriculated into their degree program upon successful completion of their third degree course and participation in one day past the drop period of their fourth degree course (not including leveling coursework). Any student who does not successfully complete the first three degree courses and participate in one day past the drop period of their fourth degree course are considered non-matriculated and will not be used in calculating completion rates. See the [Refund Policy and Procedure](#) for detailed information regarding the University's drop period.

Student's Right to Cancel

Students have the right to cancel the Enrollment Agreement and obtain a full refund of charges through attendance in Week 1 (day 7 of the first course).^{*} Applicants who wish to cancel an enrollment agreement must contact their Academic and Finance Advisor at learnerservices@ncu.edu or call (888) 628-6904 prior to attending Week 2 of your first course. Cancellation or Withdrawal will be effective on the date that the notice is received.

The University reserves the right to cancel or terminate the agreement if the applicant fails to accept and attend their first course, meet basic academic requirements during provisional admissions periods, violate the Student Code of Conduct, fail to make satisfactory academic progress, fail to make payment in accordance with the terms of the student finance agreement, and/or fail to meet attendance requirements as outlined in the University Course Catalog.

If students obtain loan(s) to pay for their educational program, they have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund that is owed under the refund policy.

Re-entry Enrollment

Students who have been out of attendance for less than 365 days will be allowed to return to the degree program/catalog version that they were enrolled in prior to exiting the University. New application paperwork is not required unless the student changes degree program/catalog version.

Students who have been out of attendance for over 365 days must reapply for re-entry to the University under the most current degree program/catalog version. Students applying for re-entry must meet all applicable University policies including the basis for admission criteria in effect at the time of their re-entry enrollment.

All returning students are subject to current tuition rates and fees applicable at the time of their return. [Click here for current tuition information.](#)

Students who are academically or administratively dismissed may not be eligible to return to the University. See [Academic](#) and [Administrative Dismissal](#) policies for additional information.

Students dismissed due to a violation of the Student Code of Conduct policy, or due to any other legal or ethical matters, do not qualify for re-entry to the University.

All students enrolled in the Master of Arts in Marriage and Family Therapy (MAMFT) Program are required to complete the Statement of Professional Ethics prior to re-entry. Students enrolled in the MAMFT Program or related certificate who have been out of attendance for over 365 days (or in the case of certificate students, are seeking to change the courses in the certificate regardless of length of time away from their program) and re-entry students new to the MAMFT Program, must complete all application paperwork, participate in an interview with program leadership, and complete a background check (if needed).

General Re-entry Guidelines

In most cases, upon re-entry enrollment, students will return to the same SAP status as when they left unless there has been a substantial program change (see below). If it is mathematically impossible for a student to achieve Good Standing for SAP at their evaluation point by returning to the same program, re-entry enrollment may be denied and the student should consider a different program.

If a student returns to the University for an additional degree and has previously completed the University credits that can be applied to their new program, only the passing grade will carry over. Any unsuccessful coursework attempts will remain in the previous program and shall not negatively impact the new programs SAP status or maximum time to completion. Minimum grade requirements and other transfer credit policy still apply.

Mandatory Program Comparison

When a student is re-entering the University, after being out of attendance for over 365 days or returning to the university to a different degree program, all programs the student had started prior to leaving the University will be compared to the program the wishes to re-enter. If the comparison results in a determination of a substantial change as described below, the student is considered to be entering a new program for the purposes of SAP. In such cases, SAP may reset. Students are only permitted to make a substantial program or degree change once per degree level in their tenure with the University.

If the degree comparison determines there has not been a substantial change since the student left the University. SAP does not restart and all previously taken courses count for purposes of calculating Course Completion Rate, SAP Maximum Time Frame, and Cumulative GPA. A SAP Appeal will need to be filed and approved for all program extensions needed for re-entry enrollment to the same program when it has been determined that a student cannot complete their program within the allowed attempted credit limits per their individual program requirements and will need more time to complete their degree program.

However, no program comparison is required for students returning to the University who:

- Withdrew from the University with 75% or more of the credits completed that were required by their degree program at the time of exit
- Are returning within 365 days from their last date attendance

Under these circumstances, students may return to the same degree program/catalog version, without adjustment being made to the courses required to complete the program. SAP does not reset.

Military students returning to the University from military service-related time away will be reviewed on a case-by- case basis to determine if a comparison is needed. In many cases, these students may re-enter into their previous degree program/catalog version.

Substantial Program Change

A substantial program change is defined as a change to a program that is fundamentally distinct from the program in which the student was previously enrolled at the University, as evidenced by the difference in the first four digits of the respective program's Classification of Instructional Program (CIP) codes or the Program Credential Level (PCL), per Federal Student Aid. There is an exception to this rule for the University's post-baccalaureate and post-master's certificate programs (see below).

A student may change to a substantially different program without a SAP appeal once per degree level. SAP will reset for a change to a substantially different program. However, any course that migrates to the student's current program will be included in the SAP calculation. If a completed instance of the course migrates, then all instances of the course, including failed or withdrawn instances, will be included in the SAP calculation.

Examples of substantially different programs:

Example 1 (same PCL, different CIP code)

- Doctor of Philosophy in Psychology (CIP code 42.0101)
- Doctor of Marriage and Family Therapy (CIP code 51.1505)

Example 2 (same CIP code, different PCL)

- Master of Arts in Psychology (CIP code 42.0101)
- Doctor of Philosophy in Psychology (CIP code 42.0101)

SAP will not reset for a change to a substantially similar program.

An example of substantially similar programs:

- Doctor of Philosophy in Organizational Leadership (CIP code 52.0213)
- Doctor of Philosophy in Business Administration (CIP code 52.0209)

There is an exception to how the University defines a substantial program change for students who advance from a post-baccalaureate certificate to a master's degree and a post-master's certificate to a doctoral degree when the first four digits of the respective program's CIP codes are the same. This is because the courses in the post-baccalaureate certificate program are master's level courses, and the courses in the post-master's degree program are doctoral level courses.

With this exception in mind, an example of substantially similar programs:

- Post-Master's Certificate in Psychology (CIP code 42.0101)
- Doctor of Philosophy in Psychology (CIP code 42.0101)

Accordingly, an example of substantially different programs:

- Post-Master's Certificate in Psychology (CIP code 42.0101)
- Master of Arts in Psychology (CIP code 42.0101)

The Office of the Registrar, in accordance with guidelines stated in the Transfer of Credit Policy, will evaluate all changes in specialization or concentration.

Out-Dated Courses Treatment

When a student returns to the University or an active student makes a school or degree change, outdated courses not being applied to the current degree program because of age will not be counted. Master's degree courses must be less than five years old. Doctoral courses must be less than seven years old. To calculate if the course is outdated, use the date recorded when the grade was posted. These courses that are not being applied or migrated, do not count for SAP calculations or for graduation requirements.

Transfer of Credits to Re-Entry Program

Whether the student is re-entering a new program or the same program, the University determines which previously completed courses are given credit in the student's re-entry program and creates a new degree plan accordingly.

Re-entry after Withdrawal for Non-Payment

All prior financial obligations must be met before a student may return and resume attendance at the University. It is the returning student's responsibility to work on ensuring their previous balance is covered prior to their return. The student should work with our re-entry team on possible solutions to ensure admissibility. The re-entry team can be contacted directly at futuregraduate@nu.edu or toll free 888-327-2877 x 8289 regarding any previous financial obligation to the University.

Re-entry after SAP Dismissal

A student who does not meet SAP standards may appeal to the SAP Appeal Committee as detailed in the SAP policy. If it is mathematically impossible for a student to achieve Good Standing for SAP by returning to the same program, then students in this circumstance should consider re-entering a different program offered by the University. The Catalog contains information for current degree programs offered.

Denied Admissions

The University may refuse admission/re-entry to a potential student whose record shows previous or current misconduct that is deemed not to be in the best interest of the University community. The Office of the Provost or designee will review all situations in which behavioral conduct issues or other issues that will prohibit student success are noted. When necessary, this officer will contact appropriate parties having knowledge of the applicant and/or the misconduct and make a decision as to whether admission of the applicant would be in the best interest of the University community. Any applicant denied admission under this policy may submit a written appeal to Provost@nu.edu to be reviewed after the notification of the denial of admission. Details should include the student name, school, contact information, and a description of the circumstances including all supporting documents to be reviewed.

Program Availability

Program availability varies by state. Admission is granted at the time of initial acceptance into a program and is dependent on program availability in a state where the applicant resides at the time of admission. If a student moves to a state other than the state where the applicant resided when accepted into the program, continuation in the program will depend on the availability of the program within the new state of residence. It is the applicant's responsibility to notify the institution of a change in residence (new state). Students who relocate while enrolled may be unable to complete their studies if they are moving to a state where the university is not currently authorized to offer a particular program. Not all programs are approved in authorized states. Students wishing to relocate to a restricted state will not be able to continue in their program of study. Students should contact their Advisor to discuss how relocation could alter their eligibility in their current program.

Tuition & Fees

Tuition & Fees Disclaimer

The Catalog includes the tuition and fees in effect at the time of publication.

Payment method/details must be on record prior to course registration.

Students utilizing tuition assistance programs are responsible for timely payment of tuition and fees to the University, and must recognize this may mean the student must pay the financial obligations to the University before receiving reimbursement from their tuition assistance source.

The University reserves the right to change tuition and fees, as it deems necessary. Prepayment of the entire tuition for a program of study does not exclude a student from changes to tuition and fees. Additionally, students and alumni should be aware that:

- All applicable tuition is charged and due at the time the student enters *NCUOne*
- A one-time only, per program Learning Management Fee of \$450 will be charged when a student vests in their first course
- A course materials fee will be charged per course; fees vary by program
- The course materials fee includes access to the student's electronic textbooks; some courses or students may be exempt from these charges

Program Costs

The cost of the program may vary depending on how many credits are transferred into the program at the University and other factors that may apply such as leveling courses, repeated courses, start date, etc. The information listed below provides an estimated total cost (by program length). Please contact an Enrollment Advisor for further details at 866-776-0331.

As an online university, the University uses the total program tuition cost (which includes the Course Materials Fee (per applicable program) plus the one-time per program Learning Management Fee) in its estimated cost of attendance calculation. Non-institutional grants and scholarships, University affiliation preferred tuition rates, or any other forms of tuition reduction will affect the estimated cost of attendance calculation. The University does not include the room, board, transportation, childcare, or personal expenses in its calculation of the estimated cost of attendance.

* Course Materials Fee (CMF) applies to 3 credit hour courses. The Course Material Fee for CMP and DIS courses is \$50 per course. The fee for all other courses is the higher CMF amount as noted above and is calculated in the Total Estimated Cost of Program.

**Total Estimated Cost of Program may vary depending on how many credits are transferred into the program and other factors that may apply such as leveling courses, repeated courses, etc. Rates reflect today's credit requirements based on current course tuition rates and include the one-time learning management fee of \$450 and a course materials fee (CMF) that will be charged per course to cover all of the materials (text and other) for the course.

Program requirements may vary, please reference Marriage and Family Therapy information in the Department of Social Sciences section of the catalog for details regarding leveling credits and/or additional courses needed for state licensure.

Note: In the Marriage and Family Therapy training programs (MA and PhD), in some cases, students may be required to pay for local supervision. This will depend on the clinical placement location, local clinical placement, and/or local supervisor they contract with to complete their practicum and internship requirements. The decision to pay for local supervision is entirely up to the student and not a requirement of the University.

Non-Degree Tuition Rates

(Refer to <https://www.nu.edu/admissions/tuition-2/>)

Degree Type	Base Per Course Tuition Rate
Non-Degree (Undergraduate)	\$1,383
Non-Degree (Graduate)	\$2,760

Total program costs reflected are calculated based on standard degree program credits exclusive of the program's potential evaluation track. The actual cost of program is determined on the program and track student enters, transfer credits if any and other unique student factors. For more information: please contact Admissions.

NOTE: Tuition rates may vary based on a variety of factors. Contact your Academic and Finance Advisor if you have questions about your tuition rate.

Miscellaneous Fees

Description of Miscellaneous Fees	Fee Amounts
Learning Management Fee, one-time, per program as noted in Total Estimated Cost of Program section.	\$450.00
Official Transcript Fee - Paper Mailed Transcript	\$5.00
Official Transcript - Digital Transcript	\$7.00
Declined Credit Card Fee	\$25.00
Late Payment Fee	\$25.00
Returned Check Fee	\$25.00

Miscellaneous Fee Information:

- **Official Transcript Fee** is charged for each official transcript requested
- **Returned Check Fee** is charged if a check is returned for non-sufficient funds
- **Credit Card Declined Fee** is charged if a charge to a credit card account is declined

NOTE: All fees are non-refundable.

Financial Policies

Method of Payment

Students have access to a variety of financing options when attending the University and should consult with their Enrollment Specialist or Financial Aid representative for assistance in determining which options are appropriate for their circumstances. These financing options are described in the Financial Aid and Financial Information sections of this Catalog and include:

- Self-Pay
- Federal Student Aid Loans and Grants
- Private Loans
- Internal and External Scholarships
- Veterans Educational Benefits, including the Yellow Ribbon Program
- Military Tuition Assistance
- Tribal Funding
- Employer Tuition Assistance
- Employer Vouchers
- University Payment Plans

Students may also find additional information about financing their education at the University at <https://www.nu.edu/admissions/financial-aid-and-scholarships/>.

Statement of Financial Responsibility

Students are required to maintain current credit card and/or eChecking account information on file in their student records. Payment information, including the methods of payment listed in this Catalog, is used to secure payment for all current and future fees and tuition charges incurred by the student. Students also agree to the University's Attendance and Continuous Enrollment policy, which enrolls students into courses on a scheduled timeline. Students authorize the University to charge their account on record for all applicable fees and tuition charges for each subsequent course without further authorization.

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If the student has received federal student financial aid funds, the student is entitled to a refund of the money not paid from federal student financial aid program funds.

Meeting Financial Obligations

The University considers all financial obligations payable immediately, unless otherwise stated. Upon completion of the degree program, any outstanding financial balance is due and payable immediately. The University may withhold certificates and diplomas until all unpaid financial accounts have been satisfied.

Personal Responsibility

It is the personal responsibility of each applicant and student to determine how to pay for their education.

The University expects applicants and students to actively search for the best funding option(s) available through review of all available information on the University Web site at www.nu.edu. The University, through its numerous partnerships, agreements with corporations, businesses, educational organizations, the U.S. military, and other agencies, offers tuition benefits to

employees of those entities. The University staff will assist students in clarifying eligibility for any funding option offered by the University. It is the sole responsibility of the individual applying to the University to ensure and confirm their eligibility for any funding options prior to enrollment and first course request.

Students who become aware of a tuition benefit that reduces the student's financial liability after enrolling will need to notify the University by e-mail or in writing. Submit tuition benefit inquiries to your Academic & Finance Counselor. After a review and approval of the written request, the University will adjust the student's tuition rate. The postmark date or e-mail receipt date of final supporting documentation shall be the effective date of change.

The University does not accommodate requests from students for retroactive consideration.

Forbearance and Deferment Options

The University is proud of its ability to provide accredited bachelor's, master's and doctoral degree programs in an online environment at a highly competitive price. Students and prospective students seeking financial relief while continuing their education should contact Student and Financial Services team or their lenders to discuss forbearance or other deferment options.

Forbearance may be granted at the lender's discretion for a variety of other reasons. The terms and conditions of forbearance are determined by each individual lender and may vary from student to student based upon loan indebtedness, past payment history, or other factors deemed appropriate by the lender.

There are several deferment options including active military, public service, economic hardship, and others. These deferment options do not require school certification.

The University recommends that students and prospective students address their forbearance or deferment needs with their respective lender(s) to clarify the eligibility requirements for forbearance or deferment.

Default of Financial Obligation

If the student's financial obligations are in default (defined as not paying a financial obligation within 30 days of the due date), the University may declare the entire balance due without further notice and require full payment immediately. Failure to pay the unpaid balance within 10 days may result in any or all of the following:

- Denial of course registration, withholding of certificates or diplomas
- Assignment of the account for collection
- Reporting the delinquent account status to a credit bureau
- Financial dismissal from the University

In the event an account is delinquent, the University as well as outside agencies working on its behalf have the right to communicate with the student via email and/or cell phone regarding an outstanding balance. When an account is turned over for collection, the student is obligated to pay the University's collection expenses. If a lawsuit or other action is filed, litigation falls under California state jurisdiction and the student agrees to pay the University's attorney's fees as fixed by the trial court. If any party appeals any part of the trial court's decision, the student promises to pay the University's attorney's fees for the appeal as fixed by the appellate court.

Waiver of Tuition/Fees

In general, the University does not grant waivers of tuition or fees. However, in the rare instance that a waiver is considered, it must be recommended by the Provost or Senior Director of Student Services and pre-approved by Registrar or the Chief Financial Officer or designee.

If a student would like to request a waiver, a student must submit the request in writing, including the reason or justification. Contact your Academic and Finance Advisor for more information.

Refund Policy

Students have the right to withdraw from a course or the University at any time. The University team members who receive a request to withdraw from the University will process the request on behalf of the student, using the date they received the request as the Request Date. See [Academic & University Policies](#) for additional information regarding withdrawal from the University.

Students may also be dismissed from the University for Non-Attendance, Non-Payment, lack of Satisfactory Academic Progress, or violation of the Student Code of Conduct. See the [Administrative Dismissal](#) policy.

Dismissed or withdrawn students receiving Federal Financial Aid are subject to return of Title IV funds.

If a refund for a non-Title IV payment is required, the amount will be returned to the same source from which the payment was made. For example, if the payment was made by credit card, the refund will go to the same credit card where possible. If the amount cannot be refunded to the original method of payment, a check will be sent to the student using their address of record.

For third party payments, refunds will be sent to the entity who made the payment.

Calculating Refunds

In the event of course drop or withdrawal from the University, refunds are based on amounts already paid by the student and on when the course drop and/or University withdrawal are requested.

- If a student requests to withdraw from the University prior to course registration, pre-paid tuition for courses in which the student is not yet registered is refunded 100%
- If a student requests to drop a course more than 7 days from and including the course start date, it is considered a course withdrawal and full tuition and Course Material Fees are charged
- If the date given in Course Registration Information as the last date to withdraw from a course without academic penalty has passed, the letter grade that was earned at the time of the request to withdraw from the course will be awarded rather than a Withdrawn code
- Students receiving Federal Financial Aid may be subject to return of Title IV funds

Refund Processing Time

Tuition refunds are provided within 30 days of the withdrawal request date or date the course is dropped. The student will be notified if a balance is due to the University.

State-Specific Refund Policies

Alabama Refund Policy

The following refund policy applies to Alabama residents.

1. The student has the right to cancel the Enrollment Agreement within 3 days after entering into it. If the student has paid any fees or tuition to the University before cancelling, all monies paid will be refunded. Refunds of all prepaid tuition will also be refunded if the student cancels after the 3 days, but prior to starting the course.
2. A student who has not cancelled within 3 days of enrollment shall be entitled to a pro rata refund of fees or tuition paid if the student withdraws before completing 60% or more of the course. Refunds shall be paid within 30 days after the date of withdrawal, and the student does not have to request the refund.
3. After completing 60% or more of the course, the student shall not be entitled to a refund.
4. Refunds shall be paid first to the student's financial aid sponsors and then to the student.
5. A full refund is due to students whose contracted educational services are denied by the school as a result of economic or academic fraud as defined in the Code of Alabama §16-46-1(7) and (8) (1975).

California and Washington D.C. Refund Policy

The following refund policy applies to California and Washington D.C. residents.

Students who cease enrollment at the University, either through withdrawal or dismissal, will receive a pro-rata refund of tuition if the student has completed 60% or less of the period of attendance. For the purpose of calculating the student's refund, the student's withdrawal date is the last day of recorded attendance. The period of attendance is defined as the start date to the scheduled end date of any courses in progress at the time of withdrawal or dismissal. If a student is enrolled in more than one course concurrently at the time of withdrawal/dismissal, each course will be calculated independently. The schedule below shows the refund percentage by day of attendance. Credit balance on the account at the time of withdrawal will be processed within 45 days of the date of withdrawal.

If a student's tuition is paid either by a third party or by a scholarship or grant, any refund due will be issued directly to the third party or returned to the scholarship/grant program unless otherwise directed by the third party.

Georgia Refund Policy

The following refund policy applies to Georgia residents.

This refund policy is for refunding unused portions of tuition and fee charges in the event a student withdraws from or fails to begin a course or program of study.

All monies paid by a prospective student are refunded if the student requests a refund within three business days after signing an enrollment agreement; or no enrollment agreement is signed and prior to classes beginning the student requests a refund within three business days after making a payment.

The University refunds any unused portion of its tuition and fees if a student withdraws before completing fifty percent of the course. Refunds are based on tuition and fees paid for the course, made in full to the student within forty-five (45) days of the withdrawal date, and determined based on the proration of tuition and fees and percentage of course completed at the withdrawal date, up until 50% of the course, per the following pro-rata schedule.

% of Course Completed	% Refunded
Up to 10%	100%
10.01% to 20%	90%
20.01% to 30%	80%
30.01% to 40%	70%
40.01% to 50%	60%
More than 50%	0%

Iowa Refund Policy

The following refund policy applies to Iowa residents.

1. The student has the right to cancel the Enrollment Agreement within 3 days after entering into it. If the student has paid any fees or tuition to the University before cancelling, that will be refunded within 10 days.
2. A student who has not cancelled within 3 days of enrollment shall be entitled to a pro rata refund of fees or tuition paid if they did not complete 60% of the course(s). An Iowa resident who withdraws from the University receives a tuition reduction equal to 90% of the tuition charged for the dropped course(s), multiplied by the pro rata amount not attended through the 60% mark. For example:

Tuition Cost per course	# of weeks in course	# of total days in course	# of days for 60%	# of days completed	Re-Calculated Tuition if less than 60%	Days Remaining to 60%	% remaining to 60%	Minimum refund
\$2,063.00	8	56	34	10	\$1,856.70	24	70%	

3. Refunds shall be paid within 45 days after the date of withdrawal, and the student does not have to request the refund.
4. After completing 60% or more of the course, the student shall not be entitled to a refund.
5. Exception: An Iowa resident who withdraws from the University during a course(s) due to physical incapacity receives a reduction of tuition charges proportionate to the number of days in the course that the student did not complete. The University reserves the right to request documentation of physical incapacity. Course drop fees do not apply to Iowa resident students who withdraw from the University.
6. Refunds shall be paid first to the student's financial aid sponsors and then to the student.
7. A student's date of withdrawal is the last date the student participated in a course.

Military Deployment

An Iowa resident who is a member, or the spouse of a member if the member has a dependent child, of the Iowa national guard or reserve forces of the United States and who is ordered to state military service or federal service or duty has the following options:

- i. Withdraw from the student's entire registration and receive a full refund of tuition and mandatory fees.
- ii. Make arrangements with the University for a course grade, or to complete coursework at a later date, for all or a portion of the courses in which the student was enrolled at the time of withdrawal. The student will be charged tuition and mandatory fees in full for any course(s) for which the University assigns a grade or that the student will complete at a later date. Any course(s) for which arrangements cannot be made for grades or incompletes is considered dropped and the University will fully refund tuition and mandatory fees for that course(s).

A student must provide a copy of military orders, a letter from their commanding officer, or other documentation to support the student's request. Students that elect to complete a course(s) at a later date should refer to the University's Military Leave of Absence policy.

Kansas Refund Policy

The following refund policy applies to Kansas residents.

Students who complete 25% or less of a course and withdraw shall be eligible for a pro rata refund. The completion percentage shall be based on the total number of calendar days in the course and the total number of calendar days completed. After a student has attended at least 25% of the course, tuition and fees shall not be refundable.

Maryland Refund Policy

The following refund policy applies to Maryland residents.

The minimum refund that the University shall pay to a Maryland student who withdraws or is terminated after completing only a portion of a course is as follows:

Proportion of Total Course Completed as of Date of Withdrawal or Termination	Tuition Refund
Less than 10%	90% refund
10% up to but not including 20%	80% refund
20% up to but not including 30%	60% refund
30% up to but not including 40%	40% refund
40% up to but not including 60%	20% refund
More than 60%	No refund

Oregon Refund Policy

The following refund policy applies to Oregon residents.

The minimum refund that the University shall pay to an Oregon student who withdraws or is terminated after completing only a portion of a course is as follows:

Refund Schedules per Course Duration (weeks) for Non-Term Programs							Refund Schedules per Term Duration (weeks) for JFK School of Law at National University Programs					
	6		8		12		10		11		16	
Week #	% Comp	% Ref	% Comp	% Ref	% Comp	% Ref	% Comp	% Ref	% Comp	% Ref	% Comp	% Ref

Washington State Refund Policy

For Washington State residents seeking information and resources about student loan repayment or seeking to submit a complaint relating to your student loans or student loan servicer, please visit <http://www.wsac.wa.gov/loan-advocacy> or contact the Student Loan Advocate at loanadvocate@wsac.wa.gov.

Wisconsin Refund Policy

The following refund policy applies to Wisconsin residents.

1. The student has the right to cancel the Enrollment Agreement within 3 days after entering into it. If the student has paid any fees or tuition to the University before cancelling, that will be refunded within 10 days.
2. A student who has not cancelled within 3 days of enrollment shall be entitled to a pro rata refund of fees or tuition paid if the student withdraws before completing 60% or more of the course. Refunds shall be paid within 40 days after the date of withdrawal, and the student does not have to request the refund.
3. After completing 60% or more of the course, the student shall not be entitled to a refund.
4. Refunds shall be paid first to the student's financial aid sponsors and then to the student.
5. A student's date of withdrawal is the last date the student participated in a course.

Student Aid

General Student Aid Eligibility

To be eligible for FSA funds, a student must meet the criteria listed below. The University ensures that eligibility requirements are met before the awarding of aid occurs. A student must:

- Be enrolled as a regular student in an eligible program
- Not be enrolled simultaneously in elementary or secondary school
- Demonstrate financial need (for some FSA programs)
- Sign the certification statement on the Free Application for Federal Student AID (FAFSA) status that they:
 - Are not in default on a federal student loan and does not owe money on a federal student grant
 - Will use federal student aid only for educational purposes

- Show they are qualified to obtain a college education by one of the following:
 - Having a high school diploma or a recognized equivalent such as a General Education Development (GED) certificate
 - Completing a high school education in a homeschool setting approved under state law (or - if state law does not require a homeschooled student to obtain a completion credential - completing a high school education in a homeschool setting that qualifies as an exemption from compulsory attendance requirements under state law)
 - Enrolling in an eligible career pathway program and meeting one of the "ability-to-benefit" alternatives:
 - Passing an approved "ability-to-benefit" test
 - Completing six credit hours or equivalent coursework toward a degree or certificate
- Have a valid Social Security Number with the Social Security Administration
- Be a U.S. citizen or eligible noncitizen
- Be registered with Selective Service, if required
- Not be in default on a Title IV loan or, if in default, have made satisfactory repayment arrangements with the loan holder
- Have not obtained loan amounts that exceed annual or aggregate loan limits made under any Title IV loan program
- Not be liable for an overpayment of a Title IV grant or Federal Perkins Loan or, if liable, have made satisfactory repayment arrangements with the holder of the debt
- Be making satisfactory academic progress (SAP)
- Not have property which is subject to a judgment lien for a debt owed to the U.S. or, if subject to a judgment lien, have made satisfactory repayment arrangements with the debt holder
- Not have been convicted of an offense involving the possession or sale of illegal drugs that occurred while enrolled and receiving Title IV aid
- Have completed repayment of funds to either ED or the holder of a loan, as applicable, if the student has been convicted of, or pled guilty to, a crime involving fraud in obtaining Title IV aid

Student must complete the Free Application for Federal Student Aid (FAFSA) and have the results sent to the University. Once the results are received by the University, they are reviewed to ensure that the student meets all eligibility criteria. If a student is deemed ineligible due to one of the above issues, the Student and Financial Services team will inform the student of the issue so that the student can work towards resolution.

If the student meets the eligibility criteria for federal financial aid and all the required documents have been received, they will be awarded financial aid funds.

Transfer coursework is used to establish grade level for loan eligibility. Credit evaluations from unofficial transcripts are accepted to determine loan eligibility.

Financial Aid Programs and Assistance

The University participates in a variety of financial aid programs. Assistance may include scholarships, grants, and loans. Scholarships and grants are gift awards that do not need to be repaid. Loans are considered self-help awards, since repayment is required. The type and amounts of aid awarded depends upon the student's financial need and the cost of attendance.

The University participates in the following Federal Student Aid (FSA) programs:

Federal Pell Grant Program

The Federal Pell Grant Program is an entitlement program for students pursuing their first undergraduate degree. Students must demonstrate financial need to qualify. Students who have already earned a bachelor's degree are not eligible for Federal Pell Grant funds.

The Federal Pell Grant Program is federally funded with the purpose of helping financially needy students meet the cost of postsecondary education. This program is centrally administered by the federal government and is typically the foundation of an undergraduate student's aid package.

In order to determine eligibility for the Federal Pell Grant, the University must receive the results of the Free Application for Federal Student Aid (FAFSA) in the form of a valid Institutional Student Information Report (ISIR) from the Department of Education's Central Processing Service (CPS). The Federal Pell Grant Scheduled Award is based upon the official Expected Family Contribution (EFC) and the Federal Pell Grant Cost of Attendance (COA). Students cannot receive more than 100% of the Federal Pell Grant Scheduled Award within an award year, and a student's maximum duration of Pell Grant eligibility is six scheduled awards, as measured by the percentage of lifetime eligibility used (one scheduled award equals 100% lifetime eligibility used). A student is ineligible to receive further Pell Grant funds if they have reached or exceeded the 600% limit.

All Undergraduate students enrolled at the University are considered to be full-time students for purposes of calculating the Federal Pell Grant Scheduled Award.

The amount of Federal Pell Grant awarded is based upon the length of the payment periods to be funded and the EFC indicated on the student's valid SAR/ISIR.

The portion of the enrollment that is funded based upon a particular year's SAR/ISIR depends upon the student's payment periods that begin in that year. Payment periods are normally funded from the year in which they begin.

When a payment period falls into two award years (crosses over July 1st), it is called a "crossover payment period". The University will assign crossover payment periods to the award year that best meets the needs of its students and maximizes a student's eligibility over the two award years in which the crossover payment period occurs.

For an academic year, the student is awarded the full Federal Pell Grant Scheduled Award determined by the EFC and COA. When less than a full academic year is to be funded, the Scheduled Award is prorated appropriately.

Federal Pell Grant funds are generally scheduled for disbursement at the beginning of each course, module, or payment period, in conjunction with the achievement of Satisfactory Academic Progress. The funds scheduled represent, at maximum, funding for all credits that should be earned during the payment periods to be funded from the appropriate award year. Students enrolled in an undergraduate term-based program, e.g., Bachelor of Arts in Legal Studies, who are eligible for a Federal Pell Grant will have their Pell Grant award recalculated upon vesting in each course in each module to determine if the student has made changes in his/her schedule that results in a change in enrollment status or cost of attendance. Schedule changes that affect a student's Pell Grant award will result in an adjustment, increase or decrease, to the award. Adjustments will be made as soon as possible, but no later than seven days from the recalculation date. Students must post attendance and vest in each course of a module for the course to count towards the Pell enrollment status.

Federal Pell Grant funding is scheduled for all eligible students who submit a final and valid SAR/ISIR while enrolled and prior to the end of the award year.

Federal Direct Loans

Federal Direct Subsidized Loan

The Federal Direct Subsidized Loan Program provides low-interest, deferred-payment loans to undergraduate students who demonstrate financial need. These loans assist students with educational expenses.

The U.S. Department of Education subsidizes the interest on these loans while the students are enrolled in school at least half-time and during grace and deferment periods.

Students apply for the Federal Direct Subsidized loan by completing the Free Application for Federal Student Aid (FAFSA) and the Master Promissory Note (MPN). All first-time University borrowers must also complete entrance counseling prior to receiving loan funds. All students who have had Direct loans disbursed while attending the University must complete exit

counseling prior to graduation. Those borrowers who terminate attendance by means other than graduation or those who were not able to attend exit counseling sessions will be contacted and informed of loan responsibilities in writing. All borrowers may also complete the required entrance and exit counseling on-line.

The total aggregate amount of Subsidized loans that an undergraduate student may borrow is \$23,000.

All degree programs at the University are at least an academic year in length.

Federal Direct Unsubsidized Loan

The Federal Direct Unsubsidized Loan Program provides low-interest, deferred-payment loans to undergraduate and graduate students regardless of financial need. These funds assist students with educational expenses.

Unlike the Direct Subsidized loan program, the U.S. Department of Education does not subsidize the interest on these loans while the students are enrolled at least half-time and during grace and deferment periods.

Students apply for the Federal Direct Unsubsidized loan by completing the FAFSA and the Master Promissory Note (MPN). All first-time University borrowers must complete entrance counseling prior to receiving funds. All students who had Direct loans disbursed while attending the University must complete exit counseling prior to graduation. Those borrowers who terminate attendance by means other than graduation or those who were not able to attend exit counseling sessions will be contacted and informed of loan responsibilities in writing. All borrowers may also complete the required entrance and exit counseling on-line.

The total aggregate amount of Unsubsidized loans that may be borrowed is \$31,000 for dependent undergraduate borrowers (\$23,000 of which may be Subsidized loan funds), \$57,500 for independent undergraduate borrowers (\$23,000 of which may be Subsidized loan funds), and \$138,500 for graduate borrowers. Annual limits are noted in the chart below. The total amount of Subsidized and Unsubsidized loans may not exceed the maximum amounts.

Dependent students may receive an Unsubsidized Direct loan if they do not have the financial need to qualify for a Subsidized loan. Dependent students may also qualify for an "additional Unsubsidized" Direct loan if their parents are not eligible to receive a Federal PLUS loan.

All degree programs at the University are at least an academic year in length.

Annual Direct Loan Limits

Dependent Undergraduates	Base Subsidized & Unsubsidized	Additional Unsubsidized	Maximum Subsidized & Unsubsidized
First Year: 1-24 credits completed	\$3,500	\$2,000	\$5,500
Second Year: 25-48 credits completed	\$4,500	\$2,000	\$6,500
Third Year: 49-72 credits completed	\$5,500	\$2,000	\$7,500
Fourth Year and Beyond: 73+ credits completed	\$5,500	\$2,000	\$7,500

Independent Undergraduates (and dependent undergraduates whose parents cannot borrow PLUS loan)			
First Year: 1-24 credits completed	\$3,500	\$6,000	\$9,500
Second Year: 25-48 credits completed	\$4,500	\$6,000	\$10,500
Third Year: 49-72 credits completed	\$5,500	\$7,000	\$12,500
Fourth Year and Beyond: 73+ credits completed	\$5,500	\$7,000	\$12,500
Graduate and Professional Students			
Each year until lifetime aggregate is met	\$0	\$20500	\$20500

Federal Direct PLUS Loans

Federal Direct Parent Loan for Undergraduate Students (PLUS)

The Federal PLUS loan provides non-subsidized low-interest-rate loans to the parents of dependent students regardless of need. These funds assist students with educational expenses.

The PLUS loan may be awarded up to the cost of attendance less any other aid awarded.

The parent borrower must meet the citizenship criteria and not be in default or owe a repayment on a Title IV loan or grant. The parent must also be able to meet the credit criteria established by the Federal Direct Loan Program. A credit check will be done for parents applying for a PLUS.

Federal Direct PLUS Loan for Graduate and Professional Students (GradPLUS)

The GradPLUS provides a non-subsidized loan option to graduate and professional students. Students must also be able to meet the credit criteria established by the Federal Direct Loan Program, complete a GradPLUS Master Promissory Note (MPN) and complete GradPLUS entrance counseling. A credit check will be done for students applying for GradPLUS.

The Grad PLUS loan may be awarded up to the cost of attendance less any other aid awarded.

Additional Assistance Options

Non-FSA assistance may be available to students. Click on the link below for additional information:

Employer Reimbursement

Any "employer reimbursement" or "tuition assistance" is included as part of the student's estimated financial assistance (EFA) for the purpose of determining need.

Employer reimbursement or tuition assistance is included based on the student's response on the University Financial Aid Application. The University assumes that an answer of "yes" without an explanation of terms means full tuition remission. Employer reimbursement or tuition assistance is used to cover tuition and fees only, unless otherwise noted by the student.

GI Bill® and Other VA Education Benefits

The University does not determine student eligibility for education benefits from the U.S. Department of Veterans Affairs (VA), including GI Bill® benefits. Students may review benefit eligibility requirements at the official GI Bill® website, www.benefits.va.gov/gibill, and complete an application at www.VA.gov. For questions regarding VA education benefits, students should call the VA Education Call Center at 1-888-442-4551 or contact a University School Certifying Official (SCO) at veteranaffairs@nu.edu.

Students are required to submit a Certificate of Eligibility (COE) or similar document, confirming benefit entitlement, to the SCO before enrollment will be certified to VA. Acceptable documentation includes Certificates of Eligibility (COE), Post 9/11 GI Bill® Enrollment Status pages from www.eBenefits.va.gov, statements of benefits from www.VA.gov, Web Automated Verification of Enrollment (WAVE) pages, and Authorization Forms (VA form 28-1905) for the Vocational Rehabilitation and Employment benefit.

Once a student's benefit documentation is on file, the University will submit enrollment certifications to VA on a course-by-course basis, after the drop period of each course passes. Students receive confirmation emails every time enrollment certifications are submitted to VA.

The University permits students utilizing Vocational Rehabilitation & Employment (chapter 31) or Post 9/11 GI Bill® (chapter 33) education benefits to attend and participate in a course while the university awaits payment from VA, for at least 90 days after the date the University certifies the course charges to VA. The University does not impose any penalty, including the assessment of late fees, the denial of access to courses or school resources, or the requirement to borrow additional funds, on these students due to the delayed payment from VA under chapter 31 or 33 benefits. Students utilizing the chapter 31 and 33 education benefits will still be responsible for any portion of their tuition and fee charges that are not coverable by VA under their specific benefit.

The University will inquire about all previous education and training for students electing to use VA education benefits and request transcripts from these students for all prior institutions, as required by VA. This includes transcripts for military training, traditional college coursework, and vocational training. Unofficial transcripts are sufficient for the purpose of an initial evaluation. Transcripts for education and training from prior institutions will be evaluated and credit will be granted, as appropriate, per the University's Transfer of Credit Policy.

As part of our commitment to our military students, the University complies with the Principles of Excellence. The Principles of Excellence are voluntary federal guidelines for institutions of higher learning, which ensure military service members, veterans, and their families are treated fairly and are well informed when making decisions concerning their post-secondary education.

"GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <https://www.benefits.va.gov/gibill>.

Note: JFK School of Law at National University programs are not eligible for VA benefits. For more information about the Juris Doctor program please click [here](#).

Yellow Ribbon Program

The Yellow Ribbon Program is a provision of the Post 9/11 GI Bill® benefit. It is designed to help students pay for their out-of-pocket tuition and fee costs after exhausting the annual private school funding limit of the Post 9/11 GI Bill®, during the VA academic year (August 01 - July 31). The annual limit for the Post 9/11 GI Bill® is subject to change each year and is listed at www.benefits.va.gov/gibill/post911_gibill.asp.

As a Yellow Ribbon Program participating school, the University will contribute up to \$2,000 for tuition and fees after an eligible student exhausts the annual funding limit. VA will then match the amount of the school's contribution and issues payment directly to the University.

The following individuals are eligible for Yellow Ribbon Program benefit:

- Veterans and their spouses, through transfer of entitlement, eligible for the Post 9/11 GI Bill® at the 100% benefit level (based on service requirements).
- Dependent children, through transfer of entitlement, eligible for the Post 9/11 GI Bill® at the 100% benefit level, regardless of the sponsor's active duty status.

Active duty service members and their spouses are not eligible for the Yellow Ribbon Program. When a student exhausts their entitlement to the Post 9/11 GI Bill®, they are also no longer eligible for the Yellow Ribbon Program.

For questions regarding the Yellow Ribbon Program at the University, students should contact the University School Certifying Official at veteranaffairs@nu.edu.

Military Tuition Assistance

As an active duty, National Guard, or Reserve Uniformed service member, students may be eligible for military Tuition Assistance (TA) to help pay tuition. TA benefits may even cover the entire cost of education with the special tuition rates the University offers in conjunction with TA.

TA funds are awarded to students on a course by course basis under the assumption that the student will attend the University for the period for which the assistance is awarded. TA funds are earned proportionally during an enrollment period, with unearned funds returned directly to the military service based upon when a student stops attending. The University will return any unearned TA funds on a prorated basis through at least the 60 percent point of the course for which the funds were provided. The chart below shows the University's TA proration schedule.

8-Week Course Refund Schedule		12-Week Course Refund Schedule	
Week 1	100%	Week 1	100%
Week 2	75%	Week 2	75%
Week 3	50%	Week 3	75%
Week 4	25%	Week 4	50%
Week 5*	25%	Week 5	50%
Week 6	0%	Week 6	25%
Week 7	0%	Week 7*	25%
Week 8	0%	Week 8	0%

-	-	Week 9	0%
-	-	Week 10	0%
-	-	Week 11	0%
-	-	Week 12	0%

*The course is 60% complete during this week.

Tribal Funding

The University participates in Title IV federal financial aid programs and in completing Tribal Funding Need Analysis Forms, follows the guidelines stated in Estimated Cost of Attendance (COA). As an online university, the University uses tuition costs only as its estimated cost of attendance calculation. Grants, scholarships, University partnership discounts, or any other forms of tuition reduction will affect the estimated cost of attendance calculation.

Private Education Loan Information

A private education loan is a non-Federal Student Aid (FSA) loan that is made to a borrower expressly for postsecondary education expenses, regardless of whether the loan is provided through the educational institution that the student attends or directly to the borrower from the private educational lender. In either case, borrowers should know that they may qualify for FSA loans or other assistance from FSA programs, and that the terms and conditions of a FSA loan may be more favorable than the provisions of private education loans. Accordingly, the University encourages students needing financial aid to pay for their education to complete the Free Application for Federal Student Aid (FAFSA) to determine their eligibility for FSA.

The University may certify a student's private education loan in situations where a student may not be immediately eligible for a FSA loan.

The University does not participate in a preferred lender arrangement with private education loan lenders, but those lenders that will make loans available to University students or parents can be viewed on the FASTChoice website at <https://choice.fastproducts.org/FastChoice/home/3813300/1>. The University does not endorse these lenders. Borrowers can choose to use any private education loan lender that will make loans to the borrower for attendance at the University, but many private education loan lenders require a credit check. This means that lenders look at borrowers' financial history to determine if they can approve a loan, and if so, what terms they will offer the borrower.

Scholarships

From time to time, the University offers grants or scholarships to provide students with extra financial support.

When a Grant or Scholarship opportunity becomes available, details regarding awards, deadlines, and submission requirements will be posted in the Commons on *NCUOne*.

More information can be found by contacting Student Financial Services or visiting the grants and scholarships page of www.nu.edu.

University Payment Plan and Fees

Description of University Payment Plans and Fees	Fee Amounts
Pay-in-Full Payment Plan Processing Fee	\$0
Pay-by-Term Payment Plan Processing Fee	\$0
Late Payment Fee	\$25.00
Returned Check Fee	\$25.00
Declined Credit Card Fee	\$25.00

Payment Plans and Fee Information

- Students utilizing financial assistance programs are responsible for timely payment of tuition and fees
- Students must pay their financial obligations to the University before receiving reimbursement from their financial assistance source
- A Late Payment Fee is charged if a student fails to meet the terms and conditions of their payment plan
- A Returned Check Fee is charged when a student's payment by check does not clear their account
- A Declined Credit Card Fee is charged when a student payment by credit card is denied by the issuing credit card company

Undergraduate Payment Plans

Pay-in-Full (Length of Program)

Students may pre-pay the tuition for their entire degree program at the beginning of their program at the University. Such pre-payment will confirm the tuition rate for the duration of the student's entire program (excluding additional or retaken courses).

Pay-by-Course

Tuition is due at the time the student requests their course(s). The University reserves the right to change tuition rate as it deems necessary.

University Payment Plan

This monthly payment plan covers the direct University tuition costs for each course only

- At the time of a student's Course Acceptance, a payment plan is initiated by the student requiring monthly payments made directly to the University
- The University reserves the right to change tuition rates as it deems necessary

Procedural Steps for the University Payment Plan:

Step One: At the time attendance is confirmed in the course, the student submits the initial payment plan fee and schedules the subsequent monthly payments as required by the payment plan. The first payment and payment plan fee are processed on the eighth (8th) day of the course.

Step Two: The student's two remaining monthly payments will be processed in 28-day increments beginning 36 days from the start of the course.

Other Important Details about University Payment Plans:

- Credit Card: The student's credit card on file is charged automatically each month until tuition and fees for the term are paid in full
- Fees: A \$25 Late Payment Fee will be charged for each month that a payment is not received on time
- If a credit card payment is declined or a check is returned due to insufficient funds, a \$25 Declined Credit Card or Returned Check Fee will be charged
- If a student who has prepaid tuition withdraws or is dismissed from their degree program prior to graduating, any tuition reduction applied to such tuition prepayment is invalid
 - The student is charged the applicable tuition for all completed courses based on the full tuition rate in effect at the time each course began
 - The difference resulting from any tuition reduction and the amount charged at the full tuition rate in effect at the time each course began is deducted from the remaining credit balance prior to the refund payout

Post-Baccalaureate Certificate, Master's Degree, Post-Master's Certificate, and Doctoral Degree Payment Plans

Pay-in-Full (Length of Program)

Student may pre-pay the tuition for their entire degree program at the beginning of their program at the University.

Pay-by-Course

Tuition is due at the time the student requests their course(s). The University reserves the right to change tuition rates, as it deems necessary.

University Payment Plan

This monthly payment plan covers the direct University tuition costs for each course

- At the time of the student's Course Request, a payment plan is initiated by the student requiring monthly payments made directly to the University
- Students cannot register for a new course until all outstanding tuition and fees balances are paid in full
- The University reserves the right to change tuition rates as it deems necessary

Procedural Steps for the University Payment Plan:

Step One: At the time attendance is confirmed in the course, the student submits the initial payment plan fee and schedules the subsequent monthly payments as required by the payment plan. The first payment and payment plan fee are processed on the eighth (8th) day of the course.

Step Two: The student's two remaining monthly payments will be processed in 28-day increments beginning 36 days from the start of the course.

Other Important Details about University Payment Plans:

- The student's credit card on file is charged automatically each month until tuition and fees for the term are paid in full
- Fees: A \$25 fee will be charged for each month that a payment is not received on time
- If a credit card payment is declined or a check is returned due to insufficient funds, a \$25 Declined Credit Card or Returned Check Fee will be charged.
- If a student who has prepaid tuition withdraws or is dismissed from their program prior to graduating, any tuition reduction applied to such tuition prepayment is invalid
 - The student is charged the applicable tuition for all completed courses based on the full tuition rate in effect at the time each course began
 - The difference resulting from any tuition reduction and the amount charged at the full tuition rate in effect at the time each course began is deducted from the remaining credit balance prior to the refund payout

Application and Forms

The financial aid process begins when a student indicates their interest in financial aid during the application process and discusses their intent with an Academic and Finance Advisor. Students may be eligible to receive Federal Student Aid (FSA) funds once they have completed the entire financial aid process.

Forms

FSA forms, applications and/or instructions for applying are available on the FSA website at <https://studentloans.gov>. This site is a resource of information from the U.S. Department of Education about how to apply for and manage student loans. These forms and instructions include, but are not limited to:

- Free Application for Federal Student Aid (FAFSA) is a need analysis document published by the Department of Education
 - Students must complete the FAFSA and receive a valid federal output document in order to be eligible for Title IV funds
- Federal Direct Loan Master Promissory Note for Federal Direct Loans and/or PLUS or GradPLUS loans are required only of those students interested in borrowing through the William D. Ford Direct Loan Program
- Entrance Counseling is required for all first time borrowers and first time students at any post-secondary education institution

Students must complete these applications, forms, and processes electronically in order for the SFS Department to determine eligibility.

Application Process

FAFSA

Each applicant requesting federal financial aid must have a current and valid Institutional Student Information Report (ISIR) on file with the University and the U.S. Department of Education. The FAFSA must be completed on-line at: www.fafsa.ed.gov.

From the application data, the SFS department obtains the Expected Family Contribution (EFC) and makes a preliminary determination of Federal Pell Grant eligibility. The application data is also used to determine the amount of a student's Federal Direct Loan eligibility.

A FAFSA is required for each award year in which a student wishes to receive aid, but in some cases, an ISIR may be used for multiple award years. Students starting courses before June 30, 2023 may complete the 2022/2023 FAFSA. New students starting courses after June 30, 2023 must complete the 2023/2024 FAFSA.

Verification

Students selected for Verification must complete a Verification Worksheet. In most cases, a completed Verification Worksheet is sufficient to complete Verification when students use the IRS Data Retrieval Tool available when completing the FAFSA online.

Additional information may be needed to be verified depending on which verification group a student is placed in. See the [Verification](#) section of the Catalog for a list of the verification groups and corresponding information that must be verified.

Master Promissory Note (MPN)

In order to be eligible to receive a Direct loan, a student must sign an MPN. The MPN will be completed by the student on the MPN web site, which will include the Borrower's Rights and Responsibilities.

Under the multi-year feature of the MPN for Direct loans, students are able to obtain additional loans without having to sign a new MPN for each academic year. However, a new MPN will be required at the University in the following situations:

- No disbursements were made on the MPN within 12 months of the date the borrower signed the MPN or
- Ten years have passed since the date the student signed the MPN; if a portion of the loan is made on or before the ten-year limit on the signature date, remaining disbursements of that loan can be made

The Financial Aid Office can refuse to certify a student's loan application on a case-by-case basis, if the reason is documented for its action and the office provides the reason to the student in writing.

Entrance Counseling

Entrance counseling is required before students can receive a first Direct Loan as an undergraduate student, or a first Direct Graduate PLUS Loan as a graduate student. Student access entrance counseling by logging in to www.StudentLoans.gov using their FSA ID. Additional Loan counseling is required for students borrowing Graduate PLUS loans with endorsers or adverse credit history.

Financial Aid History

Prior to disbursing FSA program funds, the University will check the financial aid history for a student who has received aid at another institution. This will be done by reviewing the financial aid history from the National Student Loan Data System (NSLDS).

Verification

Verification is the selective confirmation of certain student and parent-reported data (for dependent students). Applications are selected for verification either by the Central Processing System (CPS) or by the Student and Financial Services (S&FS) team. The Financial Aid Office verifies all applications selected by the CPS. Any Institutional Student Information Record (ISIR) may be selected for verification, even if the prior ISIR was not selected.

On a case-by-case basis, the SFS team may institutionally select an application for verification if there is a discrepancy or a condition that is unusual and warrants review.

To minimize award notification updates and post-award questions, the University packages and disburses funds only after completing any necessary verification. The verification process must be completed for selected applicants before any Title IV aid (excluding PLUS and Unsubsidized Direct loans if those loans represent the only award) will be disbursed. A student will receive an updated award letter if, based on verification documentation, Title IV award amounts have changed.

Information that must be verified and the acceptable documentation for students selected for verification are determined annually and published before the start of an award year. In accordance with the new regulation, the University may verify different items from year to year.

Student Notification of Verification

Applicants selected for verification will be notified via email notice of:

- The documentation needed to satisfy the verification requirements
- The student responsibilities with respect to the verification application information, including the deadlines for completing the process and the consequences of failing to complete the process
- The notification methods if the award letter changes as a result of verification and the time frame for such notification
- When the verification process is complete

The Financial Aid Office will provide a written verification notice to the student of the documents required to complete the process. The student must submit these documents to the Financial Aid Office in order to receive any Title IV aid for the award year.

Students cannot avoid the verification process by choosing to decline a Pell Grant or Subsidized Direct loan, resulting in Unsubsidized Direct funds only.

Submission of Verification Documents

In most cases, a completed Verification Worksheet is sufficient to complete verification, when the student uses the IRS Data Retrieval Tool available when filling out the FAFSA online. As a practice, and unless the student is selected for the verification process, the Financial Aid Office does not request Form W-2 Wage and Tax Statements with tax transcripts. W-2 forms are only requested when determining a separation of income, making a professional judgment, when the student is a nontax filer, and/or resolving conflicting data.

In the event the student has a qualified IRA rollover the University will request a written statement from the tax filer indicating the amount of the distribution that was included in the IRA rollover.

A student must submit all verification documents by the earlier of 120 days after the last day of the student's enrollment or by the deadline published in the *Federal Register* (generally at the end of September following the end of the award year). Verification is considered complete when all requested documentation has been received, all errors have been corrected, and a valid ISIR is on file.

If required verification documentation is not submitted by the deadline, the student will not be eligible for any Title IV aid for the period of time the selected ISIR was used to determine eligibility.

Once a student is no longer enrolled, they may still submit verification documentation (using the deadline above) and receive a late disbursement if, during the time they were enrolled, the U.S. Department of Education had processed an ISIR with an official Expected Family Contribution (EFC). If the EFC changes based on the documentation received, any Pell grant award will be based on the higher EFC. As a reminder if the student is a Pell Grant recipient, certain Lifetime Eligibility Used (LEU) restrictions may apply.

Verification Exclusions

Applicants who fall into the following categories are exempt from the verification requirements unless there is conflicting data present in the file. Use of verification exclusions will be documented in the applicant's record.

- Spouse Unavailable – applicant's data must still be verified according to other requirements
 - This exception is only for spousal data in which the:
 - Spouse is deceased or mentally incapacitated
 - Spouse is residing in a country other than the United States and cannot be contacted by normal means
 - Spouse cannot be located because their address is unknown and the applicant cannot obtain it
- Parents Unavailable – applicant's data must still be verified according to other requirements
 - This exception is only for parental data in which the:
 - Applicant's parents are deceased or mentally incapacitated
 - Parents are residing in a country other than the United States and cannot be contacted by normal means
 - Parents cannot be located because their address is unknown and applicant cannot obtain it
- Death of a student - if an interim disbursement has been made and the student dies before verification is completed, no further verification is required
 - No additional funds can be disbursed, including disbursement to any of the student's beneficiaries
- The University re-verifies students who may have completed the verification process for the same award year while attending another institution
 - An exception is made for undergraduate students who transfer from Rio Salado Community College
- The applicant is eligible to receive only unsubsidized student financial assistance
 - The University must still verify the student's identity and collect the statement of educational purpose for students selected for V4 and V5 verification
 - The University is not required to verify proof of high school completion status for students selected for V4 and V5 verification because its admission process requires an academic transcript that indicates the student completed at least a two-year program that is acceptable for full credit toward a bachelor's degree
- Not a Title IV Recipient – if a student will not be receiving federal student aid for reasons other than the failure to complete verification, verification is not required

If any of these exclusions apply, the appropriate documentation is maintained in the student's file.

Verification Tracking Groups

Students who are selected for verification will be placed in one of the six following groups. The group determines which FAFSA information must be verified.

V1 - Standard Verification Group

Students in this group must verify the following if they are tax filers:

- Adjusted gross income
- U.S. income tax paid
- Untaxed portions of IRA distributions
- Untaxed portions of pensions
- IRA deductions and payments
- Tax-exempt interest income
- Education tax credits

- Household size
- Number in college
- Supplemental Nutrition Assistance Program (SNAP) benefits, if indicated on the ISIR
- Child support paid by the student (or spouse), the student's parents, or both, if indicated on the ISIR

Students who are not tax filers must verify the following:

- Income earned from work
- Number of household members
- Number in college
- SNAP benefits, if indicated on the ISIR
- Child support paid by the student (or spouse), the student's parents, or both, if indicated on the ISIR

Graduate-level students who have V1 flags will not be required to provide tax/income information but will still need to provide a Statement of Educational Purpose.

V4 - Custom Verification Group

Students in this group must verify high school completion status and provide an identity/statement of educational purpose.

V5 - Aggregate Verification Group

Students in this group must verify high school completion status and provide an identity/statement of educational purpose in addition to the items in the Standard Verification Group.

Groups V2, V3, and V6 are reserved for future use by the Department of Education.

Verification Resolution

Separation of Income

To reflect a student's (or parents) financial situation properly when a change in family status occurs between the prior calendar tax year and the current time period, a Separation of Income form is required. This form enables the student (or parent) to assess the dollar amount of funds reported on the prior year tax return and/or FAFSA that are attributable to the student (parent).

This amount is then used in the EFC calculation, as it more accurately reflects the student's (or parents) financial situation.

Conflicting and Inaccurate Information

If the results of the FAFSA indicate that further verification is needed, such as citizenship proof, proof of non-citizen eligibility, or proof of registration with Selective Service, additional documentation may be required. The Financial Aid Office is required to resolve conflicting data if there is a reason to believe that any information on an application used to calculate the EFC is inaccurate.

Filing a Tax Extension

When a student files a tax extension, proof of the filed extension must be provided. This consists of the documentation the student received from the IRS when the extension was filed. Once the taxes have been filed, the student must provide a copy of the tax transcript to the Financial Aid Office. No interim disbursements of financial aid will be made for students who are selected for verification while they are completing the verification process.

Time Limits

- There is no time limit for evaluating information to determine if a conflict exists
- The University will resolve the conflict expeditiously
- The University will not disburse aid (or make additional disbursements of aid) until the conflict is resolved
- No further action is needed if
 - All aid for the period of enrollment has been disbursed
 - At the time of disbursement, there was no conflicting information
 - The student is no longer enrolled at the University and has not told the University they intend to re-enroll
- Post Withdrawal Disbursement: If aid remains to be disbursed, the University will resolve the conflict before making the late or post withdrawal disbursement

Handling Conflicts in Taxable Income

- Determine if the applicant/spouse/parent(s) were required to file a tax return
- Determine if the student/parent filed using the correct filing status
 - For example, one individual filed as Married Filing Separately, but both claimed Head of Household
- Determine if interest and dividend income or capital gains are reported on the income tax return, but there are no assets are reported on the FAFSA
- Compare the verification worksheet and the tax transcript to the FAFSA/ISIR
 - Inconsistent information represents conflicting information
 - If the FAFSA or the ISIR disagrees with the income tax transcript, either the FAFSA/ISIR or the income tax return must be corrected
 - The Financial Aid Office can insist the family submit a corrected tax return and then submit to the University an IRS generated tax transcript
 - Aid will not be disbursed until the conflict is resolved
- Determine if a conflict exists regarding the relationship reported in the exemption section of the tax return and other information reported
- Verify Social Security Numbers reported by student and/or parents
- Verify marital status reported by student and/or parents
- Determine if a person was claimed as a tax exemption by more than one person
- Determine if the applicant reported a low income figure
- Determine if untaxed income needs to be resolved

Resolution Documentation

The University is required to document the resolution regarding conflicting information, including what it determines the correct information to be. This may be confirmation that an earlier determination is correct.

Examples of documentation to support resolution of conflicting information include:

- A signed federal tax transcript
- A letter from the tax preparer or accountant that adequately explains the situation
- A letter from the IRS
- A signed statement from the student/spouse/parent(s)
- FAFSA/ISIR with information corrected by the student or
- An IRS generated letter to reflect the data from an amended tax return

Referral of Fraud Cases

Suspicion of financial aid fraud should be reported to the Human Resources and Student & Financial Services leadership teams. The University refers for investigation to U.S. Department of Education's Office of Inspector General (OIG) any credible information indicating that a Title IV aid applicant, school employee, or third-party servicer may have engaged in fraud or other criminal misconduct in connection with the Title IV programs.

Database Matches

Database matches requiring clearance of Reject or C-Codes fall into six categories and must be resolved prior to award and disbursement of Federal Student Aid (FSA).

- Selective Service
 - Data match
 - Registration
- Department of Homeland Security (DHS)
 - Primary verification of citizenship
 - Secondary verification of citizenship
- Social Security Administration (SSA)
 - Social Security Number (SSN)
 - Citizenship
 - Date of Death
- Veteran's Affairs (VA) - Veteran Status
- National Student Loan Data System (NSLDS)
 - Default
 - Overpayment
 - Financial Aid History
- Department of Justice (DOJ) - Drug Abuse hold file

Students with a Database match, Reject, or C-Code are notified via their Student Aid Report (SAR). The Financial Aid Office also sends a written notice to the student requesting any documents required to complete the process.

The student must submit these documents to the Financial Aid Office in order to receive any FSA for the award year.

Documentation received requiring corrections to the Institutional Student Information Record (ISIR) will be used as the source for corrections by the Financial Aid Office. The Financial Aid Office will hold documentation used for resolution on file.

Selective Service

Males in the United States born on or after January 1, 1960 are required to register with the Selective Service between the age of 18 and 25. To resolve a Selective Service match, the student must provide specific information.

- If still between the ages of 18 and 25, provide proof of registration with Selective Service
- If beyond the age of registration and did register when eligible, provide proof of registration
- If beyond the age of registration and did not register, provide proof that they were exempt
- If active in the armed services and on active duty, provide a copy of a current Military ID
- If a former member of the armed services, provide a copy of the DD214 long form showing a discharge other than dishonorable
- If beyond the age of registration and did not register and were not exempt, provide the Financial Aid Office with documents to show that the failure to register was not knowing or willful; eligibility to be determined through Professional Judgment.

Department of Homeland Security (DHS)

To be eligible for Title IV aid, a student must be a U.S. citizen, or eligible non-citizen as qualified through the United States Citizenship and Immigration Services (USCIS) within the DHS. Eligible statuses are:

- U.S. citizen or national
- U.S. permanent resident
- Citizens of the Freely Associated States: The Federated States of Micronesia and the Republics of Palau and the Marshall Islands
- Other eligible noncitizens

If a parent wants to take out a PLUS loan for a dependent undergraduate student, both the parent and the student must be U.S. citizens or nationals, or eligible noncitizens.

When students complete their Free Application for Federal Student Aid (FAFSA) the Central Processing System (CPS) will match the student's information to validate the student's name, date of birth (DOB), U.S. Citizenship status, Social Security number (SSN), and possible date of death.

For proof of citizenship, a student will need to provide a copy of one of the following:

- U.S. Birth Certificate
- Certificate of Birth Abroad
- Certificate of Citizenship
- U.S. Passport
- Certificate of Naturalization

Older versions of the Certificates of Naturalization and Citizenship instruct the holder not to photocopy the document. The USCIS has advised that these documents may be photocopied for lawful purposes, such as documenting eligibility for Title IV aid.

If the student is an eligible noncitizen, they will need to provide at least one of the following:

- I-94 or I-94A stamped "Processed for I-551"
- I-151 Receipt Card
- I-151 Resident Alien Card
- Machine Readable Immigration Visa (MRIV)
- Foreign Passport stamped "Processed for I-551"

This list is not inclusive of all documents that may resolve a DHS match for eligibility.

Should DHS not confirm eligibility at Primary Verification, CPS will attempt automated Secondary Confirmation from DHS. The Automated Secondary Confirmation process may take as little as 5 days but no longer than 15 business days. If the student does not pass automated Secondary Confirmation and still wants Title IV aid, the Financial Aid Office will initiate the paper Secondary Confirmation process to resolve the discrepancy.

Secondary Confirmation performed by the Financial Aid Office requires the student to provide proof of their immigration status and the Financial Aid Office then completes the G-845 form and submits the form to USCIS with the appropriate immigration documents from the student.

Social Security Administration (SSA)

The purpose of the SSA database match is to verify that the student's SSN, DOB, and name reported on the FAFSA match the SSA records. The SSA database match will also verify citizenship in conjunction with the USCIS.

If the student's SSN is not found in the SSA database, the student's FAFSA application will be rejected and the student will receive instruction on their SAR to correct their SSN. SSA rejects can occur when:

- The student reports the wrong SSN on the FAFSA
- There is an error in the SSA database
- No match of SSN to name or DOB
- Name, DOB, or signature are missing from the FAFSA
- The student reports an invalid SSN
- The SSN has an associated date of death

Students from the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau are not required to provide SSNs, but are instead assigned an identification number by CPS when indicating their state of legal residence.

Means of resolving SSA database codes include, but are not limited to:

- The student/parent making corrections directly to the FAFSA via Student Aid Report (SAR) or FAFSA on the web (FOTW), if fields were left blank on the ISIR or were entered in error
- Providing a copy of the student's/parent's birth certificate
- Providing a copy of the student's/parent's Social Security card
- The student/parent contacting the SSA to update SSA records

Veteran's Affairs (VA)

FAFSA information is also sent via CPS to the Department of Veteran's Affairs for a status match. If the student answers 'Yes' to the FAFSA question asking if they are a Veteran, the VA scans its databases to see if it considers the student to be a veteran. There is no minimum amount of time the student has to serve in order to be considered a veteran.

Criteria for a student to meet Title IV aid requirements as a Veteran are:

- The student has served in the U.S. Armed Forces (U.S. Army, Navy, Air Force, Marines, or Coast Guard) and has been on active duty (does not include those in the Reserves that have not been called to active duty)
- The student was released from the military under a condition other than dishonorable
- The student is currently serving in the Armed Forces, provided documents confirm intended release prior to the end of an award year. The student has attended a U.S. military academy or U.S. preparatory school (U.S. MAPS or NAPS, not high school academies) for at least one day and was released under conditions other than dishonorable.
 - Students currently attending a U.S. military academy or ROTC students are not veterans
- The student is a member of the Reserves or Coast Guard, provided the student has been called to active duty for purposes other than training
- The student has served in the Reserves or Coast Guard and has been discharged for any reason other than a dishonorable discharge

The student may be asked to provide documentation to substantiate their Veteran status if the VA returns a C-Code for non-match. Items that may be requested to resolve veteran status include:

- DD214, Report of Separation
- A letter or memo from a commanding officer stating the intent to release the student prior to the end of the award year
- A letter from the Department of Veterans Affairs that states its records have been updated to show the student is a veteran

National Student Loan Data System (NSLDS)

NSLDS records the financial aid history of a student across all schools where they may have been awarded financial aid funding in loan or grant form. When the student applies using the FAFSA, CPS will match the student to NSLDS.

Database matches from NSLDS will require resolution from the student prior to being offered any award from the Financial Aid Office. The following is a list of possible database matches that require resolution:

- The student is in default on a federal student loan
- The student owes on an overpayment on a federal student loan or grant
- The student has exceeded annual or aggregate loan limits
- A match is found for SSN, but does not match the student name or DOB
- The student has had at least one federal student loan discharged due to disability

The following Non-Database Matches require resolution if the University or the Financial Aid Office is aware of the situation specific to a student:

- The student has been convicted of, or has pled no contest or guilty to a crime involving fraud in obtaining Title IV aid.
- The student is subject to a judgment lien for a debt owed to the United States (such as a lien from the Internal Revenue Service on a student's property for failure to pay federal tax debt).

Means to resolve NSLDS matches include but are not limited to the following:

- If the SSN is found but name and DOB do not match:
 - A copy of the student Social Security Card
 - A copy of the student Birth Certificate
- If a previous loan was discharged due to disability:
 - A student and Physician statement indicating the student may engage in substantial gainful activity
 - Student statement acknowledging that they are aware any new federal loans may not be discharged on the basis of present impairment unless the condition substantially deteriorates meeting the definition of total and permanent disability
- If related to defaulted loans or overpayments
 - A copy of satisfactory repayment from the loan holder(s) from the student

Department of Justice (DOJ)

If the student receives a Drug Abuse/Drug Conviction C-Code or reject code from CPS it may indicate that there is a problem with how the student answered the drug conviction question on the FAFSA. Student convicted of a federal or state offense of selling or possessing illegal drugs while receiving federal student aid may still be eligible for federal student aid, and if not, may still be eligible for state or institutional aid.

The question asks if the student has ever been convicted of possessing or selling illegal drugs while the student was receiving federal student aid.

If the student answers yes or leaves the question blank the student will be required to complete the Drug Abuse/Drug Conviction Worksheet to determine if there was a drug conviction and if it affects the student's eligibility for aid.

Student denied eligibility for an indefinite period can regain it only after successfully completing a qualified drug rehabilitation program or if a conviction is reversed, set aside, or removed from the student's record so that fewer than two convictions for sale or three convictions for possession remain on the record. In such cases, the nature and dates of the remaining convictions will determine when the student regains eligibility. It is the student's responsibility to certify to the Financial Aid Office that they have successfully completed the rehabilitation program; as with the conviction question on the FAFSA, the Financial Aid Office is not required to confirm the reported information unless there is conflicting information.

Student Budgets

Student budgets are an important component in the financial aid process. Standard student budgets are used to award financial aid by reflecting the cost of attendance for the average student population at a modest, but adequate, standard of living. The Student and Financial Services Team approves special budget considerations for additional costs on a case-by-case basis as covered through a Professional Judgment decision.

Direct and Indirect Costs

Students apply for financial assistance to help pay for costs related to receiving an education at the University. Some costs are direct charges such as tuition, books, and fees, while other costs are considered indirect costs such as housing, utilities, food, and other incidental personal expenses. Indirect costs are included in the student budget because they are costs a student must consider when determining the expense to attend the University. The student may apply for student financial assistance to help cover education-related expenses such as these.

How Budgets Are Derived and Updated

The University reviews student budgets each year to determine current and reasonable expenses to attend the University. The University has chosen to use CollegeBoard guidelines, based on data from the most recent Consumer Expenditure Survey (CES) and the Indexes of Comparative Costs, both produced by the U.S. Bureau of Labor Statistics. Because a standardized budget is used, students are not asked to provide receipts to prove expenses. The budget will not be increased unless unusual or exceptional circumstances exist and are approved through a Professional Judgment decision.

A student budget consists of anticipated charges. These charges include average tuition and fees based on degree level, average books and supplies, and an estimated amount for indirect costs. Indirect costs include items such as room and board, transportation, and miscellaneous personal expenses. The institution uses a standardized amount for indirect costs to determine financial aid eligibility.

There are times when students have additional educational expenses based on program requirements. The University will consider adjustments to cost of attendance in these situations, if requested by a student, on a case-by-case basis.

Costs in the budget include:

- Tuition and fees: The average tuition amount for the loan period is based upon degree level, mandatory fees including a one-time learning management fee, and estimated loan fees
- Books, supplies, transportation and miscellaneous personal expenses; these expenses are based on estimates from CollegeBoard
- Room and board: The standardized amount is based upon the student attending a distance education University; it includes the estimated cost for such things as rent, utilities and food

2023-2024 Cost of Attendance

Cost of attendance is a figure used by the Financial Aid Office to help determine your financial aid eligibility. The cost of attendance is an estimated figure that captures direct and indirect expenses you may incur while in school.

One to One Model (Formerly NCU) for Non-Term Programs

Degree Level	Undergraduate	Master's/Post-Baccalaureate	Doctoral/Post-Master's
Tuition Average:	\$11,064	\$14,982	\$19,650

Learning Management Fee (Charged once per program):	\$450	\$450	\$450
Books, Course Materials, and Equipment:	\$1,720	\$1,290	\$1,290
Dependent & Independent Off-Campus Housing & Utilities:*	\$8,332.66	\$8,332.66	\$8,332.66
Food** (without meal plan):	\$3,571.10	\$3,571.10	\$3,571.10
Transportation:	\$2,470.60	\$2,470.60	\$2,470.60
Miscellaneous Personal Expenses:	\$8,085.60	\$8,085.60	\$8,085.60
Loan Fees:	\$132	\$132	\$132
Total Cost of Attendance:	\$35,825.96	\$39,313.96	\$43,981.96

*On-Campus Housing & Utilities is not offered by National University

**Meal Plans for food are not offered by National University

One to One Model (Formerly NCU) for Term Programs

Degree Level	Juris Doctorate: Fall-Spring	Juris Doctorate: Summer-Fall or Spring-Summer
Tuition Average:\$18,928	\$14,982	\$14,196
Learning Management Fee (Charged once per program):	\$450	\$450
Books, Course Materials, and Equipment:	\$592	\$592
Dependent & Independent Off-Campus Housing & Utilities:*	\$8,332.66	\$8,332.66
Food** (without meal plan):	\$3,571.10	\$3,571.10
Transportation:	\$2,470.60	\$2,470.60
Miscellaneous Personal Expenses:	\$8,085.60	\$8,085.60
Loan Fees:	\$132	\$132
Total Cost of Attendance:	\$42,561.96	\$37,829.96

*On-Campus Housing & Utilities is not offered by National University

**Meal Plans for food are not offered by National University

Budget Restrictions

Certain student categories are restricted with regard to allowable budget components:

Student Category	Restriction(s)
Correspondence students	N/A - The University is an online education institution and does not offer correspondence courses
Incarcerated students	<ul style="list-style-type: none"> • Are limited in COA determination to tuition and fees, required books, and supplies • Are ineligible for Federal Student Aid (FSA) loans • If in a federal or state penal institution are ineligible for Pell grants
Less-than-half-time students	N/A - All students at the University are considered full-time.
Active Military Students and Students Receiving Military Tuition Assistance	Active Military students and students receiving military tuition assistance may have reduced budgets to allow for BAH payments and reduced tuition, when applicable.
Employee Voucher	Employees with approved vouchers are charged for tuition - therefore the student's budget may be adjusted to ensure the student does not exceed COA.
Students using Title IV funding concurrently at another institution.	The University will only award direct cost to student using Title IV funding at another institution.

Budget Appeals

A written appeal can be submitted to the Student Financial Services Team if the student believes they have unusual expenses not reflected in the standard budget. The appeal letter must include a description of the unusual circumstances and in some cases, additional documentation may be required. The Student Financial Services Team will notify the student of the decision.

Awarding/Packaging Financial Aid

The University's institutional packaging philosophy ensures students are awarded aid from the Title IV student financial assistance programs in a consistent and equitable manner. Students are informed of the amount of Title IV aid for which they are eligible. A member from the Financial Aid Office will counsel the student regarding their rights and responsibilities. It is the student's decision to determine the amount of student loan debt they believe is appropriate for them to cover their education costs, which may include direct and indirect costs.

Federal financial aid awards are intended to meet the student's level of financial need. Financial aid recipients who qualify can expect to receive a Pell grant (a grant based on financial need) and scholarships first in order to reduce future loan indebtedness. The Pell grant program is available for students in an undergraduate program if the student meets all other eligibility criteria.

Packaging Overview

The combination of Title IV student financial aid programs offered to a student is referred to as packaging. Students are packaged with federal aid after all required documentation has been received, including an ISIR. An ISIR is accepted for release of payment from Title IV federal student financial aid programs when any conflicting information is resolved, additional information requested by the U.S. Department of Education in the ISIR is provided, and/or when students have completed the verification process.

Title IV federal student financial aid is awarded based on an academic year. For graduate students, the academic year is at least 18 credits and at least 30 instructional weeks. For undergraduate students, the academic year is at least 24 credits and at least 30 instructional weeks.

Estimated Financial Assistance

Estimated Financial Assistance (EFA) is the estimated amount of assistance for a period of enrollment that student (or Parent on behalf of a student) will receive from Federal, State, institutional, or other sources, such as scholarships, grants, net earnings from need-based employment, or loans. EFA does not include those amounts used to replace the expected family contribution (EFC). However, if the sum of the amounts received that are being used to replace the EFC exceed the EFC, the excess amount must be treated as EFA.

Note: The University's institutional research awards are not EFA because: the award is not considered a payment toward institutional charges or educational expenses included in the cost of attendance (COA); the award is not processed through a student's account or posted to a student's ledger; and the award is not contingent upon a student's enrollment at the University. Students are encouraged to seek assistance from outside resources. However, if, at any time during the award period, a student receives additional EFA that was not considered in calculating the student's eligibility, and if the additional EFA combined with the expected financial aid exceeds the student's need, the amount in excess of the student's need is considered an overaward.

The University's treatment of overawards in the Direct/Direct PLUS programs depends on whether the loans have been fully disbursed.

If the University discovers there's going to be an overaward before the Direct Loan funds are disbursed, the University will eliminate the overaward through the packaging process by canceling/reducing the Direct Loan, or by canceling/reducing aid over which the University has direct institutional control.

If the University discovers the overaward situation after the Direct Loan funds are disbursed, there is no Direct Loan overaward that needs to be addressed.

Federal Grants & Loans

Federal Pell Grants

All undergraduate students are eligible to apply for a Federal Pell Grant before any other source of Title IV aid. The University disburses a Pell Grant based upon an annual award for the academic year according to the student's academic pace.

The student's official Expected Family Contribution (EFC) from a valid Institutional Student Information Report (ISIR) is used in conjunction with the student's cost of attendance to determine the amount of the scheduled award.

There is a Lifetime Eligibility Used (LEU) limit for students eligible for a Pell Grant. If the sum of all Pell Grants received for multiple years equals or exceeds 600% of Pell eligibility for that award year, the student may no longer receive Pell Grant funding. Similarly, a student whose LEU is greater than 500% but less than 600% remains eligible for Pell but will not receive a full award the following year. The amount of Federal Pell Grant funds a student may receive over his lifetime is limited to the equivalent of six years of Pell Grant funding. Since the maximum amount of Pell Grant funding a student can receive each year is equal to 100 percent, the six-year equivalent is 600 %.

Lifetime Eligibility Used (LEU):

The U.S. Department of Education keeps track of a student's LEU by adding together the percentages of the student's Pell Grant scheduled awards received for each award year. When a student is close to the LEU or exceeds the LEU, a comment code will be noted on the SAR.

For University undergraduate students, an academic year consists of a minimum of 24 credits and 30 instructional weeks. Within each academic year, there are two payment periods. The student's award for each payment period is calculated as follows:

Scheduled Award X	Credits in Payment Period
	Credits in the student's Borrower-Based Academic Year

When a payment period falls into two different award years, it is referred to as a crossover payment period. The student can be paid from either award year as long as he has a valid ISIR from that award year. If more than six months of a payment period fall within an award year, the payment should be made from that award year. The decision about which award year to use is usually based on the student's remaining eligibility in the earlier award year.

Eligibility for a Pell Grant award is determined using the following calculation:

$$\text{Cost of attendance} - \text{EFC} = \text{student's financial need}$$

Direct Loans

Students may receive subsidized and unsubsidized Direct loans, depending on need and eligibility, to meet educational costs at the University.

Eligibility for a subsidized Direct loan is based on need. Graduate students are not eligible for subsidized Direct loans. A student's need is calculated as follows.

$$\text{Cost of attendance} - \text{EFC} - \text{Pell award} - \text{estimated financial assistance} = \text{student's need}$$

Eligibility for an unsubsidized Direct loan is based on the cost of attendance. Eligibility is calculated as follows:

$$\text{Cost of attendance} - \text{Pell award} - \text{estimated financial assistance} - \text{subsidized Direct loan} = \text{student's eligibility for unsubsidized Direct loan}$$

Based on the student's grade level, they may borrow up to the annual maximum loan amounts available. If a student does not qualify for a subsidized Direct loan, he may qualify to borrow an unsubsidized Direct loan. For undergraduate programs greater than an academic year in length with a final period of enrollment shorter than an academic year, loan award amounts are prorated according to the following formula:

Annual loan limit X	Credits in Payment Period
	Credits in student's Borrower-Based Academic Year

A graduate student's academic year must be a minimum of 18 credits and 30 instructional weeks. Graduate loan awards are not prorated for less than an Award Year.

Note that an unsubsidized Direct loan can be used to offset all or part of the EFC.

First-time borrower's eligibility for Direct Subsidized loans may not exceed 150% of the length of the borrower's educational program. Under certain circumstances, first-time borrowers who exceed the 150% limit lose the interest subsidy on their subsidized loans.

PLUS Loans

A parent of a dependent student may request up to the student's cost of attendance less any estimated financial assistance in the form of a PLUS loan.

A student or parent who owes a repayment on a Federal Student Aid award or is in default on a federal student loan is not eligible for additional federal student aid.

Award Package Notification and Appeals

Students receive notice of their financial aid amounts via a financial aid offer. Students are also informed of their right to make changes and the process for requesting changes in the financial aid offer.

A student may request a change to the award by the later of the first day of the payment period or 14 days after the student is notified of the award. The student may make changes to the offered amounts by contacting the Student and Financial Services Team.

Students who wish to appeal an awarded amount may do so by contacting the Student and Financial Services Team. The student's request must meet the requirements for a Professional Judgment, and the student must follow the Professional Judgment process.

The University does not disburse the loan until the borrower is notified of the proposed loan package and the time given to respond, 14 days, has elapsed. The borrower only needs to take action if they want to decline the loan or make adjustments to the amount of the loan.

Award Revisions

Once a financial aid offer has been issued to a student, an appeal or other circumstance may require a change to the original notification. The Student and Financial Services Team reviews a student's circumstances and, if appropriate, makes an adjustment to the award, and sends a revised financial aid offer as soon as possible. The revised award offer supersedes the original award notice, which is then no longer valid.

The Student and Financial Services Team routinely considers a revision in a student's aid package when any of the following occurs:

- There is conflicting information in the file
- There are changes resulting from verification
- An administrative error occurred
- There is a change to the student course schedule
- Additional funding has been identified

Overawards

An overaward occurs when the student's disbursed financial aid (federal, institutional, and outside aid) and other resources exceed the cost of attendance for the award period. There are several possible reasons why overawards occur:

- The student has additional resources greater than those used to calculate the award
- The Financial Aid Office has inadvertently made an error

In addition, the student may have intentionally deceived or misrepresented information in order to obtain funds. If a determination is made that an overaward has occurred because of fraud, the Financial Aid Office will report the suspected fraud to the Office of Inspector General of the U.S. Department of Education. Before reducing an aid package because of an overaward, the Financial Aid Office attempts to eliminate the overaward by:

- Increasing the student's budget using allowable expenses, or
- Adjusting the EFC or
- Adjusting undisbursed funds for the current payment period (all undisbursed financial aid funds are adjusted in the case of an overaward)

If eliminating the over award is not possible, the Financial Aid Office reduces aid in the next payment period and requests that the student be billed for any remaining amount due.

Professional Judgement

The Director of Student and Financial Services has the authority to exercise professional judgment based upon unusual and special circumstances on a case-by-case basis.

Professional Judgement Criteria & Process

Circumstances That May Justify a Professional Judgment

Professional judgment is an opportunity for the parent, student, or the University to account for exceptions in certain areas that might allow more financial aid eligibility. The goal of Professional Judgment is to consider whether current circumstances are hindering a student from receiving adequate financial assistance.

Following are some examples of reasons for which a student and/or parent may request a Professional Judgment, but these are not the only reasons why Professional Judgment may be appropriate:

- Job loss or income reduction
- Illness or death of a spouse
- Medical and dental expenses not covered by insurance
- Unusually high child/dependent care expenses
- Parents enrolled in college
- Elementary and secondary school tuition
- Early distribution from retirement plans
- Loss of benefit
- Roth IRA rollovers
- Male students who failed to register for Selective Service

Limits on the use of Professional Judgment

Professional Judgment may not be used to modify the EFC formula tables used in the EFC calculation.

Processing Requests for Professional Judgment

Student requests for Professional Judgment should be submitted to the Student and Financial Services Team.

All requests for the use of Professional Judgment are considered on a case-by-case basis and documented in detail in the student's file. If an adjustment is made, documentation includes the reason for the adjustment and how it relates to the special circumstances that have arisen.

Professional Judgment may be applied to adjust either the cost of attendance in the student budget or a data element in the ISIR. If the data element in the ISIR is adjusted, the University will use the resulting EFC consistently for all federal student aid funds awarded to undergraduate students.

An aid administrator's decision regarding adjustments is final and cannot be appealed.

Dependency Override

The Director of Student and Financial Services has the authority to exercise Dependency Overrides based upon unusual circumstances on a case-by-case basis.

Dependency Override Criteria & Process

Circumstances That May Justify a Dependency Override

Dependency Override is the process through which a student can appeal to have the dependency status as determined by the Free Application for Federal Student Aid (FAFSA) overridden due to unusual circumstances where the student is unable to contact a parent or where contact with parents poses a risk to such student.

Following are some examples of reasons for which a student may request a Dependency Override, but these are not the only reasons why it may be appropriate:

- Human trafficking, as described in the Trafficking Victims Protection Act of 2000 (22 U.S.C. 7101 et seq.)
- Legally granted refugee or asylum status
- Student's voluntary or involuntary removal from the parents' home
- Parental abandonment or estrangement
- Student or parental incarceration

Limits on the use of Dependency Override

Dependency Override does not apply to situations in which parents refuse to financially contribute to the student's education, are unwilling to provide their information, or do not claim the student as an income tax dependent, or for a student who demonstrates total self-sufficiency. In addition, the fact that a student's parents live in another country does not qualify as an unusual circumstance.

Processing Requests for Dependency Override

Student requests for Dependency Override should be submitted to the Student and Financial Services Team.

Disbursement Process

Definition of Disbursement and Disbursement Methods

A disbursement may be defined as the application of any aid source to the student account, including, but not limited to, Title IV funding, Veteran's benefits, State Grants, Private Loans, and institutional grants and scholarships.

The disbursement policy allows for consistent application to student accounts that have scheduled and awarded funding. The policy outlines the process for funding when the student falls outside of the standard disbursement timeline.

Students who elect to use Title IV Funding will be subjected to eligibility reviews at multiple checkpoints in the funding period. These checkpoints are implemented to ensure proper adherence to the policy and regulation. Students must meet eligibility requirements in order to receive subsequent disbursements within an aid year. Students must be making Satisfactory Academic

Progress and all required documents must have been submitted to the Financial Aid Office before any disbursement can be made.

Federal student aid funds are considered disbursed when they are credited to a student's account.

Academic Year Definitions:

- Undergraduate Academic Year – 24 semester credits and at least 30 instructional weeks
- Graduate Academic Year – 18 semester credits and at least 30 instructional weeks

Payment Period Definitions:

- Undergraduate Payment Period – 12 semester credits and at least 15 instructional weeks
- Graduate Payment Period – 9 semester credits and at least 15 Instructional weeks

An academic year consists of two payment periods. Each payment period is half of the credits and half of the weeks within the academic year. Students must complete both the credits and the weeks in the payment period to be considered to have completed the payment period.

Loan funds awarded for the academic year are equally awarded for each payment period. Pell Grant funds are awarded for each payment period within the Award Year.

Students must be making Satisfactory Academic Progress and all required documents must have been submitted to the Financial Aid Office before any disbursement can be made. The University reserves the right to make multiple disbursements within each payment period to align with the timing of charges being assessed.

Tuition and fees are charged to the account after the seven-day drop/add period and for which they have demonstrated participation in the course. More than one course may be taken at the same time, and therefore charges are accrued simultaneously.

Students must complete ½ of the semester credits AND ½ of the instructional weeks in the academic year before a subsequent payment period's disbursement of aid can be credited to their account.

Responsibility for Disbursement of Funds

Federal regulations require a clear and distinct separation of functions between the team authorizing FSA payments and the team disbursing FSA funds..

The Student and Financial Services Team ensures the accurate and appropriate awarding of aid. The Student and Financial Services Team also verifies the student's eligibility and enrollment status at the time of disbursement. The results of the review are then forwarded to the Accounting Team for funds to be either credited to the student's account or returned to the funding program.

The Accounting Team has the responsibility for disbursing and posting loan, grant, and scholarship funds to the appropriate student's account. The Accounting Team credits the student's account within three business days of receipt of the funds.

Disbursement Eligibility

For all students, the following items are reviewed to confirm disbursement eligibility:

- for Direct Loans, the student is enrolled at least half time and has a valid, linked MPN; and either entrance counseling has been completed
- for a student otherwise eligible for a Pell Grant, the scheduled disbursement will not cause the student to exceed his or her lifetime eligibility
- The Student is meeting Satisfactory Academic Progress or is approved for Financial Aid Probation.

- The ISIR does not have conflicting information or unresolved c-codes
- If a subsequent ISIR has been received, the above criteria apply and it will be reviewed to determine if any eligibility changes exist in reference to need-based aid eligibility
- If first disbursement in the student's second payment period, student has successfully completed at least half of the units and half of the instructional weeks as defined for the academic year

The University reserves the right to make multiple disbursements within each payment period to align with the timing of charges being assessed. Repeated courses due to unsuccessful grades may be paid for with Financial Aid depending on each student's individual aid availability. Repeated courses that have been previously passed are only able to be paid for with financial aid once.

Late Disbursements

Generally, if funds are received after the end of the loan or Pell period, if a student has withdrawn after successfully completing the payment period, or if the student has graduated, the student may be eligible for a late disbursement. Late Disbursements will be reviewed and processed once the qualification criteria has been validated and a student acknowledgment has been collected, if applicable.

Student eligibility for a late disbursement is contingent on the following:

Direct Loans and PLUS/Grad PLUS Loans:

- The loan must have originated on or before the end of the loan period or graduation date.
- The student must meet all other eligibility criteria (i.e., Satisfactory Academic Progress (SAP), started the loan period within 30 days, completed prior academic year, met admission criteria, etc.).
- The disbursement must be made within 180 days after the date the student becomes ineligible.
- In the case of a late second or subsequent disbursement of Direct Loan funds, the student must have graduated or completed the loan period for which the funds were intended.

Grants:

- A valid ISIR for the award year has been received prior to the student's withdrawal date, or the Department of Education's ISIR deadline dates, whichever is earlier.
- The student has met all other eligibility criteria (i.e. SAP, completed prior academic year credits, met admission criteria, and so on).
- The disbursement must be made by the Department of Education's payment deadlines for the given award year or within 180 days after the date the University determined that the student withdrew, whichever is earlier.
- If a student withdraws and it is determined during the return to Title IV calculation that they are eligible for more Pell than was disbursed, they will be offered a late disbursement.
- If there is no withdrawal date in the academic year or the student has graduated, the student may be paid retroactively for any completed payment periods subject to the above stated deadlines.

Additional Disbursement Information

Student and Parent Authorizations

Disbursing Title IV Funds to Pay Prior Award Year Educationally-Related Institutional Charges Other than Tuition, Fees, and Contracted Room and Board

Students are allowed to apply up to \$200 in FSA funding to prior year charges. In accordance with this, NU will hold up to \$200 in funding if the student has a prior period charge on their account at the time of disbursement. If the charges or for non-institutional charges, the student (or parent) must provide authorization.

Title IV Credit Balances

It is the policy of National University (NU) to issue credit balances within 14 days as required by the Department of Education. In accordance with Department of Education policy, NU determined TIV credit balances based on the charges for the period in question minus any disbursements during the same period. When the disbursements exceed allowable charges, a credit balance is created.

Students will be issued any credit balance owed for that course within 14 days of being posted to their student ledger.

In practice, NU does not hold Credit Balances on student accounts. Credit balance payments are made to students within 14 days of the credit balance creation.

Return of Title IV Funds

Title IV funds are awarded to a student under the assumption the student will attend the University during the entire period for which the assistance was awarded.

The University is required to determine whether any Title IV funds must be returned to the Federal Student Aid (FSA) programs when a student does not complete the period of enrollment in which the student is currently enrolled. For example, due to a student's withdrawal from the University, the University dismissing a student, not participating in a course for more than 28 consecutive days, or a student transferring to a substantially different program.

The percentage of earned and unearned portions of Title IV aid is calculated based upon the scheduled number of days in the period of enrollment and the date either in which the student withdrew from the University or when the student ceased participating in their course work for more than 28 consecutive days. For purposes of determining the percentage of Title IV aid earned, the date of withdrawal is determined to be the last date the student participated in a course. For students who have ceased participating in their course for more than 28 consecutive days, the University will record in the Return of Title IV calculation worksheet, as the date of determination, the 14th day after the last date the student participated in an academic-related activity.

As mandated by the U.S. Department of Education (ED), the Return of Title IV calculation determines what portion of Title IV funds, whether disbursed or could have been disbursed, that can be used to pay institutional and non-institutional charges.

For students subject to a Return of Title IV calculation, the calculation accounts for the initial charges that are assessed for the period of enrollment. Initial charges may only be adjusted by those changes the University makes prior to the student's withdrawal (for example, dropping a course unrelated to a withdrawal).

The following Title IV aid programs in which the University participates are covered in the Return of Title IV calculation and are referred to as the Title IV aid programs:

- Federal Pell Grant
- Federal Direct Loan (subsidized and unsubsidized)
- Federal Direct PLUS Loan (for parents of dependent students and graduate students)
- Iraq and Afghanistan Service Grant

If the calculation results in the return of funds, those funds will be returned first to the federal loan programs. If the remaining amount exceeds the amount of the loan disbursements, the remaining amount will be returned to the federal grant programs. The order, in which Title IV aid is returned, if required, is as follows:

Title IV Return Process

Order of Distribution

When the Return of Title IV calculation is complete, the University returns any unearned aid to the following sources, in the following order of distribution, up to the total net amount disbursed from each source:

1. Unsubsidized Federal Direct Loan
2. Subsidized Federal Direct Loan
3. Federal Direct PLUS Loan
4. Federal Pell Grant
5. Iraq and Afghanistan Service Grant

Withdrawal Date

The University determines when a student ceases to attend the institution. Determination occurs when:

- a student notifies the University of their intent to withdraw;
- the institution dismisses or administratively withdraws the student;
- the student ceases attending the institution;
- the student transfers/changes to a substantially different program; or
- a student fails to return from an approved Leave of Absence (LOA)

When a student fails to return from an approved LOA, the withdrawal date is the last date the student performed an academic-related activity.

Date of Determination (DOD)

For all students who have ceased participating in their course for more than 28 consecutive days, or officially withdrawn from enrollment, the University will record in the Return to Title IV calculation worksheet, the 14th day after the last date the student participated in the course, or the date the student requested to withdraw, for the DOD. For students who do not return from their LOA and do not notify the University, the date of determination is the last date of the student's LOA. For students on an approved LOA who do provide notification of their intent to not return, the DOD is the date the student notified the University that they would not be returning. For all students subject to a return, federal funds will be returned within 45 days from the DOD.

When a student ceases attending the institution, the withdrawal date is the last date the student performed an academic-related activity. The date of determination is:

- the date the student notified the University of their intent to withdraw;
- the date the University dismissed or administratively withdraws the student;
- the end date of an approved LOA;
- 14 days after the student's last date of attendance

The withdrawal process begins on the date of determination.

From the date of determination, the University makes no further disbursements of Title IV aid and holds any credit balances due the student until the Return of Title IV calculation is completed. The University returns funds within 45 days of the date of determination. The exception to this rule is if the student or parent (dependent student) is eligible for a post withdrawal disbursement of funds earned but not disbursed.

Calculation for the Return of Title IV Funds

The University performs all Return to Title IV calculations in a manner consistent with the rules and guidelines provided by ED.

Percent of Aid Earned - The percent of Title IV aid funds earned is based on the following formula:

Calendar days completed in the period of enrollment divided by the total calendar days scheduled in the period of enrollment, excluding days when the student was on an approved leave of absence or a regularly scheduled break of five or more consecutive days.

If the result (percentage of aid earned) is greater than 60 percent, then 100 percent of the Title IV aid funds disbursed, or that could have been disbursed, are considered earned, and funds need not be returned to the Title IV federal financial aid programs.

Dollar Amount of Aid Earned - If the Percent of Aid Earned is 60 percent or less, a return to the Title IV aid programs may be required and the University must determine the dollar amount of aid earned. The amount of Title IV aid funds earned is determined based on the following formula:

Percent of aid earned multiplied by the amount of aid disbursed and any aid that could have been disbursed during the period of enrollment.

Institutional Charges

Institutional charges are used to determine the portion of unearned Title IV aid that the school is responsible for returning. Institutional charges do not affect the amount of Title IV aid a student earns when they withdraw as per Step Three of the calculation. The institutional charges in the calculation are the charges that were initially assessed, or would be assessed, to the student for courses started within the period of enrollment.

Amount to be Returned

A comparison is performed to determine the amount of Title IV aid that must be returned to the federal aid programs. A comparison is made between two calculations and the lesser amount is the amount of unearned Title IV aid that must be returned to the federal student aid programs. These are the two calculations:

- A. The amount of Title IV aid earned is subtracted from the Title IV aid disbursed in the period of enrollment. This is the amount of Title IV aid that must be returned.
- B. The institutional charges for the period of enrollment are multiplied by the percentage of unearned Title IV aid calculated.

The University notifies the student via email regarding the funds that have been returned on their behalf. The Direct Loan Servicing Centers are informed of the student's date of withdrawal.

The amount of unearned Title IV funds the University must return when the student completes 60 percent or less of the period of enrollment is determined in the calculation. The amount of Title IV funds returned by the University reduces the student's outstanding Title IV student loan balance

Post-Withdrawal Disbursement

A post-withdrawal disbursement (PWD) may occur when the Dollar Amount of Aid Earned is greater than the amount disbursed. The amount for the PWD is determined by this formula:

The Dollar Amount of Aid Earned – (minus) the total Title IV aid disbursed for the period of enrollment.

If the amount is greater than zero, a PWD can be made if all other requirements are met.

The University sends eligible students an offer letter for any amount of a PWD that is not credited to the student's account within 30 days of the DOD. The offer letter will include:

- Fund source and amount of Title IV aid funds that make up the PWD
- Fund source and amount of Title IV aid funds that have been credited to the student's account
- An explanation that the student or parent may accept or decline some or all of the PWD that is not credited to the student's account
- An explanation that informs the student or parent that no PWD will be made if the student or parent does not respond within 14 calendar days of the letter date
- Instructions that the student or parent must submit the response in writing directly to the Student and Financial Services (S&FS) team by either e-mail or fax.

Post-Withdrawal Grant funds are always processed and made available before loan funds. Grant Funds are disbursed directly to the student account within 45 days of the date of determination.

The University disburses loan funds within 180 calendar days of the DOD. The amount the student is eligible for is determined at the time of the return calculation, and the amount of the Post-Withdrawal Disbursement may be less than the full eligibility amount if the student or parent accepts less than the total amount.

The student, or parent to whom a PLUS loan has been made, must accept the loan PWD offer within 30 days of the date of the offer letter. However, if the student (or parent/borrower on a PLUS loan) returns an accepted offer letter after 14 calendar days but within 180 days of the date of determination, the S&FS team will disburse funds.

Academic & University Policies

Educational Materials and Resources

Appropriate course materials, course syllabi, and course outlines are used for each course. Required course materials are indicated in the course syllabus by title, author, publisher, and ISBN. Students that opt out of the Course Materials Fee (CMF) are responsible for purchasing course materials identified in the syllabus they are issued for each course. Students that opt-in to the CMF will have materials provided for them. Note: required course materials, textbooks, or other readings are not eligible for interlibrary loan in the Library.

It is students' responsibility to make sure they purchase the primary course materials if they opt out of the CMF and or other textbook(s) and resources required in the syllabus the student is issued. Students must determine from their syllabus what course materials are required. The University may have more than one version of a particular syllabus issued to students. The University is not responsible for student purchases of course materials that do not match assigned syllabi.

The University partners with several online textbook suppliers. Students having difficulty finding required textbooks and course materials may contact their Academic and Finance Advisor or email bookstore@ncu.edu for assistance.

Program, Course Start Date

The program start date is the start date of the first course in the student's program. Courses are available to begin on Monday of each week.

Once a student is registered for a course, the start date may not be moved. To start the course at a later time, the student must drop the course and re-register. Compliance with the Attendance policy is mandatory regardless of any courses dropped or added.

Students may contact their Academic and Finance Advisor for assistance in determining the latest date they may start a course without violating the Attendance policy.

Coursework may not be submitted until the course start date.

Faculty Assignment Disclosure Policy

The University makes every effort to recruit the highest caliber of faculty available in their field of scholarship and assesses on a regular basis the standard of instruction provided by each individual faculty member. When enrolling for a course, students will be assigned an appropriate faculty member from the pool of instructors available; and a choice of instructor will not usually be possible. Similarly, faculty teaching research courses and acting as Chair of a Dissertation Committee will be decided by School Deans on the basis of appropriate qualifications and availability; however, in this circumstance, students are encouraged to approach faculty whom they would like to have serve on their Dissertation Committee and they to make requests for such assignments through their Academic and Finance Advisor. In these situations, students may express preferences for particular faculty members by consulting with their Academic and Finance Advisor, but the University has final authority over all teaching assignments.

Add/Drop/Withdraw Period

Students may add, cancel or withdraw from a course at any time. To cancel or withdraw from a course, students can contact their Academic and Finance Advisor at learnerservices@ncu.edu or call (888) 628-6904. Cancellation or Withdrawal will be effective on the date that the notice is received.

If a student wishes to add a course outside of the prescribed degree plan, they will take the course as a non-degree seeking student.

Students who withdraw from a course are subject to the grading policies and refund policy outlined in the Course Catalog and are responsible for repaying loans obtained plus interest, less the amount of any refund due under the refund policy.

Dropping a Course

Courses dropped during the first seven days of the course session, or 14 days for a term-based JFK School of Law at National University program will be issued a "DR" grade. Dropped courses will not be counted in the units attempted unless a student has posted attendance [in accordance with the University's Attendance policy] during the first seven days of the course.

A student may not receive more than three "DR" grades with attendance per degree program.

NOTE: Students begin earning Federal Student Aid (FSA) funds on their first day of attendance. Students may be eligible to receive a post-withdrawal/post-drop disbursement of the FSA funds earned but not yet received. To minimize the potential abuse of FSA funds, the University limits the number of "DR" grades with attendance a student can receive to a maximum of three per program.

Students who exceed the maximum number of DR grade with attendance may be administratively withdrawn from their program and prevented from registering for the next course until they have explained the reason for the multiple "DR" grades with attendance. It is then at the discretion of the University if the student will be allowed to continue in the program.

Once a student is registered for a course, the start date may not be moved. To start the course at a later time, the student must drop the course and re-register.

Students who discontinue a course after the seven-day drop period, or fourteen day drop period for term-based JFK School of Law at National University programs, are subject to the Withdrawal Policy.

Refunds of tuition for a dropped course will be made as described in the Financial Policies section of the catalog.

Attendance Requirements

The University requires students to be in attendance at least once every 28 calendar days from the last date of attendance.

When doctoral candidates are not actively enrolled in a course, they have limited communication with University support staff and may not engage in certain activities related to their research. Specifically, doctoral candidates must be actively enrolled in a course to have contact with their dissertation chair. Doctoral candidates must also be actively enrolled in a course in order to perform data collection or have any contact with their human subjects if their Institutional Review Board (IRB) application has been approved.

Note: Continual enrollment requirements are different for the Juris Doctor degree program and are outlined in the Juris Doctor Catalog & Handbook.

Academic-Related Activities

Academic-Related Activities (ARAs) are used to determine a student's official last date of attendance and corresponding enrollment status at the University. ARAs are also used to determine the effective date of active and withdrawn enrollment statuses. Academic-Related activities may include, but are not limited to:

- Uploading or completing an assignment (e.g., paper, project) in an online course
- Course related online quizzes
- Accessing academically related online content within or related to an online course
- Participating in the Discussion Forum section of an online course (e.g., commenting on a discussion question posted by the faculty member, providing feedback to another student), provided that the discussion is related to the course content

Note: Academic-related activities must be posted to an online course no later than Sunday at 11:59 P.M. Arizona time each week. See [Grading Policies & Procedures](#) for additional details on assignment deadlines.

Continuous Enrollment

To comply with continuous enrollment, all students must earn attendance at least once every 28 consecutive calendar days. Students who fall out of continuous enrollment will be administratively withdrawn from the University on the 29th day after their actual last date of attendance.

The Office of the Registrar' Student Records department is responsible for monitoring compliance with continual enrollment requirements. Academic and Finance Advisors are notified of administrative withdrawals for non-compliance and are responsible for deleting scheduled courses when students fall out of continuous enrollment.

Note: Students in JFK School of Law at National University programs are required to maintain regular (continuous) enrollment in their program. To maintain continuous enrollment, students must remain in compliance with attendance policies or petition for a Leave of Absence.

Non-Term Based Enrollment Status

The University recognizes the following program-level enrollment statuses:

Enrollment Status	Code	Definition
Active Full-Time	F	The student is enrolled and attending a course that meets the student's academic degree completion requirements. The student is actively attending class and the student's official last date of attendance based on academic-related activities does not exceed 28 consecutive days.

Active Less Than Half-Time	L	The student is enrolled and attending a course that does not meet the student's academic degree completion requirements, as determined by the institution, or the student is on administrative leave.
Leave of Absence	A	The student is on an approved Leave of Absence (LOA).
Withdrawn	W	The student has been withdrawn from the University. Withdrawal can be unofficial, official, or administrative.
Graduated	G	The student has completed all program requirements and degree is conferred.

Term-Based Enrollment Status

For the purpose of financial aid and enrollment verification enrollment status is determined by the number of credits per semester:

Enrollment Status	Undergraduate Credits per Term	Certificate Credits per Term
Full-Time (FT)	12	12
Three-Quarter Time (TQT)	9	9
Half-Time (HT)	6	6
Less-Than Half-Time (LTHT)	<6	<6

Credit Hours

National University recently merged with John F. Kennedy University and Northcentral University with the goal of providing a more holistic approach to student success and degree offerings to support the "Whole Human Education" experience. In part, due to this merger of three universities, National University currently offers degree plans that use "quarter" credit hours and degree plans that use "semester" credit hours. NU is working to consolidate all degree offerings using semester credit hours. Until then, students will need to refer to the university course catalog or speak with their academic advisor to confirm if their degree plan utilizes quarter or semester credit hours.

Semester Credit Hours

NU courses that award credits earned based on semester credits mostly carry 3-semester credits. It is expected that a student taking a 3-credit semester course will need to spend approximately 135-144 hours on learning experiences such as reading and study; research; faculty-student interaction; demonstration of defined learning outcomes through assignments, papers and projects; examinations; and assessment of performance.

Quarter Credit Hours

Courses designed using quarter credit hours divide the academic year into four 12-week quarters, each comprised of three 4-week classes. Under the current policy, 4.5 units of credit are awarded for courses.

Contact Hours: WSCUC accredited, undergraduate courses require 1 hour of classroom instruction (also known as direct faculty instruction or contact hours, including substantive interaction) and a minimum of 2 hours of out-of-class (non-contact hour) student work, per credit hour, each week for 10-12 weeks, or the equivalent amount of work over a different amount of time. (Note - If the accreditor updates this requirement, the following will be revised.)

At National University, this means that a typical, 4.5 credit hour course taught over 4 weeks, must include at least 2,700 minutes (45 hours) of student contact time spent "in" the course. (For fewer credits, divide these numbers appropriately; for more credits, multiply these numbers appropriately. Courses longer than 4-weeks will see these numbers spread over time.) This student-content, student-student, and/or student-professor interaction typically involves students working in the LMS itself. In the 4-week, 4.5 credit hour course model used at NU, this means that students should spend just over 11 hours per week working in and with fellow students, instructors, and course content such as discussions, simulations, watching videos, etc.

Non-Contact Hours: WSCUC expects individual programs and/or departments to make determinations above and beyond the base timeframe (called non-contact hours) with a minimum requirement of 2 hours of non-contact time for every 1 hour of contact time. (Ex: A typical week for a National University 1 undergraduate student should see approximately 11 hours of "in class" work with at least 22 hours of reading, writing papers, creating presentations, and other homework, etc.) Course Authors should seek guidance from department stakeholders for other non-contact expectations.

Student Workload

Active students enrolled in undergraduate courses may take a maximum of 12 credits at a time without Dean approval. Undergraduate students requesting to take more than 12 credits simultaneously must be approved by their school Dean.

Active students enrolled in graduate courses may take a maximum of 6 credits at a time without Dean approval. Graduate students requesting to take more than 6 credits simultaneously must be approved by their school Dean.

Grades

The University awards letter grades in recognition for academic performance in each course. Grade points are assigned to each academic performance grade, with the exception of S, U, R, and RD grades, and are used to calculate a Grade Point Average (GPA) for each student.

Academic Performance Grade Scale

Grades are based on the faculty member's academic judgment that the student has demonstrated a specified level of performance based on objective and subjective evaluations such as papers, presentations, assignments, examinations, projects, and discussions. Students are graded according to their individual performance in the course and not on a curve. Students are not compared with each other to determine a grade or performance ranking. Criteria for awarding grades for achievement may include, but are not limited to the following:

- Preparation of assignments, including accuracy, legibility and promptness;
- Contribution to faculty member-student discussions;
- Demonstrated understanding of concepts on exams, papers, assignments, etc.;
- Application of skills and principles to new and real-life situations;
- Organization, presentation, and professionalism of written and oral reports;

- Originality and reasoning ability demonstrated in working through assignments; and
- Meeting minimum standards for all rubric criteria on the required deliverable

Grade points are assigned to academic performance grades as indicated and are used to calculate a Cumulative Grade Point Average (CGPA) for each student:

All Courses	Undergraduate Courses Only
A = 4.00	C- = 1.66
A- = 3.66	D+ = 1.33
B+ = 3.33	D = 1.00
B = 3.00	
B- = 2.66	
C+ = 2.33	
C = 2.00	
F = 0.00	
S = N/A	
U = N/A	

NOTE:

- S (Satisfactory) denotes satisfactory progress in a course but does not contribute to the calculation of GPA
- U (Unsatisfactory) denotes unsatisfactory progress in a course but does not contribute to the calculation of GPA

Grading Policies & Procedures

Minimum Grade Requirements

The University considers the following to be the minimum passing grade by course-level:

Undergraduate	D = 1.00
Graduate	C = 2.00
Doctoral Sequence (CMP9000 to CMP9599 and DIS9000 to DIS9599)	S = N/A
Doctoral Sequence	B = 3.00

(CMP-9600+, DIS-9901A+)	
-------------------------	--

NOTE: Doctoral students are required to have a minimum of a 3.0 GPA before entering into CMP courses (portfolio, or prospectus).

Students earning a grade below the minimum must repeat the course or take an alternate course as described below (refer to Repeating Grades, Repeating Doctoral Sequence Courses, and Unsatisfactory Grades for Doctoral Students).

Assignment Deadlines & Final Course Grades

Course policies and procedures regarding the submission of assignments and late submissions are published in all course syllabi. Assignments submitted after the course end date will not be graded or calculated in the final grade for the course.

Assignment Submission and Return

The Academic Week at the University begins on Monday and ends the following Sunday night at 11:59 p.m. Arizona time. Assignment due dates are mandatory. Coursework may not be submitted before a course start date. Faculty who receive work before a course start date should return the work with an explanation of the submission policy. Each assignment's due date must be met. In addition, coursework should not be accepted after the course end date and/or approved course extension end date. Faculty are expected to review and return assignment feedback in a timely manner. The recommended assignment response times vary by program-level and course deliverables:

- Undergraduate and Graduate content course assignments = 4 days
- Doctoral Comprehensive Portfolio/Prospectus = 4 days
- Dissertation Courses = 7-14 days (see the [Doctoral Student Experience \(DSE\) Manual](#) or [Applied Doctoral Experience \(ADE\) Manual](#) for additional information)

Incomplete Grades

Incomplete grade requests are student-initiated requests to extend a course. Students may request a maximum of one incomplete grade extension per course when an unforeseen circumstance impacts their ability to complete a course by the scheduled course end date. To request an incomplete grade extension, students must submit the completed Incomplete Grade form in *NCUOne* to their faculty member for review prior to the course end date. Faculty may approve requests at their discretion and should consider the eligibility requirements listed on the Incomplete Grade form when rendering a decision. Incomplete grade request decisions are final and cannot be appealed.

NOTE: The following Doctoral courses are not eligible for an incomplete grade extension:

- DIS-99XXA, B, and C

Repeating Undergraduate & Graduate Content Courses

When an undergraduate or graduate content course has been repeated, the credit used in computing the grade point average is the grade and credit hours earned the last time the repeated course was taken. When a course is repeated, the original course grade will be changed to an "R" (retaken). Some courses may not be eligible for an "R" grade; students should work with their Academic and Finance Advisor to determine course repeat eligibility.

If an alternate course is taken to meet degree requirements for a non-passing course, the grade for both the alternate course and the non-passing course will appear on the student's transcript and both grades will be used in computing the cumulative GPA.

Students will be charged tuition for repeated or alternate courses. If students are utilizing financial aid, repeated courses due to unsuccessful grades may be covered depending on each student's individual aid availability. Repeated courses that have been previously passed are only able to be paid for with financial aid once.

NOTE: Content courses may only be repeated once without prior approval from the Dean or the Program Chair. A denial of a third attempt of a required course or a third failed grade in any course listed on a student's degree plan as required for graduation will lead to dismissal.

Exception: Passing grades earned in graduate-level courses that are completed as part of a conferred University undergraduate degree will not change to an "R" grade if they need to be retaken to satisfy the minimum grade requirements in a University Master's degree program.

Maximum "R" Grade Policy

A student may utilize the "R" grade a maximum of five times in their current program (as defined by the Re-entry Enrollment Policy). If a student retakes a course after they have earned five "R" grades, the original grade and the grade earned during the retake will both appear on the transcript and be used to calculate GPA.

Unsatisfactory Grades for Doctoral Sequence Courses

CMP Courses

CMP9000- CMP9599	Students who receive a "U" grade in a CMP-9000 through CMP-9599 course must repeat the course. Students who receive three "U" grades in the CMP9000 through CMP9599 course will be subject to dismissal from the University.
CMP-9600- CMP-9799	Students who earn a non-passing grade in a CMP-9600 through CMP-9799 course must repeat the course. Students who earn three non-passing grade in the CMP-9600 through CMP-9799 course will be subject to dismissal from the University.

DIS Courses

DIS9000- DIS9599	Students who receive a third "U" grade in a DIS9000 through DIS9599 course is subject to dismissal from the University. This applies to <i>any combination</i> of three "U" grades in the DIS9000-DIS9599 course sequence, whether the three grades are received in the same course or a different course.
DIS-9901A-DIS- 9914D	Students who are unable to earn a minimum passing grade of "B" or better by the fourth course within a block of courses (DIS-99XXA, DIS-99XXB, DIS-99XXC, and DIS-99XXD) are subject to dismissal from the University.

Repeating Doctoral Sequence Courses

Students enrolled in course codes CMP-9600 through CMP-9799, and DIS-9901A through DIS-9914D, may be eligible to earn a Repeated Doctoral Sequence ("RD") grade for courses that were originally completed with a non-passing grade if subsequent attempts are completed with a "B" or better. Courses awarded an "RD" grade will not be used in GPA calculations. Some courses may not be eligible for an "RD" grade; students should work with their Academic and Finance Advisor to determine Doctoral Sequence course repeat eligibility.

NOTE: A dissertation block consists of a 12-week dissertation course (DIS-99XXA) and three, 8-week supplemental courses (DIS-99XXB, DIS-99XXC, and DIS-99XXD). For non-passing grade(s) to be replaced, students must successfully complete the

dissertation block with a grade of "B" or better by the end of the third supplemental dissertation course (DIS-99XXD). Students who earn a non-passing grade in a dissertation block will be automatically scheduled and accepted into the appropriate supplemental course without a break in scheduling to ensure that students remain in continuous enrollment throughout the doctoral sequence.

Maximum "RD" Grade Policy for Doctoral Sequence Courses

A student may utilize the "RD" grade a maximum of fourteen times during the Doctoral Sequence (CMP-9600+ and DIS-9901A+). During the dissertation block, a student will be allowed a maximum of three "RD" grades per dissertation block.

ADA Course Accommodations

Students receiving ADA accommodations that extend their original course completion date are also eligible for Dean approved course modifications and incomplete grade extensions beyond approved ADA accommodation date.

Administrative Course Codes

Administrative course codes do not contribute to GPA calculation.

Code	Explanation
DR (Dropped)	<p>The "DR" course code is assigned when a student cancels participation in a course during the first seven (7) days of a course session for non-term programs, and fourteen (14) days for term-based programs and did not complete an academically related activity that met the University's attendance policy. Dropped courses only appear on the student's transcript when the student has posted attendance in a course prior to dropping the course on or before the seventh day. Students dropping a course are eligible for a full or partial refund in accordance with the University's refund policy.</p> <p>NOTE: Courses where attendance was posted that received a "DR" course code will have an asterisk next to them in the student portal.</p>
EXT (Extension)	<p>An "EXT" course code is assigned when a course is extended past the original course end date. "EXT" are used for administrative purposes and will be replaced with a final academic letter grade once the extension period ends.</p> <p>NOTE: If an academic letter grade has been posted prior to an extension approval, the "EXT" course code will replace the grade until the extension period ends and a final grade is determined.</p>
I (Incomplete) Grade	<p>An "I" grade is assigned when a faculty member grants a student an incomplete grade extension. "I" grades are used for administrative purposes only and will be replaced with a final academic letter grade once the incomplete extension period ends.</p>
NG (No Grade)	<p>The "NG" course code is authorized for use by the Office of the Provost or Registrar to address administrative errors or specific accommodations as approved by leadership. The "NG" course code remains permanently on the University records but does not appear on the student's transcripts.</p>
R (Retaken)	<p>An "R" grade is indicated on the transcript when the student repeats an undergraduate or graduate content course and the original grade awarded has been superseded by the later grade (see exceptions listed under Repeating Courses).</p>

RD (Repeated Doctoral Sequence)	An "RD" grade is indicated on the transcript when the student earns a non-passing grade in CMP9600+ or a dissertation block course (DIS-99XXA, DIS-99XXB, DIS-99XXC, DIS-99XXD) and repeats the CMP course or completes the subsequent course within the same dissertation block with a grade of "B" or better (see Repeating Doctoral Sequence Courses).
W (Withdrawal)	<p>A "W" is assigned when a student cancels participation in a course during the course withdrawal period. Students who attend a course past the 7-day drop period or 14 day drop period for term-based JFK School of Law at National University programs, are eligible to request a course withdrawal. Course withdrawal requests that are submitted prior to the student attending 71% of the course will be issued a "W" grade.</p> <p>Students who request a course withdrawal after attending 71% or more of a course will be issued a letter grade for the course that they are withdrawing from based on their academic performance in the course at the time of the course withdrawal.</p> <p>"W" grades appear on student transcripts and do not contribute to GPA calculation.</p>
WL (Withdrawal Military Leave)	"WL" indicates that a student has taken a Leave of Absence due to Military Deployment before the course end date. Students returning from a Military Leave of Absence may continue in the course where left off without paying course tuition again. When completed, the "WL" will be replaced by the final academic performance grade.

Grade Appeals

Students and faculty are encouraged to proactively communicate to address any grading questions or concerns while the course is still in session however, a final course grade may be appealed if:

- A computational error was made in the calculation of a course or assignment grade
- Documented active military duty, which resulted in an inability to continue in the course or program
- Documented personal or family medical emergency
 - Students should first notify Disabilities Services and provide documentation to the appropriate personnel
- Documented act of nature (e.g., hurricane, wildfires, etc.)
- Documented death in the family
- Documented temporary severe economic hardship

NOTE: Family is defined as including husband, wife, domestic partner, grandparent, grandchild, mother-in-law, father-in-law, brother-in-law, sister-in-law, daughter-in-law, son-in-law, (step/adoptive) mother, (step/adoptive) father, (step/adoptive) brother, (step/adoptive) sister, and (step/adoptive) child.

The final grade appeal process is not designed to accommodate issues such as, but not limited to:

- Time management concerns
- Submission of an assignment after the course end date has passed
- IT or technology related issues
- Job demands

Below is additional information on the grade appeal procedure:

Grade Appeal Procedure

Appeals must be submitted, along with supporting documentation, through the online Grade Appeal form located in *NCUOne*, no more than 10 calendar days after the final course grade has posted. All appeals are reviewed by the applicable School Dean or designee. **The appeal decision made under the authority of the Dean or designee is final.**

Responsibility	Action
Student	<ol style="list-style-type: none"> 1. Discuss grade concerns with faculty member in order to resolve discrepancy. 2. If the issue is not resolved, submit online Grade Appeal request and supporting documentation no more than 10 calendar days after the final course grade has posted
Faculty Member	<ol style="list-style-type: none"> 3. Respond to online Grade Appeal request within five (5) business days of receipt.
Dean (or Designee)	<ol style="list-style-type: none"> 4. Review online Grade Appeal requests and render a final decision on the grade within five (5) business days after receiving the faculty response. <p>NOTE - If the faculty member does not respond within their allotted time, the Dean or designee will render a final decision without a faculty response.</p>

Exception - If a student is unable to access the online Grade Appeal request, they should contact their assigned Academic and Finance Advisor for instructions on how to submit a paper Grade Appeal form. See above table for timeframes for submission, faculty response, and Dean's final decision.

Satisfactory Academic Progress

Satisfactory Academic Progress (SAP) is the standard by which the University measures students' progress toward completion of a degree or certificate program. The three components of SAP are Grade Point Average (GPA), Course Completion Rate (pace), and Maximum Timeframe. If at any time, a student is not meeting the minimum requirements for SAP, they will receive an email notification in *NCUOne* as well as an email to the address on file. However, it is ultimately the student's responsibility to know these requirements, and failure to receive notification does not nullify the SAP status.

SAP Procedures

SAP Component Definitions

Program Grade Point Average (GPA) - A Cumulative Program GPA is calculated using only grades earned at the university for the student's current program of study. The minimum GPA requirement for undergraduate students is 2.0. The minimum GPA requirement for graduate students is 3.0. The minimum GPA requirement for Juris Doctor students is 2.4.

Course Completion Rate (Pace) - Students must earn a passing grade in two-thirds or no less than 66.66% of the course credit hours attempted toward completion of their program of study. The Course Completion Rate is calculated by dividing the cumulative number of credit hours successfully completed by the cumulative number of credit hours attempted. All courses count as attempted except for drops and withdrawals for Military Leave of Absence ("WL" grade). Only courses for which the student receives a passing grade count as completed.

SAP Maximum Timeframe -The SAP Maximum Timeframe to complete a program cannot exceed 150% of the published length of the student's active program and is measured in credit hours. For example, if an undergraduate program consists of 120 credit hours, the student must successfully complete the program after attempting no more than 180 credit hours. See the [Time Limits for Degree Completion](#) section for the SAP Maximum Time to Completion breakdown.

Maximum Timeframe resets for SAP only if there has been a substantial change in degree program. Refer to the substantial change definition in the Re-entry policy for more information. A SAP Appeal will need to be filed for all program extensions when it has been determined that a student cannot complete their program within the allowed attempted credit limits per their individual program requirements and will need more time to complete their degree program.

Treatment of Courses and Credits

Course Repetitions - Only the most recent grade for a repeated course is counted in the Program GPA. All attempted courses are counted toward the Course Completion Rate and the SAP Maximum Timeframe for program completion.

Dropped Courses - Courses dropped before the end of the drop period are not included in SAP calculations. Courses from which the student withdraws due to an approved Military Leave of Absence or for which an "NG" (No Grade) is granted are treated as dropped courses and are also excluded from SAP calculations.

Applied/Migrated Credits Within the University - All credits earned at the University that are accepted into the student's current program of study are considered as both attempted and completed credits for calculation of the Course Completion Rate, are counted toward the SAP Maximum Timeframe, and are included in Program GPA calculations.

If a comparison of the original program and the program the student is entering results in the determination of a substantial change by the Office of the Registrar, the student is considered to be starting a new program. In this case, SAP will restart. See the [Re-entry policy](#) for further information.

Transfer Credits From Another Institution - All accepted transfer credits from an outside institution transferred into the student's current program of study are considered both attempted and completed credits for purposes of calculating the Course Completion Rate. Graduate transferred credits are not included in SAP Maximum Timeframe or Program GPA calculations. Undergraduate transfer credits are included in SAP Maximum Timeframe but not in Program GPA calculations.

Course Withdrawals - All courses from which a student withdraws after the end of the drop period receive a "W" on the student's transcript. These courses are considered attempted credits for calculation of the Course Completion Rate and are counted toward the SAP Maximum Timeframe.

Changing Programs - Students are only permitted to make a substantial program or degree change once per degree level in their tenure with the University. If a comparison of the original program and the program the student is entering results in the determination of a substantial change by the Office of the Registrar, SAP will restart. The substantial change definition remains the same for both re-entry and continuing students who wish to change programs. Refer to the substantial change section in the re-entry policy for more details.

SAP Evaluation Schedule

Undergraduate Programs – Students enrolled in undergraduate programs are evaluated for SAP after every 12 credit hours attempted in their programs.

Graduate Programs – Students enrolled in graduate programs are evaluated for SAP after every 9 credit hours attempted in their programs.

Term-Based Programs (JFK School of Law at National University) – Students enrolled in term-based programs are evaluated for SAP after each term in their program.

SAP Evaluation Statuses

Good Standing – A student is in good standing if: 1) No grades have been posted yet, or 2) If SAP has not been evaluated yet, or 3) Student is meeting minimum SAP requirements at time of evaluation, or 4) Student regained Good Standing after being placed on an Academic/Financial Aid Warning or Academic Probation/Financial Aid Probationary period.

Academic/Financial Aid Warning – A student is in an Academic/Financial Aid Warning status when they are not maintaining Good Standing pursuant to the terms of this policy at the time of any SAP evaluation. Financial aid may be received while in this status. If SAP is regained by the next scheduled SAP evaluation period, the student is returned to Good Standing status.

Academic Probation – A student is in an Academic Probation status when they did not regain Good Standing after being placed on an Academic/Financial Aid Warning. If the student wishes to maintain their financial aid, they will need to submit an Appeal. See below for directions on the Appeal process. If SAP is met by the next scheduled evaluation period and the Academic Plan was successfully followed, the student will regain Good Standing status.

Academic Probation Two – A student is in an Academic Probation Two status only if they were placed on an Academic/Financial Aid Probation and fails to regain Good Standing status before the next evaluation point and has then decided to Appeal for a second probationary evaluation period based on special circumstances. If the student wishes to maintain their financial aid, they will need to submit an Appeal for Financial Aid Probation – Two. See below for directions on the Appeal process. If SAP is met by the next scheduled evaluation period, the student will regain Good Standing status.

Financial Aid Probation – A student is in Financial Aid Probation status only if they were first placed on Academic Probation and then decided to Appeal to reinstate federal financial aid. If SAP is met by the next scheduled evaluation period, the student will regain Good Standing status and will also remain eligible for federal financial aid.

Financial Aid Probation - Two – A student is in Financial Aid Probation - Two status only if they were placed on Academic or Financial Aid Probation and fails to regain Good Standing status before the next evaluation point and has then decided to Appeal for a second time based on special circumstances. If SAP is met by the next scheduled evaluation period, the student will regain Good Standing status and will remain eligible for federal financial aid.

SAP (Academic) Dismissal – This status indicates a student was in a probationary SAP period and did not regain good standing by the next SAP evaluation. Students may appeal the dismissal to return to the University. Students who receive approval to return from academic dismissal are subject to the Re-entry policies and procedures. If ever it is determined that it is mathematically impossible for the student to regain good standing within the current program, the student may consider a different program. A student is allowed one substantial program change per degree-level without the submission of a SAP appeal.

**To protect the integrity of the University, a student may also be Administratively Withdrawn. Refer to the Student Code of Conduct policy for further details.*

*** For students using educational benefits from the U.S. Department of Veterans' Affairs (VA), upon reaching SAP Dismissal status, unsatisfactory progress will be reported to VA and educational benefits will be discontinued. Benefits may be resumed if the student reenrolls in the same program.*

SAP Right to Appeal

Occasionally, a student's academic progress may be delayed by circumstances beyond their control. A student may appeal:

- For federal financial aid to continue after the student has been placed on Academic Probation, or
- For an extension when it has been determined that a student cannot complete their program within the allowed attempted credit limits per their individual program requirements and will need more time to complete their degree program, or
- To get permission to make a substantial change of program if they have already made a substantial change once, or
- To return to the University and their program of study after being Academically Dismissed.

Students able to regain good standing status who wish to appeal for any of the above reasons should email their Academic and Finance Advisor or saphelp@ncu.edu to request a SAP appeal form. Completed SAP appeal forms, including supporting documentation, should be emailed to saphelp@ncu.edu for the SAP Appeal Committee to review. The SAP Appeal Committee comprised of various University leaders who meet on a periodic basis to review student appeals. Committee appeal decisions are made within 15 business days of receipt and are final. Students may not submit a second appeal for the same situation without new information documenting any extenuating circumstances not previously disclosed.

For consideration, students should provide the following:

- An explanation and/or document that they have suffered from extenuating circumstances such as death of a relative, injury, disability, illness or other special circumstances;
- Specific information in the Appeal regarding why they failed to meet SAP;
- An explanation as to what has changed in the student's situation that will allow them to achieve SAP by the next evaluation.

NOTE: Please refer to the Student Code of Conduct and Attendance and Continuous Enrollment policies information on administrative dismissals due to violation of academic and University policy.

Time Limits for Degree Completion

Students at the University are held to two standards regarding time to degree completion: Satisfactory Academic Progress and Academic Maximum Time Frame.

Satisfactory Academic Progress (SAP) is a standard by which the University measures students' progress toward completion of a degree or certificate program. The three components of SAP are Grade Point Average (GPA), Course Completion Rate (pace), and SAP Maximum Time Frame. For Academic Maximum Time Frame, the University sets the deadline in calendar years from the first date of attendance in the degree program. SAP Maximum Time Frame rules will supersede Academic Maximum Time Frame when it comes to financial aid eligibility.

SAP Maximum Time to Completion

The SAP Maximum Time Frame to complete a program cannot exceed 150% of the published length of the students' active program and is measured in credit hours, this applies to graduate and undergraduate programs. For example, if a program consists of 120 credit hours, the student must successfully complete the program after attempting no more than 180 credit hours.

Students who are unable to complete his/her program within the SAP maximum time limits and need more time to complete his/her program may file a Satisfactory Academic Progress (SAP) appeal by following the procedures given in the Satisfactory Academic Progress (SAP) policy. SAP Maximum Timeframe extensions are determined on a case-by-case basis.

Program Type	Course Completion Rate	Minimum GPA	SAP Maximum Time Frame
Bachelor's Degrees - 120 credit hours	No less than 66.66% of total course credit hours attempted	2.0	180 attempted credit hours
Paralegal Certificates - 28 credit hours	No less than 66.66% of total course credit hours attempted	2.0	46.6 attempted credit hours
Post-Baccalaureate Certificate -12 credit hours	No less than 66.66% of total course credit hours attempted	3.0	18 attempted credit hours
Master's Degrees - 30 credit hours	No less than 66.66% of total course credit hours attempted	3.0	45 attempted credit hours
Master's Degrees - 36 credit hours	No less than 66.66% of total course credit hours attempted	3.0	54 attempted credit hours

Post-Master's Certificate -18 credit hours	No less than 66.66% of total course credit hours attempted	3.0	27 attempted credit hours
Education Specialist (EdS) -33 credit hours	No less than 66.66% of total course credit hours attempted	3.0	49.5 attempted credit hours
Doctoral - 54 credits hours	No less than 66.66% of total course credit hours attempted	3.0	81 attempted credit hours
Doctoral - 60 credit hours	No less than 66.66% of total course credit hours attempted	3.0	90 attempted credit hours

Academic Maximum Time to Completion

The University requires students to complete all degree or certificate program requirements within specific time limits as outlined in the Catalog to be eligible for graduation. Students who do not complete their degree or certificate program within the required time limits may be academically dismissed from the University. The program completion guidelines outline the maximum time frames allotted to students and do not supersede the obligation to maintain satisfactory academic progress through the student's program of study. Program completion deadlines are calculated based on the first date of attendance in the student's program. In extenuating circumstances, with accompanying documentation, Deans may approve an extension to the academic maximum time frame. Approved extensions may not exceed the requirements to maintain satisfactory academic progress.

Program Type	Academic Maximum Time Frame
Bachelor's Degrees	180 attempted credit hours
Paralegal Certificate	2 years
Master's Degrees - 36 credit hours or less	5 years
Master's Degrees - More than 36 credit hours	6 years
Post-Baccalaureate and Post-Master's Certificates	2 years
Education Specialist Degree (EdS)	5 years
Doctoral Degrees - 60 credits hours or less	7 years
Doctoral Degrees - More than 60 credit hours	8 years

Changing Degree Programs

Students must contact their Academic and Finance Advisor for assistance in changing their degree program. Student and Financial Services are required to evaluate the impact on federal financial aid eligibility when a student requests to change degree

programs after federal financial aid has been disbursed. In some cases, a program change will result in a return of federal aid per the withdrawal from the initial program and the immediate re-packaging of federal aid that will apply towards the new program.

Changes of school, degree level, specialization, and changes from a professional doctorate to a doctorate of philosophy or vice versa, require Dean approval.

Upon receiving Dean approval, students must complete a new application and enrollment agreement for the new degree program. The student's new application and Dean approval is then submitted to the Office of the Registrar for evaluation and admissions approval in accordance with University policy. Once approved, the Office of the Registrar updates the student's degree plan and program of study. A Learning Management Fee (LMF) will be charged when a student vests in the first course of their new program.

Program Discontinuation

If the University decides to discontinue an academic program, all students that remain continuously enrolled are afforded the opportunity to complete their program. Doctoral students that have advanced to candidacy will have the option to complete their program even if they have had a break in enrollment.

Academic Leave of Absence

The University programs are designed to allow students to pursue their educational efforts full-time while managing other responsibilities. The University will consider granting an Academic Leave of Absence (ALOA) for a student who is experiencing hardships that make effective progress in their academic course of study unusually difficult. A leave of absence is defined as a temporary break from academic registration with a clear intent to return to the program of study.

Leaves are only available to students who have provided their official transcripts and have been officially admitted to the university, are currently in active status and have proceeded beyond the drop period in at least one course since beginning their program of study. Students on approved ALOA who receive Federal Financial Aid are not considered withdrawn, and a return of funds is not required. Students may not receive Federal Financial Aid disbursements while on an ALOA.

Policy and procedure for students who require a leave of absence due to military deployment are given in the Military Leave of Absence policy.

Academic Leave of Absence (LOA) Policy

The Academic Leave of Absence policy is applicable to all officially admitted and enrolled students in degree programs at the University. If a student is not actively enrolled in a program, the student is not eligible to apply for a leave of absence (LOA). Students provisionally admitted are not eligible for an LOA until the University receives official transcripts and the basis for admission is met. Students may be approved by the University for multiple LOAs in a 12-month period. Students also may be approved for consecutive LOAs, but each LOA must be independently submitted by the student and approved by the University. The minimum duration of an approved LOA is 14 days; the maximum duration is 60 days per LOA request. The total of all LOAs may not exceed 180 calendar days in a rolling 12-month period.

The University will approve students for an LOA when they are between courses without additional documentation. For students who require an LOA while they are active in a course, the University will only approve LOAs where the student meets all of the following criteria:

- The student provides evidence of an extenuating circumstance
- The student is in good standing within their current course
- The University has a reasonable expectation the student will return to school

LOAs aren't granted during an active course except in extenuating circumstances. If the student can show an extenuating circumstance, they will not be charged for the class they take upon return. Students should contact their advisor with questions.

When unforeseen circumstances prevent a student from submitting an LOA request for a subsequent LOA, the University may grant a requested LOA if the reason and decision has been documented by the University. The University must receive the official LOA request from the student before the end of the LOA, and the request must be approved by the University. Unforeseen circumstances may include, but are not limited to, medical and family emergencies, military, jury duty, business travel, inclement weather and natural disasters.

During an LOA, the student is not considered withdrawn and no Return to Title IV (R2T4) calculation is required for financial aid recipients. The University will not impose additional charges when the LOA ends and students' return to their program of study. During an approved LOA there will be limited access to the *NCUOne* Learning Management System.

When a student requests an LOA start date in the future and is officially or administratively withdrawn from the University prior to the start date of the LOA, the LOA is null and void and the student will be considered withdrawn effective their last date of attendance.

When a student withdraws from a course and is approved for an LOA, upon return from that LOA, the student will not be re-charged for the course they previously withdrew from. Additionally, if a student returns to a different course, they will not be charged.

NOTE: Time spent on an LOA counts toward program length and is included when determining if a student can complete their degree program within the maximum time limits.

Required Documentation

An LOA is a temporary interruption in a student's program of study and may be approved if the University determines there is a reasonable expectation the student will return. The University will not grant a student an LOA merely to delay the return of unearned Title IV funds or to avoid failing grades. Students must request the LOA, by proactively providing the academic and finance advisor (on or before the start of the LOA) a request, including the reason for the LOA.

A student's initial request for an LOA will be reviewed, and if applicable, approved and processed by an academic and finance advisor. A student's subsequent request for an LOA in a 12-month period will be reviewed, and if applicable, approved and processed by an associate director. A third request for an LOA in a 12-month period will be reviewed, and if applicable, approved and processed by a director or senior director.

When unforeseen circumstances prevent a student from proactively providing a request on or before the start of the LOA, the University may grant the LOA if it has documented the reason and decision. Unforeseen circumstances may include, but are not limited to, medical and family emergencies, military, jury duty, business travel, University course unavailability, inclement weather and natural disasters.

Access to University Resources During Leave

Students on leave do not maintain access to faculty, the online courseroom, or the Academic Success Center coaching service. Access to other university resources such as the University Library may also be limited while a student is on leave.

When doctoral candidates are not actively enrolled in a course, they have limited communication with University support staff and may not engage in certain activities related to their research. Specifically, doctoral candidates must be actively enrolled in a course to have contact with their dissertation chair. Doctoral candidates must also be actively enrolled in a dissertation course with the University in order to recruit, obtain informed consent, have any contact with participants, or perform data collection if their Institutional Review Board (IRB) application has been approved.

Return from Leave

Students returning from ALOA remain in the degree program in which they were enrolled at the time the ALOA was approved.

If a student does not return to the University by the end of an approved LOA, the student is administratively withdrawn and an R2T4 calculation will be performed. To avoid being dismissed, the student must accept and vest in a course upon their LOA return date. The return course will be scheduled at the time of the LOA request and approval. It is the responsibility of the student to work with their Academic and Finance Advisor to begin a course on or before the date specified as the date of return from leave. The student's withdrawal date is retroactive to the student's last day of attendance (LDA).

Military students exceeding 180 days will be Administratively Withdrawn from the University. Students can submit their military orders to qualify for compassionate re-entry see [General Re-entry Guidelines](#) for additional information on returning to the University.

Academic Leave of Absence Policy for Term-Based Programs

The Academic Leave of Absence policy for term-based programs is applicable to all officially admitted and enrolled students in term-based degree programs at the University. If a student is not actively enrolled in a program, the student is not eligible to apply for a leave of absence (LOA). Students provisionally admitted are not eligible for an LOA until the University receives official transcripts and the basis for admission is met. Students in term-based programs may be approved for a maximum of two consecutive semesters on an LOA in a 12-month period. Each LOA must be independently submitted each semester by the student and approved by the University.

Matriculated students are expected to maintain regular (continuous) enrollment in their program. Students who are unable to enroll for one or more terms must complete a Leave of Absence request to avoid falling out of compliance with continuous enrollment requirements. Failure to remain in continuous enrollment may result in administrative withdrawal from the university.

A leave of absence for term-based programs may be granted for up to two consecutive semesters within a 12-month period, including any term in which a student enrolled but withdrew from all courses.

Students must get prior, written approval from the Dean's office for any Leave of Absence and must provide the following information in their Leave of Absence request:

- The student provides evidence of an extenuating circumstance
- The student is in good standing (under both the Academic Standards Committee policies and the SAP guidelines) within the program; an LOA request will not be granted to any student on probation
- The University has a reasonable expectation the student will return to school

The Dean's office may confer with the Academic Standards Committee to impose any conditions upon return from the LOA (usually related to classes that must be taken).

When unforeseen circumstances prevent a student from submitting an LOA request for a subsequent LOA, the Dean's office may grant a requested LOA if the reason and decision has been documented by the University. The Dean's office must receive the official LOA request from the student before the end of the LOA, and the request must be approved in writing by the Dean's office and University. Unforeseen circumstances may include but are not limited to, medical and family emergencies, military, jury duty, business travel, inclement weather.

During an LOA, term-based students are considered withdrawn for Title IV purposes and a Return to Title IV (R2T4) calculation is required for financial aid recipients. During an approved LOA there will be limited access to the *NCUOne* Learning Management System.

When a student requests an LOA start date in the future and is officially or administratively withdrawn from the University prior to the start date of the LOA, the LOA is null and void and the student will be considered withdrawn effective their last date of attendance.

NOTE: Time spent on an LOA counts toward program length and is included when determining if a student can complete their degree program within the maximum time limits.

Required Documentation

An LOA is a temporary interruption in a student's program of study and may be approved if the Dean's office determines there are extraordinary circumstances and that there is a reasonable expectation the student will return. The University will not grant a student an LOA merely to delay the return of unearned Title IV funds or to avoid failing grades. Students must request the LOA, by proactively providing the academic and finance advisor (on or before the start of the LOA) a request, including the reason for the LOA.

When unforeseen circumstances prevent a student from proactively providing a request on or before the start of the LOA, the Dean's Office may grant the LOA if it has documented the reason and decision. Unforeseen circumstances may include but are not limited to, medical and family emergencies, military, jury duty, business travel, University course unavailability, inclement weather, and natural disasters.

Access to University Resources During Leave

Students on leave do not maintain access to faculty, the online courseroom, or the Academic Success Center coaching service. Access to other university resources such as the University Library may also be limited while a student is on leave.

Return from Leave

Students returning from an LOA remain in the degree program and catalog version in which they were enrolled at the time the LOA was approved and are subject to any requirements or conditions placed upon their return when the LOA request was granted.

If a student does not return to the University by the end of an approved LOA, the student will be administratively withdrawn from their program. To avoid being administratively withdrawn, the student must attend and vest in a term upon their LOA return date. The return term will be scheduled at the time of the LOA request and approval. It is the responsibility of the student to work with their Academic and Finance Advisor to begin a term on or before the date specified as the date of return from leave. The student's withdrawal date is retroactive to the student's last day of attendance (LDA).

Military students exceeding 180 days will be Administratively Withdrawn from the University. Students can submit their military orders to qualify for compassionate re-entry see [General Re-entry Guidelines](#) for additional information on returning to the University.

Military Leave of Absence

A student may request a Military Leave of Absence (MLOA) online or by contacting their Academic and Finance Advisor and submitting a copy of supporting documents. A copy of the student's military orders, a letter from their commanding officer, or other documentation will be required to support the request for military leave. The student may request any length for the leave, so long as it does not begin more than 30 days prior to the assignment date, and does not exceed more than 180 days beyond their last date of attendance. The Academic and Finance Advisors will ensure that the MLOA return date coincides with a valid course start date.

Students are eligible for re-entry if, during their leave, they performed or will perform voluntary or involuntary active duty service in the U.S. armed forces, including active duty for training and National Guard or Reserve service under federal authority, for a period of more than 30 consecutive days, and received a discharge other than dishonorable or bad conduct. In general, the cumulative length of absence and all previous absences for military service (service time only) must not exceed five years.

MLOA Criteria & Process

Leave Duration

By default, all students requesting a Military Leave of Absence are granted the longest possible leave without exceeding 180 days beyond their assignment end date. The Academic and Finance Advisors ensure that the MLOA return date coincides with a valid course start date, and contact students on Military Leave of Absence within 30 days after the end of their deployment to confirm or adjust the timing of their return as needed.

Courses in Progress

Students going on military leave are given a WL grade for all in-progress courses. Such MLOA students are considered in Leave status.

Satisfactory Academic Progress is not negatively affected by a WL grade. In addition, time away while on an approved MLOA is not counted in the calculation of a student's maximum timeframe for their program if the student has been continuously enrolled and is in good standing.

A Student Records Specialist will document the students file and send an exit email that includes the following:

- Order expiration date
- Return date deadline
- Current catalog version
- Current tuition track
- Current program and specialization

Return from Leave

Students who fail to return to their program within 180 days will be administratively withdrawn from their program. If the student wishes to return to the program after the deadline they will be placed in the current program version and tuition will be charged at the current track.

Students that return within 60 days of the expiration of orders will be compassionately re-entered into their program.

Students returning outside of 60 days may submit updated orders that list the continuation.

Students will be re-entered into:

- Same Program
- Catalog Version
 - The original degree plan will be updated to reflect any changes due to course retirement.
 - If a failed course is unable to be retaken due to retirement, a suitable substitution will be scheduled
- Tuition track
 - Students will be charged at the current tuition pricing for the track they were on when they left.

Students who do not vest into the 8th day of the returning course or the 15th day for term-based JFK School of Law at National University programs immediately following the date of return from leave will be administratively withdrawn from the University. It is the responsibility of the student to work with their Academic and Finance Advisor to begin a course on or before the date specified as the date of return from leave.

Service Leave Types and Reasons

- Active Duty or Veteran support as needed (ex: medical or personal emergencies)
- Boot Camp
- Department of Defense (example: nurses in combat zones)
- Deployment (This may be in excess of one calendar year)
- National Guard
- PCS (Permanent Change of Station; transfer of permanent duty station)
- Reservist
- Restricted duty (Service members may serve in areas where access to online communication is restricted or unavailable)
- Separation from service
- Special missions
- TDY (Temporary duty assignment, which could be for military training, school or medical evaluation)
- Technical School
- Written Requests from Commanding Officer

Student Withdrawal from the University

Students have the right to withdraw from the University at any time. The University team members who receive a student request to withdraw from the University will submit the request to the Office of the Registrar for processing on behalf of the student using the date they received the student's request as the Request Date. If students are enrolled in a course at the time of withdrawal, the Office of the Registrar will use applicable Grading Policies & Procedures to determine the final grade of the withdrawn course.

Once officially withdrawn from the university, students are no longer considered to be active. Students that are not active in a program or certificate no longer have access to the *NCUOne* Portal, previously submitted assignments, or university resources. It is the students responsibility to save previously submitted assignments, syllabi, electronic textbooks (in accordance with publisher download permissions), and other documents from the *NCUOne* portal to their personal devices.

See the [Refund Policy and Procedure](#) for applicable financial policies.

Academic Dismissal

Students who fail to meet the requirements of a degree program including official basis for admissions, minimum grade requirements, and satisfactory academic progress of study are subject to academic dismissal from the University. See [SAP Procedures](#) for additional information.

Administrative Dismissal

Students who violate the University's ethical policies and standards including, but not limited to, the Student Code of Conduct policies, may be subject to immediate administrative dismissal. Students who have been dismissed due to violation of the Student Code of Conduct policies, or due to any other legal or ethical matter, do not qualify for re-entry to the University. See [Ethical Standards & Practices](#) and [Student Rights & Responsibilities](#) for additional information.

Administrative Dismissal Appeal Procedure

Students who believe they have mitigating circumstances and wish to appeal their administrative dismissal must initiate the appeal within 30 days of receiving notification of the dismissal. Students appealing an administrative dismissal must follow the same Appeal Procedure as given in the Satisfactory Academic Progress policy.

Responsibility	Action
Student	1. As soon as possible following notification of dismissal, contact your Academic and Finance Advisor for instructions and a web link for submitting an appeal. NOTE: Dismissal of a Doctoral student for failure to meet requirements of the Dissertation Review Process may NOT be appealed.
	2. Using the instructions and web link, explain why you are appealing, including the specific circumstances that have prevented you from meeting requirements and any supporting documentation. Retain a copy of the appeal and documentation for your records.
	3. Submit the appeal electronically <i>within ten calendar days of notification</i> of dismissal. Once you have initiated an appeal, do <i>not</i> contact your Academic and Finance Advisor or School Dean.
	4. A. Student Does Receive Financial Aid – The system sends an alert to the Academic and Finance Advisor, School Dean and the Director of Financial Services. Proceed to Step 5.
	4. B. Student Does Not Receive Financial Aid – The system sends an alert to the School Dean and the Academic and Finance Advisor. Proceed to Step 6.
Director/Financial Services	5. Contact the School Dean as soon as possible to assist in evaluating the student's circumstances.
School Dean	6. Within ten calendar days of receiving an appeal alert, review the student's circumstances and enter a decision on the system, which automatically generates an email to the student and Academic and Finance Advisor. Dismissal Appeal Approved – An alert also goes to the Office of the Registrar.
Registrar	7. If you receive an alert that a Dismissal Appeal is approved, reinstate the student into Active status, with an SAP status of Warning or Probation as decided by the Dean.
Student	8. The Dean's decision is final. End of Procedure.

National University Dean's List

At National University, we believe it is important to recognize academic success in many forms. We realize our students have many demands across many roles in their lives. While Cum Laude and other graduation honors are awarded in recognition of achievement sustained across the student journey, the Dean's List recognizes students in their shorter sprints toward ultimate success.

The Dean's List at National University is a quarterly recognition of undergraduate and graduate students who have demonstrated exceptional academic performance. Students eligible for the honor must complete a minimum amount of coursework (9.0 quarter units/6.0 semester units) with a three-month GPA of at least 3.5 (undergraduate) or 3.7 (graduate).

In determining student eligibility, we use the following criteria:

- Completed a minimum of 9.0 quarter units/6.0 semester units). These units are calculated on the end date of the course. For instance, a student completing an 8-week course with 4 weeks completed prior to the quarter and 4 weeks completed during the assessment period would be granted unit and GPA credit for the whole course.

- Quarter GPA of at least 3.5 (undergraduate) or 3.7 (graduate). These minimum GPAs are only calculated with the courses completed during the assessment period. Therefore, a student may have a cumulative GPA of 3.3, receive two A's during courses completed in the quarter, and will be eligible for the honor of Dean's List.

Exceptions: Dissertation courses and some clinically-focused coursework is excluded in the calculation of eligibility, and those students in the Juris Doctorate program have different eligibility criteria based on program accreditation requirements as outlined in the Juris Doctorate Student Handbook.

The Dean's List is calculated and awarded quarterly in January, April, July, and October for the three months preceding. Students are notified via their student email address and also receive a confirmation when their certificate is issued. Certificates are available electronically through Parchment.

National University President's Circle

National University (NU) is deeply committed to promoting academic and service excellence. In pursuit of this objective, National University takes great pride in annually acknowledging and honoring students' outstanding academic achievements through the President's Circle.

Nomination Process:

- Graduating students are nominated annually by the Dean of their respective schools for consideration to be part of the President's Circle.
- Within each school, one student is selected from each degree program, including associate's, bachelor's, master's, and doctoral programs.
- The nominated students represent the highest achievers in their respective programs, consistently exceeding expectations while demonstrating exceptional dedication.
- The following criteria are used to determine the selection of each student:
 - Attainment of consistently high academic performance
 - For graduate students, sustained performance at a distinguished scholarly level
 - Active participation in various student groups, such as University activities, the Student Advisory Council, or Honor Societies
 - Demonstration of a strong commitment to improving the lives of others through their education
 - Belief in their capacity to effect positive change in their communities

Students chosen to join the President's Circle are invited to attend the President's Circle Breakfast, which occurs before the commencement ceremony annually. Students will have the opportunity to interact with NU leadership and their school Deans during this event. They will also be publicly recognized for their outstanding achievements and receive an appreciation certificate and specialized honor cords. Subsequent to recognition, academic-year classes of President's Circle members will be invited to stay engaged as premiere NU academic ambassadors with students, alumni, and the broader community.

National University Memorial Degree

National University wishes to recognize the academic achievements of students enrolled at the University at the time of their passing. In the event of an untimely death of a National University student, they might be eligible to receive an honorary posthumous degree to commemorate those achievements for the benefit of the family. Diplomas awarded posthumously will indicate the honorary posthumous designation. A family member may contact the Office of the Registrar at 858.642.8260 or registrar@nu.edu for more information about the process and eligibility.

Procedure

Responsibility	Action

Any member of the university community who wishes to recommend award of a posthumous degree	1. Submit official notification of student's death to the Office of the Registrar along with a request to award a Posthumous Degree.
Office of the Registrar	2. Receive official notification of a student's death. Immediately place administrative hold on the student's academic records. Also, absolve the student of any University financial obligations. Determine if the student was in good standing with the University, and if so, notify the school / college to solicit a recommendation from the faculty.
School / College	3. The dean will solicit a recommendation from the faculty to help substantiate that the student had demonstrated substantial progress toward their degree completion at the time of death and would have most likely completed their degree had they survived. If the dean agrees with the faculty recommendation to Award a Posthumous Degree, forward that recommendation to the Office of the Provost
Office of the Provost	The provost will review the recommendation from the dean, and if the provost agrees with the recommendation, the Posthumous Degree will be awarded.

Honor Societies

The University's schools hold membership in honorary societies listed below. Acceptance into these programs is based on academic excellence.

Honor Societies and Associations

All Schools

Golden Key International Honor Society (GK)

Golden Key is the world's largest collegiate honor society for undergraduate and graduate students. Participation in the society is open to all academic disciplines Membership is by invitation only and is sent to eligible students on a periodic basis

For more information about Golden Key, visit www.goldenkey.org

Students who have not received a membership invitation but believe they meet the University's academic eligibility criteria can submit an online application at <https://goldenkey.org/golden-key-eligibility> for review.

National Society of Leadership Success (NSLS)

The National Society of Leadership and Success is the nation's largest leadership honor society. Candidacy is a nationally recognized achievement of honorable distinction. Participation in the society is open to all undergraduate and graduate level majors based on GPA and number of courses completed. Lifetime membership benefits include: an accredited leadership development program, free admission to live broadcasts of speakers from leading organizations as well as a presidential series, opportunities for scholarships and building a professional network, access to a job bank, letter of recommendation, and more.

For more information about National Society of Leadership Success, visit: <http://www.nsls.org>

Phi Chapter Omega Nu Lambda Honor Society

Phi Chapter Omega Nu Lambda (ONL) is the only national collegiate honor society exclusive to online students. ONL strives to help make online education a better experience by acknowledging academic achievement, rewarding online experience by offering scholarship opportunities, and creating environments that promote connectivity among other ONL members throughout the United States.

For more information about Phi Chapter Omega Nu Lambda, visit <https://www.omeganulambda.org>. For more information, please contact ONL@nu.edu.

SALUTE Veterans National Honor Society

SALUTE is a national academic honor society recognizing the service and scholastic achievements of student veterans and active-duty military in higher education.

For more information about SALUTE please contact the Veteran Center at veterancenter@nu.edu

Sanford College of Education

Kappa Delta Pi (KDP)

KDP is the champion for future and new teachers from campus to classroom. We deliver guidance and solutions to the particular issues facing teachers across the United States, while maintaining a global perspective. Above all, we are a reliable and research-based source of best practices for the teaching field as a whole.

For more information about Kappa Delta Pi, please visit: <https://www.kdp.org/>

College of Business, Engineering and Technology

School of Business and Economics

Delta Mu Delta, "Through Knowledge, Power" (DMD)

Delta Mu Delta is an honor society only open to ACBSP accredited schools. Invitation to the student is offered by the School of Business and Economics. Master's degree students have to be in the top 20% of the class at the completion of 75% of the program. Doctoral students have to be in the top 20% of the class after the completion of the prospectus course. Membership Benefits include lifetime recognition of outstanding academic achievement, resume enhancement, scholarship program, lifetime contact through national newsletter, and other benefits.

For more information about Delta Mu Delta go to <http://deltamudelta-lambdaeta.org/>

Sigma Beta Delta Honor Society

Sigma Beta Delta is an honor society for students of business, management, or administration who are pursuing bachelor's or master's degrees. The society characterizes itself by three principles, wisdom, honor, and the pursuit of meaningful aspirations. It recognizes these qualities as being important for success in the academic realm as well as providing guidelines, which lead to a fulfilling personal and professional life and a life distinguished by honorable service to humankind.

For more information about Sigma Beta Delta, please visit: <https://sigmabetadelta.org/>

School of Health Professions

Upsilon Phi Delta (UPD)

Applicable for students enrolled in the Bachelor of Science in Healthcare Administration (BSHA) and the Master of Health Administration (MHA) Program in the School of Health Professions. Upsilon Phi Delta is an honor society only open to programs who hold membership with the Association of University Programs in Health Administration (AUPHA). Invitation to the student is offered by the School of Health Professions. Membership Benefits include lifetime recognition of outstanding academic achievement, scholarship program, lifetime contact through national networking, and other benefits.

For more information about Upsilon Phi Delta go to: <http://www.aupha.org/main/resourcecenter/currentstudents/honorsociety>

Sigma Theta Tau International (STTI) Omega Omega Chapter 574

The mission is to develop nurses' leaders to improve healthcare everywhere. Students who qualify from Undergraduate and Graduate level Nursing Programs are invited to join this international community of nurses. These Nurse leaders are dedicated to the advancement of knowledge, teaching, learning, and service through the cultivation of communities of practice, education, and research.

For more information about Sigma Theta Tau International Omega Omega go to: <https://www.sigmanursing.org/>

JFK School of Psychology and Social Science

Delta Kappa International

Delta Kappa, is the official honor society for the field of MFT, serves to further and complement the fine work being done by the American Association for Marriage and Family Therapy, the American Family Therapy Academy, and the International Family Therapy Association. An installation ceremony is held twice a year – one at graduation and a virtual ceremony. Membership benefits include a lifetime recognition of outstanding academic achievement, resume enhancement, scholarship program, lifetime contact through national newsletter, and other benefits.

For more information about Delta Kappa International, please visit: <https://www.deltakappamft.org/Home>

Phi Alpha Honor Society

The purpose of Phi Alpha Honor Society is to provide a closer bond among students of social work and promote humanitarian goals and ideas. Phi Alpha fosters high standards of education for social workers and invites into membership those who have attained excellence in scholarship and achievement in social work.

For more information about Phi Alpha Honor Society, please visit: <https://phialpha.org/>

School of Arts, Letters, and Sciences

Alpha Kappa Delta International Sociology Honor Society

Alpha Kappa Delta seeks to acknowledge and promote excellence in scholarship in the study of sociology, the research of social problems, and such other social and intellectual activities as will lead to improvement in the human condition. Alpha Kappa Delta is a non-secret, democratic, international society of scholars dedicated to the ideal of Athropon Katamanthanein Diakonesin or "to investigate humanity for the purpose of service." At commencement membership in Alpha Kappa Delta is signified by the wearing of a teal honor cord.

For more information about Alpha Kappa Delta, please visit: <https://alphakappadelta.org/>

Psi Chi Honor Society

Psi Chi is an international honor society whose purpose is to encourage, stimulate, and maintain excellence in scholarship of the individual members in all fields, particularly in psychology, and to advance the science of psychology. Undergraduate and graduate students accepted for membership in Psi Chi are recognized for their academic achievement and devotion to the field of psychology. Psi Chi is a member of the Association of College Honor Societies and is an affiliate of the American Psychological Association (APA) and the Association for Psychological Science (APS). Nominees can be identified by the platinum and blue cord they wear during the ceremony.

For more information about Psi Chi, please visit: <https://www.psichi.org/>

Sigma Tau Delta, International English Honor Society

Sigma Tau Delta, the International English Honor Society, was established in 1924 to confer distinction for high achievement in English language, literature, and writing, and the organization is dedicated to fostering literacy and all aspects of the discipline of English. With over 900 active chapters located in the United States and abroad, there are more than 1,000 Faculty Advisors, and approximately 9,000 members inducted annually.

For more information about Sigma Tau Delta, please visit: <https://www.english.org>

JFK School of Law at National University

Alpha Phi Sigma (APS)

The Mission of Alpha Phi Sigma is to promote analytical thinking, rigorous scholarship, and lifelong learning; to keep abreast of the advances in scientific research; to elevate the ethical standards of the criminal justice professions and to sustain in the public mind the benefit and necessity of education and professional training.

Alpha Phi Sigma recognizes academic excellence of undergraduate and graduate students of Criminal Justice and related disciplines. Alpha Phi Sigma is the only Criminal Justice Honor Society, that is a certified member of the Association of College Honor Societies and is affiliated with the Academy of Criminal Justice Sciences.

For more information about Alpha Phi, Sigma please visit: <https://alphaphisigma.org/>

Order of the Sword and Sheild Honor Society

The Order of the Sword and Shield is the first and only academic and professional honor society dedicated exclusively to homeland security, intelligence, emergency management, cyber and information security, and all protective security disciplines. The mission of the Society shall be to promote critical thinking, high scholarship and professional development; to further enhance the ethical standards of the protective security professions; and to cultivate a high order of personal living.

For more information about Order of the Sword and Shield, please visit: <https://www.securityhonorsociety.org/>

Graduation Requirements

To graduate, all degree-seeking students must complete their degree program within the maximum time limits specified in the University's catalog under the Time Limits for Degree Completion policy.

Degree Requirements

For all degree-seeking students, degree conferral requirements include:

- Cumulative grade point average of 2.0 (letter grade of "C") or better for undergraduate students and 3.0 (letter grade of "B") or higher for graduate students
- Official documents on file for basis for admission from a regionally or nationally accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- Completion of all degree program credit requirements
- University approval of dissertation manuscript and successful completion of dissertation defense for doctoral students
- All financial obligations to the University have been satisfied

Diploma Application and Degree Conferral

Students must submit a Diploma Application through *NCUOne*, which triggers a final degree audit. The audit process confirms that the student has met all academic and programmatic requirements and is financially clear. The Diploma Application final degree audit is reviewed and completed by the Academic and Finance Advisor, the School of the degree program to be conferred, Student and Financial Services, and the Office of the Registrar.

Upon successful completion of the final degree audit, the student is degree conferred and the diploma order is submitted to the University's third-party diploma vendor for processing.

A student's program completion date is the end date of the last course in their program. This date will be used as the student's degree conferral and diploma date.

If a doctoral student successfully defends their dissertation **prior** to the end date of the last dissertation course, the University will use the date the student defended their dissertation as the degree conferral and diploma date.

Example: End date of last course is March 14th; doctoral student defends dissertation on March 8th. Degree conferral date and diploma date is March 8th.

Honors

Students who demonstrate exceptionally high academic progress in the undergraduate programs are eligible for graduation honors. Graduate degrees do not qualify for honors designation. Students must have earned at least 30 semester credits with letter grades (A through F) at the University for honors to be determined. Academic honors are posted to the diploma and final transcript when the student's degree is conferred.

Students completing an Undergraduate program may qualify for the following honors:

- Summa Cum Laude (with highest honors) GPA 3.85 +
- Magna Cum Laude (with high honors) GPA 3.75 - 3.849
- Cum Laude (with honors) GPA 3.50 - 3.749

Diplomas and Certificates

The student's name in the official record will be printed on their diploma. Students may type out how they want their name to appear on the diploma in the diploma application, however; only minor deviations from the name will be allowed (e.g., omission or inclusion of middle name or suffix, abbreviated or nickname). If a student wants a different name than what is on record, they must complete a change of information request prior to submitting the diploma application. Contact the Office of the Registrar at graduation@ncu.edu for additional assistance.

Students receive one free diploma and diploma cover upon completion of the degree conferral audit and approval process. Students may order duplicate copies of their diploma or an electronic credential. Electronic credentials are only available for students that graduated after February 2021. See [Miscellaneous Fees](#) for more information.

Commencement Ceremony

The current commencement ceremony calendar and general information about the University's graduation process and ceremony schedule can be found at <https://www.nu.edu/national-university-2024-commencement/>.

Students may order their regalia from the University's third-party regalia vendor. The third-party vendor's website and contact information is published on www.nu.edu.

To participate in commencement activities:

- Bachelor's degree students must be within 9 credits of program completion 45 calendar days prior to the commencement ceremony event date with a GPA of at least 2.0 and good financial standing with the University
- Master's degree students must be within 9 credits of program completion 45 calendar days prior to the commencement ceremony event date with a GPA of at least 3.0 and good financial standing with the University
- Doctoral students must pass their dissertation defense 45 calendar days prior to the commencement ceremony event date and be in good financial standing with the University

Note: Eligible students must also complete the event registration process outlined on <https://www.nu.edu/national-university-2024-commencement/> 45 calendar days prior to the commencement ceremony event date.

Dissertation of the Year Award

Each year, the University recognizes scholarly achievement among its doctoral students by honoring one or more authors of outstanding dissertations submitted for consideration by committee Chairs. The author of the Dissertation of the Year (DOY) is invited to attend that year's commencement ceremony to be honored, with the University covering travel costs for the DOY winner through a University travel-approved travel agency including transportation and lodging.

Eligibility

Graduates who have completed their dissertation paper and completed their dissertation defense by April 30th of the current academic year are eligible to have their Chair submit their dissertation for consideration for the Dissertation of the Year award.

Example: Dissertation must have been completed and approved between May 1st of 20XX and April 30th of 20XX.

Participation at Commencement

To be eligible for the current year, nominations must be submitted to the Graduate School by May 1st. Nominations may be made by the dissertation chair. To nominate a dissertation for this award, a letter referencing the dissertation and indicating why it might merit an award should be submitted to GraduateResearch@ncu.edu. No late submissions will be considered.

Licensure and Certification

Professional organizations, societies, states, and licensing jurisdictions have specific requirements for membership, certification, or licensure. Students intending to seek licensure of any type must take full responsibility for ensuring that their degree program at the University meets the licensing requirements of their local states, school districts, professional associations, or agencies. The University cannot provide assistance to a student reg

Ethical Standards & Practices

Student Code of Conduct

Preface

National University (NU) is dedicated to making lifelong learning opportunities accessible, challenging, and relevant to a diverse student population. Consistent with the University mission, rights and responsibilities are extended to all members of our University community.

Community exists on the basis of shared values and principles. NU student community members are expected to uphold and abide by certain standards of conduct which form the basis of the Student Code of Conduct. These standards are embodied within the below set of core values.

Core Values of Student Conduct at National University

- Integrity: National University students exemplify honesty, honor and a respect for the truth in all of their dealings.

- Community: National University students build and enhance their community.
- Social Justice: National University students are just and equitable in their treatment of all members of the community and act to discourage and/or intervene to prevent unjust and inequitable behaviors.
- Respect: National University students show positive regard for each other, for property and for the community.
- Responsibility: National University students are given and accept a high level of responsibility to self, to others, and to the community.

National University students are solely responsible for having knowledge of information, policies and procedures outlined within this policy. The Office of Student Conduct (OSC) reserves the right to change this code as deemed necessary; posted changes are effective immediately. Students are encouraged to check online at <https://www.nu.edu/student-services/StudentConduct/> for the most current version of all policies and procedures.

Conflict Resolution Options

Whenever appropriate, community members should consider alternative dispute resolution in the following forms. Some important exceptions include offenses including sexual violence, physical threat/violence, or when there is a concern a physical threat may develop with continued contact between the parties.

- Involvement of a Supervisor or Academic Program Leadership
- University Ombuds Office at (858) 642-8368 or ombuds@nu.edu
- Consider switching communication methods (e.g., discussion via phone rather than email)

SECTION 1: MISSION AND PHILOSOPHY STATEMENTS

1.1 Mission Statement

The OSC seeks to enhance student learning and personal development by creating an educationally purposeful, ethical and caring community, while protecting the interests of the larger National University community. Through the fair, timely and consistent administration of the student conduct process, the OSC promotes student learning with the guiding principles of integrity, community, social justice, respect and responsibility.

1.2 Philosophy Statement

The NU community is committed to fostering an environment that is conducive to academic inquiry, a productive campus life, and thoughtful study and discourse. The OSC is entrusted to maintain balance between the interests of individual students and those of the University community. This community exists on the basis of shared values and principles, which all members are expected to uphold and abide by. Specific to students, these shared principles of behavior form the basis of the Student Code of Conduct. These standards are embodied within a set of core values that include integrity, community, social justice, respect and responsibility.

When members of the University community fail to exemplify these five values by engaging in violation of the standards below, it is the responsibility of all staff, faculty, students, and other community members to encourage behavior change. Specifically, the OSC establishes norms, documents, intervenes, and leads development and assertion of these standards. The student conduct process at National University is not intended to punish students; rather, it exists to protect the interests of the community and to challenge those whose behavior in some way compromises the productivity of academic pursuits. Sanctions are intended to challenge students' moral and ethical decision-making and to help them bring their behavior into accord with our community expectations. When a student is unable to conform their behavior to community expectations, the student conduct process may determine the student should no longer share in the privilege of participating in this community.

Procedures and rights in student conduct procedures are conducted with fairness to all but are not held to the same protections of due process afforded by the courts during civil or criminal proceedings. Due process, as defined within these procedures, assures written notice and an Educational Conference (EC) with an objective decision-maker (only in the case of an investigation – not solely a complaint). No student will be found in violation of National University policy without showing it is more likely than not that a policy violation occurred and any sanctions will be proportionate to the severity of each violation and to the cumulative conduct history of the student.

SECTION 2: POLICY ADMINISTRATION AND DESIGNATIONS

2.1 Interpretation and Revision

OSC will develop procedural rules for the administration of conduct proceedings and/or appeals that are consistent with provisions of the Student Code of Conduct. Material deviation from these rules will, generally, only be made as necessary and will include reasonable advance notice to the parties involved, either by posting online and/or in the form of written communication. The OSC may vary procedures with notice upon determining that changes to law or regulation require policy or procedural alterations not reflected in this Code. The OSC may make minor modifications to procedure that do not materially jeopardize the fairness owed to any party. Any question of interpretation of the Student Code of Conduct will be referred to the OSC, whose interpretation is final. The Student Code of Conduct will be updated annually.

2.2 University as Convener

The University is the convener of every action under this Code. Within that action, there are several roles. The Respondent is the person who is alleged to have violated the Code. The party bringing the complaint is the Reporter, who may be a student, employee, visitor or guest. The Reporter may, if they so choose, be present and participate in the process as fully as the Respondent. There are Witnesses, who may offer information regarding the allegation. There is an Investigator(s) whose role is to present the allegations and share the evidence that the University has obtained regarding the allegations.

2.3 Group Violations

A student group or organization and its officers and membership may be held collectively and individually responsible when violations of this code by the organization or its member(s):

- Take place at organization-sponsored or co-sponsored events, whether sponsorship is formal or tacit;
- Have received the consent or encouragement of the organization or of the organization's leaders or officers; or
- Were known or should have been known to the membership or its officers.

Investigations for student groups or organizations follow the same general student conduct procedures. In any such action, individual determinations as to responsibility will be made and sanctions may be assigned collectively and individually and will be proportionate to the involvement of each individual and the organization.

2.4 Amnesty

Amnesty means that current students can avoid informal and formal University disciplinary action and the creation of a formal disciplinary record under the circumstances described below. Records regarding the provision of amnesty are maintained. Abuse of amnesty requests can result in a decision by the OSC not to extend amnesty to the same person repeatedly.

2.4.1 For Victims

The University provides amnesty to victims who may be hesitant to report to University officials because they fear that they themselves may be accused of minor policy violations, such as underage drinking, at the time of the incident. Educational options will be explored, but no conduct proceedings or conduct record will result.

2.4.2 For Those Who Offer Assistance

To encourage students to offer help and assistance to others, the University pursues a policy of amnesty for minor violations when students offer help to others in need. At the discretion of the OSC, amnesty may also be extended on a case-by-case basis to the person receiving assistance. Educational options will be explored, but no conduct proceedings or conduct record will result.

2.4.3 For Those Who Report Serious Violations

Students who are engaged in minor violations but who choose to bring related serious violations by others to the attention of the University are offered amnesty for their minor violations. Educational options will be explored, but no conduct proceedings or record will result.

SECTION 3: JURISDICTION

The Student Code of Conduct is published annually in the University General Catalog, and the policy is available on the National University Office of Student Conduct website. Hard copies are available by request from the OSC (osc@nu.edu). Students are responsible for having read and abiding by the provisions of the Student Code of Conduct.

The Student Code of Conduct and the student conduct process apply to the conduct of all students, both undergraduate and graduate, and all National University- affiliated student organizations. For the purposes of student conduct, National University considers an individual to be a student when an offer of admission has been extended, a student identification number has been issued, and thereafter, as long as the student is eligible to enroll in courses at the University. The Code also applies to guests of students, whose hosts may be held accountable for the misconduct of their guests. Visitors to, and guests of, National University may seek resolution of violations of the Student Code of Conduct committed against them by members of the National University student body.

National University retains conduct jurisdiction over students who choose to take a leave of absence, withdraw, or have graduated; for any misconduct that occurred prior to the leave, withdrawal, or graduation. The University will retain jurisdiction even when misconduct is reported after the student has left, withdrawn, or graduated from the University. There is no time limit on reporting violations of the Student Code of Conduct; however, the longer someone waits to report an offense, the harder it becomes for National University officials to obtain information and witness statements, and to make determinations regarding alleged violations.

The Student Code of Conduct applies to behaviors that take place on a campus, online, at University sponsored events and may also apply off-campus when the OSC determines that the off-campus conduct affects National University constituents or its interests. National University interest is defined to include:

- Any situation where it appears that the student's conduct may present a danger or threat to the health or safety of themselves or others;
- Any situation that significantly impinges upon the rights, property, or achievements of self or others, or significantly breaches the peace and/or causes social disorder; and/or
- Any situation that is detrimental to the educational mission and/or interests of National University.

The Student Code of Conduct may be applied to behavior conducted online, via email, social media and all other types of electronic medium. Students should also be aware that online postings such as blogs, web postings, chats and social networking

sites are in the public sphere and are not private. These postings can subject a student to allegations of conduct violations if evidence of policy violations is posted online. However, most online speech by students not involving National University networks or technology will be protected as free expression and not subject to this Code, with two notable exceptions:

- A true threat, defined as a threat that a reasonable person would interpret as a serious expression of intent to inflict bodily harm upon specific individuals.
- Speech posted online about National University or its community members that causes a significant on campus disruption.

Though anonymous complaints are permitted, doing so may limit National University's ability to investigate and respond to an allegation. Those who are aware of misconduct are encouraged to file a report as quickly as possible to the OSC. A responding student facing an alleged violation of the Student Code of Conduct is not permitted to withdraw from National University until all allegations are resolved. Official transcripts and/or diploma may be withheld until the allegations are resolved.

University-assigned student email addresses are the primary means of communication at National University as well as the OSC. In addition, students may be required to meet in-person, via phone, or through videoconferencing, when necessary. Students are responsible for keeping their contact information up to date and are responsible for all communications received to their means of contact as they are documented in official University records. Failure to check and/or respond to email or voicemail is NOT an acceptable excuse for failing to respond to an official communication.

SECTION 4: VIOLATIONS OF THE LAW

Alleged violations of federal, state and local laws may be investigated and addressed under the Student Code of Conduct. When an offense occurs over which National University has jurisdiction, the National University conduct process will usually go forward notwithstanding any criminal complaint that may arise from the same incident.

National University reserves the right to exercise its authority of interim suspension upon notification that a student is facing criminal investigation and/or complaint. Interim suspensions are imposed until an EC can be held, typically within two (2) weeks. The EC may resolve the allegation or may help to determine if the interim suspension should be continued. The interim suspension may be continued if a danger to the community is posed, and National University may be delayed or prevented from conducting its own investigation and resolving the allegation by the pendency of the criminal process. In such cases, National University will only delay its process until such time as it can conduct an internal investigation or obtain sufficient information independently or receive a report from law enforcement to proceed. This delay will be no longer than two (2) weeks from notice of the incident unless a longer delay is requested and substantiated in writing by the Reporter or Respondent, or to allow the criminal investigation to proceed before the National University process. Students accused of crimes may request to take a Leave of Absence (LOA) from National University until the criminal charges are resolved. In such situations, the National University procedure for voluntary leaves of absence is subject to the following conditions:

- The responding student must comply with all campus investigative efforts that will not prejudice their defense in the criminal trial;
- The responding student must comply with all interim actions and/or restrictions imposed during the leave of absence;
- The responding student must agree that, in order to be reinstated to active student status, they must first be subject to, and fully cooperate with, the campus conduct process and must comply with all sanctions that are imposed; and
- This Leave of Absence will not prevent enrollment status from being reported as scheduled. Students receiving Financial Aid should contact the Financial Aid department to help determine impact of voluntary LOA.

SECTION 5: THE RULES

5.1 Core Values and Behavioral Expectations

National University considers the behavior described in the following sub-sections as inappropriate for the NU community and in opposition to the core values set forth in this document. These expectations and rules apply to all students, whether undergraduate, graduate, or non-degree seeking. National University encourages community members to report all incidents that involve the following actions to the OSC. Any student found to have committed or to have attempted to commit the following misconduct is subject to the sanctions outlined in the student conduct process.

5.2 General Standards of Conduct for Online Students

Freedom of speech and expression is valued in the academic setting. Equally valued is the respect given to University computer systems and information technology. To that end, students will adhere to the following online standards of conduct:

- Access National University courses only for lawful purposes.
- Respect the privacy of other members of the class and other students.
- Respect the integrity of the University's computer systems.
- Respect the diversity of opinions among the instructor and members of the class and respond to them in a courteous manner. Electronic communication consisting of all caps, large font, or bold print may be considered unprofessional and a form of verbal abuse.
- Maintain an environment free of harassment, stalking, threats, abuse, name-calling, intimidation, cyber-bullying, use of offensive language, insults or humiliation to the instructor and members of the class. This includes, but is not limited to, demeaning written or oral comments of an ethnic, religious, sexist (or sexual orientation), or racist nature, and the unwanted sexual advances or intimidations by email, or on discussion boards and postings in course shells.
- Abide by all rules and regulations published by the University and agree to be subject to disciplinary actions as described in this Code of Conduct and all policies as described in the General Catalog.

5.2.1 Integrity

National University students exemplify honesty, honor and a respect for the truth in all of their dealings. Behavior that violates this value includes, but is not limited to:

5.2.1.1 Academic Dishonesty

Academic dishonesty violations will be addressed by the instructor utilizing the guidance in the Faculty Handbook on Academic Integrity and Ethics. The instructor will subsequently report any violation that occurs at the University to the OSC at the following link: www.nu.edu/reportit. The OSC is responsible for adjudication utilizing the rubric below and tracking of all academic integrity violations that occur at the University.

In the case of academic integrity violations, the student may be subject to both classroom/program as well as institutional sanctions. Classroom or program-specific sanctions will be issued at the discretion of the instructor of record/program leadership (e.g., penalized grade or program dismissal), whereas the OSC will assess the appropriateness of and enact educational and/or disciplinary sanctions. An incident or string of incidents will generally be considered a single violation up until the point a student receives notice of the violation; additional infractions occurring after that point will be considered separately for purposes of this rubric. General guidance on substantial issues of interpretation of the sanction rubric may be provided by the Academic Program Lead (APL) or the OSC.

Each incident the student is found responsible for will constitute one cumulative point toward Academic Dishonesty Sanctions listed below. Points are assigned per incident regardless of the number of violations. Also, an additional point may be accrued if the charges involve one or more of the following: senior project, thesis, surrogate, graduate course, altering grades, candidacy/qualifying exam, and/or program professional/clinical standards (credential/nursing/MAC). Sanction points are cumulative over the length of the student's tenure at National University.

Scope of Academic Dishonesty Policy

This policy applies to all course assignments submitted by a student to an instructor, including but not limited to the following:

- Discussion postings
- Exams
- Signature assignments
- Course papers
- Comprehensive portfolio/prospectus
- Written assignments using outside source information
- Dissertation documents (dissertation chapters, concept papers, proposals and final reports)

Examples of Academic Dishonesty and Plagiarism

Below are examples of academic integrity infractions. This list is NOT all inclusive and students are considered responsible for maintaining integrity in their academic pursuits at all times.

- Referencing content from websites without citation or paraphrase (websites may be referenced for academic work but must be cited by the date referenced).
- Intentional close paraphrasing of the published or unpublished work of another author or authors without proper in-text attribution.
- Submitting as your own original work any paper, article, report, presentation, or book chapter written by another author or authors.
- Submitting as your own original work any assignment that includes content purchased from a commercial service or another person.
- Submitting a paper or other assignment previously written for another course (at National University or other institution) without explicit permission from the faculty of the current course.
- Submitting a paper or other assignment that contains any published materials that have been duplicated word-for-word without citation or proper attribution.
- Writing a paper (or any assignment) on behalf of another student.
- Providing and/or citing references that were not actually used in your work giving the impression that authentic research was conducted.
- Speaking in public (in the form of a speech, lecture or presentation) where any content in that presentation is misrepresented as your own original work or intellectual property.
- Unauthorized collaboration with others on homework assignments.
- Attempting to obtain access to test questions or advance copies of an exam in advance of the exam.
- Publishing or otherwise making available evaluation materials, essay prompts, or other protected documentation from University coursework or services.

Re-using or Re-purposing Prior Work

All student work must be original and written specifically for the course in which it was assigned. Presenting one's previously used work as an original work in subsequent assignments is plagiarism and is inconsistent with honesty and truthfulness in scholarship. Submitting the same coursework to multiple courses also violates Academic Integrity unless the resubmitted work is substantially changed and cited as previous work. NU faculty and students should discuss the expectations of each activity at the beginning of the class. There should be a clear understanding between the faculty member and student regarding the use of prior work in the class. The faculty member must indicate if the student's response must be an original work or if the student may use prior work in their response to a new activity.

Exceptions

1. Previously attempted course - A student may submit prior work for the same course when re-taking a course that was previously attempted. Students must notify their faculty that they previously attempted the course and are re-using prior work. This exception notwithstanding, refining prior work before submission to best reflect the student's current scholarly abilities and achieve the best chance for a passing grade on the re-take is always prudent.
2. Research methods courses and dissertation research - Doctoral research is an ongoing process and these courses represent a continuing sequence where it is expected that students refine their prior work. Therefore, the submission of prior work is acceptable. Students must notify their professors that they are continuing their research from a prior course. This exception notwithstanding, refining prior work before submission to best reflect the student's current scholarly abilities and take advantage of prior faculty feedback is always prudent.
3. Comprehensive portfolios/prospectus - The comprehensive portfolio and prospectus are the student's opportunity to showcase and prove knowledge already attained. Therefore, the submission of prior work is acceptable. This exception notwithstanding, students must revise the prior work before submission as part of the portfolio to best reflect the student's current scholarly abilities and submit both the original and the revised versions.
4. When instructed to do so by the faculty or assignment instructions - re-submission of prior work or revised work is permitted.

Office of Student Conduct Points/Sanctions

Sanction points for academic dishonesty are as follows:

- 1 Point = Written Warning
- 2 Points = Educational Sanction (ex. paper on academic dishonesty/ethics)
- 3 Points = Educational and Disciplinary Sanctions (ex. paper and disciplinary probation and/or suspension)
- 4 Points = Separation Proceedings

5.2.1.2 Unauthorized Access

Unauthorized access to any University building (i.e., keys, cards, etc.) or unauthorized possession, duplication or use of means of access to any University building or failing to timely report a lost University identification card or key.

5.2.1.3 Collusion

Action or inaction with another or others to violate the Student Code of Conduct, which includes but is not limited to:

- Students are subject to disciplinary action for knowingly acting in concert with others to violate University policies and/or regulations.
- Students are subject to disciplinary action for being aware of the existence of a violation of University policies and/or regulations and failing to take reasonable action to report the violations in a timely manner.
- Students are always responsible for the actions of their guests that are on campus visiting a member of the campus community.

5.2.1.4 Trust

Violations of positions of trust within the community and/or deliberately misleading University officials or agents who are attempting to gain information for University business.

5.2.1.5 Election Tampering

Tampering with the election of any National University-recognized student organization (minor election code violations are addressed by the Associate Director of NU Scholars Program).

5.2.1.6 Taking of Property

Intentional and unauthorized taking of National University property or the personal property of another, including goods, services and other valuables; attempting to take, sell or keep in one's possession, including but not exclusively, items of National University property or items belonging to students, faculty, staff, student groups, visitors or to others within the larger community whether on or off campus.

5.2.1.7 Stolen Property

Knowingly taking or maintaining possession of stolen property.

5.2.2 Community

National University students build and enhance their community. Behavior that violates this value includes, but is not limited to:

5.2.2.1 Disruptive Behavior

Disruption of University operations, both physical and electronic operations, including non-adherence to and/or disregard for location-specific rules and behavioral expectations such as, but not limited to, the library, computer, science and/or simulation labs.

Disruptive behaviors are separated into two different categories: Minimum and Significant.

Minimum

Minor disruption of University operations which occur on/off campus or online will be addressed by the Professor, Academic Program Lead, Director or Manager of the University department where the behavior occurred, and documented for the department file.

Examples include, but are not limited to:

- Repeated and disruptive tardiness to class or appointments
- Eating and/or drinking (if not permitted)
- Electronic devices going off
- Email or phone harassment (1-3 separate instances within a short time frame)
- Performing a distracting repetitive act such as tapping feet or fingers, popping gum, or loud talking
- Disrespectful engagement online or in-person

Significant

Substantial disruption of University operations including obstruction of teaching, research, administration, other University activities, and/or other authorized non-University activities which occur on/off campus or online must be reported immediately and will be addressed by the OSC. Persistent Minimum-level behaviors can become Significant level concerns. When reporting persistent minimum level behaviors, that have risen to the significant level, please provide the OSC with adequate documentation regarding prior occurrences, including all attempts at addressing the behavior at the department level.

Examples include, but are not limited to:

- Persistent Minimum level behaviors (3+ separate instances)
- Invading one's personal space or blocking an entry or exit way
- Moving around the classroom in a threatening manner and/or without authorization (e.g., during a lecture)
- Aggressive confrontation of another person
- Explicit or implicit threats

5.2.2.2 Disorderly Assembly

Causing, inciting or participating in any disturbance that presents a clear and present danger to others, causes physical harm to others, or damage and/or destruction of property, which includes, but is not limited to, the following:

- 1.0 Assembling on campus for the purpose of disrupting classes, seminars, meetings, research projects, or activities of the University
- 1.1 Assembling on campus for the purpose of creating or attempting to create a riot, destroying property or creating a disorderly diversion that interferes with the normal operation of the University (i.e., water balloon or water gun fights, egging incidents, etc.)
- 1.2 Obstructing the freedom of movement of other persons to and from University facilities or materially interfering with the normal operation of the University.
- 1.3 Engaging in abuse of or unauthorized use of sound amplification equipment indoors or outdoors during class hours. (Any use of sound amplification equipment must be cleared in advance through the Center Director of the specific campus where the event will take place. For student organizations, this must first be cleared by the Office of Student Engagement and Leadership and then the Center Director.)

5.2.2.3 Unauthorized Entry

Misuse of access privileges to University premises or unauthorized entry to or use of buildings, including trespassing, propping open or unauthorized use of alarmed doors for entry into or exit from a University building.

5.2.2.4 Forgery/Fraud

Altering University documents, misrepresenting information, or knowingly providing false information.

5.2.2.5 Damage and Destruction

Intentional, reckless and/or unauthorized damage to or destruction of University property or the personal property of another.

5.2.2.6 IT and Acceptable Use

Violations in this category would include, but are not limited to:

- 1.0 Unauthorized entry into a file to use, read or change the contents, or for any other purpose
- 1.1 Unauthorized transfer of a file
- 1.2 Unauthorized use of another individual's identification and password
- 1.3 Use of computing facilities to view or send indecent, obscene, threatening or abusive messages

- 1.4 Use of computer facilities that violate copyright laws including the unauthorized distribution of copyrighted material via file sharing
- 1.5 Inappropriate use of social media (including but not limited to Facebook, Instagram, Tic Tok, Twitter, Snapchat, Vine, blogs, etc.)
- 1.6 Use of computing facilities to interfere with the normal operation of the Office of Information Technology

5.2.2.7 Gambling

Gambling as prohibited by the laws of the State of California; (Gambling may include video games, dice, raffles, lotteries, sports pools, online betting activities, any other game of skill or chance played for money.)

5.2.2.8 Weapons

Possession, use, or distribution of explosives (including fireworks and ammunition), guns (including air, BB, paintball, facsimile weapons and pellet guns), or other weapons or objects deemed dangerous such as arrows, axes, machetes, nun chucks, throwing stars, or non-folding knives with a blade of longer than 4 inches, mace or pepper spray, chemical weapons, darts, box cutters, including the storage of any item that falls within the category of a weapon in a vehicle parked on University property.

5.2.2.9 Smoking or Tobacco

Smoking or tobacco sale or use in any area of National University facilities, vehicles, and outside stairways. Students who smoke are required to smoke outside and at a minimum of 25 feet away from a building. Smoking materials must be properly disposed of in appropriately designated receptacles.

5.2.2.10 Fire Safety

Violation of local, state, federal or campus fire policies including, but not limited to:

- 1.0 Intentionally or recklessly causing a fire which damages University or personal property or which causes injury
- 1.1 Failure to evacuate a National University-controlled building during a fire alarm
- 1.2 Improper use of National University fire safety equipment
- 1.3 Tampering with or improperly engaging a fire alarm or fire detection/control equipment while on National University property. There is the possibility that such action may result in a local fine in addition to National University sanctions.

5.2.2.11 Ineligible Pledging or Association

Pledging or associating with a student organization without having met eligibility requirements established by National University.

5.2.2.12 Animals

Animals and pets, with the exception of service animals for persons with disabilities, are not permitted in any University facility. Students who have questions on whether their animal will be allowed on campus due to a disability are responsible to contact the Student Accessibility Services (SAS) team. (Please visit www.nu.edu/sas for more information).

5.2.2.13 Wheeled Devices

Skateboards, roller blades, roller skates, bicycles and similar wheeled devices are not permitted inside National University buildings. Additionally, skateboards and other wheeled items may not be ridden on railings, curbs, benches, or any such fixtures that may be damaged by these activities, and individuals may be liable for damage to National University property caused by these activities.

5.2.3 Social Justice

National University students recognize that respecting the dignity every person is essential for creating and sustaining a flourishing university community. They understand and appreciate how their decisions and actions impact others and are just and equitable in their treatment of all members of the community. They act to discourage and challenge those whose actions may be harmful to and/or diminish the worth of others. Conduct that violates this value includes, but is not limited to:

5.2.3.1 Discrimination

Any act or failure to act that is based upon an individual or group's actual or perceived status (sex, gender, race, color, age, creed, national or ethnic origin, physical or mental disability, veteran status, pregnancy status, religion, sexual orientation or other protected status), that is sufficiently severe in that it limits or denies the ability to participate in or benefit from the University's educational programs or activities. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.3.2 Unwelcome Harassment

Any unwelcome conduct in-person or online, on the basis of an individual or group's actual or perceived status (sex, gender, race, color, age, creed, national or ethnic origin, physical or mental disability, veteran status, pregnancy status, religion, sexual orientation or other protected status). Any unwelcome conduct should be reported to a campus official, who will act to remedy and/or resolve reported incidents on behalf of the parties involved and the community. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

- 1.0 Hostile Environment

Sanctions can and will be imposed for the creation of a hostile environment only when unwelcome harassment is sufficiently severe, pervasive or persistent, and objectively offensive that it unreasonably interferes with, limits or denies the ability to participate in or benefit from the University educational or employment program or activities. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.3.3 Retaliatory Discrimination or Harassment

Any intentional, adverse action taken by a responding individual or allied third party, absent legitimate nondiscriminatory purposes, against a participant or supporter of a participant in a civil rights grievance proceeding or other protected activity under this Code. To be considered retaliation, a causal connection is required between a materially adverse action and the act of:

- 1.0 Reporting an allegation; or
- 1.1 Participating in support of an investigation.

A materially adverse action is one that would dissuade a reasonable person from reporting an allegation of a policy violation under this Code. A determination of whether an action is materially adverse is made on a case-by-case basis. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.3.4 Bystanding

Students are expected to "reasonably" respond to assist other students in need.

- 1.0 Complicity with or failure of any student to appropriately address known or obvious violations of the Code of Student Conduct or law
- 1.1 Complicity with or failure of any organized group to appropriately address known or obvious violations of the Code of Student Conduct or law by its members

5.2.3.5 Abuse of Conduct Process

Abuse or interference with, or failure to comply in, University processes including conduct and academic integrity conferences, including, but not limited to:

- 1.0 Falsification, distortion, or misrepresentation of information
- 1.1 Failure to provide, destroying or concealing information during an investigation of an alleged policy violation
- 1.2 Attempting to discourage an individual's proper participation in, or use of, the campus conduct system
- 1.3 Harassment (verbal or physical) and/or intimidation of a member of a campus conduct body prior to, during, and/or following a campus conduct proceeding
- 1.4 Failure to comply with the sanction(s) imposed by the campus conduct system
- 1.5 Influencing, or attempting to influence, another person to commit an abuse of the campus conduct system

5.2.4 Respect

National University students show positive regard for each other and for the community. Behavior that violates this value includes, but is not limited to:

5.2.4.1 Harm to Persons

Intentionally or recklessly causing physical harm or endangering the health or safety of any person.

5.2.4.2 Threatening Behaviors

Students should not be engaged in any behavior that seeks to threaten or intimidate others, thereby disrupting the ability to maintain a positive environment conducive to learning.

- 1.0 Threat
Written or verbal conduct that causes a reasonable expectation of injury to the physical health, mental health, or safety of any person or damage to any property.
- 1.1 Intimidation
Intimidation defined as implied threats or acts that cause a reasonable fear of emotional, mental or physical harm in another.

5.2.4.3 Bullying and Cyberbullying

Bullying and cyberbullying are repeated and/or severe aggressive behaviors that intimidate or intentionally harm or control another person physically or emotionally and are not protected by freedom of expression.

5.2.4.4 Hazing

Defined as an act that endangers the mental or physical health or safety of a student, or that destroys or removes public or private property, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in a group or organization. Participation or cooperation by the person(s) being hazed does not excuse the violation. Failing to intervene to prevent, failing to discourage or failing to report those acts may also violate this policy. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.4.5 Intimate Partner/ Relationship Violence

Violence or abuse by a person in an intimate relationship with another. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.4.6 Stalking

Stalking is a course of conduct directed at a specific person that is unwelcome and would cause a reasonable person to feel fear. This would include persistent contact via electronic mediums (Facebook, Instagram, Email, Text Message, etc.). (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.4.7 Sexual Misconduct

Includes, but is not limited to, sexual harassment, non-consensual sexual contact, non-consensual sexual intercourse, or sexual exploitation. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.4.8 Public Exposure

Includes deliberately and publicly exposing one's intimate body parts, public urination, defecation, and public sex acts. (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

5.2.5 Responsibility

National University students are given and accept a high level of responsibility to self, to others and to the community. Behavior that violates this value includes, but is not limited to:

5.2.5.1 Alcohol

Use, possession or distribution of alcoholic beverages or paraphernalia while on University property.

5.2.5.2 Illegal Drugs

Use, possession or distribution of illegal drugs or other controlled substances or drug paraphernalia while on University property.

5.2.5.3 Prescription Medications

Abuse, misuse, sale or distribution of prescription or over-the-counter medications while on University property.

5.2.5.4 Failure to Comply

Failure to comply with the reasonable directives of University officials or law enforcement officers during the performance of their duties and/ or failure to identify oneself to these persons when requested to do so.

5.2.5.5 Financial Responsibilities

Failure to promptly meet financial responsibilities to the institution, including, but not limited to; knowingly passing a worthless check or money order in payment to the institution or to an official of the institution acting in an official capacity.

5.2.5.6 Arrest

Failure of any student to accurately report an off-campus arrest by any law enforcement agency for any crime (including non-custodial or field arrests) to the OSC within seventy-two (72) hours of release.

5.2.5.7 Other Policies

Violating other published University policies, regulations or rules. Students are subject to the specific policies in the academic handbook of the program in which they are enrolled. Students registered in courses that involve clinical rotations, student teaching or internships are also subject to the specific policies of those allied third-party sites.

5.2.5.8 Health and Safety

Creation of health and/or safety hazards (dangerous pranks, hanging out of or climbing from/on/in windows, balconies, roofs, etc.).

5.2.5.9 Violations of Law

Evidence of violation of local, state or federal laws, when substantiated through the University's conduct process.

SECTION 6: OVERVIEW OF THE CONDUCT PROCESS

This overview gives a general idea of how the University's campus conduct proceedings work, but it should be noted that not all situations are of the same severity or complexity. Thus, these procedures are flexible, and are not the same in every situation, though consistency in similar situations is a priority. The campus conduct process and all applicable timelines commence with notice to an administrator of a potential violation of University rules.

6.1 Notice of Alleged Violation

Any member of the University community, visitor or guest may allege a policy violation(s) by a student for misconduct under this Code by filling out the form found at this link (www.nu.edu/reportit) with all pertinent details.

Notice may also be given to the OSC (or designee), the Title IX Coordinator, or any member of the Equity Grievance Process (EGP) Team, when appropriate. Additionally, administrators may act on notice of a potential violation whether a formal allegation is made or not. All allegations can be submitted by a victim or a third party and should be submitted as soon as possible after the incident occurs. The University has the right to pursue an allegation or notice of misconduct on its own behalf and to serve as convener of the subsequent campus conduct process.

In Title IX related issues, the "administrator" is any "mandated reporter" as defined under the Equal Opportunity, Harassment and Non-Discrimination policy.

6.2 STEP 1: Initial Inquiry Leading to Warning Letter or Notice of Investigation (NOI)

The University conducts a prompt initial inquiry into the nature of the incident or notice, the evidence available, and the parties involved. The initial inquiry may lead to one of the following:

- A determination that there is insufficient evidence to pursue the investigation because the behavior alleged, even if proven, would not violate the Student Code of Conduct (e.g., for reasons such as mistaken identity or allegations of behavior that falls outside the Code); or
- A determination that there is sufficient evidence to issue student a Warning Letter, describing the problematic behavior in violation of the Student Code of Conduct and requesting specific behavior change; (a Warning Letter and the resulting requests do not carry sanctions and are therefore not eligible for appeal); or
- A determination that there is sufficient evidence to conduct a more comprehensive investigation, usually through the use of an EC. A formal notice of investigation will be issued to the responding party.

6.3 STEP 2: Educational Conference (EC)

When an EC is held, the possible outcomes include:

A decision not to pursue the allegation based on a lack of or insufficient evidence. The matter should be closed, and records should so indicate.

A decision on the allegation, also known as a resolution to an allegation. If necessary, additional investigation and/or ECs may be held prior to closing the investigation and recommending sanction(s). If a decision on the allegation is made and the finding is that the responding student is not responsible for violating the Code, the process will end. If/when the CO conducting the EC determines that it is more likely than not that the responding student is in violation, the CO will close the investigation and recommend final sanction(s) to the OSC.

6.4 STEP 3: Review and Finalize Sanction(s)

If the student is found in violation(s), sanction(s) will be recommended by the CO to the OSC (based on precedent, prior violations of a similar nature that may indicate pattern, etc.), who will review and finalize the sanctions, subject to the University appeals process by any party to the complaint.

6.5 Conduct Sanctions

One or more of following sanctions may be imposed upon any student found responsible for any single violation of the Student Code of Conduct:

- 1.0 Warning

An official written notice that the student has violated University policies and/or rules and that more severe conduct action will result should the student be involved in any other violations while the student is enrolled at the University.

- 1.1 Restitution

Compensation for damage caused to the University or any person's property. This could also include situations such as failure to return a reserved space to proper condition – labor costs and expenses. This is not a fine but, rather, a repayment for labor costs and/or the value of property destroyed, damaged, consumed, or stolen.

- 1.2 Community/University Service Requirements

For a student or organization to complete a specific supervised community or University service.

- 1.3 Loss of Privileges

The student will be denied specified privileges for a designated period of time.

- 1.4 Confiscation of Prohibited Property

Items whose presence is in violation of University policy will be confiscated and will become the property of the University. Prohibited items may be returned to the owner at the discretion of the OSC and/or Campus Security.

- 1.5 Behavioral Requirement

This includes required activities including, but not limited to, seeking academic counseling or substance abuse counseling, writing a letter of apology, etc.

- 1.6 Educational Program

Requirement to attend, present and/or participate in a program related to the violation. It may also be a requirement to sponsor or assist with a program for others on campus to aid them in learning about a

specific topic or issue related to the violation for which the student or organization was found responsible. Audience may be restricted.

- 1.7 University Probation

The student is placed on official notice that, should further violations of University policies occur during a specified probationary period, the student may face suspension or expulsion. Regular probationary meetings may also be imposed.

- 1.8 Eligibility Restriction

The student is deemed "not in good standing" with the University for a specified period of time. Specific limitations or exceptions may be granted by the OSC and terms of this conduct sanction may include, but are not limited to, the following:

- a. Ineligibility to hold any office in any student organization recognized by the University or hold an elected or appointed office at the University; or

- b. Ineligibility to represent the University to anyone outside the University community in any way including: participating in a study tour or study abroad program, attending conferences, or representing the University at an official function, event or competition as a competitor, manager or student coach, etc.

- 1.9 Records, Enrollment, and/or Graduation Hold

A hold may be placed on the student's ability to re-enroll and/ or obtain official transcripts and/or graduate, and all sanctions must be satisfied prior to release of records, re-enrollment, or graduation/degree conferral.

- 1.10 University Suspension

Separation from the University for a specified minimum period, after which the student is eligible to return. Eligibility may be contingent upon satisfaction of specific conditions noted in the Decision Letter at the time of suspension. During the suspension

period, the student is banned from all university property, functions, events, activities, online classes and/or NU Commons Facebook activity without prior written approval from the OSC (or designee). This sanction may be enforced with a trespass action as necessary.

- 1.11 University Expulsion

Permanent separation from the University. The student is banned from all University property and the student's presence at any University-sponsored activity or event (including alumni events) is prohibited. This action may be enforced with a trespass action as necessary.

- 1.12 Revocation of Degree

In the event of serious misconduct committed while still enrolled but reported after the responding student has graduated, National University may invoke student conduct procedures and should the former student be found responsible, the University may revoke that student's degree.

- 1.13 Other Sanctions

Additional or alternate sanctions may be created and designed as deemed appropriate to the offense with the approval of the OSC or designee. The following sanctions may be imposed upon groups or organizations found to have violated the Student

- Code of Conduct:

- One or more of the sanctions listed above; and/or
- Deactivation, de-recognition, loss of all privileges (including status as a University-registered group/organization), for a specified period.

6.6 Parental Notification

The University reserves the right to notify the parents/guardians of dependent students regarding any conduct situation, particularly alcohol and other drug violations. The University may also notify parents/guardians of non-dependent students who are under the age of 21 of alcohol and/or other drug violations. Parental notification may also be utilized discretionarily by administrators when permitted by FERPA or consent of the student.

6.7 Notification of Outcomes

The outcome of a conduct proceeding is part of the education record of the responding student and is protected from release under the Federal Education Rights and Privacy Act (FERPA), except under certain conditions. As allowed by FERPA, when a student is accused of a policy violation that would constitute a "crime of violence" or forcible or non-forcible sex offense, National University will inform the alleged victim in writing of the final results of a conduct proceeding and/or an appeal panel regardless of whether the University concludes that a violation was committed. Such release of information may only include the responding student's name, the violation committed, and the sanctions assigned (if applicable). In cases of sexual misconduct and other offenses covered by Title IX, only, the rationale for the outcome will also be shared with all parties to the incident, in addition to the finding and sanction(s).

In cases where National University determines through the student conduct process that a student violated a policy that would constitute a "crime of violence" or non-forcible sex offense, the University may also release the above information publicly and/or to any third party. FERPA defines "crimes of violence" to include:

- Arson
- Assault offenses (includes stalking)
- Burglary
- Criminal Homicide—manslaughter by negligence
- Criminal Homicide—murder and non-negligent manslaughter
- Destruction/damage/vandalism of property

- Kidnapping/abduction
- Robbery
- Forcible sex offenses
- Non-forcible sex offenses

6.8 Failure to Complete Conduct Sanctions

All students, as members of the University community, are expected to comply with conduct sanctions within the timeframe specified by the CO (or designee). Failure to follow through on conduct sanctions by the date specified, whether by refusal, neglect or any other reason, may result in additional sanctions and/or suspension from the University.

SECTION 7: THE APPEAL REVIEW PROCESS

Any party may request an appeal of the decision of the OSC by filing a Petition for Appeal, available at: www.nu.edu/student-services/student-conduct/. All appeals of conduct decisions must be submitted within 5 business days of the original outcome, barring exigent circumstances. Any exceptions are made at the discretion of the OSC. If a party is granted an appeal, the party is granted only one appeal, based on the outline "Grounds for Appeal Requests" provided below. All sanctions imposed by the original decision-maker(s) remain in effect, and all parties will be informed (usually within five business days) of the status of requests for appeal, the status of the appeal consideration, and the results of the appeal decision.

7.1 Grounds for Appeal Requests

Appeals requests are limited to the following grounds:

- A procedural error occurred that significantly impacted the outcome of the investigation (e.g., substantiated bias, material deviation from established procedures, etc.).
- To consider new evidence, unavailable during the original investigation, that could substantially impact the original finding or sanction. A summary of this new evidence and its potential impact must be included.
- The sanctions imposed are substantially outside the precedent set by National University for the same type of offense and/or the cumulative conduct record of the responding student.

7.2 Appeal Process

The presumptive stance of the University is that all decisions made and sanctions imposed by the original decision-maker are to be implemented during the appellate process. At the discretion of the OSC, implementation of sanctions may be stayed pending review only in extremely exigent circumstances. This does not include proximity to graduation, end of term, or exams. Instead, it refers to an overwhelming likelihood that the appeal would result in a reversal of the finding and/ or substantial modification of the sanctions.

Failure to provide information during or participate in an investigation or an EC, even resulting from concern over pending criminal or civil proceedings, does not make evidence "unavailable" at the time of the EC.

The Director of Student Affairs will consult with the original decision maker. The OSC will share the appeal by one party with the other party(ies) when appropriate under procedure or law (e.g., if the responding student appeals, the appeal is shared with the Reporter, who may wish to file a response, or request an appeal on the same grounds or different grounds).

In the case of timely and relevant appeals, the OSC will send a response to the appeal requestor(s), explaining whether the request(s) will be granted or denied, and the rationale. On reconsideration, the party assigned to hear the appeal may affirm or change the findings and/or sanctions of the original investigation in accordance with the granted appeal grounds. Procedural

errors should be corrected, new evidence should be considered, and sanctions should be proportionate to the severity of the violation and the student's cumulative conduct record.

All appeal decisions are to be made within fifteen (15) business days of submission and are final.

SECTION 8: DISCIPLINARY RECORDS

All conduct records are maintained by the University indefinitely from the time of their creation and in line with University records policy and procedures established by the Office of the Registrar.

Pregnancy and Parenting Policy

National University is committed to creating and maintaining a community where all individuals enjoy freedom from discrimination, including discrimination on the basis of sex, as mandated by Title IX of the Education Amendments of 1972 (Title IX). Sex discrimination, which can include discrimination based on pregnancy, marital status, or parental status, is prohibited and illegal in admissions, educational programs and activities, hiring, leave policies, employment policies, and health insurance coverage. National University hereby establishes a policy and associated procedures for ensuring the protection and equal treatment of pregnant individuals, persons with pregnancy-related conditions, and new parents.

Under the Department of Education's (ED) Title IX regulations, an institution that receives federal funding "shall not discriminate against any student or exclude any student from its education program or activity, including any class or extracurricular activity, on the basis of such student's pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery therefrom." According to the ED, appropriate treatment of a pregnant student includes granting the student leave "for so long a period of time as is deemed medically necessary by the student's physician," and then effectively reinstating the student to the same status as was held when the leave began.

This generally means that pregnant students should be treated by National University the same way as someone who has a temporary disability and will be given an opportunity to make up missed work wherever possible. Extended deadlines, make-up assignments (e.g., papers, quizzes, tests, and presentations), tutoring, independent study, online course completion options, and incomplete grades that can be completed at a later date, should all be employed, in addition to any other ergonomic and assistive supports typically provided by Student Accessibility Services. To the extent possible, National University will take reasonable steps to ensure that pregnant students who take a leave of absence return to the same position of academic progress that they were in when they took leave, including access to the same course catalog that was in place when the leave began. The Title IX Coordinator or designee has the authority to determine that such accommodations are necessary and appropriate, and to inform faculty members of the need to adjust academic parameters accordingly.

As with disability accommodations, information about pregnant students' requests for accommodations will be shared with faculty and staff only to the extent necessary to provide the reasonable accommodation. Faculty and staff will regard all information associated with such requests as private and will not disclose this information to anyone, unless there is a legitimate need to know. Administrative responsibility for these accommodations lies with the Title IX Coordinator or designee, who will maintain all appropriate documentation related to accommodations.

In situations such as clinical rotations, performances, labs, and group work, the institution will work with the student to devise an alternative path to completion, if possible. In progressive curricular and/or cohort-model programs, medically necessary leaves are sufficient cause to permit the student to shift course order, substitute similar courses, or join a subsequent cohort when returning from leave.

Students are encouraged to work with their faculty members and National University's support systems to devise a plan for how to best address the conditions as pregnancy progresses, anticipate the need for leaves, minimize the academic impact of their absence, and get back on track as efficiently and comfortably as possible. The Title IX Coordinator or designee, will assist with plan development and implementation as needed.

Scope of Policy

This policy applies to all aspects of National University's program, including, but not limited to, admissions, educational programs and activities, extracurricular activities, and student leave policies. Reporting Any member of the National University community may report a violation of this policy via the following link: reportit@nu.edu or they may file a report with any supervisor, manager, or any of the below listed Title IX Coordinators. All employees at National University are considered "Mandated Reporters" and are required to promptly forward such reports to the Office of Diversity, Equity and Inclusion via the above link to the online reporting form. The Title IX Coordinator and Equity Resolution Process (EGP) Officers are responsible for overseeing reports of discrimination involving pregnant and parenting students.

Definitions

Caretaking: caring for and providing for the needs of a child.

Medical Necessity: a determination made by a health care provider (of the NU community member's choosing) that a certain course of action is in the patient's best health interests.

Parenting: the raising of a child by the child's parents in the reasonably immediate post-partum period.

Pregnancy and Pregnancy-Related Conditions: include (but are not limited to) pregnancy, childbirth, false pregnancy, termination of pregnancy, conditions arising in connection with pregnancy, and recovery from any of these conditions.

Pregnancy Discrimination: includes treating an individual affected by pregnancy or a pregnancy-related condition less favorably than similar individuals not so affected and includes a failure to provide legally mandated leave or accommodations.

Pregnant/Birth-Parent: refers to the NU community member who is or was pregnant. This policy and its pregnancy-related protections apply to all pregnant persons, regardless of gender identity or expression.

Reasonable Accommodations: (for the purposes of this policy) changes in the academic or typical operations that enables pregnant students of the NU community or those with pregnancy-related conditions to continue to pursue their studies and enjoy equal benefits of National University

Reasonable Accommodation of Student Affected by Pregnancy, Childbirth, or Related Conditions

- a. National University and its faculty, staff, and other employees will not require students to limit their studies as the result of pregnancy or pregnancy-related conditions.
- b. The benefits and services provided to students affected by pregnancy will be no less than those provided to students with temporary medical conditions.
- c. National University students with pregnancy-related disabilities, like any student with a short-term or temporary disability, are entitled to reasonable accommodations so that they will not be disadvantaged in their courses of study, research and may seek assistance from the Office of Diversity, Equity & Inclusion.
- d. No artificial deadlines or time limitations will be imposed on requests for accommodations, but National University is limited in its ability to impact or implement accommodations retroactively.

Reasonable accommodations may include, but are not limited to:

1. Providing accommodations requested by a pregnant student to protect the health and safety of the individual and/or the pregnancy (such as allowing the individual to maintain a safe distance from hazardous substances);
2. Making modifications to the physical environment (such as accessible seating);
3. Providing mobility support;
4. Extending deadlines and/or allowing the student to make up tests or assignments missed for pregnancy related absences;
5. Offering remote learning options;
6. Excusing medically-necessary absences (this must be granted, irrespective of classroom attendance requirements set by a faculty member, department, or division);
7. Granting leave per National University's Leave of Absence Policy or implementing incomplete grades for classes that will be resumed at a future date.

Breastfeeding individuals must be allowed reasonable time and space to pump breast milk in a location that is private, clean, and reasonably accessible. *Bathroom stalls do not satisfy this requirement.

Nothing in this policy requires modification to the essential elements of any academic program. Pregnant students cannot be channeled into an alternative program or school against their wishes.

Modified Academic Responsibilities Policy for Parenting Students

- a. Students with child caretaking/parenting responsibilities who wish to remain engaged in their coursework while adjusting their academic responsibilities because of the birth or adoption of a child or placement of a foster child may request an academic modification period up to two (2) quarters during the first six (6) months from the time the child entered the home. Extensions may be granted when additional time is required by medical necessity or extraordinary caretaking/parenting responsibilities.
- b. During the modification period, the student's academic requirements will be adjusted and deadlines postponed as appropriate, in collaboration with the Title IX Coordinator or designee, the student's academic advisor, and the appropriate academic department(s).
- c. Students seeking a period of modified academic responsibilities may consult with their academic advisor, who will in turn contact the Title IX Coordinator or they may contact the Office of Diversity, Equity & Inclusion directly. The Title IX Coordinator or designee, will coordinate accommodation-related efforts with the advisors unless the students specifically requests that their advisors be excluded. Students are provided with a letter that details out approved accommodations and students are encouraged to work with their advisors and/or faculty members to reschedule course assignments, lab hours, examinations, or other requirements, and/or to reduce their overall course load, as appropriate, once authorization is received from the Title IX Coordinator or designee. If, for any reason, caretaking/parenting students are not able to work with their advisors/faculty members to obtain appropriate modifications, students should

alert the Title IX Coordinator or designee, as soon as possible, who will help facilitate needed accommodations and modifications.

- d. In timed degree, certification or credentialing programs, students who seek modifications upon the birth or placement of their child will be allowed an extension of up to twelve (12) months to prepare for and take preliminary and qualifying examinations, and an extension of up to twelve (12) months toward normative time to degree while in candidacy, to the extent those deadlines are controlled by National University. Longer extensions may be granted in extenuating circumstances.
- e. Students can request modified academic responsibilities under this policy regardless of whether they elect to take a leave of absence.
- f. While receiving academic modifications, students will remain registered and retain educational benefits accordingly.

Leave of Absence – Academic

- a. As long as students can maintain appropriate academic progress, faculty, staff, or other National University employees will not require them to take a leave of absence, or withdraw from or limit their studies as the result of pregnancy, childbirth, or related conditions, but nothing in this policy requires modification of the essential elements of any academic program.
- b. Pursuant to Title IX, the University treats pregnancy and related conditions as justification for a leave of absence for as long a period of time as is deemed medically necessary by a student's physician. Enrolled students may elect to take a leave of absence because of pregnancy and/or the birth, adoption, or placement of a child. The leave term may be extended in the case of extenuating circumstances or medical necessity.
- c. Students taking a leave of absence under this policy will provide notice of the intent to take leave 30 calendar days prior to the initiation of leave, or as soon as practicable. In unforeseen circumstances, in which the situation prevents the student from doing so, the student may request a retroactive leave of absence under this policy.
- d. Intermittent leave may be taken with the advance approval of the Title IX Coordinator or designee, and students' academic department(s), when medically necessary.
- e. Students who elect to take leave under this policy may register under an [inactive/"on leave" etc. status] to continue their eligibility for certain benefits.
- f. To the extent possible, National University will take reasonable steps to ensure that upon return from leave, students will be reinstated to their program of study, in the same status as when the leave began.

Leave of Absence – Students Receiving Financial Aid or Scholarships

- a. To avoid a disruption of financial aid funding, please review the National University leave of absence policy in the General Catalog.
 - A student will need to apply for a leave of absence through the Office of the Registrar to avoid cancellation of future financial aid disbursements and/or a return of Title IV funds due to a break of over 35 days.
 - Students utilizing federal financial aid may be subject to a Return to Title IV calculation once the student exceeds 180 days on an Approved Leave of Absence in a rolling calendar year.
 - If a student is no longer meeting Satisfactory Academic Progress (SAP) due to a break or breaks in attendance, they will be required to submit an appeal and provide supporting documentation to reinstate their eligibility.
- b. Continuation of students' scholarship, fellowship, or similar external sponsored funding during the leave term will depend on the students' registration status and the policies of the specific funding program regarding registration status.
- c. Students will not be negatively impacted by or forfeit their future eligibility for their scholarship, fellowship, or similar National University-supported funding by exercising their rights under this policy.
- d. The Title IX Coordinator or designee can and will advocate for students with respect to financial aid agencies and external scholarship providers in the event that a leave of absence places eligibility into question.

Employee – Leave of Absence

- a. If an employee is requesting a Leave of Absence, they must contact National University's Benefits Department at benefits@nu.edu or (858) 642-8199

Student-employee Leave of Absence

- a. If a student, who is also an employee is requesting a Leave of Absence, they must first contact National University's Benefits Department at benefits@nu.edu or (858) 642-8199, who will in turn collaborate with the Title IX Coordinator regarding approved accommodations.

Retaliation and Harassment

- a. Harassment of any member of National University community based on sex, gender identity, gender expression, pregnancy, or parental status is prohibited.
- b. Faculty, staff, and other National University employees are prohibited from interfering with any member of the National University community's right to take leave, seek reasonable accommodation, or otherwise exercise their rights under this policy.
- c. Faculty, staff, and other National University employees are prohibited from retaliating against any member of National University for exercising the rights articulated by this policy, including imposing or threatening to impose negative educational outcomes because a member of National University requests leave or accommodation, file a complaint, or otherwise exercise their rights under this policy (Please see National University's [Equal Opportunity, Harassment and Nondiscrimination Policy](#) for more information).

Dissemination of the Policy and Training

A copy of this policy will be published in the General Catalog and posted on the National University, Title IX website. All new members of the National University community will be made aware of this policy and the location of this policy during the enrollment and/or new hire process. All students and employees will be provided with a copy annually. The Office of Diversity, Equity and Inclusion will make additional educational materials available to all members of the National University community to promote compliance with this policy and familiarity with its procedures.

Institutional Statement on Artificial Intelligence (AI) Use

The National University Catalog specifies that students are responsible for the integrity of the work they submit and must give credit for any information that is not either the result of original research or common knowledge. NU students are permitted to utilize available tools to learn and apply the material in their courses and prepare for exams, assignments, and papers unless otherwise directed in individual courses, programs, or schools. Tools include those associated with generative artificial intelligence (AI).

Students who submit AI-generated work as their own are committing plagiarism. Failure to submit original work, cite sources according to disciplinary standards (e.g., APA, MLA, Chicago, Bluebook), and confirm the validity of the content represents academic dishonesty and is subject to the Student Code of Conduct.

Acceptable Use of Information Technology

Through *NCUOne*, the University provides students with access to course rooms, messaging system, Library and other academic resources. The University also provides computer, network, Internet, Intranet, and email access for team members and faculty for performance of their job functions. This access carries certain responsibilities and obligations as to what constitutes acceptable use of the institution's network. This policy explains how information technology (IT) resources are to be used and specifies what actions are prohibited. No policy can cover every situation, and all users are expected to use common sense when using institutional resources. Questions on what constitutes acceptable use should be directed to the user's team leader, instructor, or Academic and Finance Advisor.

When utilizing University IT resources, all institutional policies are in effect at all times. Any student, team member, or faculty member who abuses the privilege of University facilitated access to student or faculty *NCUOne*, e-mail, or the Internet may be denied access to and, if appropriate, be subject to disciplinary action, up to and including termination or dismissal from the University.

Scope

The scope of this policy includes any and all use of institutional IT resources, including but not limited to, the student and faculty *NCUOne*, computer systems, phones, email, the network, network resources, and University Internet and Intranet connections.

The University recognizes that use of e-mail and the Internet make communication more efficient and effective. However, Internet service and e-mail are valuable, costly resources and their purpose is to facilitate University business. Irresponsible use reduces their availability for critical business operations, compromises security and network integrity, and leaves the University open to potentially damaging litigation. All use of the University IT resources must be in support of business, education, and research consistent with the purposes of the University. This policy discusses acceptable usage for computers, e-mail, and the Internet.

Restrictions and Prohibitions on Use and Access

Communications and Internet access should be conducted in a responsible and professional manner reflecting the University's commitment to honest, ethical, and non-discriminatory practices. In furtherance of these goals and to ensure the security of institutional, faculty, and student information, the following restrictions and prohibitions apply:

- Never share your logon ID and/or password with any other person. No internal department or team member including IT and HR, should ask for a user's logon ID credentials (username / password)
- Do not reveal University network or system access passwords to others, including family, friends, or other members of the household when working from home or remote locations
- Do not access a computer account that belongs to another team member, faculty member, student or department
- Use only your assigned logon ID and password; you are responsible for all activity under your logon ID
- Report any known or suspected compromise of your logon ID to the University Information Technology Department
- Anytime team members leave their desks/work area, they shall lock their desktop/PCs (in windows ctrl+alt+delete and press enter)
- Unauthorized attempts to circumvent data security schemes; identify or exploit security vulnerabilities; or decrypt secure data are prohibited
- Attempting to monitor, read, copy, change, delete or tamper with another user's electronic communications, email, files or software is prohibited
- Knowingly or recklessly running or installing (or causing another to run or install) a program (such as a "worm" or "virus") intended to damage or place an excessive load on a computer system or network is prohibited
- Forging the source of electronic communications, altering system data used to identify the source of messages or otherwise obscuring the origination of communications is prohibited

- Any use that violates federal, state, or local law or regulation is expressly prohibited
- Knowing or reckless interfering with the normal operation of computers, peripherals or networks is prohibited
- Deliberately wasting computer resources, including bandwidth, disk space, and printer paper, or running or installing games or other unauthorized software on institutional computers is prohibited
- Using the institution network to gain unauthorized access to any computer system is prohibited
- Downloading University information, especially University confidential information, onto any external hard drive, disk, or other storage device is prohibited, unless specifically for work purposes
- Performing any of the following is prohibited: port scanning, security scanning, network sniffing, keystroke logging, or other IT information gathering techniques when not part of user's job function
- Any use of the University Web sites for product advertisement, except those endorsed by the University, is prohibited
- Any use of the University Web sites for political lobbying is prohibited
- All communications accessible via the University Web sites, such as the Bulletin Board, Discussion Forums and any other communication tools, will reflect professionalism, respect for others and appropriate language

Password Standards

Students must have valid login and password credentials to access *NCUOne*. Passwords for student accounts must be a minimum length of eight (8) characters and meet three of the following conditions:

- English uppercase characters (A through Z)
- English lowercase characters (a through z)
- Base 10 digits (0 through 9)
- Non-alphanumeric characters: ~!@#%&* _-+=`\|(){} []:;'"<>.,?/

NOTE: For greater security, passwords should not be based on personal information (e.g., names of family, birthdates, etc.) or complete words or phrases in any language, slang, dialect, or jargon.

Passwords expire every 90 days and cannot be reused for 365 days (one year) from the date of expiration. Students with expired passwords will not be granted access to *NCUOne* until they have successfully reset their password. Instructions for updating account passwords are available through the *NCUOne* login/password reset feature.

Copyright Infringement

All users should be aware that federal copyright laws, regardless of whether a copyright notice appears on the work, may protect any information, software, or graphics on the Internet. Licensing agreements may control redistribution of information from the University's Internet-related systems or from the Internet. Duplication or transmission of such material may not be undertaken without express authorization from the University's Information Technology management.

The University computer systems and networks must not be used to download, upload, or otherwise handle illegal and/or unauthorized copyrighted content. Any of the following activities constitute violations of acceptable use policy, if done without permission of the copyright owner (this list is not meant to be exhaustive, as copyright law applies to a wide variety of works):

- Copying and sharing images, music, movies, or other copyrighted material using Peer-to-Peer (P2P) file sharing or unlicensed CD's and DVD's
- Posting or plagiarizing copyrighted material
- Downloading copyrighted files which the user has not already legally procured

Violations and Penalties under Federal Law

Anyone found liable for civil copyright infringement may be ordered to pay either actual damages or statutory damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For willful infringement, a court may award up to \$150,000 per

work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense.

Institutional Sanctions for Copyright Infringement

Students are expected to conduct themselves professionally and refrain from acts of misconduct set forth in the Student Code of Conduct. Suspected acts of misconduct or violations related to copyright infringement and P2P file sharing should be reported to the appropriate authority for review. Substantiated violations may result in disciplinary sanctions, up to and including expulsion from the University.

Fair Use of Copyrighted Material

The University Library is committed to compliance with intellectual property law and the preservation of the rights of copyright owners and users of copyrighted materials. The Library strives to inform all its constituencies of the rights and responsibilities under the fair use provisions of the Copyright Act (17 U.S.C. Section 107).

- Fair use applies to the digital environment without regard to the medium of the original work
- Fair use does not supersede licensed resources, unless the terms of controlling agreements specifically defer to U.S. Copyright Act 17 U.S.C. Section 107
- Fair use depends on a case-by-case examination of facts surrounding each case, and the four factors identified in U.S. Copyright Act 17 U.S.C. Section 107:
 1. The purpose or character of the use; including whether such use is of a commercial nature or for nonprofit educational purposes
 2. The nature of the copyrighted work used
 3. The amount and substantially of the work being used
 4. The effect of the use on the market for or value of the original work

The Library works to comply with the Fair Use Guidelines and the U.S. Copyright Law (Title 17, U.S. Code) regarding photocopied materials. The copyright law of the United States governs the making of photocopies or other reproductions of copyrighted materials. Under certain conditions specified by the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement. The University reserves the right to refuse to accept a copying order if, in its judgment, fulfillment of the order would involve violation of copyright law.

Students should refer to the Acceptable Use of Information Technology policy for additional policies and procedures related to copyright infringement – including Peer-to-Peer (P2P) file sharing – institutional sanctions for student misconduct, and violations and penalties for copyright infringement under federal law.

Institutional Review Board (IRB)

Statement of Principles

The University is committed to ensuring that all research involving human participants follows the ethical principles and requirements as set forth in the Code of Federal Regulations (45 CFR 46), the Belmont Report, and the Nuremberg Code.

Establishment of Institutional Review Board (IRB)

To support these principles, the University has established an Institutional Review Board (IRB). The IRB reports to the Office of the Provost. The University will ensure there is IRB Director, IRB Chairperson, and sufficient resources and personnel are provided to the IRB in accordance with 45 CFR 46.103(b)(2).

Signatory Official

The signatory official for the University is the University Co-Provost overseeing IRB operations.

Authority of the IRB

All research proposals will be reviewed by the IRB. The IRB, not the researcher, will determine the necessary type of review (i.e. not human subjects research, Exempt, Expedited, or Full Board). If a study does not meet the federal definition of human subjects research as outlined in 45 CFR 46.102, the IRB will confirm this designation in writing, and no additional IRB oversight will be required.

The IRB will determine the risk level of a study as minimal risk or greater than minimal risk. Researchers may provide their own description of perceived risk factors. However, final determination of risk level is made by the IRB.

The IRB has the authority to review and approve, require modifications to, or disapprove all research covered by 45 CFR 46. In accordance with 45 CFR 46.112, research approved by the IRB may be subject to additional review by officials of the institution. These officials may approve or disapprove the research after an IRB approval, but they may not approve the research if it was first disapproved by the IRB.

In accordance with 45 CFR 46.113, the IRB shall have the authority to suspend or terminate approval of research that is not conducted in accordance with IRB requirements or that has been associated with unexpected serious harm to subjects.

Institutional Research and Course-Based Projects

The following types of institutional research do not require IRB review: internal research to evaluate institutional programs or determine institutional effectiveness, data collection and analysis for accreditation purposes, and reviews of course or instructor ratings. However, if these data are intended for publication or to contribute to generalizable knowledge, then the study requires IRB review.

All dissertation research must be submitted to the IRB for review. Students who are working on course projects that are not designed to contribute to generalizable knowledge do not need to submit to the IRB as these projects are not considered research proposals. University faculty and staff involved with designing course projects related to research are strongly encouraged to contact the IRB to verify that the projects will not require IRB oversight.

Researcher Responsibilities

Researchers are responsible for compliance with this policy. Primary responsibilities include:

- All researchers must complete the University required Collaborative Institutional Training Initiative (CITI) course modules
- Researchers must use the current IRB research application form and supplemental documents.
- Researchers may not obtain data for purposes of conducting research without IRB review and approval
- Researchers may not access identifiable or legally protected information unless the IRB has approved a procedure to obtain appropriate authorization from each participant

- Researchers must provide evidence to the IRB that the information will be obtained in compliance with all applicable local, state, and federal laws, policies, and regulations related to privacy and confidentiality of legally protected information
- Researchers may not perform any procedure, intervention, or data collection for future research purposes and then retrospectively deem those data "archival" and not in need of appropriate safeguards to participants (including consent)
- Researchers must submit an IRB application if they intend to change or modify an approved application
 - The modification request must be approved by the IRB before any changes are implemented in the research
- Researchers must contact the IRB to report any injuries, problems, or complaints from participants within 24 hours of occurrence
- Researchers must fully disclose dual roles with sites or participants in their research application
 - This information is required for adequate risk assessment
- When performing research with participants who live outside of the United States, it is the researcher's responsibility to know and comply with local laws, research regulations, and requirements to obtain approval from the appropriate in-country ethics board
 - The IRB may request additional documentation as evidence of adequate compliance
- If an approved study was determined to be greater than minimal risk researchers must submit an IRB application for continuing review of an approved IRB protocol before the expiration date on the University IRB approval letter if they intend to continue recruitment and/or data collection beyond the approved expiration date
 - If the continuing review is not yet approved by the IRB at the time of the approved expiration date, the researcher must confirm in writing that all study procedures have ceased, and all study procedures may not resume until the IRB has completed the continuing review and approved the application for an extension with a new expiration date
- Researchers must submit an IRB study closure form as soon as data collection is complete, and all data are de-identified
- Student researchers doing dissertation research may not submit an application for their dissertation research to the IRB until the final Dissertation Proposal is approved by the committee and Chair
- Student researchers must be enrolled in an active dissertation course with the University while any recruitment, consent, and data collection are in-process

Additional Responsibilities for Faculty

Faculty who are supervising research must:

- Be current (completion dates are not more than three years old) in the University required modules and any elective and supplemental CITI training modules that apply to their own research or research they supervise
- Emphasize student awareness of and compliance with all aspects of this policy
- Support and sign students IRB applications

IRB Director Responsibilities

The IRB Director will:

- Ensure the IRB operates in a manner consistent with the statement of principles in section 1 of this policy
- Assist the IRB Chair with selection of members to the Full Board
- Assist the IRB Chair with operation of the Full Board, including facilitation of meetings when the IRB Chair is not able to be present
- Select and supervise IRB reviewers performing minimal risk reviews that are not assigned to the Full Board
- Oversee and document the selection of IRB membership that complies with the requirements set forth in 45 CFR 46.103(b) (3) and 45 CFR 46.107

- Maintain written Standard Operating Procedures (SOPs) in accordance with 45 CFR 46.103(b)(4,5)
- Maintain, review, and update additional SOPs as needed to optimize the effective function of the IRB and delivery of timely reviews for researchers
- Maintain records in accordance with 45 CFR 46.115
- Facilitate IRB registration in accordance with 45 CFR 46 Subpart E
- Oversee the University's Federal Wide Assurance documentation, compliance, renewal, updates, and requests for applicable addenda (e.g. Department of Defense).
- Appoint IRB Members

IRB Chair Responsibilities

The IRB chair is nominated by the Director and members for a term one calendar year with the possibility of a second year.

The IRB Chair will:

- Facilitate Full Board meetings
- Oversee completion of minutes of Full Board meetings
- Collaborate with the IRB Director to communicate Full Board determinations to researchers
- Coordinate review of resubmissions to verify conditions are met when the Full Board determination is "approval with conditions"

Assist with expedited review of minor modifications to studies previously approved by the Full Board in accordance with IRB Standard Operating Procedures.

IRB Member Responsibilities

IRB Members are appointed. Appointments are renewed at the discretion of the IRB Chair and IRB Director.

In accordance with 45 CFR 46, the IRB members will:

- Maintain awareness of community attitudes and promote respect for the IRB's advice and counsel in safeguarding the rights and welfare of human subjects
- Possess professional competence in research, except in the case of the non-scientist member(s)
- Remain knowledgeable about institutional commitments and regulations, applicable laws, and standards of professional conduct and practice
- Recuse themselves from initial or continuing review of any project in which there is a conflict of interest, except to provide information as requested by the IRB
- Maintain working knowledge of 45 CFR 46 and approve studies only when required items are met
- Be current (completion dates are not more than three years old) in all University required, elective, and supplemental CITI training modules
- Adhere to the University Code of Conduct

Appeals Process

If a researcher believes an IRB determination does not fall within the regulatory language, the researcher should first informally discuss the concern with the IRB Director and IRB Chair. If an informal resolution cannot be reached, the researcher should submit a formal appeal letter to the Office of the Provost. The formal appeal letter must detail the rationale for the researcher's concerns and support proposed alternatives with reference to applicable university policy and federal regulation (i.e. 45 CFR 46).

Violations

Suspected violations of this policy should be communicated to the IRB Director immediately. The IRB Director will determine if a non-compliance investigation is warranted and initiate an investigation and corrective action plan when needed. Notification of initiation or findings and/or corrective action plan from a non-compliance investigation will be made to the researcher, dissertation committee Chair (when applicable), Associate Dean and/or Associate Director, and Dean, Graduate School. The IRB Director will notify appropriate institutional officials if made aware of violations of other University policies or local, state, or federal laws or regulations.

Corrective actions for IRB noncompliance may include, but are not limited to:

- Establishment of more frequent continuing reviews of IRB approved research
- Suspension or termination of IRB approved research
- Referral for a suspected Code of Conduct violation
- Restriction of access to sites or participant groups affected by noncompliance
- Other appropriate actions as determined by the IRB Director and/or Full Board

Student Rights & Responsibilities

Student Responsibilities

It is the student's responsibility to be familiar with the information presented in the Catalog, and to know and observe all regulations and procedures relating to the program they are pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of the regulations and procedures included in the Catalog. Responsibility for following all policies and meeting all requirements and deadlines for degree programs rests with the student.

Admission Requirements from the current online catalog, in effect at the time of a student's enrollment, are the official sources and permanent references governing the terms of a student's enrollment. Students who fall out of continual enrollment may be subject to administrative withdrawal from the University. Students who re-enter after dismissal or withdrawal may be subject to re-entering the most current program version at the time of their re-entry. For additional information, please refer to the Denied Admissions policy.

Well-Being and Safety

The University is committed to providing students with an environment free of discrimination or harassment. Please see the [University's Code of Conduct](#) for additional information. In addition, community resources exist to provide students with information and support relating to personal well-being and safety, such as:

- National Domestic Violence Hotline (800) 799-SAFE (7233)
- National Sexual Assault Hotline (800) 646-HOPE
- U.S. Department of Justice National Sex Offender Public Registry <http://www.nsopr.gov>
- Substance Abuse or Mental Health Treatment National Helpline (800) 662-HELP (4357)
- National Aids Hotline: (800) 448-0440
- National Suicide Prevention Lifeline: (800) 273-8255
- Behavioral Health Treatment Services Locator <http://findtreatment.samhsa.gov/>
- Rape, Abuse & Incest National Network <http://www.rainn.org/get-information>

- National Center for Victims of Crime <http://www.victimsofcrime.org/>
- Addiction and Sexual Abuse Recovery Center <http://www.recovery.org/topics/addiction-and-domestic-violence-or-sexual-abuse/>
- Internet Safety Guide for Women <https://www.vpnmentor.com/blog/the-empowering-internet-safety-guide-for-women/>

Further, when requested by a victim, the University will facilitate changes in a victim's transportation and working situations, in addition to academic and living situations, as reasonable and appropriate.

Students with Disabilities

It is the policy of National University, in compliance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, and other federal and state disability nondiscrimination laws, that no student shall, based on their disability, be excluded from participation in, be denied the benefits of, or otherwise be subject to discrimination under, any University program or activity.

National University is committed to providing students with disabilities an equal opportunity to access the benefits, rights, and privileges of University services, programs, and activities in the most integrated setting appropriate to the students' needs.

National University is committed to providing reasonable accommodations to students with disabilities to ensure all students have an equal opportunity to benefit from and access programs and services. "Reasonable accommodation" means a reasonable modification or adjustment that enables qualified students with disabilities equal access to programs and services.

Under the law, "reasonable accommodation" may include, but is not limited to, removal of barriers to access of the physical facilities or programs, "academic adjustments" such as modification of academic requirements, policies, and procedures, and "auxiliary aids" such as texts in alternate media, interpreters, readers, and other similar services and actions.

Student Accessibility Services cannot authorize the following:

- Extended breaks between courses or leaves of absence
- Special funding, discounts, or waivers for course fees
- Vocational rehabilitation funding or scholarships
- Additional time to complete a program
- Waivers of the University policies, including admissions, academics, or financial
- Fundamental alterations to courses and programs that can have an impact on the essential academic requirements.

Student Accessibility Services Office

Student Accessibility Services (SAS) at National University, through collaboration with the campus and the community, is committed to empowering students with disabilities and providing equal access to higher education through the provision of academic support services, technology, and advocacy to promote student persistence and graduation. SAS provides disability consultation, coordination of support services, and accommodations for all eligible students with disabilities.

Services

SAS provides a variety of services designed to assist the National University community, including students, faculty, and staff. SAS offers services that allow students with disabilities to participate fully in all facets of the learning experience.

- Students with disabilities are equipped with tools to promote self-advocacy, independence, learning, and goal attainment.

- Faculty and staff are provided resources and guidance to assist with the creation of accessible on-site and online learning experiences that foster engagement and interaction with all students.

Requesting Accommodations and Services

National University can modify academic requirements as necessary to ensure that such requirements do not discriminate or prohibit the participation of qualified applicants or students with a disability if the modification does not fundamentally impact the course or program in which the student is participating. Fundamental alterations can include but are not limited to, changes to curriculum and program revisions that impact accreditation or University requirements. Modifications may include changes in the length of time permitted for the completion of the degree requirements, substitution of specific courses required for the completion of degree requirements, and adaptation of the manner in which specific courses are conducted. In course examinations or other procedures for evaluating a student's academic achievement, National University shall provide methods for evaluating the achievement of students with disabilities that impair sensory, manual, or speaking skills as will best ensure that the results of the evaluation represent the student's achievement in the course, rather than reflecting the student's impaired sensory, manual or speaking skills, except where such skills are the factors that the test purports to measure.

The University will take necessary steps to ensure that no qualified disabled student is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination because of the absence of educational auxiliary aids. Auxiliary aids may include texts in alternate format, interpreters, or other effective methods of making orally delivered materials available to students with hearing impairments, readers in libraries for students with visual impairments, classroom equipment adapted for use by students with manual impairments, and other similar services and actions. Accommodations that would fundamentally alter the nature of the program, cause undue hardship on the University or jeopardize the health or safety of others cannot be provided. Reasonable accommodations must specifically address the functional limitations of the student's specific disability.

Registration

Students seeking accommodations and services due to a disability should contact SAS. A SAS Counselor will discuss potential accommodations and required documentation with the student. Students are encouraged to register with SAS and make accommodation requests as far in advance as possible; accommodations are not retroactive.

Students seeking to register with SAS are required to:

1. self-identify to SAS,
2. submit an application,
3. provide documentation of a disability from the appropriate licensed professional,
4. participate in an interactive appointment with a SAS Counselor.

SAS will provide a letter confirming eligibility for services and detailing approved curriculum accommodations to eligible students with disabilities following the completion of the registration process. Information related to the registration process can be found at www.nu.edu/sas.

Disability Documentation

Disability documentation must be signed by a licensed physician, psychologist, audiologist, speech pathologist, physical therapist, occupational therapist, or other professional healthcare provider. Documentation should indicate the student's current level of functioning with respect to the major life activity impacted by the disability. The diagnostic report should include, where appropriate, recommendations for specific accommodations and explain why the accommodation is recommended. In some situations, the University may request additional documentation. The cost of obtaining professional documentation of a disability is the student's responsibility. Additional information regarding documentation is located at www.nu.edu/sas.

Accommodation Determination

SAS will consider all materials, consult with relevant faculty when necessary and afford qualifying individuals with appropriate accommodations. The student may provide additional input from an appropriate professional at the student's expense if the student or SAS deems such input necessary to determine eligibility for services or the appropriateness of a specific accommodation requested.

Once a student is approved to receive accommodation(s), a SAS Counselor will provide an accommodation letter to the student. It is the student's responsibility to present this letter to his/her instructor in a timely fashion, preferably within the first three days of the term/course, to allow sufficient time to arrange any prescribed accommodation(s). A student may or may not elect to use the accommodation(s). Students are encouraged to speak with their professor regarding their accommodations and to review which accommodations they plan to use.

Students requesting and approved for on-site testing accommodations near an established Testing Center are required to complete a Testing Accommodations Orientation at least two weeks prior to their first exam request for in-course exams. For on-site tests, students are also required to complete an On-site Test Accommodation Request Form. Completed forms are due to SAS at least five business days prior to the exam or quiz date to allow sufficient time for the arrangement of test accommodations, including but not limited to extended test time, distraction-reduced setting, etc. In addition, students are required to read and follow the Test Accommodation Policies and Guidelines. The Testing Accommodations Orientation documents, the On-site Test Accommodation Request Form, and the Test Accommodation Policies and Guidelines are located at www.nu.edu/sas in the section entitled Accessibility Forms and Guides.

Providing advanced notice: students needing captioning and/or interpreting must request these services using the appropriate request forms located at www.nu.edu/sas. Faculty and staff are encouraged to communicate with deaf and hard-of-hearing students using electronic mail or web-based chat. If the student uses text telephone (TT) or video phone, use the California Relay Services by dialing 1-800-735-2922 (English), or 1-800-855-3000 (Spanish).

Faculty who receive a request from a student for a curriculum accommodation due to a reported disability should request an accommodation letter from the student. If the student informs the instructor that they do not have such a letter or are not registered with SAS, the faculty member should direct the student to SAS, providing them with the contact information. In addition, the instructor should contact SAS to discuss any questions or seek additional guidance. Any disability-related information that a student gives to the faculty member is to be used only for making the curriculum accessible for the student and may not be disclosed to any parties without written consent from the student. Instructors are not authorized to deny a student an approved accommodation unilaterally. Instructors who disagree with a particular accommodation prescribed for a student and included on the official accommodation letter should contact SAS for immediate consultation and discussion.

If a student would like to request additional accommodations, additional documentation and an additional interactive appointment may be requested.

Modality

National University (NU) offers classes in two possible instructional modalities: a one-to-one model and a class-based model. In a one-to-one model course, each student is assigned to a professor who will work individually with that student throughout the course. Courses generally begin each Monday. In a class-based model, multiple students are assigned to start the course simultaneously with one professor, often involving discussion boards or other student-to-student interactions. These courses begin monthly at the designated time of the course calendar.

As a unified department, a standardized accommodation approach will be adopted for all new students. Students who were previously enrolled in a one-to-one model through NCU will be offered the opportunity to remain in their one-to-one model through their program completion or merge into a class-based model, with the understanding that once they move, they will not be able to switch between modalities after that selection. Students offered the option to remain in their one-to-one model or change to a class-based model will understand that their accommodations will reflect the model in which they are enrolled.

Students who choose to remain in a one-to-one model will be offered an opportunity to revise their accommodations or maintain their current approvals. If the standardized approach negatively affects their academic progress, they will be granted a one-time offering to return to their NCU legacy accommodations. Once selected, one-to-one students understand that their accommodations will remain as is until they complete their program or transfer to a class-based model. Students who transfer to a class-based model understand that there is a possibility of a change in accommodations to reflect the change in course modality. Accommodation approval will remain an individualized process dependent on the student's diagnosis and documentation. Students who transfer to a class-based model will meet with a SAS Accommodation Counselor to review their accommodations and discuss any changes that may be necessary.

All inquiries regarding accommodations for either modality should be directed to SAS at sas@nu.edu.

Denial or Insufficiency of Accommodation

If a student is denied an accommodation or believes that the accommodation approved is insufficient, the student may appeal to the Vice President of Student Services (VPSS), who will render a decision within seven days of receipt of the appeal or before the start date of the next course, depending on which occurs first. The decision of the VPSS is final.

Problems in Receiving Approved Accommodations

If a student believes they are not receiving an accommodation specified in their letter, they should immediately contact SAS for assistance at sas@nu.edu.

Confidentiality

SAS is committed to ensuring all information and communication about a student's disability is maintained as confidential as required and/or permitted by local, state, and federal laws and regulations. To that end, the following guidelines govern the use and disclosure of information shared with the SAS office staff.

1. This information is protected by the Family Educational Rights and Privacy Act (FERPA). All records received and kept by SAS are considered educational records. All documentation is kept in secure electronic files, and immediate access is limited to the SAS staff and managers.
2. Personally identifiable information will not be disclosed to persons outside the University without the expressed written permission of the student, except in accordance with local, state, and federal laws or pursuant to a court order or subpoena.
3. Personally identifiable information will be shared with other University employees, faculty, and other officials only when the requestor maintains a legitimate educational interest. In such a case, the SAS staff will disclose only information pertinent to the request and in the student's best interest.
4. If a student wishes to have information about their disability shared with others outside of the institution, the student must provide written authorization to SAS at sas@nu.edu to release the information.
5. A student has the right to review their own SAS file with reasonable notification. Any student wishing to review their records should contact SAS at sas@nu.edu.

Students Who Believe They Have Been Subject to Discrimination Based on their Disability

National University students and employees (including the SAS office staff) abide by the [Equal Opportunity, Harassment and Nondiscrimination Policy](#), as found on the NU website and in the [General Catalog](#).

It is our sincere hope that no member of our community experiences discrimination, harassment, misconduct, or violence based on their actual or perceived membership in a protected category. If that has occurred, please know that any person may file an informational report (whether or not the person reporting is alleged to have experienced the conduct). A report may be made at any time (including during non-business hours) by choosing the appropriate reporting form at this link: www.nu.edu/reportit, or in person, by mail, by telephone, by video, or by email, using the contact information listed below for the Title IX Coordinator/ADA 504 Coordinator.

Title IX Coordinator & ADA/504 Coordinator

Heather Tyrrell, Director, Institutional Equity

Office of Institutional Equity

Office Email: oie@nu.edu
Email: htyrrell@nu.edu

Title IX Notice of Non-Discrimination

Scope

The scope of this policy applies to all staff, faculty, third-parties conducting business on behalf of the University, and all students. The core purpose of this policy is the prohibition of all forms of discrimination. Sometimes, discrimination involves exclusion from or different treatment in activities, such as admission, or employment. Other times, discrimination takes the form of harassment or, in the case of sex-based discrimination, can encompass sexual harassment, sexual assault, stalking, sexual exploitation, dating violence or domestic violence.

The University adheres to all federal, state, and local civil rights laws prohibiting discrimination in employment and education. The University does not discriminate in its admissions practices, in its employment practices, or in its educational programs or activities on the basis of sex. As a University of federal financial assistance for education activities, the University is required by Title IX of the Education Amendments of 1972 to ensure that all of its education programs and activities do not discriminate on the basis of sex. Sex includes sex, sex stereotypes, gender identity, gender expression, sexual orientation, and pregnancy or parenting status.

The University also prohibits retaliation against any person opposing discrimination or participating in any discrimination investigation or complaint process internal or external to the institution. Sexual harassment, sexual assault, dating and domestic violence, and stalking are forms of sex discrimination, which are prohibited under Title IX and by the University's policy.

Any member of the community, guest, or visitor who acts to deny, deprive, or limit the educational, employment, residential, or social access, opportunities and/or benefits of any member of the University community on the basis of sex is in violation of the Title IX Policy.

Policy & Procedure

Any person may report sex discrimination (whether or not the person reporting is the person alleged to have experienced the conduct), by mail, by telephone, by video, or by email, using the contact information listed for the Title IX Coordinator (below). A report may be made at any time (including during non-business hours) by electronic email or by voicemail.

Questions regarding Title IX, including its application and/or concerns about noncompliance, should be directed to the Title IX Coordinator. For a complete copy of the policy or for more information, please contact the Title IX Coordinator.

Who to Contact

Individuals who believe they have experienced sex discrimination, harassment, and/or retaliation in violation of University policy should contact the following:

Title IX Coordinator

Heather Tyrell

Office Location: Remote Employee

Mailing Address: 9388 Lightwave Avenue, San Diego, CA 92123

Telephone: (858) 642-8087 Email: htyrell@nu.edu

University Code of Conduct Related to Harassment

The University does not condone harassment or abusive behavior. Harassment, physical abuse, threatening comments, or intimidation of any person on University owned or controlled property or at University sponsored or supervised functions, or conduct which threatens or endangers the health or safety of any member of the University community or any other person or persons. Such conduct includes, but is not limited to stalking, cyber stalking, harassment, and retaliation as a result of complaints or alleged misconduct.

Report It

Notice or complaints of discrimination, harassment, and/or retaliation may be made using any of the following options:

1) File a complaint with, or give verbal notice to, the Title IX Coordinator. Such a report may be made at any time (including during non-business hours) by using the telephone number or email address, or by mail to the office address, listed for the Title IX Coordinator or any other official listed.

Because reporting carries no obligation to initiate a formal response, and as the University respects Complainant requests to dismiss complaints unless there is a compelling threat to health and/or safety, the Complainant is largely in control and should not fear a loss of privacy by making a report that allows the University to discuss and/or provide supportive measures.

A Formal Complaint means a document submitted or signed by the Complainant or signed by the Title IX Coordinator alleging a policy violation by a Respondent and requesting that the University investigate the allegation(s). A complaint may be filed with the Title IX Coordinator by phone, by mail, or by electronic mail, by using the contact information in the section immediately above, or as described in this section. As used in this paragraph, the phrase "document filed by a Complainant" means a document or electronic submission (such as by electronic mail or through an online portal provided for this purpose by the

University) that contains the Complainant's physical or digital signature, or otherwise indicates that the Complainant is the person filing the complaint, and requests that the University investigate the allegations.

If notice is submitted in a form that does not meet this standard, the Title IX Coordinator will contact the Complainant to ensure that it is filed correctly.

Investigations

The University Title IX Coordinator maintains oversight for review and investigation of complaints of this nature. All investigations will adhere to practices set forth by Federal Guidelines.

Protection Against Retaliation

The University is committed to providing a workplace and educational environment, as well as other benefits, programs, and activities, that are free from discrimination, harassment, and retaliation. To ensure compliance with federal and state civil rights laws and regulations, and to affirm its commitment to promoting the goals of fairness and equity in all aspects of the educational program or activity, the University has developed internal policies and procedures that provide a prompt, fair, and impartial process for those involved in an allegation of discrimination or harassment on the basis of protected class status, and for allegations of retaliation. The University values and upholds the equal dignity of all members of its community and strives to balance the rights of the parties in the grievance process during what is often a difficult time for all those involved.

Student Consumer Information

Federal Student Consumer Information Requirements

National University (NU) consumer information provides a suite of important University information, disclosures, policies and procedures. Per the Higher Education Opportunity Act, this information is intended to provide an assortment of pertinent and helpful information to prospective students, current students, their families, support persons, and other interested parties. This consumer information includes resources to academic policies, financial aid resources, general institutional information, health, safety & security items, student services, admissions expectations, and a variety of other areas. NU's consumer information is also available on the University's website at: <https://www.nu.edu/consumer-info/>.

Notice to Enrolled Students

National University (NU) Student and Financial Services team annually emails each enrolled student a Notice of Availability of financial assistance and institutional and consumer information, including FSA Penalties for Drug Law Violations, links to the University's graduation and completion rates and retention rates reported to IPEDS, campus security reports, and student rights under FERPA. Information will also be linked in new student Enrollment Agreements so all students are provided with the information in the Enrollment process. Students who have any questions or would like to meet with one of the University's dedicated financial aid advisors may reach out at financialaid@nu.edu or 1-800-NAT-UNIV, ext. 8500.

Financial Aid Information

Financial Aid Programs Available at National University

National University (NU) offers eligible students access to Federal and State loan and grant programs.

Federal Student Aid (FSA) Grants

Federal Pell Grant

This grant program helps students with tuition costs. This program assists students who are working toward a first bachelor's degree.

- Award Range for 2022-2023 Award Year: \$692 to \$6895
- Applications: FAFSA

The Federal Pell Grant Program is an entitlement program for students pursuing their first undergraduate degree. Students must demonstrate financial need to qualify. Students who have already earned a bachelor's degree are not eligible for Federal Pell Grant funds.

The Federal Pell Grant Program is federally funded with the purpose of helping financially needy students meet the cost of postsecondary education. This program is centrally administered by the federal government and is typically the foundation of an undergraduate student's aid package.

In order to determine eligibility for the Federal Pell Grant, NU must receive the results of the Free Application for Federal Student Aid (FAFSA) in the form of a valid Institutional Student Information Report (ISIR) from the Department of Education's Central Processing Service (CPS). The Federal Pell Grant Scheduled Award is based upon the official Expected Family Contribution (EFC) and the Federal Pell Grant Cost of Attendance (COA). The University uses Pell Formula 4 to determine a student's eligibility and award. Students may be eligible to receive up to 150% of their Pell Grant Scheduled Award for an award year. This provision is called "Year-Round Pell" or "additional Pell". Students eligible for Year-Round Pell awards are subject to the normal duration of eligibility rules and LEU limits. A student's maximum duration of Pell Grant eligibility is six scheduled awards, as measured by the percentage of lifetime eligibility used (one scheduled award equals 100% lifetime eligibility used). A student is ineligible to receive further Pell Grant funds if they have reached or exceeded the 600% limit.

All Undergraduate students enrolled at NU are considered to be full-time students for purposes of calculating the Federal Pell Grant Scheduled Award. The amount of Federal Pell Grant awarded is based upon the length of the payment periods to be funded and the EFC indicated on the student's valid SAR/ISIR. The portion of the enrollment that is funded based upon a particular year's SAR/ISIR depends upon the student's payment periods that begin in that year. Payment periods are normally funded from the year in which they begin.

When a payment period falls into two award years (crosses over July 1st), it is called a "crossover payment period." The University will assign crossover payment periods to the award year that best meets the needs of its students and maximizes a student's eligibility over the two award years in which the crossover payment period occurs.

For an academic year, the student is awarded the full Federal Pell Grant Scheduled Award determined by the EFC and COA. When less than a full academic year is to be funded, the Scheduled Award is prorated appropriately.

Federal Pell Grant funds are generally scheduled for disbursement at the beginning of each course, or payment period, in conjunction with the achievement of Satisfactory Academic Progress. The funds scheduled represent, at maximum, funding for all credits that should be earned during the payment periods to be funded from the appropriate award year.

Federal Student Aid (FSA) Loans

Direct Subsidized Loan

This loan program assists undergraduate students with educational expenses. Interest doesn't accrue while you are attending and enrolled in at least a half time status. The interest rate and origination fees are fixed. More information about specific interest and origination rates can be found at <https://studentaid.gov/understand-aid/types/loans/interest-rates>. Repayment is not required while you are attending school and maintain at least half-time enrollment. Students are allowed a six month grace period when they cease attendance of attend less than half-time. More information about loan repayment can be found at <https://studentaid.gov/manage-loans/repayment>.

Direct Subsidized Loan Amount: For each academic year, a student may borrow:

- Up to \$3,500 as a first-year undergraduate
- Up to \$4,500 as a second-year undergraduate

- Up to \$5,500 as a third-, fourth-, or fifth-year undergraduate

Date funding begins is based on each student's individual program of study.

Direct Unsubsidized Loan

This program is available to undergraduate, graduate and professional students to assist with educational expenses. Interest accrues while you are attending. More information about specific interest and origination rates can be found at <https://studentaid.gov/understand-aid/types/loans/interest-rates>. Repayment is not required while you are attending school and maintain at least half-time enrollment. Students are allowed a six month grace period when they cease attendance or attend less than half-time. More information about loan repayment can be found at <https://studentaid.gov/manage-loans/repayment>.

- Up to \$9,500 as a first-year undergraduate
- Up to \$10,500 as a second-year undergraduate
- Up to \$12,500 as a third-, fourth-, or fifth-year undergraduate
- Up to \$12,500 as a fifth-year undergraduate credential student
- Up to \$20,500 as a graduate student
- Up to \$33,000 as a graduate student in certain health professions

Dependent student's Direct Unsubsidized Loan amount eligibility may vary.

Aggregate Loan Limits

- Dependent Undergraduate: \$31,000 (\$23,000 maximum subsidized)
- Independent Undergraduate: \$57,500 (\$23,000 maximum subsidized)
- Graduate: \$138,500 (\$65,500 in subsidized)
- Graduate in certain health professions: \$224,000 (\$65,500 in subsidized)

Note: The graduate loan limit includes any Direct Loans borrowed as an undergraduate. Students may view their borrowed loan amounts via NSLDS. A link to the NSLDS website is available via the University's consumer information or directly at: <https://www.nu.edu/administrations/financial-aid-and-scholarships/financial-aid-programs/>.

Direct PLUS Loans

Direct PLUS Loans are available to parents of dependent undergraduate students and graduate or professional students to assist with educational expenses not covered with other financial aid. PLUS loans aren't based on need and require a credit check.

Federal Direct Loan Interest Rates and Fees

Interest rates and origination fees vary depending on when your aid is disbursed. Specific rates and fees are available on the FSA website. A link to the FSA website is available via the University's consumer information page or directly at: <https://www.nu.edu/admissions/financial-aid-and-scholarships/financial-aid-programs/>.

Institutional Information

Net Price Calculator (NPC)

National University (NU) provides prospective students with a calculator designed to give them an early indication of how much and what types of financial aid they may qualify for if they were attending school full-time in the academic year indicated. The goal is to provide students with a clear picture of options and opportunities so they may make more informed decisions about their college choices. A link to the College Board's NPC is available on the University's consumer information page at <https://www.nu.edu/consumer-info/>.

Cohort Default Rates (CDR)

National University (NU) provides prospective students with the University's annual FSA loan default rate to give them an indication of how many students who borrowed FSA loan funds from the University are not paying back their FSA loans. The

goal is to provide students with an indicator regarding the percentage of students who do not repay their loans after graduating or withdrawing from the University. A link to NU's current and prior two year's default rates is available on the University's consumer information page at: <https://www.nu.edu/consumer-info/>.

Tuition and Fees

National University (NU) provides prospective students with a straightforward, easy to understand tuition and fee structure that includes a cost per course tuition rate and minimal additional fees. NU attempts to keep book costs and other miscellaneous program fees to a minimum. Upon enrollment, each student is informed of any additional fees that are not included in the cost per course tuition rates. National University (NU) tuition and fee costs for all of its programs are available on the University's consumer information page at: <https://www.nu.edu/consumer-info/>.

Completion or Graduation Rate

National University (NU) annually prepares its graduation rates and makes these rates available to enrolled and prospective students via its consumer information page at: <https://www.nu.edu/consumer-info/>.

National University reports disaggregated graduation rates by gender, major racial and ethnic subgroups (as defined by IPEDS).

The "Student Right to Know" or IPEDS graduation rate tracks the progress of students who began their studies as full-time, first-time degree or certificate-seeking students to see if they complete a degree or other award such as certificate within 150% of "normal time" for completing the program in which they are enrolled. NU does not disaggregate SRTK graduation by recipients of Federal Student Financial Aid recipients as the number is too small (30 students at last reporting) to disclose or report and protect student privacy. Not all students are tracked for these rates. Students who have already attended another postsecondary institution, or who began their studies on a part-time basis, are not tracked for this rate.

Student Right to Know graduation and retention rates can be found on the NCES website at: <https://nces.ed.gov/collegenavigator/?q=national+university&s=all&pg=2&id=119605#retgrad>.

NU graduation rates for all students can be found on the NU graduation rate dashboard on the student achievement website at: <https://studentachievement.nu.edu/institutional-data.html>.

Graduate diversity is also available as a Graduate Report as part of the Student Demographics dashboard.

NU graduation rates for all students can be found on the NU graduation rate dashboard on the student achievement website at: <https://studentachievement.nu.edu/institutional-data.html>.

NU does not calculate job placement rates and thus does not provide the following consumer information: Job Placement Rates, Placement in Employment, and Types of Graduate and Professional Education in which the Institution's Graduates enroll.

Annual Security Report

National University (NU) recognizes that crime prevention is the responsibility of each person working at, attending school at, or visiting a University facility. Crime prevention is best served by the vigilant surveillance of the premises and reporting any suspicious personal behavior. The University is, therefore, committed to providing a safe environment for learning and working.

The Jeanne Cleary Disclosure of Campus Security Policy and Campus Crime Statistics Act requires the distribution of an annual security report to all current faculty, staff, and students and notice of its availability to prospective students, faculty and staff. The annual security report includes statistics for the previous three years concerning reported crimes that occurred on campus, in certain off-campus buildings, or on property owned or controlled by National University, and on public property within, or immediately adjacent to and accessible from the campus. The report also include institutional policies concerning campus

security such as policies concerning alcohol and drug use, crime prevention and the reporting of crimes, sexual assault, and other matters.

NU's current and past annual security reports are available on the University's consumer information website at: <https://nu.edu/our-university/annual-safety-and-security-report/>. The annual report is released in January of each year by the Legal/Regulatory department. A paper copy will be provided upon request.

Timely Warnings and Emergency Notifications

National University (NU) recognizes that crime prevention is the responsibility of the University and each person working at, attending school at, or visiting a University facility. Crime prevention is best served by the vigilant surveillance of the premises and reporting any suspicious personal behavior.

The University's Emergency Operations information line is 1(844)-AlertNU or 1(844) 253-7868. This recorded information line is updated in the event of a campus emergency.

Reporting Health and Safety Concerns

Students, faculty, staff, and guests should immediately report health and safety concerns to campus or security personnel. If a campus security officer cannot be reached, request to speak with the center director or another staff member since they will be able to assist in reaching the security officer. The Campus Safety and Security team may be reached directly via their main line (858) 642-8892, mobile line (619) 405-4208, or email safety@nu.edu.

For concerns that are not an immediate health or safety concern, visit www.nu.edu/reportit to connect with the appropriate department.

Emergency Procedures

University team members are advised to program the following numbers in their mobile phones in the event of an emergency and should note that campus phone will require "9" to be entered to reach an outside line. Incidents occurring on any campus can be reported to the Director of Security for immediate assistance.

- Office Phone: (858) 642-8191
- Mobile Phone: (619) 405-4208
- Safety & Security Office: (858) 642-8892

All work-related injuries or illnesses must be reported to Human Resources within 24 hours:

- Office Phone: (858) 642-8191
- Email: benefits@nu.edu

If an incident is in progress and someone is unable to call but has access to email, a message will need to be sent instead to incidents@nu.edu. This notifies Human Resources, Information Technology, Regional Operations and Safety & Security. All Security Officers are equipped with a cell phone. Please contact your Center Director for your officer's number.

Active Shooter

If an active shooter is in the vicinity: RUN.HIDE.FIGHT

- Remain calm. Survey your surroundings for a safe escape route.
- RUN. Relocate to a safe location.
- If there is an escape path, attempt to evacuate to a safe location.
- Leave your belongings behind. Staying out of harm's way is your top priority.

- Help others escape, if possible.
- Prevent others from entering the area.
- Call 911 when you are safe. Report location of injured and if possible, description of the assailant.
- Hide. If evacuation is not possible, find a place to hide.
- Loco and/or blockade the door.
- Silence your cell phone.
- Hide behind large objects, out of the assailant's view.
- Remain very quiet.
- Prepare to evade or defend.
- Fight. As a last resort, and ONLY if your life is in danger.
- Attempt to incapacitate the intruder.
- Act with physical aggression.
- Improvise weapons
- Commit to your actions

When Law Enforcement Arrives:

- Remain calm and follow instructions.
- Keep your hands visible at all times.
- Avoid pointing or yelling.
- Know that help for the injured is on its way.
- Wait for further instructions. Do not drive away unless instructed to do so.

Building Evacuation

- When an alarm sounds or an emergency is communicated, evacuate the building IMMEDIATELY.
- Pull the fire alarm if you discover a fire.
- Do not lose your life over your possessions. If time allows, take your keys and cell phone.
- CLOSE but do not lock doors as you leave.
- Look for the nearest doorway marked EXIT and/or proceed to the nearest safe stairway and exit the building quickly.
- Do not use elevators.
- Be certain all persons in the area are evacuated, if possible.
- Help those who need special assistance.
- Report immediately to the designated assembly area for a head count. Report anyone missing or injured.
- Wait for instructions from emergency personnel. Do not leave until told to do so.

Earthquake

Before:

- Decide where you can take cover when tremors start.
- Clear the area underneath your desk of boxes or other items.
- Store your Grab-in-Go bag underneath your desk or table.
- Secure bookshelves or partitions to walls.
- Keep overhead bins locked.
- Prepare a kit for home. (3 day supply of food & water, First Aid kit, blankets, flashlights, radio, and batteries).
- Store a pair of shoes and flashlight in a bag and tie it to your bedpost.
- Establish an out-of-state contact.
- Join your local Community Emergency Response Team (CERT)

During:

- Resist the urge to panic and flee. Remain calm.

- Protect yourself from falling or flying objects.
- Get under or beside something that is sturdier than you.
- Stay away from large windows, shelving systems, or tall room partitions.
- DROP onto your hands and knees and take cover underneath a desk, table, or stairwell; or beside an interior wall or sofa.
- Do not stand in doorways. Doors can swing violently, resulting in smashed or broken fingers.
- COVER the back of your head and clasp your hands behind your neck. Bend over to protect your vital organs.
- If you are in a wheelchair, set your parking brake, lean forward and cover your neck with your hands and arms, or other items.
- Close your eyes and mouth to protect against dust and debris.
- HOLD ON to desk or table legs so that you can remain covered; or on to a sofa leg. Be prepared to move with your shelter.
- Remain sheltered until shaking stops.
- Prepare for aftershocks, power outages, sounding alarms, activated fire sprinklers, and noise from broken glass, creaking walls, or falling objects.
- If you are inside, stay inside.

If you are outside:

- Resist the urge or running towards a building
- DROP, COVER and HOLD ON
- Drop down to your hands and knees
- Cover your head with your arms, clasping your hands behind your neck.
- Bend over to cover your vital organs and hold on
- If you can move safely, relocate to an open area away from overhead power lines, building facades, or windows.

If you are at a desk or table located near a window:

- Get underneath the desk or table and pull in a chair as close as you can to protect yourself from flying glass.

If you are driving:

- Gradually decrease speed and pull over to the side of the road.
- Do not stop under overpasses or bridges.
- Set your parking break.
- Turn on the radio and listen to emergency alerts.
- If a power line falls on your car, call 911 and remain inside your vehicle. Do not touch windows, doors, or any metal surfaces.

If you are in a stadium/theater/auditorium/classroom

- DROP to your hands and knees, in between the seats.
- COVER your neck with your hands and arms. Bend over to cover your vital organs.
- HOLD ON to a chair leg with one hand, while protecting your head and neck with your other arm.
- Close your eyes and mouth to protect against dust and debris.

If you are sitting in a restroom stall.

- Bend towards your knees.
- Cover your head with your arms to protect yourself from falling objects.
- Close your eyes and mouth to protect against dust and debris.

If at the grocery store:

- Resist the instinct to run.
- DROP, COVER, and HOLD ON.

After:

- Retrieve your dusk mask from your GRAB-n-GO bag and use it to cover your nose and mouth.
- Check your surroundings before leaving your shelter or bed.
- Be careful of any debris such as broken glass.
- Do not attempt to evacuate unless absolutely necessary.
- If evacuating, take all essential items (jacket, purse/wallet, cell phone, car and house keys, laptop, etc.) and your Grab-n-Go bag.
- Survey your immediate area for trapped or injured persons and ruptured utilities.
- Provide care for injured and resolve any issues such as chemical spills or other hazards.
- Be prepared for aftershocks by relocating to a safe area and not running.
- If possible, notify your out-of-state contact.

Campus Crime Log

National University (NU) provides a Campus Safety and Security team and maintains a crime log for all campuses. This log is available on its consumer information website at: <https://nupublicresources.blob.core.window.net/campussecurity/nu-crime-log.pdf>.

Other General Disclosures

Consumer Protection Policies

Privacy Policy

National University (NU) is committed to protecting the privacy of students, faculty, team members and all other stakeholders. NU values its users' privacy and has created a Privacy Policy (Policy) to assist in the understanding of how it collects and uses personal information from those who visit its website or make use of its online facilities and services, and what it will and will not do with the information it collects. The NU policy has been designed and created to assure those affiliated with NU of its commitment and realization of its obligation not only to meet, but to exceed, most existing privacy standards. This Policy does not govern the collection and use of information by companies that NU does not control, nor by individuals not employed or managed by NU. This policy is designed to provide the following:

- What personally identifiable information is collected through its website;
- Why NU collects personally identifiable information and the legal basis for such collection;
- How NU uses the collected information and with whom it may be shared;
- What choices are available regarding the use of data; and
- The security procedures in place to protect the misuse of information.

FERPA

In accordance with the Family Educational Rights and Privacy Act (FERPA) of 1974, all National University student records are confidential. Generally, information pertaining to a student record is not to be released to a third party without written or authorized electronic consent via a FERPA release form, judicial order or lawfully issued subpoena.

FERPA Rights

FERPA sets out requirements designed to afford students certain rights with respect to their education records. In addition, it puts limits on what information NU may disclose to third parties without receiving prior written consent from the student via a FERPA release form, an authorized signature on another document or a lawfully issued subpoena or judicial order.

NU Registrar's office maintains student educational records, provides students access to their records, and keeps information contained in those records confidential as required by FERPA.

Procedure to Inspect and Retrieve Education Records

Under FERPA, students have the right to inspect and review their education records. A student who wishes to inspect and review their records should submit a written request to the University Registrar. Students have the option to inspect their records at the University's San Diego, California location and must present photo identification before access to educational records is allowed. A designated University official must be present when a student wishes to review their records at the San Diego, California location.

For students who cannot reasonably travel to the University's San Diego, California location, copies of records from a student's file can be made available; the student must fill out and submit the 'Request for Educational Records' form.

All records requests will be responded to within 14 days from the date of receipt of the request. If the requested records are subject to inspection and review by the student, arrangements for access will be made within a reasonable period of time, but in no case more than 45 calendar days after the request was made.

The cost of obtaining copies, whether paper or electronic, is \$1.25 per page, payable in advance.

Education Records

Education records are defined as official records that are directly related to a student and maintained by the University Registrar.

When a record contains personally identifiable information about more than one student, the student may inspect and review only the information that relates to them personally.

Request to Correct Education Records

Students have the right to request an amendment of their education records if student believes their record may be inaccurate, misleading or in violation of their rights of privacy. The request for amendment must be made in writing and include a notarized signature. The request must be mailed to the attention of the Office of the Registrar and must identify the part(s) of the education records to be amended and specifying the reasons why the student believes the information is inaccurate or misleading.

The Office of the Registrar shall notify the student of the decision regarding their request for an amendment to their record within 15 business days of the receipt of the request. If the Office of the Registrar denies the student request to correct education records, the student has the right to request an appeal. All appeal requests must be submitted to the Office of the Provost and must be postmarked or emailed within 15 business days after the initial denial was sent. Any requests for appeal that are sent after the 15 business day deadline has passed will be denied, and the matter shall be deemed closed.

Once the Office of the Provost receives the student's appeal request they will render a written decision to the student within 15 business days of the receipt of the request. The Office of the Provost's decision is final and is not subject to further appeal.

Disclosure of Educational Records

Generally, schools must have written permission from the eligible student in order to release any information from a student's education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):

- School officials with legitimate educational interest
- State and Federal Regulatory Agencies
- Other schools to which a student is transferring
- Specified officials for audit or evaluation purposes
- Appropriate parties in connection with financial aid to a student
- Organizations conducting certain studies for or on behalf of the school
- Accrediting organizations
- To comply with a judicial order or lawfully issued subpoena
- Appropriate officials in cases of health and safety emergencies or crises
- State and local authorities, within a juvenile justice system, pursuant to specific State law

The University has designated certain types of information as "Directory Information," which may be disclosed without a student's consent.

Directory Information

The University designates the following information as directory information. (Directory information is personally identifiable information that may be disclosed without the student's consent):

- Student's name
- Email address
- Program(s) of study
- Dates of attendance
- Course schedule and degree plan
- Degrees, certificates and awards granted including conferral date
- Honors or awards received
- Current enrollment status (i.e., active/inactive)
- Undergraduate year (Freshman, Sophomore, Junior, Senior)
- Participation in activities officially recognized by the University

Although directory information can be disclosed without student consent, the University is not required to do so.

Non-Directory Information

Non-directory information is considered any information that is not listed as directory information. This information may not be released without the prior written consent of the current or former applicant or student.

The University will annually notify students of their rights under FERPA. Students may request nondisclosure of student directory information via a FERPA hold form, in writing, to the Office of the Registrar, National University, 9388 Lightwave Ave. San Diego, CA 92123. Failure to request nondisclosure of directory information may result in disclosure of one or more of the above-designated categories of directory information.

*Undergraduate Year - For federal reporting purposes, the year of progress in an undergraduate program is designated according to the total number of semester credits earned towards their bachelor's degree, including units accepted in transfer (partial semester credits are rounded down):

- Freshman 0-24 semester credits
- Sophomore 25-48 semester credits
- Junior 49-72 semester credits
- Senior 73 or more semester credits

Student Educational Records

NU maintains student educational records, provides students access to their records, and keeps information contained in those records confidential as required by FERPA. FERPA covers anyone who is or has enrolled at the University, including:

- Active students currently enrolled in a program
- Former students and alumni
- Administrative team members, full-time faculty members, and part-time faculty members

When operating websites, NU must take special measures to ensure the confidentiality of the information is protected. A privacy statement appears on the websites that explains what information NU may collect through our websites, why NU collects such information, how the information is protected, and the choices stakeholders have about how NU uses the information.

The University safeguards this information and to ensure the stakeholders are protected.

The University maintains Enrollment, Financial Aid, and Disciplinary documents for up to five years and Transcript documentation indefinitely.

Vaccination Requirements

National University does not require students to provide proof of vaccination status as most student-related interactions are remote.

Students who are completing in-person clinicals, internships, or student teaching are subject to the external facility's vaccination requirements.

Copyright Infringement and Fair Use

NU is committed to adhering to the provisions of the United States Copyright Law, including peer-to-peer (P2P) file sharing. To learn more about our related policies and procedures, please see the [Acceptable Use of Technology](#) and [Fair Use of Copyrighted Material](#) policies.

Student Code of Conduct

NU has a Code of Conduct that supports the University mission to provide access to higher education opportunities that help students become valuable contributors to their communities and within their professions. Each student is expected to understand the terms and conditions set forth in the Student Code of Conduct Policy and conduct themselves with academic honesty and personal integrity.

Student Grievance Process

In the event that a student has a complaint or a dispute with the University regarding the University's application of policies and procedures, its decisions, or judgments, the student has a right to seek a satisfactory resolution through the formal avenues of a grievance.

NU encourages students to attempt to resolve all issues internally with their Academic and Finance Advisor and or Faculty members. This procedure support timeliness, quality, accountability, and ensures that the appropriate institutional levels are involved and resolve matters in an efficient and effective manner. Additionally, it allows those closest to the problem the ability to extend the highest levels of support services.

Academic and Finance Advisors will coordinate and collaborate with required team members, department, and or Schools in pursuit of a student's required response. This ensures that the process is in accordance with policy and reviewed by the necessary parties required to properly address the issue at the appropriate institutional level.

Expected Escalation Levels for Resolution

- First level- Academic and Finance Advisor/Faculty
- Second level- Team Lead and or Associate Director of Student Financial Services
- Third level- Sr. Director of Student and Financial Services/Dean or designee
- Fourth level- VP Operations- Student and Financial Services/Office of the Provost (Depending on the nature of the issue)
- Fifth level- Grievance

NOTE: Dissertation Students are required to work through problems and concerns with their Committee Chair. If a student is unable to resolve an issue with the Chair regarding dissertation protocols, then the student may use these resolution methods.

Grievance

A grievance is a formal complaint that has not been resolved at other levels within the University. Resolution is viewed as being afforded due diligence and has been evaluated in accordance with ethics, academic integrity, policies, regulations, and laws. A grievance is not another channel of escalation in the case a decision was not made in the student's favor.

Grievance Evaluation

Formal grievances are reviewed by the Provost and are considered final. Students can file a grievance through their Academic and Finance Advisor if all other steps noted above have been attempted without appropriate resolution.

NOTE: Students may not grieve the stated or published policy of NU.

Procedure: Filing a Grievance

Responsibility	Action
Student	<ol style="list-style-type: none"> 1. Create a written document outlining your concerns and evidence to support your assertion. Submit this documentation to your advisor who will review and share as appropriate based on a review of each unique situation. Documentation should include: <ul style="list-style-type: none"> • The complaint; • Other methods of resolution that have been used unsuccessfully to resolve this issue; • Description of events leading to the grievance; • Remedy or resolution being requested. <p>Students are expected to allow for the due diligence of review and investigation to occur prior to submission of a follow-up or attempted escalation of the same problem.</p>
Office of the Provost/ Office of the Registrar	<ol style="list-style-type: none"> 2. A. If the issue requires an impartial review to determine possible solutions above and beyond the resources provided through other departments, the concern will be forwarded to Provost@nu.edu to determine if additional parties at the functional level should participate in the review and resolution. 2. B. If it is determined that further escalation is appropriate, they will assign an investigator and conduct an investigation. 3. Contact the student to determine understanding of the matter and to attempt informal closure. If that is not possible, continue the investigation.

	4. Share results of the investigation with the Provost for review and judgment if required.
	5. Communicate the outcome to the individual within 20 days (including weekends) * via email or share the decision in a telephone call. (Note: If execution of proper due diligence requires more than 20 days, the University will maintain regular contact with the student to ensure they are aware of the status of the investigation.)
	6. Provide copies of the communication to University departments as appropriate. Decisions made at this level are final and cannot be grieved or appealed.

An individual may contact the Bureau for Private Postsecondary Education for review of a complaint. The bureau may be contacted at: 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, through their website <https://www.bppe.ca.gov/>, by phone at 916-431-6959 or by fax at 916-263-1897.

Drug and Alcohol Abuse Prevention Information

National University's (NU) drug and alcohol abuse prevention program and policy is designed to present students and team members of the University with official notification of the applicable policies and penalties related to controlled substances (illicit drugs) and alcohol, as required by the Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act Amendments of 1989. Students and team members of the University are required to be aware of and abide by the standards and provisions outlined in this policy statement. NU will distribute this policy to students and team members on an annual basis.

The use, consumption, sale, purchase, possession, manufacture, or distribution of illegal drugs, drug paraphernalia, and/or alcohol while on University property or while engaged in University activities is prohibited. All students and team members are subject to this policy and to applicable federal, state and local laws related to this matter. Any violation of this policy may result in disciplinary actions as set forth in the applicable sections of this policy. NU recognizes that students and team members may, in accordance with the federal, state, and local laws, choose to use alcohol on their own time. Additionally, the University retains the right to grant limited exceptions to this policy only for the moderate consumption of alcohol during University- sponsored events or meals at which the University deems such moderate consumption to be acceptable.

Students and team members should be aware that there are criminal penalties- under federal, state, and local law- that make it illegal to use, manufacture, sell or possess controlled substances. Students must also be aware that there are federal financial aid penalties for drug-related convictions- received prior to and/or while receiving aid- that can affect student eligibility to receive federal financial aid. For additional information regarding financial aid and the implications of drug-related convictions, please visit the Office of the US Department of Education's Federal Student Aid website.

NU urges individuals with substance abuse problems to seek assistance and support. Students are encouraged to seek help through available national and community resources and hotlines, including, but not limited to, the following examples:

National Council on Alcoholism and Drug Dependence, Inc. (NCAD)

Telephone: 1-800-NCA-CALL (622-2255)

Substance Abuse and Mental Health Services Administration (SAMHSA)

Telephone: 1-800-662-HELP (4357)

Website: <http://www.samhsa.gov/>

Treatment Finder: <https://findtreatment.samhsa.gov/>

National Institute on Alcohol Abuse and Alcoholism (NIAA)

Telephone: 1-800-662-HELP (4357)

Website: <http://www.niaaa.nih.gov>

Treatment Finder: <http://www.niaaa.nih.gov/alcohol-health/support-treatment>

National Institute on Drug Abuse (NIDA)

Telephone: 1-800-662-HELP (4357)

Website: <http://www.drugabuse.gov/>

Alcoholics Anonymous (AA)

Telephone: see local telephone directories

Website: <http://www.aa.org/AI-Anon>

Telephone: 1-888-425-2666

National Cocaine Hotline

Telephone: 1-800-COCAINE (262-2463)

Addiction Group

Telephone: (855) 217-2693

Website: <https://www.addictiongroup.org>

Treatment Information: <https://www.addictiongroup.org/treatment/>

Team members are eligible to participate in the University's Employee Assistance Program at no additional cost. Team members are encouraged to contact Human Resources with additional questions.

There are serious physical and psychological health implications associated with the use and or abuse of drugs and alcohol that vary based on the frequency, extent, and intensity of consumption. When consumed in excess, drugs and alcohol can also lead to overdose or death. Drug use can cause changes in the brain that result in memory and cognition problems or lead to more severe consequences such as seizures, stroke, and possible brain damage. Alcohol use can impair brain function and motor skills; excessive use can increase the risk of certain cancers, stroke, and liver disease. Drug and alcohol use while pregnant may result in a number of health complications for the fetus such as premature birth, miscarriage, and low birth weight. For more information on the use of drugs and or alcohol and its effects on the brain and body, visit the National Council on Alcoholism and Drug Dependence.

Students and team members found participating in the use, consumption, sale, purchase, possession, manufacture or distribution of illegal drugs, drug paraphernalia, and or alcohol while on University property or while engaged in University activities shall be subject to disciplinary sanctions on a case by case basis. Students are expected to conduct themselves professionally and refrain from acts of misconduct set forth in the Student Code of Conduct published in NU's Catalog. Suspected acts of misconduct or violations of this policy should be reported to the appropriate authority for review and submission of the Suspected Code of Conduct Violation form. Substantiated violations may result in disciplinary sanctions, up to and including expulsion from the University. Team members are expected to observe high standards of ethical, moral, and legal business conduct as outlined in the Code of Conduct and Ethics and Standards of Professional Conduct published in the Team Member Handbook. Violation of these standards of conduct or this policy may result in corrective action, up to and including termination of employment. Suspected violations should be reported to a member of leadership or the Human Resources office.

New employees will receive a copy of this policy during the New Employee Orientation process, and all other employees will receive their annual notice of the policy during the annual Compliance Training process as implemented by Human Resources.

New students will receive a link to the policy on their Enrollment Agreements, with all other students receiving their annual notice no later than August 31.

Voter Registration Information

National University (NU) provides voter registration information for its students on its consumer information website at: <https://www.nu.edu/consumer-info/>.

The National Mail Voter Registration Form can be used by U.S. citizens to register to vote, update registration information due to a change of name, make a change of address, or to register with a political party. The national form also contains voter registration rules and regulations for each state and territory. In order to use this form for state registration purposes, the citizen must follow the state-specific instructions listed for their state. After completing the form, it must be signed and sent to the state or local election office for processing.

For more information about registering to vote, contact a state-specific election office. To register to vote by following your state-specific instructions and using the National Mail Voter Registration form, go to <https://www.eac.gov/voters/national-mail-voter-registration-form>.

Consumer Information Review Process

Topic	Team Responsible	Annual Review Due Date	Remediation Due Date	Annual Notice Required?	Method of Notice
Annual Notices to Enrolled Students^	Student & Financial Services	June 30	July 31	Yes	Email
Financial Aid Info^	Student & Financial Services	June 30	July 31	Yes	Website
Institutional Info^	Academic Affairs	June 30	July 31	Yes	Website
Completion/Grad Rates^	Data Operations	July 31	August 31	Yes	Website
Annual Security Report*	Legal/Regulatory	January 31	February 28	Yes	Website
General Disclosures^	Academic Affairs	June 30	July 31	Yes	Email
State-Required Consumer Information^	Academic Affairs	June 30	July 31	No	Website
Accrediting Agency Information^	Academic Affairs	June 30	July 31	Yes	Website
Title IV Loan Counseling~	Student & Financial Services	June 30	July 31	No	Email

*Students will be notified no later than February 28 by the Legal/Regulatory team that the annual Security Report is available on the National University website, with paper copies available upon request.

^An annual notice with links to all required annual disclosures will be sent out no later than August 31 by the Student & Financial Services team.

~Counseling information will be provided to each student on a case-by-case basis.

Entrance Counseling will be communicated to new financial aid- receiving students by the Academic & Financial Advisor team, as needed, in the packaging process.

Exit Counseling will be communicated by the Processing team either during the R2T4 process if a student withdraws, or within 30 days of the student completing their degree program.

State-Required Consumer Information

State Authorization of Distance Education

National University (NU) researches and monitors state authorization requirements in each state and continues to make good faith efforts to secure the appropriate authorization and/or licensure to offer online programs in each state for student enrollment. NU may have programs that are unauthorized in various states and is therefore unable to offer those programs to students residing in states.

States have varying rules, requirements and regulations that govern online (distance) education offered by out-of-state postsecondary institutions. These rules require higher education institutions that offer distance education to state residents to either register, obtain licensure or certification approval, a letter of exemption, or other certification from the relevant state agencies. For states in which NU lacks a physical presence, which may be defined differently by state, the University is not required to obtain authorization. Many of these regulations also apply to field experience (e.g., internships, practicums, clinicals, etc.) in the state.

State Relocation Notice

Students who relocate while enrolled may be unable to complete their studies if they are moving to a country or state where the University is not currently authorized to offer that particular program. Prospective students should contact their Admission Advisor to discuss how relocation could alter their eligibility, while current student should contact their Academic Advisor if they are considering relocating during their course of study.

Since the University must be authorized/approved to offer programs in each state, there may be consequences for applicants and students who relocate to a state or country where the institution does not meet state requirements or has yet to be approved. There are also program limitations even in states where the university is authorized/approved; for states with an authorized/approved status, applicants/students may not be able to apply, continue, or change to a particular program, as not all programs may be approved by a state licensing authority. In these cases, these programs cannot be offered to students residing in that state.

Professional Licensure/Certification

Some programs offered at National University may not provide all the educational requirements necessary for professional licensure or certification in a student's state or country. Prospective and current students should review the University's Licensure Disclosures for more information related to these programs. Individuals considering an online program that leads to a professional license/certification should be aware that requirements for professional licensure can vary drastically by state, and these requirements can change frequently and often without notice. While a program may originally meet the educational requirements for licensure, changes in requirements could impact the program's ability to meet any new educational requirements.

Students considering an online program that leads to professional license in a state are highly encouraged to contact the appropriate licensing agency and organization(s) in that state to seek information and additional guidance before beginning the program; and students should also continually monitor changes throughout the program as licensure requirements may change over time. Many licensure boards require more than successful degree completion to obtain a license, such as completion on an examination(s), test(s), background check(s), internships/practicum hours, and other requirements determined by the respective state board. It is the responsibility of the student completing the licensure program to check with the respective state licensing board(s) for the most recent information, rules and requirements. National University is not responsible and cannot be held liable if the student is unable to qualify for licensure or certification in any jurisdiction or cannot obtain a practicum/internship location.

State-Regulated Refund Policies for Online/Distance Learning

Tuition refunds for students enrolled in online programs who reside in certain states will be issued in accordance with the policies required by the laws and regulations of those states. However, if the University's standard refund policy is more beneficial to those students, the University will follow its standard Refund Policy. State-specific refund policies are listed below and online at <https://online.flippingbook.com/view/814609/48>.

Student Consumer Information

The National University Consumer information page at <https://www.nu.edu/consumer-info/> provides links to a suite of important National University information, disclosures, policies and procedures. Per the Higher Education Opportunity Act, this information is intended to provide an assortment of pertinent and helpful information to prospective students, current students, their families, support persons, and other interested parties. This information webpage includes resources and links to academic policies, financial aid resources, general institutional information, health, safety & security items, student services, admission expectations, and a variety of other areas. See <https://www.nu.edu/consumer-info/>.

National University is currently registered, licensed, authorized, have a letter of exemption or lack of physical presence in the following states:

Maryland Refund Policy:

Students enrolled in online programs who reside in Maryland will receive the minimum tuition refunds in accordance with the Maryland Higher Education Commission requirements (specified in Title 13B.05.01.10 of the code of Maryland Regulations)

- A. Except as provided by §B of this policy/regulation, an institution's refund policy shall conform to this regulation and the institution shall provide for refunds of tuition to Maryland students as provided in this regulation.
- B. If the University's refund policy is more beneficial to Maryland students, the institution will follow its refund policy and provide for refunds of tuition to Maryland students as provided in that policy.
- C. Minimum refund: The University will refund the applicable tuition refund to a Maryland student who drops, withdraws, or is terminated after completing only a portion of a course/class:

Proportional Total Course, Program, or Term Completed as of Date of Withdrawal or Termination

Tuition Refund

Less than 10%90% refund

10% up to but not including 20%.....80% refund

20% up to but not including 30%.....60% refund

30% up to but not including 40%.....40% refund

40% up to but not including 60%.....20% refund

More than 60%.....No refund

A refund due to a Maryland student will be based on the date of withdrawal or termination and paid within 60 days from the date of withdrawal or termination.

D. This refund policy is disclosed and acknowledged by students upon enrollment, and documentation verifying student refunds in accordance with this policy is maintained.

Virginia Student Grievance Form: <https://www.surveymonkey.com/r/StudentComplaintForm>

Virginia Refund Policy: Students are accepted and registered for classes with the understanding that they will attend the entire course. Faculty contracts, the commitment of space, and other University resources are made on that assumption, creating financial obligations that students who withdraw must share. National University's refund policy reflects this position. Students may withdraw themselves from class prior to midnight on the ninth (9th) day of the session by emailing their academic advisor at advisor@nu.edu or Student Concierge Services at scs@nu.edu. To accurately count session days, note that the first day of a session – not the actual day a student attends class – counts as day one of that session. The University counts calendar days rather than business days for determining refunds. As such, if the first day of the session is a Monday, the student would need to withdraw prior to midnight of the following Tuesday, the ninth day of that session.

If a student does not complete a course, a tuition refund is made according to the following schedule, which is based upon a 28-day month.

- Students who withdraw from a course prior to midnight of the:
- Ninth (9th) day of the session will receive a 100% refund.
- Fourteenth (14th) day of the session will receive a 50% refund.
- Twenty-first (21st) day of the session will receive a 25% refund.

Students who withdraw from a course after midnight of the twenty-first (21st) day of the session will not receive a refund.

Students must have a credit balance in their account to receive a refund. Refunds, depending on the verification of funds, are processed and mailed within fifteen (15) days from the later of:

- a. The date from when a student cancelled enrollment
- b. The date from when the institution terminates a student's enrollment
- c. The last day of an authorized leave of absence (if the student fails to return after this period)
- d. The last day of attendance of a student

All refunds are mailed to the student's home address. Students must make sure that the address on file is correct.

Washington Student Achievement Council

917 Lakeridge Way, SW
Olympia, WA 98504-3430
Phone: 360.753.7800
Website: www.wsac.wa.gov

Washington Disclosure: "National University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes National University to offer field placement components for specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council or the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympic, WA 98504-3430 or by email at degree authorization@wsac.wa.gov."

Washington Disclosure: "The transferability of credits earned at National University is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of student at National University will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma or other academic credential earned at National University to satisfy an admission requirement of another institution is at the discretion of the receiving institution. Accreditation does not guarantee credentials or credits earned at National University will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas or certificates earned".

Washington Disclosure: "For Washington State residents seeking information and resources about student loan repayment or seeking to submit a complaint relating to your student loans or student loan servicer, please visit www.wsac.wa.gov/loan-advocacy or contact the Student Loan Advocate at loanadvocate@wsac.wa.gov."

Wisconsin Educational Approval Board

Mailing Address:
P.O. Box 8696

4822 Madison Yards Way
Madison, WI 53705-8366

Website: www.dsps.wi.gov/pages/programs/educationalapproval/default.aspx

Wisconsin Disclosure: Students must submit an enrollment agreement before beginning classes at National University. The agreement includes topic pertaining to tuition and fees, billing, attendance, financial assistance, payment options, and other matters of enrollment. Contact an enrollment advisor for further information. The student may cancel enrollment during a 3-business-day period by delivering or mailing a signed written notice to the school at the address set forth in the notice of cancellation privilege. Saturdays, Sundays and holidays are not business days. The school shall, within 10 business days after receiving notice of cancellation from the student, make any refund owing as a result of the cancellation and arrange for a termination of the student's obligation to pay any sum. This cancellation privilege does not apply to any program for which the total cost is less than \$150 and which is offered in less than 6 class days, provided that the program is not one of a sequence.

Wisconsin Student Grievance Information:

<https://dsps.wi.gov/Pages/Programs/EducationalApproval/EAPFileAComplaint.aspx>

Wisconsin Student Grievance Form: <https://dsps.wi.gov/Documents/EAComplaintForm3.01.doc>

Wisconsin Refund Policy: A student who withdraws or is dismissed after the cancellation period has passed, but before completing 60% of the potential units of instruction in the current enrollment period, shall be entitled to a pro rata refund, as calculated below, less any amounts owed by the student for the current enrollment period, less a one-time application fee of \$ 100.

1. Pro rata refund shall be determined as the number of units remaining after the last unit completed by the student, divided by the total number of units in the enrollment period, rounded downward to the nearest 10 percent. Pro rate refund is the resulting percent applied to the total tuition and other required costs paid by the student for the current enrollment period.
2. All efforts will be made to refund prepaid amounts for books, supplies, and other charges unless the student has consumed or used those items and they can no longer be used or sold to new student, or are returned by the school to the supplier.
3. Refunds shall be paid within 40 days after the effective date of termination.
4. After the student's first period of enrollment, if a student withdraws or is dismissed in a subsequent enrollment period, the school may also retain an administrative fee of 15% of the total cost of a resident program, or \$400, whichever is less.
5. No refund is required for any student who withdraws or is dismissed after completing 60% of the potential units of instruction in the current enrollment period unless a student withdraws due to mitigating circumstances, which are those that directly prohibit pursuit of a program and which are beyond the student's control.

Email: wascsr@wascsenior.org

Registering a Complaint with National University's Accrediting Organization Western Association of Schools and Colleges (WASC) Senior College and University Commission (WSCUC):

Students may file a complaint with the University's institutional accrediting body by contacting the Western Association of Schools and Colleges (WASC) Senior College and University Commission at wascsr@wascsenior.org. Any student desiring to file a complaint must satisfy specific criteria as published in the official Complaint and Third-Party Comment Policy and must submit the required Complaint Form. The policy and form are available for download on the WASC Document List.

Complaints

Each institution of higher education is required to provide all prospective and current students with the contact information for the state agency, or agencies that handle complaints against postsecondary education institutions offering online (distance) learning within that state.

If a prospective or current student has a complaint, we encourage you to resolve them informally or formally through Student Services before submitting a complaint to an external entity. Please contact our Student Concierge Service at 1-866-NU-ACCESS (1-866-682-2237) or email scs@nu.edu with any concerns or questions. Should a student wish to file a complaint in their home state, they should select the state contact per above.

Accrediting Agency Consumer Information

National University (NU) shares with students that accreditation is a process of institutional peer review performed by objective, not-for-profit external agencies and that the goal of accreditation is to ensure institutions of higher education meet acceptable levels of quality. These agencies evaluate colleges, universities and educational programs for continuous quality. In other words, accreditation is a higher education seal of approval for schools, employers, and most importantly, for students. Students who earn a degree at a regionally accredited institution can be confident that the quality of education, and commitment of an institution to maintain and improve quality, meets the standards of the accrediting body.

Since 1977, NU has been accredited by the WASC Senior College and University Commission (WSCUC). The commission accredits institutions rather than individual programs. Therefore, in addition to assessing the academic quality and educational effectiveness of institutions, the Commission emphasizes institutional structures, processes, and resources. The accreditation process is aimed at:

- Assuring the Community of Quality
- Developing and Applying Standards
- Promoting a Culture of Evidence
- Promoting Engagement
- Developing Adaptive Systems
- Promoting the Exchange of Ideas

Title IV Loan Counseling

National University (NU) ensures all undergraduate student loan borrowers who have not received a prior FSA loan disbursement and all graduate PLUS loan borrowers who have not received a prior FSA graduate PLUS loan disbursement receives entrance counseling prior to their first disbursement.

Entrance Counseling

National University (NU) identifies first-time borrowers and notifies those students via email regarding the entrance counseling requirements and directs them to the Department of Education's online tool at www.studentaid.gov. NU will not disburse FSA loan funds prior to verifying the student's entrance counseling is complete.

Exit Counseling

National University (NU) identifies students who have withdrawn, enrolled and failed to return, or graduated from their program of student and notifies those students, via email within 30 days after they complete their program or the date they were determined to have left their program, regarding the exit counseling requirement and directs them to the Department of Education's online tool at www.studentaid.gov.

College of Business, Engineering, and Technology

School of Business and Economics

Post-Baccalaureate Certificate in Business

Description of Program

The Post-Baccalaureate Certificate program is designed for students who have completed their bachelor's degree and are seeking academic expertise through a graduate level certificate program. In order to earn a Post-Baccalaureate Certificate, students must complete four courses (12 credit hours), within the chosen Post-Baccalaureate Certificate program. Students must complete three courses (9 credit hours) for Management of Virtual Organizations Certificate program. With the exception of the General Business specialization, each Post-Baccalaureate Certificate is prescribed, meaning students can only take what is listed for the particular Post-Baccalaureate Certificate (students may not substitute alternative courses). Students must complete all four courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

[Click here](#) for potential career opportunities within the Post-Baccalaureate Certificates in Business.

Basis for Admissions

Admission to the Post-Bachelor's Certificate program requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to the University's Post-Baccalaureate certificate program. Coursework must have been completed at an accredited college or university within the last five years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Baccalaureate Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 9 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 6 months.

Post-Baccalaureate Certificate Transfer into a Master's Degree Sequence

Coursework completed within a Post-Baccalaureate Certificate program may be applied towards the specialization sequence within a master's program. Applying Post-Baccalaureate Certificate coursework towards a master's degree is contingent upon coursework and degree relevance under the most current master's degree program version. Applying Post-Baccalaureate Certificate coursework towards a master's degree may only occur once during a student's tenure. Specialization coursework completed as part of a master's degree, where a degree was conferred, cannot be applied towards a Post-Baccalaureate Certificate program. However, a Post-Baccalaureate Certificate can be completed as part of master's coursework, assuming the student officially applies for the Post-Baccalaureate Certificate prior to completing the fourth course in the Post-Baccalaureate Certificate series.

Entrepreneurship

This Post-Baccalaureate Certificate takes students beyond the classroom, allowing them to build and test their entrepreneurial ideas in real-world settings. The entrepreneurship courses will integrate all business disciplines, including marketing, finance, operations, and strategy. The courses are designed to help students develop skills in building businesses, investing in businesses, raising capital, and evaluating business opportunities. Specifically, the students in this specialization will focus on analysis, decision-making and business planning. Students will benefit from the latest business trends and techniques in recent entrepreneurship literature and experienced faculty feedback.

Required Courses - 12 credit hours

- ENT-5000 - Innovation - The Entrepreneur and Intrapreneur
- ENT-5001 - Strategic Market Assessments
- ENT-5002 - New Venture Formation
- ENT-5003 - Venture Capital and Private Equity

General Business

The General Business Post-Baccalaureate Certificate allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 12 credit hours for the Post-Baccalaureate Certificate in General Business. Students must take at least two business courses from any of the business focused courses offered in the MBA program and may take an additional course from a Post-Baccalaureate Certificate offered in other fields (Psychology, Technology and/or Education) to fulfill their General Business certificate requirement.

Recommended Courses - 12 credit hours

- FIN-5012 - Corporate Finance

- HRM-5013 - Global Cultural Effectiveness
- GBM-5001 - Global Leadership and Change
- ENT-5000 - Innovation - The Entrepreneur and Intrapreneur

Inclusive Leadership

This post-baccalaureate certificate specialization will equip you with the insights, knowledge, and skills to go beyond traditional conceptualization of leadership and will prepare you to be a leader who can empower, energize, and inspire individuals, and unify diverse employees while learning how to address structural inequities. This specialization will teach you to identify how power and hierarchy shape relationships and what you can do as a leader to be self-reflective as you work to mitigate biases. Learn how to become an agent of change who has the enhanced skills to lead an organization while being a champion and advocate for diversity, equity, inclusion, and social and economic justice. After completing this program, you will be able to make decisions that help to advance a unified and collaborative global workforce that functions effectively and efficiently, optimizing the organization's effectiveness.

Required Courses - 12 credit hours

- INL-5000 - Developing Competencies for Global Inclusive Leadership
- INL-5010 - Leveraging Global Diversity for Results
- INL-5020 - Leading the Inclusive Organization: Empathy, Equity, and Accountability
- Any Master's-level course from School of Business and Economics

Management of Virtual Organizations

This post-baccalaureate certificate focuses on acquiring knowledge and skills to support the management of virtual organizations. Students focus on a wide range of topics relevant to the manager overseeing virtual organizations. From theory to tactics, experienced professionals and entry-level candidates will build expertise in such diverse areas as virtual leadership, building trust in virtual teams, and legal and other implications that may arise in virtual organizations.

Required Courses - 9 credit hours

- MVO-5001 - Virtual Leadership & Team Management
- MVO-5002 - Building Virtual Teams & Trust
- MVO-5003 - Legal & Other Implications in a Virtual Organization

Project Management

This Post-Baccalaureate Certificate explores principles, concepts, tools, and techniques to improve project performance and organizational effectiveness. Project Management is one of the fastest growing professional disciplines. Students examine all aspects of company projects including cost estimates, budget management, cost control, risk assessment, bid negotiation and contracts, and performance reporting critical to the success of any organization. The Post-Baccalaureate Certificate provides curriculum for students aspiring to take on project management responsibilities. This Post-Baccalaureate Certificate focuses on risk management, procurement, and project monitoring and control.

Required Courses - 12 credit hours

- PM-6000 - Project Procurement Management
- PM-6004 - Project Risk Management
- PM-6008 - Project Monitoring and Control
- PM-6020 - Management, Leadership and Team Building in the Project and Program Environment

Master of Business Administration, MBA

Description of Program

The Master of Business Administration, MBA, requires 30 credit hours for degree completion. The MBA program includes 18 credit hours of foundational courses. The foundational courses are taken by all students regardless of their undergraduate degree to form and strengthen fundamental business skills. The next 9 credit hours in the program encapsulate a specialization aligned with a student's career goals and interests. Students end the program with a 3 credit-hour capstone course.

Disclaimer * Students in the Master of Business Administration program can choose between two online delivery modalities, the 1:1 instruction model or the class-based instruction model. Once students begin their program, they will remain in the same instructional modality for the duration of the program and will follow the institutional policies aligned with that modality.

[Click here](#) for potential career opportunities within the MBA.

Learning Outcomes

- Evaluate financial statements and quantitative information for decision making using appropriate information systems and tools.
- Assess the global supply chain and develop strategies that reach across different countries and cultures.
- Diagnose the systems, processes, and human capital of an organization.
- Understand decision making processes and use those processes to make effective decisions.
- Demonstrate effective communication strategies through the use of media and presentations that includes slide decks, personal presentation, and the creation of audio/visual files.
- Interpret legal compliance, ethical concerns of stakeholders, and social responsibility in terms of their impact on the conduct of business.
- Assess the economic environment within an industry and decide appropriate financial decisions for the firm.

Basis for Admissions

Admission to the Master of Business Administration program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution. In addition to these general requirements, MBA applicants have two options for entering the program:

1. Direct Entry - Individuals with a previously completed bachelor's degree in business from a regionally or nationally accredited academic institution may immediately begin the MBA program.

Note: Students who complete the University's BBA bridge path in Business Management may be eligible to apply four graduate-level courses from the BBA program to the MBA program. Graduate-level courses completed in the BBA bridge path must be completed with a grade point average of 3.0 (grade of "B") or better.

2. Evaluation Track - Individuals who do not meet direct entry requirements will begin their degree plan with MBA-5102 - Changing Times - Business in the 21st Century, followed by SKS-5001 - Comprehensive Strategic Knowledge Studies, and upon successful completion of SKS-5001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two weeks prior to the beginning of SKS-5001 course. This can be discussed with your enrollment or academic and finance advisor.

Students who enter through the evaluation track and do not immediately test out of SKS-5001 prior to having the course placed in their degree plan are not permitted to participate in the Accelerated MBA program.

Degree Requirements

The Master of Business Administration requires 30 credit hours for degree completion. The MBA program includes 18 credit hours of foundational courses. The foundational courses are taken by all students regardless of their undergraduate degree to form and strengthen fundamental business skills. The next 9 credit hours in the program encapsulate a specialization aligned with a student's career goals and interests. Specialization courses must be appropriate to the student's degree program. Students end the program with a 3 credit-hour capstone course.

Students in the MBA program are required to demonstrate competency in the areas listed below:

- Research - MBA students are required to show competency in writing skills for research purposes through their coursework.
- Computer Competency - MBA students are required to use appropriate computer skills that are necessary in writing research papers. Students must be able to prepare documents using APA formatting and advanced word processing skills, such as the creation of title pages, abstracts, tables and figures, headers and footers, page breaks, tables of contents, and hanging indents.

Students assume full responsibility for understanding both the foundational, specialization, and capstone requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Students' Academic and Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Business Administration for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Note: Students with a conferred BBA degree from the University who complete graduate-level coursework with a grade of "B" or better to satisfy undergraduate specialization credit hours may be eligible to apply up to 12 graduate-level credit hours from the BBA program to the MBA program. Please see the Bachelor of Business Administration program for program-specific course requirements.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 20 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 months.

Accelerated MBA Scheduling Track

Within the MBA program, the School of Business and Economics offers an Accelerated MBA scheduling track. The Accelerated MBA is not an alternative program, but is a scheduling option designed for students capable of completing an intense, fast-paced, and highly challenging graduate course structure. Students considering the Accelerated MBA track are strongly encouraged to first think about their availability for study-time, work schedule or any other outside activities that may interfere with course participation, and their ability to learn in a rapidly moving academic environment. Students who enter and successfully complete the Accelerated MBA track will graduate in 12 months with a Master of Business Administration degree.

Week	Courses						
1-8	MBA-5102						
5-12	MBA-5110						
13		Break					
14-21			FIN-6890 MBA-5150				
22				Break			
23-30					MGT-6030 MGT-6080		
31						Break	
							Specialization Course (1)
32-39							Specialization Course (2)
40						Break	
41-48							Specialization Course (3)
45-52							MBA-6010

Course Sequence

The Master of Business program can be completed with a minimum of 30 credit hours, but may require additional credit hours, depending on the entry track requirements. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

All Master of Business Administration (MBA) programs require the foundation courses to be completed prior to enrolling in specialization courses. The program capstone will be completed as the last course in the degree program.

In some cases, specialization courses listed on the initial degree plan can be changed at the student's request. Please contact your Academic Finance Advisor for more information.

The Admissions and Evaluation team will schedule any additional courses needed to satisfy entry track requirements.

- SKS-5001 for students without a business degree

- MBA-5102 - Changing Times - Business in the 21st Century
- SKS-5001 - Comprehensive Strategic Knowledge Studies * Entry Track Students
- MBA-5110 - Managing People and Teams
- FIN-6890 - Financial Management
- MBA-5150 - Innovation and Marketing
- MGT-6030 - Business Operations Management
- MGT-6080 - Info & Supply Chain Systems
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- MBA-6010 - Strategic Planning

Entrepreneurship Specialization

According to the Kaufmann Foundation, 2015 had the greatest number of start-ups in the last 20 years. The Entrepreneurship MBA at NU takes you beyond the classroom as you build and test your entrepreneurial ideas in real-world scenarios. In our Online MBA Entrepreneurship specialization you will explore various business disciplines, including marketing, finance, operations and strategy, as you develop skills in building businesses, investing in businesses, raising capital and evaluating business opportunities. Entrepreneurship courses emphasize analysis, decision-making and business planning of a real new venture product or service. As a graduate, you can expect to have a solid business plan that is ready to be presented to investors, banks or private entities.

Specialization Course - 9 credit hours

- ENT-5100 - Foundations of Entrepreneurship
- ENT-5115 - New Venture Resource Development and Analysis
- ENT-5125 - Business Plan Creation

Financial Management Specialization

The Financial Management specialization works best for those seeking leadership and analysis positions in the growing, global field of financial management. With coursework applicable to domestic and international businesses, nonprofits, and governmental organizations, your studies will focus on growth and diversification policies, portfolio management, investment banking, merger strategies, exchange rate movement and risk, and case or research projects that analyze contemporary financial issues.

Specialization Courses - 9 credit hours

- FIN-6100 - Topics in Financial Management
- FIN-6310 - Security Analysis & Portfolio
- FIN-6350 - International Finance

General Business Specialization

The General Business specialization allows students to select courses from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 9 credit hours and may take business courses to fulfill their specialization requirements.

Specialization Courses - 9 credit hours

- FIN-6100 - Topics in Financial Management
- HRM-6370 - Workforce Plan, Dev & Outsource
- GBM-5002 - Global Business Strategic Management

Global Business Management Specialization

Modern business activities have an increasingly global reach. From supply chains to expanding consumer and B2B markets, successful companies and professionals must thoroughly understand international business environments to grow and thrive. With the International Business specialization, you'll explore cultural, economic, and legal issues, as well as international exporting, licensing, franchising, foreign direct investment, outsourcing, risk analysis, and human capital development. You'll also be able to travel to a foreign location for a full-immersion international experience.

Specialization Courses - 9 credit hour

- GBM-5001 - Global Leadership and Change
- GBM-5002 - Global Business Strategic Management
- IBU-6370 - Comparative International Management

Human Resource Management Specialization

This graduate-level specialization focuses on the interrelationships between human resource capital, leadership, and the business organization. Students will explore all aspects of human resource management, and address the increasing human resource issues in the global economy.

Specialization Courses - 9 credit hours

- HRM-6030 - Legal, Ethical & Safety Issues
- HRM-6370 - Workforce Plan, Dev & Outsource
- HRM-6670 - Compensation & Benefits

Leadership Studies Specialization

The leadership studies specialization prepares professionals to become problem-solving, change-oriented leaders in diverse, dynamic organizations. The instruction, coursework, and experiential exercises are for those desiring to understand and apply the technical and reflective processes that accompany leadership opportunities in the modern workplace — whether business or nonprofit, domestic or international.

Specialization Courses - 9 credit hours

- LED-6020 - Developing Groups and Teams
- LED-6030 - Leadership in the 21st Century
- LED-6050 - Conflict and Power Dynamics

Project Management Specialization

In NU's online MBA Project Management specialization, you will explore principles, concepts, tools and techniques to improve project performance and organizational effectiveness. Under the guidance of mentoring professors, our MBA in Project Management specialization will have you examine all aspects of company projects, including cost estimates, budget management, cost control, risk assessment, bid negotiation and contracts, and performance reporting critical to the success of any organization.

Specialization Courses - 9 credit hours

- PM-6004 - Project Risk Management
- PM-6008 - Project Monitoring and Control
- PM-6020 - Management, Leadership and Team Building in the Project and Program Environment

Strategic Marketing Specialization

The Strategic Marketing Specialization at the graduate level transcends traditional marketing by focusing upon emerging trends in the 21st century in marketing management and marketing research. Students will focus on thought leadership-driven strategic marketing, encompassing contemporary and emergent marketing management methods, global product management, precision pricing, advanced promotional methods, and proven distribution techniques. At the conclusion, students will be well prepared for the marketing workforce of tomorrow.

Specialization Courses - 9 credit hours

- MKT-5021 - Strategic Marketing Management
- MKT-5022 - Advanced Digital Marketing
- MKT-5023 - Global Product Management

Supply Chain Management Specialization

While globalization and outsourcing impact nearly every market and industry, supply chain management skills have become essential for competitive businesses, professionals, and managers. The Supply Chain Management specialization examines the integration of logistical planning, inventory deployment, and transportation networks to achieve the most efficient physical connections between firms. Global corporations, nonprofits, healthcare providers, and government agencies demand the increased performance, timeliness, and cost savings that result from supply chain expertise.

Specialization Courses - 9 credit hours

- SCM-6100 - Supply Chain Collaboration
- SCM-6300 - Supply Chain Planning
- SCM-6400 - Distribution Management

Master of Science in Entrepreneurship, MS

Description of Program

The Master of Science in Entrepreneurship program will help students grow their mindset and the skills, knowledge, and values necessary to confidently launch new ventures, contribute to an existing organization's growth, and identify opportunities for an improved quality of life.

[Click here](#) for potential career opportunities within the MSE.

****The University is not currently enrolling students in this program ****

Learning Outcomes

- Adapt creative strategies for pursuing, exploiting, and further developing new opportunities
- Analyze awareness and growth potential of an opportunity with an entrepreneurial mindset
- Formulate cross functional business domain skills
- Explore the skills necessary to understand and analyze significant complex and dynamic business opportunities
- Evaluate collaboration, communication, and adaptability in helping new ventures excel in a changing business landscape

Basis for Admissions

Admission to the Master of Science in Entrepreneurship (MSE) program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution. In addition to these general requirements, MSE applicants have two options for entering the program:

1. **Direct Entry** - Individuals with a previously completed bachelor's degree in business from a regionally or nationally accredited academic institution may immediately begin the MSE program.
2. **Evaluation Track** - Individuals who do not meet direct entry requirements will begin their degree plan with ENT-5100, followed by SKS-5001 - Comprehensive Strategic Knowledge Studies, and upon successful completion of SKS-5001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two weeks prior to the beginning of SKS-5001 course. This can be discussed with your enrollment or academic and finance advisor.

Degree Requirements

The Master of Science in Entrepreneurship (MSE) requires 30 credit hours for degree completion. Students in the MSE program are required to demonstrate competency in the areas listed below:

- **Research** - MSE students are required to show competency in writing skills for research purposes through their coursework.
- **Computer Competency** - MSE students are required to use appropriate computer skills that are necessary in writing research papers. Students must be able to prepare documents using APA formatting and advanced word processing skills, such as the creation of title pages, abstracts, tables and figures, headers and footers, page breaks, tables of contents, and hanging indents.

Students assume full responsibility for understanding the requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Students' Academic and Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credit hours in transfer toward the MSE for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 20 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 12 months.

Course Sequence

The Master of Science in Entrepreneurship (MSE) program can be completed with a minimum of 30 credit hours, but may require additional credit hours, depending on the entry track requirements. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The Admissions and Evaluation team will schedule any additional courses needed to satisfy entry track requirements.

- ENT-5100 - Foundations of Entrepreneurship
- SKS-5001 - Comprehensive Strategic Knowledge Studies * Entry Track Students
- ENT-5105 - Ideation and Opportunity Identification
- ENT-5110 - Environmental Analysis

- ENT-5125 - Business Plan Creation
- ENT-5130 - Legal Structure and Organization
- ENT-5135 - Entrepreneurial Strategy and Decision Making
- ENT-5140 - Pricing, Marketing, and Expansion

- ENT-5200 - Capstone

Master of Science in Organizational Leadership, MS

Description of Program

The Master of Science in Organizational Leadership (MSOL) program provides students with the knowledge to evaluate personal leadership skills and the components of leadership that contribute to the health of an organization, as well as how to apply leadership best practices in an organization.

[Click here](#) for potential career opportunities within the MSOL.

Learning Outcomes

- Assess the current state of leadership practice within a given profession
- Evaluate the components of leadership that contribute to the health of an organization
- Apply best leadership practices within a given organization
- Evaluate themselves as leaders

Basis for Admissions

Admission to the Master of Science in Organizational Leadership program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution. In addition to these general requirements, MSOL applicants have two options for entering the program:

1. **Direct Entry** - Individuals with a previously completed bachelor's degree in business from a regionally or nationally accredited academic institution may immediately begin the MSOL program.

Note: Students who complete the University's BBA bridge path in Business Leadership may be eligible to apply four graduate-level courses from the BBA program to the MSOL program. Graduate-level courses completed in the BBA bridge path must be completed with a grade point average of 3.0 (grade of "B") or better.

2. **Evaluation Track** - Individuals who do not meet direct entry requirements will begin their degree plan with MSOL-5000 - Leadership Development and Practice, followed by SKS-5001 - Comprehensive Strategic Knowledge Studies, and upon successful completion of SKS-5001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two weeks prior to the beginning of SKS-5001 course. This can be discussed with your enrollment or academic and finance advisor.

Students who enter through the evaluation track and do not immediately test out of SKS-5001 prior to having the course placed in their degree plan are not permitted to participate in the Accelerated MSOL program.

Degree Requirements

The Master of Science in Organizational Leadership is a 30 credit program comprised of 18 core credits, 9 specialization credits and 3 capstone credits. Graduates of the program must complete 30 credit hours. Students may select a discipline-specific specialization of their interest.

Students assume full responsibility for understanding both the foundational, specialization and capstone requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Students' Academic and Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Science in Organizational Leadership for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Note: Students with a conferred BBA degree from the University who complete graduate-level coursework with a grade of "B" or better to satisfy required undergraduate specialization credit hours may be eligible to apply up to 12 graduate-level credit hours from the BBA program to the MSOL program. Please see the Bachelor of Business Administration program for program-specific course requirements.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 22 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 months.

Accelerated MSOL Scheduling Track

Within the MSOL program, the School of Business and Economics offers an Accelerated MSOL scheduling track. The Accelerated MSOL is not an alternative program, but is a scheduling option designed for students capable of completing an intense, fast-paced, and highly challenging graduate course structure. Students considering the Accelerated MSOL track are strongly encouraged to first think about their availability for study-time, work schedule or any other outside activities that may interfere with course participation, and their ability to learn in a rapidly moving academic environment. Students who enter and successfully complete the Accelerated MSOL track will graduate in 12 months with a Masters of Organizational Leadership degree.

- MSOL-5105 - Leadership and Organization Strategy
- MSOL-5106 - Understanding Data
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- MSOL-5110 - Capstone Professional Project

Criminal Justice Specialization

The Criminal Justice specialization explores the dynamic nature of law enforcement, the courts, corrections, and the juvenile justice system in the United States and explores the nature of crime both domestically and internationally. This specialization focuses on developing advanced competencies and analytical capability for those seeking management and leadership positions in corrections, law enforcement, and the court system.

Specialization Courses – 9 credit hours

- CJ-5004 - Organized Crime
- CJ-5007 - Current Issues in Law Enforcement
- CJ-5101 - Introduction to Criminal Justice

Health Services Specialization

Graduates of health services management programs are in demand in hospitals, health maintenance organizations, health insurance companies, government and public health agencies, and social service agencies. The focus of this health services specialization is to develop essential knowledge and skills necessary for effective healthcare management, including legal and ethical issues and the examination of the development of health policies.

Specialization Courses – 9 credit hours

- MHA-5000 - Introduction to Healthcare Management
- MHA-5004 - Health Policy & Analysis
- MHA-5010 - Health Law and Ethics

Human Resources Management Specialization

This graduate-level specialization focuses on the interrelationships between human resource capital, leadership, and the business organization. Students will explore all aspects of human resource management, and address the increasing human resource issues in the global economy.

Specialization Courses – 9 credit hours

- HRM-5005 - Introduction to Global HR
- HRM-5011 - Global Talent Development and Management
- HRM-5013 - Global Cultural Effectiveness

Inclusive Leadership Specialization

This specialization will equip you with the insights, knowledge, and skills to go beyond traditional leadership and will prepare you to be a leader who can empower, energize, and inspire individuals, and unify diverse employees. You will become an agent of change who has the enhanced skills to lead an organization while being a champion and advocate for diversity, equity, inclusion, and social and economic justice. After completing this program, you will be able to make decisions that help to advance a unified and collaborative global workforce that functions effectively and efficiently, optimizing the organization's effectiveness.

Specialization Courses - 9 credit hours

- INL-5000 - Developing Competencies for Global Inclusive Leadership
- INL-5010 - Leveraging Global Diversity for Results
- INL-5020 - Leading the Inclusive Organization: Empathy, Equity, and Accountability

Management of Virtual Organizations Specialization

This specialization focuses on acquiring knowledge and skills to support the management of virtual organizations. Students focus on a wide range of topics relevant to the manager overseeing virtual organizations. From theory to tactics, experienced professionals and entry-level candidates will build expertise in such diverse areas as virtual leadership, building trust in virtual teams, and legal and other implications that may arise in virtual organizations.

Specialization Courses – 9 credit hours

- MVO-5001 - Virtual Leadership & Team Management
- MVO-5002 - Building Virtual Teams & Trust
- MVO-5003 - Legal & Other Implications in a Virtual Organization

Nonprofit Management Specialization

In this specialization, students learn the fundamental principles of nonprofit management by exploring the roles and responsibilities of the management team and their efforts to maximize fundraising opportunities and maintain healthy budgets. Other areas that are covered include revenue generation, legal foundations, recruitment and management of volunteers, and promotion and marketing. Contemporary topics including diversity and ethics are also examined.

Specialization Courses – 9 credit hours

- MSOL-5801 - The Nonprofit Sector: History, Trends, and Theories
- MSOL-5802 - Nonprofit Strategic Management and Leadership
- MSOL-5803 - Philanthropy and Fundraising in Nonprofits

Project Management Specialization

This specialization explores principles, concepts, tools, and techniques to improve project performance and organizational effectiveness. Project Management is one of the fastest growing professional disciplines. Students examine all aspects of company projects including cost estimates, budget management, cost control, risk assessment, bid negotiation and contracts, and performance reporting critical to the success of any organization. The graduate specialization provides curriculum for students aspiring to take on project management responsibilities. This specialization focuses on risk management, procurement, monitoring, and multi-project management.

Specialization Courses – 9 credit hours

- PM-6000 - Project Procurement Management
- PM-6004 - Project Risk Management
- PM-6020 - Management, Leadership and Team Building in the Project and Program Environment

Master of Global Human Resources, MGHR

Description of Program

The Master in Global Human Resources (MGHR) is a 30-hour program designed to provide students with a comprehensive education in strategic HR management on a global scale. The program takes an integrated approach and focuses on key areas such as managing a diverse workforce, cross-cultural communication, compensation, compliance, global talent acquisition, employee relations, and global talent development and management. Students will gain hands-on experience and develop leadership and global business skills to support HR functions while mastering HR theory and management. The program follows guidelines set by the Society of Human Resource Management (SHRM) competencies and the Human Resource Certification Institute (HRCI) certification standards.

[Click here](#) for potential career opportunities within the MGHR.

Learning Outcomes

- Apply human resource management concepts in addressing issues and challenges in domestic and global organizations
- Evaluate an organization's human resources capacity
- Analyze the challenges of managing human resource operations in domestic and global organizations
- Create employee compensation, benefits, and classification plans

Basis for Admissions

Admission to the Master of Global Human Resources program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution.

Degree Requirements

The Master of Global Human Resources (MGHR) program requires 30-credit hours for degree completion. The core curriculum is taken by all students regardless of their undergraduate degree to form and strengthen fundamental business skills. Students end the program with a 3 credit-hour capstone course.

Students in the MGHR program are required to demonstrate competency in the areas listed below:

- Research - MGHR students are required to show competency in writing skills for research purposes through their coursework
- Computer Competency - MGHR students are required to use appropriate computer skills that are necessary in writing research papers
 - Students must be able to prepare documents using APA formatting and advanced word processing skills, such as the creation of title pages, abstracts, tables and figures, headers and footers, page breaks, tables of contents, and hanging indents

Students assume full responsibility for understanding both the foundational, specialization, and capstone requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. An Academic and Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Global Human Resources for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 23 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 16 months.

Course Sequence

The Master of Global Human Resources program can be completed in 30 credits.

- HRM-5005 - Introduction to Global HR
- HRM-5006 - Global Talent Acquisition Metrics and Analytics
- HRM-5007 - Global Compensation and Benefits
- HRM-5012 - Global Employee Relations
- HRM-5013 - Global Cultural Effectiveness
- HRM-5014 - Managing a Global & Diverse Workforce
- HRM-5011 - Global Talent Development and Management
- GBM-5001 - Global Leadership and Change
- GBM-5002 - Global Business Strategic Management
- HRM-5020 - Capstone

Post-Master's Certificate in Business

Description of Program

In order to earn a Post-Master's Certificate, students must complete six courses (18 credit hours) within the chosen Post-Master's Certificate program. With the exception of the General Business program, each Post-Master's Certificate program is prescribed,

meaning students can only take what is listed for the particular Post-Master's Certificate program (students may not substitute alternative courses with the exception of the School of Business and Economics doctoral level elective course). Students must complete all six courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

[Click here](#) for potential career opportunities within the Post-Master's Certificates in Business.

Basis for Admissions

Admission to the Post-Master's Certificate program requires a completed master's level or higher degree from a regionally or nationally accredited institution or university.

Scope

6 Courses (18 Credit hours) must be completed from the coursework outlined within the corresponding Post-Master's Certificate specialization. Courses taken as part of a University master's program cannot be applied towards a Post-Master's Certificate program.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to the University's Post-Master's certificate program. Coursework must have been completed at an accredited college or university within the last seven years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Master's Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 14 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 10 months.

Post-Master's Certificate Transfer into a Doctoral Sequence

Specialization coursework completed as part of a doctoral degree, where a degree was conferred, cannot be applied towards a Post-Master's Certificate program.

- Coursework completed within a Post-Master's Certificate program may be applied towards the specialization sequence within a doctoral program.

- Applying Post-Master's Certificate coursework towards a doctoral degree is contingent upon coursework and degree relevance under the most current doctoral degree program version.

Advanced Accounting

This Post-Master's Certificate prepares students for careers in auditing, corporate accounting, and accounting positions in business, government, and nonprofit organizations. Students will develop knowledge to pursue advanced positions in management, such as chief financial officer or controller, going beyond preparation of financial statements to calculate and analyze strategic business decisions.

Required Courses - 18 credit hours

- ACC-7000 - Advanced Managerial Accounting
- ACC-7010 - Advanced Accounting and Fraud Examination Techniques
- ACC-7015 - Advanced Forensic Accounting Theory and Practice
- ACC-7030 - Advanced Auditing Methods and Practice
- ACC-7035 - Advanced Accounting Theory and Policy
- School of Business and Economics Doctoral Level Elective

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

Financial Management

This Post-Master's Certificate specialization explores the analysis of relevant financial and non-financial organizations. Topics covered include investment management, management of financial institutions, assessment of financial statements, and international financial issues. Administrators, managers and accountants who want to develop financial management skills will benefit from this Post-Master's Certificate.

Required Courses – 18 credit hours

- FIN-7012 - Corporate Finance
- FIN-7013 - Investment Portfolio Analysis
- FIN-7014 - Managing Financial Institutions
- FIN-7015 - Advanced Financial Statement Analysis
- FIN-7018 - Accounting and Control for Nonprofit Organizations
- School of Business and Economics Doctoral Level Elective

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

General Business

The General Business Post-Master's Certificate program allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 18 credit hours for the Post-Master's Certificate in General Business.

Students must take at least four doctoral level business content courses and may take up to two courses from a Post-Master's Certificate offered in other fields to fulfill their General Business certificate requirements.

Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Recommended Certificate Courses - 18 credit hours

- FIN-7012 - Corporate Finance
- HRM-7004 - Supervising in the 21st Century
- GBM-7001 - Global Business Environment
- GBM-7003 - Global Business Management
- GBM-7005 - Advanced Topics in Global Organizational Behavior
- School of Business and Economics Doctoral Level Elective

Note

Courses listed are examples and upon acceptance to the program, the initial degree plan will include these courses. Students are encouraged to choose their General Business certificate courses based on personal and professional goals and to work with their Academic and Finance Advisor to revise their degree plan.

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

Project Management

Administrative and management professionals who want to become proficient in project management will benefit from this specialization. This specialization focuses on applying principles, concepts, tools, and techniques to improve project performance and organizational effectiveness. Curriculum provides training in planning, project control, effectively working with teams to improve performance, providing leadership, and delivering projects on time and on budget.

Required Courses – 18 credit hours

- PM-7000 - Project Procurement Management
- PM-7004 - Project Risk Management
- PM-7008 - Project Monitoring and Control
- PM-7012 - Multiple Project Management
- PM-7016 - Managerial Budgets and Project Management
 - School of Business and Economics Doctoral Level Elective

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

Doctor of Business Administration, DBA

Description of Program

The Doctor of Business Administration (DBA) program is designed for current and potential business leaders and senior managers, in the private and public sectors to enhance their knowledge and competencies appropriate to a leadership role in business administration. The Doctor of Business Administration (DBA) program is a research-based degree, but unlike the PhD, the DBA program is intended to engage the student in the application of theoretical knowledge to the advancement of practice in the field (solving complex problems) (Archibald, 2010; Corley & Giola 2011; Huba, Shubb & Shelley, 2006).

The outcome of the research is designed to provide valuable insights to an organization. Examples of an applied investigation may include a replication study, a case study, or a special project (such as, for example, the creation of a curriculum, training program, or educational artifact), followed by an evaluation. A doctoral project for a professional degree does not have to be an original contribution to the body of knowledge that impacts the theories in the field, but typically responds to a practical problem or proposed innovation (Archibald, 2010).

The DBA is increasingly recognized by international business and management schools as the most appropriate post-MBA (or equivalent master's degree) route to combining academic research with management and business.

[Click here](#) for potential career opportunities within the DBA.

Learning Outcomes

- Develop business methods and concepts based on practical application of current theories
- Defend theories, applications, and perspectives related to business to diverse audiences
- Construct socially responsible and ethical business strategies
- Evaluate the relationship between the global environment and business decisions
- Formulate solutions to practical business problems based on original research

Basis for Admissions

Admission to the Doctor of Business Administration program will be determined by the degree used to meet the basis for admission. In order to enter the doctoral program, applicants are required to have a conferred master's degree from a nationally or regionally accredited academic institution. There are two options for entering the doctoral program in the School of Business and Economics.

1. **Direct Entry** – Individuals may immediately begin the doctoral program through the DBA or PhD track with a previously completed master's degree in one of the following:
 - A generalized business area such as business management or business administration
 - Specialized business area (e.g. Master of Finance, Master of Human Resources Management) **AND** an undergraduate degree in business

OR

- A previously completed master's degree in any field **AND** an undergraduate in business
2. **Evaluation Track** – Individuals not meeting the direct entry requirements are required to take SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies as part of their degree plan.

Students in the Evaluation track will begin their degree plan with BUS-7102 - Applied Doctoral Studies in Business followed by SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies and upon successful completion of SKS 7001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two weeks prior to the beginning of SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies course. This can be discussed with your enrollment or Academic and Finance Advisor.

Degree Requirements

Admission to the Doctorate programs requires a master's degree from an accredited institution (also see Direct Entry and Evaluation Track Requirements).

The University may accept up to 12 semester credit hours in transfer with a maximum of 9 semester credit hours in transfer eligible toward the specialization courses in the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The DBA degree programs in business have the following graduation requirements:

- A minimum of 36 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the DBA Pre-Candidacy Prospectus
- University Approval of Dissertation Manuscript and Oral Presentation completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;

- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Fundamental Competencies

Students in the DBA program are required to demonstrate competency in the areas listed below:

- **Graduate-Level Research Methods Competency-** DBA students are required to complete BUS-7100 and BUS-7320, BUS-7380
- **Graduate-Level Statistics Competency-** DBA students are required to complete BUS-7105
- **Computer Competency** - Doctoral students are required to have computer skills necessary for completing a dissertation
 - Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents)
 - Students must use computer programs for the statistical analysis of data (e.g., SAS)
 - Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 64 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 34 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The DBA program may be completed in 48 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Courses taken to satisfy the fundamental requirements may not be counted toward completion of required specializations courses.

Students who complete at least 12 credit hours in a single area of specialization at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma. Students may also opt for a General Business specialization, electing 12 credit hours of cross-discipline courses. Courses must be appropriate to the student's degree program.

All DBA specializations require the following courses:

Required Foundational Courses must be taken first and in sequence. Evaluation track students will take SKS 7001 after BUS-7102 and before BUS-7112.

- BUS-7102 - Applied Doctoral Studies in Business
- SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies - Eval Track Students
- BUS-7112 - Business Strategy and Innovation
- MGT-7019 - Ethics in Business
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- BUS-7100 - Scholarly Literature Review
- BUS-7105 - Statistics I
- BUS-7320 - Quantitative Research Design & Methodology
- BUS-7380 - Qualitative Research Design and Methodology
- CMP-9601B - Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Advanced Accounting Specialization

This specialization is designed to provide students with practical application of a broad accounting perspective and technical accounting knowledge, enabling the exploration of relationships among business activities, economic outcomes, and business

performance. Students will be able to meet the demand for analyzing advanced management and organization of business transactions and statements related to the assets, liabilities, and operating results of a business.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- ACC-7000 - Advanced Managerial Accounting
- ACC-7010 - Advanced Accounting and Fraud Examination Techniques
- ACC-7015 - Advanced Forensic Accounting Theory and Practice
- ACC-7030 - Advanced Auditing Methods and Practice
- ACC-7035 - Advanced Accounting Theory and Policy

Financial Management Specialization

This specialization concentrates on research and development analyses used to manage and allocate financial resources and develop effective strategic planning for projection and ROI issues. Students will analyze financial and non-financial organizations - private, public, and corporate. The specialization focuses on international financial issues, quality concepts in financial management, and accounting for profit/nonprofit organizations.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- FIN-7012 - Corporate Finance
- FIN-7013 - Investment Portfolio Analysis
- FIN-7014 - Managing Financial Institutions
- FIN-7015 - Advanced Financial Statement Analysis
- FIN-7018 - Accounting and Control for Nonprofit Organizations

General Business Specialization

The General Business specialization allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 12 credit hours for the specialization in General Business. Students may take business courses at the 7000 or 8000 level including up to two courses from other fields (Psychology, Technology and/or Education) to fulfill their specialization requirements. Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Recommended Specialization Courses - 12 credit hours

Select 4 courses from the following list:

- FIN-7012 - Corporate Finance
- HRM-7004 - Supervising in the 21st Century
- GBM-7001 - Global Business Environment
- GBM-7002 - Global Strategic Leadership
- GBM-7003 - Global Business Management

Note

Courses listed are examples and upon acceptance to the program, the initial degree plan will include these courses. Students are encouraged to choose their specialization courses based on personal and professional goals and to work with their Academic Advisor to revise their degree plan.

Global Business Management Specialization

This specialization covers the essential elements required to understand and manage global organizations. Individuals interested in global management positions in industry, higher education, government and public entities, and business consulting would benefit from this program. The specialization provides students with comprehensive education and training in interdisciplinary global management subjects of leadership, government, diplomacy, economics, finance, marketing, and organizational effectiveness. Students study global business theory, decision-making, and problem-solving techniques related to global strategic planning.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- GBM-7001 - Global Business Environment
- GBM-7002 - Global Strategic Leadership
- GBM-7003 - Global Business Management
- GBM-7004 - Global Marketing Management
- GBM-7005 - Advanced Topics in Global Organizational Behavior

Health Services Specialization

This specialization develops essential perspectives and skills for health service industry management issues. The specialization prepares students for problem identification and resolution, analysis and intervention as administrative issues, and recognition of the constraints and limitations to intervention and change in delivery systems. Students in this specialization will focus on the foundations of health services management, including an overview of the United States healthcare delivery system, financial management and economics, human resource management, quality management, and law, ethics, and policy.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- DHA-7000 - The United States Healthcare Delivery System
- DHA-7001 - Healthcare Financial Management and Economics
- DHA-7003 - Human Resource Management for Healthcare Administrators
- DHA-7005 - Healthcare Quality Management
- DHA-7006 - Health Law, Ethics, and Policy

Homeland Security: Leadership and Policy Specialization

This specialization prepares senior leaders of public administration, law enforcement, public safety, and emergency medical care and disaster preparedness agencies for executive leadership positions in the field of homeland security. Students are provided with a rigorous educational opportunity to research and explore advanced concepts and methods, and apply theory and emerging concepts to real world issues through innovative approaches to complex problems. Students choose from a number of courses that cover terrorism, strategy, intelligence, emergency management, and critical infrastructure security issues. Students will complete a final written research project demonstrating the ability to conduct an investigation on a workplace problem, identify an area for intervention, critique, justify, and recommend a plan of preventative action.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- HS-7000 - Homeland Security and Terrorism
- HS-7004 - Local Emergency Management and Civil Preparedness
- HS-7010 - Transportation Security

- HS-7013 - Intelligence and Law Enforcement
- HS-7014 - Strategy, Resiliency, and Coping with Fear

Human Resources Management Specialization

This specialization explores the interrelationships between human resource capital, leadership, and business organization. Students research theory and practice for HRM information systems, compensation and staffing strategies, training and professional development, cultural diversity, innovation, labor relations, and legal issues in HRM.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- HRM-7000 - Human Resources Management in the 21st Century
- HRM-7002 - Compensation and Benefits
- HRM-7003 - Labor Relations
- HRM-7004 - Supervising in the 21st Century
- HRM-7007 - Cultural Issues
- HRM-7008 - Legal Issues in Human Resources Management

Industrial/Organizational Psychology Specialization

(Interdisciplinary)

This specialization explores the practical application of industrial and organizational psychology to the understanding of people in the world of work. In this interdisciplinary specialization, students in the DBA program also complete courses in the JFK School of Psychology and Social Sciences in order to develop competencies in theory, research, and applications of psychology related to human behavior in organizations. Students conduct basic and applied research related to the applications of organizational and psychological theory to human resource management. Students will complete a final written research project (through business), demonstrating the ability to conduct an investigation on a workplace problem, identify an area for intervention, critique, justify, and recommend a plan of preventative action.

Specialization Courses - 12 credit hours

- IOP-8400 - Industrial/Organizational Psychology
- IOP-8404 - Consulting in Business, Education, and Health
- MGT-7006 - Advanced Topics in Organizational Behavior
- MGT-7022 - Advanced Topics in Organizational Development

Information Technology Specialization

Technology can be intimidating—yet beneficial—for many organizations. It is important for leaders to know how to take advantage of new technologies and ideas or be trapped in stagnation. The Information Technology Specialization helps prepare professionals to be champions of positive change through new ideas and new technologies.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- TIM-7001 - Principles of Technology Innovation Management
- TIM-7010 - Computer Networks & Mobile Computing
- TIM-7020 - Databases & Business Intelligence
- TIM-8301 - Principles of Cybersecurity

- TIM-7040 - Technology Policy & Strategy

Organizational Leadership Specialization

This specialization serves to enhance the understanding and practice of organizational leadership using an interdisciplinary approach between business and education theory and research. This specialization has broad appeal among practicing professionals (middle and upper management, and military personnel) with a background in business administration, human resources, nonprofit administration, and related fields, whose professional goal may be organizational consulting or a generalist leadership position in corporate, government, not-for-profit, educational or community organizations.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- OLB-7001 - Conflict Resolution and Mediation
- OLB-7002 - Building Organizational Capacity
- OLB-7004 - Theory and Practice of Organizational Leadership
- OLB-7005 - Ethical Leadership
- OLB-7006 - Communicating Change

Project Management Specialization

This specialization explores principles, concepts, tools, and techniques to improve project performance and organizational effectiveness. Students examine all aspects of managing and overseeing business projects, including cost estimates, budget management, cost control, risk assessment, bid negotiation and contracts, and performance reporting critical to the success of any enterprise. The specialization focuses on management, leadership, and team building in the project/program environment. Students will examine strategies relating to managing multiple projects as well as the concepts of earned value project management.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- PM-7000 - Project Procurement Management
- PM-7004 - Project Risk Management
- PM-7008 - Project Monitoring and Control
- PM-7012 - Multiple Project Management
- PM-7016 - Managerial Budgets and Project Management

Strategic Marketing Specialization

The Strategic Marketing Specialization at the doctoral level delivers a next-generation approach to strategic marketing, transcending traditional marketing management, and research methodology. This tertiary level specialization delivers benchmark training in the three pillars of global change leadership, marketing science, and innovation in marketing economics. Following the execution of strategic coursework, students will focus on real-world global product strategy, advanced digital marketing across the entire scope of the product life cycle. The specialization provides strategies for a sound, systematic, ethical, and legal approach to contemporary and emergent marketing practices. At the conclusion, students will be well prepared to lead the marketing workforce of tomorrow.

Specialization Courses – 12 credit hours

Select 4 courses from the following list:

- MKT-7021 - Marketing Change Leadership

- MKT-7022 - Marketing Economics Innovation
- MKT-7023 - Marketing Science
- MKT-7024 - Strategic Marketing Communication
- MKT-7025 - Global Product Strategy

Doctor of Philosophy in Business Administration, PhD

Description of Program

The Doctor of Philosophy in Business (PhD-BA) program is a research-based program designed to prepare leaders for positions in the private and public sectors by enhancing knowledge and competencies appropriate to a leadership role in business, administration, and technology management. Upon completion of the PhD program, students are expected to have a broad knowledge in fields of business and technology management and an understanding of at least one specialized area of study. A Ph.D. requires *original ideas* about a specialized topic, as well as a high degree of *methodological/scientific rigor* (Nelson, & Coorough, 1994). As is traditional in higher education, a Ph.D. is only awarded for a piece of work that will actually make a difference to the theoretical context of the field *the Ph.D. dissertation is a new contribution to the body of knowledge.*

[Click here](#) for potential career opportunities within the PhD-BA.

Learning Outcomes

- Develop business knowledge based on a synthesis of current theory
- Defend theories, applications, and perspectives related to business to diverse audiences
- Evaluate business practices that positively impact society
- Evaluate the relationship between the global environment and business decisions
- Formulate solutions to problems identified in extant business research

Basis for Admissions

Admission to the Doctor of Philosophy in Business Administration program will be determined by the degree used to meet the basis for admission. In order to enter the doctoral program, applicants are required to have a conferred master's degree from a regionally or nationally accredited academic institution. There are two options for entering the doctoral program in the School of Business and Economics.

1. **Direct Entry** – Individuals may immediately begin the doctoral program through the DBA or PhD track with a previously completed master's degree in one of the following:
 - A generalized business area such as business management or business administration,
 - Specialized business area (e.g. Master of Finance, Master of Human Resources Management) **AND** an undergraduate degree in business

OR

 - A previously completed master's degree in any field **AND** an undergraduate in business.
2. **Evaluation Track** – Individuals not meeting the direct entry requirements are required to take SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies as part of their degree plan.

Students in the Evaluation track will begin their degree plan with BUS-7101 - Changing Times: Business Administration in the 21st Century followed by SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies and upon successful completion of SKS 7001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two

weeks prior to the beginning of SKS 7001 Comprehensive Strategic Knowledge Studies course. This can be discussed with your enrollment or academic and finance advisor.

Degree Requirements

Admission to the Doctorate programs requires a master's degree from an accredited institution.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD degree programs in business have the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the PhD-BA Pre-Candidacy Prospectus
- University Approval of Dissertation Manuscript and Oral Defense completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Fundamental Competencies

All PhD students are required to demonstrate competency in these areas:

- **Graduate-Level Research Methods Competency** - PhD students are required to complete BUS-7100, BUS 7320, and BUS-7380
- **Graduate-Level Statistics Competency** - PhD students are required to complete BUS-7105 and BUS-7106
- **Computer Competency** - Doctoral students are required to have computer skills necessary for completing a dissertation
 - Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents)
 - Students must use computer programs for the statistical analysis of data (e.g., SAS)
 - Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 73 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 40 months.

Dissertation Process

Faculty assist each Doctoral candidate to reach this academic goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program requires a minimum of 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Courses taken to satisfy the fundamental requirements may not be counted toward completion of required specializations courses or electives.

Students who complete at least 15 credit hours in a single area of specialization at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma. Students may also opt for a General Business specialization, electing 15 credit hours of cross-discipline courses. Elective courses must be appropriate to the student's degree program.

The PhD in Business requires a minimum of five core courses, five specialization courses, two statistical courses, five research courses, and one doctoral elective course. Upon completion of these course requirements, students advance to the doctoral sequence of courses. A minimum of four dissertation research courses must be completed in order to complete the program.

Required Foundational Courses must be taken first and in sequence. Evaluation track students will take SKS 7001 after BUS-7101 and before BUS-7110. Following the completion of Foundational, Specialization, Research, and Doctoral Elective courses must be taken in sequence as described.

- BUS-7101 - Changing Times: Business Administration in the 21st Century
- SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies -Required Course for Entry Track Students
- BUS-7110 - The Business Environment
- BUS-7120 - Business Financial Systems
- BUS-7130 - Business Leadership & Strategy
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5
- Doctoral Level Elective

- BUS-7100 - Scholarly Literature Review
- BUS-7105 - Statistics I
- BUS-7106 - Statistics II
- BUS-7320 - Quantitative Research Design & Methodology
- BUS-7380 - Qualitative Research Design and Methodology
- CMP-9701B - Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Advanced Accounting Specialization

This specialization provides students with application of a broad accounting perspective and research based accounting knowledge, enabling the exploration of relationships among business activities, economic outcomes, business performance, and forensic analysis. Students will be able to meet the demand for advanced analysis of management and organization of business transactions and statements related to the assets, liabilities, and operating results of business enterprises, nonprofit organizations, and higher education instruction.

Specialization Courses – 15 credit hours

- ACC-7000 - Advanced Managerial Accounting
- ACC-7010 - Advanced Accounting and Fraud Examination Techniques
- ACC-7015 - Advanced Forensic Accounting Theory and Practice
- ACC-7030 - Advanced Auditing Methods and Practice
- ACC-7035 - Advanced Accounting Theory and Policy

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Financial Management Specialization

This specialization concentrates on research and development analyses used to manage and allocate financial resources and develop effective strategic planning for projection and ROI issues. Students will analyze financial and non-financial organizations - private, public, and corporate. The specialization focuses on international financial issues, quality concepts in financial management, and accounting for profit/nonprofit organizations.

Specialization Courses – 15 credit hours

- FIN-7012 - Corporate Finance
- FIN-7013 - Investment Portfolio Analysis
- FIN-7014 - Managing Financial Institutions
- FIN-7015 - Advanced Financial Statement Analysis
- FIN-7018 - Accounting and Control for Nonprofit Organizations

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Global Business Management Specialization

This specialization covers the essential elements required to understand and manage global organizations. Individuals interested in global management positions in industry, higher education, government and public entities, and business consulting would benefit from this program. The specialization provides students with comprehensive education and training in interdisciplinary

global management subjects of leadership, government, diplomacy, economics, finance, marketing, and organizational effectiveness. Students study global business theory, decision-making, and problem-solving techniques related to global strategic planning.

Specialization Courses – 15 credit hours

- GBM-7001 - Global Business Environment
- GBM-7002 - Global Strategic Leadership
- GBM-7003 - Global Business Management
- GBM-7004 - Global Marketing Management
- GBM-7005 - Advanced Topics in Global Organizational Behavior

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Health Services Specialization

This specialization develops essential perspectives and skills for health service industry management issues. The specialization prepares students for problem identification and resolution, analysis and intervention as administrative issues, and recognition of the constraints and limitations to intervention and change in delivery systems. Students in this specialization will focus on the foundations of health services management, including an overview of the United States healthcare delivery system, financial management and economics, human resource management, quality management, and law, ethics, and policy.

Specialization Courses – 15 credit hours

- DHA-7000 - The United States Healthcare Delivery System
- DHA-7001 - Healthcare Financial Management and Economics
- DHA-7003 - Human Resource Management for Healthcare Administrators
- DHA-7005 - Healthcare Quality Management
- DHA-7006 - Health Law, Ethics, and Policy

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Homeland Security: Leadership & Policy (HS) Specialization

This specialization prepares senior leaders of public administration, law enforcement, public safety, and emergency medical care and disaster preparedness agencies for executive leadership positions in the field of homeland security. This specialization focuses on rigorous research exploring advanced concepts and methods, and applying theory and emerging concepts through innovative approaches to complex problems. Students may choose from a variety of courses in terrorism, strategy, intelligence, emergency management, and critical infrastructure security issues.

Specialization Courses – 15 credit hours

- HS-7000 - Homeland Security and Terrorism
- HS-7004 - Local Emergency Management and Civil Preparedness
- HS-7010 - Transportation Security
- HS-7013 - Intelligence and Law Enforcement
- HS-7014 - Strategy, Resiliency, and Coping with Fear

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Industrial/Organizational Psychology Specialization

(Interdisciplinary)

This specialization explores the application of industrial and organizational psychology and management theory to the understanding of people in work environment. In this interdisciplinary specialization, students complete courses in the School of Business and Economics and the JFK School of Psychology and Social Sciences in order to develop competencies in theory, research, and applications of psychology related to human behavior in organizations. Students conduct advanced research related to the application of organizational and psychological theory to human resource management.

Specialization Courses – 15 credit hours

- IOP-8400 - Industrial/Organizational Psychology
- IOP-8404 - Consulting in Business, Education, and Health
- MGT-7006 - Advanced Topics in Organizational Behavior
- MGT-7022 - Advanced Topics in Organizational Development
- MGT-7110 - Leadership in Organizations

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Information Technology Specialization

Technology can be intimidating—yet beneficial—for many organizations. It is important for leaders to know how to take advantage of new technologies and ideas or be trapped in stagnation. The Information Technology Specialization helps prepare professionals to be champions of positive change through new ideas and new technologies.

Specialization Courses – 15 credit hours

- TIM-7001 - Principles of Technology Innovation Management
- TIM-7010 - Computer Networks & Mobile Computing
- TIM-7020 - Databases & Business Intelligence
- TIM-8301 - Principles of Cybersecurity
- TIM-7040 - Technology Policy & Strategy

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Organizational Leadership Specialization

This specialization serves to enhance the understanding and practice of organizational leadership using an interdisciplinary approach between business and education theory and research. This specialization has broad appeal among practicing professionals (middle and upper management, and military personnel) with a background in business administration, human resources, nonprofit administration, and related fields, whose professional goal may be organizational consulting or a generalist leadership position in corporate, government, not-for-profit, educational or community organizations.

Specialization Courses – 15 credit hours

- OLB-7001 - Conflict Resolution and Mediation
- OLB-7002 - Building Organizational Capacity
- OLB-7004 - Theory and Practice of Organizational Leadership
- OLB-7005 - Ethical Leadership
- OLB-7006 - Communicating Change

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Project Management Specialization

This specialization explores principles, concepts, tools, and techniques to improve project performance and organizational effectiveness. Students examine all aspects of managing and overseeing business projects, including cost estimates, budget management, cost control, risk assessment, bid negotiation and contracts, and performance reporting critical to the success of any enterprise. The specialization focuses on management, leadership, and team building in the project/program environment. Students will examine strategies relating to managing multiple projects as well as the concepts of earned value project management.

Specialization Courses – 15 credit hours

- PM-7000 - Project Procurement Management
- PM-7004 - Project Risk Management
- PM-7008 - Project Monitoring and Control
- PM-7012 - Multiple Project Management
- PM-7016 - Managerial Budgets and Project Management

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Strategic Marketing Specialization

The Strategic Marketing Specialization at the doctoral level delivers a next-generation approach to strategic marketing, transcending traditional marketing management, and research methodology. This tertiary level specialization delivers benchmark training in the three pillars of global change leadership, marketing science, and innovation in marketing economics. Following the execution of strategic coursework, students will focus on real-world global product strategy, advanced digital marketing across the entire scope of the product life cycle. The specialization provides strategies for a sound, systematic, ethical, and legal approach to contemporary and emergent marketing practices. At the conclusion, students will be well prepared to lead the marketing workforce of tomorrow.

Specialization Courses – 15 credit hours

- MKT-7021 - Marketing Change Leadership
- MKT-7022 - Marketing Economics Innovation
- MKT-7023 - Marketing Science
- MKT-7024 - Strategic Marketing Communication
- MKT-7025 - Global Product Strategy

Note

Elective selected on the initial degree plan can be changed with a request to an Academic and Finance Advisor.

Doctor of Philosophy in Organizational Leadership, PhD

Description of Program

The Doctor of Philosophy in Organizational Leadership (PhD-OL) program is a research-based program designed to prepare leaders for positions in the private and public sectors by enhancing knowledge and competencies appropriate to a wide variety of leadership roles. A Ph.D. requires original ideas about a specialized topic, as well as a high degree of methodological/scientific rigor (Nelson, & Coorough, 1994). As is traditional in higher education, a Ph.D. is only awarded for a piece of work that will actually make a difference to the theoretical context of the field -- the Ph.D. dissertation is a new contribution to the body of knowledge.

[Click here](#) for potential career opportunities within the PhD-OL.

Learning Outcomes

The program learning outcomes of the Doctor of Philosophy in Organizational Leadership degree are:

- Evaluate theories of organizational leadership for their academic and practical value
- Assess an organization's potential for positive change
- Formulate strategies to solve contemporary organizational issues
- Contribute to the body of knowledge in the field of organizational leadership

Basis for Admissions

Admission to the Doctor of Philosophy in Organizational Leadership program will be determined by the degree used to meet the basis for admission. In order to enter the doctoral program, applicants are required to have a conferred master's degree from a regionally or nationally accredited academic institution. There are two options for entering the doctoral program in the School of Business and Economics.

1. **Direct Entry** – Individuals may immediately begin the doctoral program with a previously completed master's degree in one of the following:
 - A generalized business area such as business management or business administration,
 - Specialized business area (e.g. Master of Finance, Master of Human Resources Management) **AND** an undergraduate degree in business**OR**
 - A previously completed master's degree in any field **AND** an undergraduate in business.
2. **Evaluation Track** – Individuals not meeting the direct entry requirements are required to take SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies as part of their degree plan.

Students in the Evaluation track will begin their degree plan with BTM-7101 - Doctoral Studies in Business followed by SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies and upon successful completion of SKS-7001 take the remaining courses in their degree plan.

Students who feel that they have the business background and knowledge are allowed to take a test-out exam that covers the major business areas. The student must score 70 or above on the exam and can be taken no later than two weeks prior to the beginning of SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies course. This can be discussed with your enrollment or academic and finance advisor.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD-OL degree programs have the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the PhD-OL Pre-Candidacy Prospectus
- University Approval of Dissertation Manuscript and Oral Defense completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal

- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Fundamental Competencies

All PhD-OL students are required to demonstrate competency in these areas:

Graduate-Level Research Methods Competency – PhD-OL students are required to complete BUS-7100, BUS-7320, and BUS-7380 at the University

Graduate-Level Statistics Competency – PhD-OL students are required to complete the following two Statistics courses at the University: BUS-7105 and BUS-7106

Computer Competency - Doctoral students are required to have computer skills necessary for completing a dissertation

- Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents)
- Students must use computer programs for the statistical analysis of data (e.g., SAS)
- Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination.

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 40 months.

Dissertation Process

Faculty assist each Doctoral candidate to reach this academic goal through a systematic process leading to a high-quality completed dissertation. A PhD-OL dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD-OL program may be completed in 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The PhD-OL is a 60-credit program comprised of 21 Foundations credits, 15 Research credits, 9 Elective credits, 3 Pre-Candidacy Prospectus credits, and 12 Dissertation credits.

Required Foundational Courses must be taken first and in sequence.

- BTM-7101 - Doctoral Studies in Business
- SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies - Required Course for Entry Track Students
- OLB-7002 - Building Organizational Capacity
- OLB-7004 - Theory and Practice of Organizational Leadership
- OLB-7005 - Ethical Leadership
- OLB-7006 - Communicating Change
- OLB-7007 - Leader as Coach/Consultant
- OLB-7008 - Executive Leadership
- Elective Course 1
- Elective Course 2
- Elective Course 3
- BUS-7100 - Scholarly Literature Review
- BUS-7105 - Statistics I
- BUS-7106 - Statistics II
- BUS-7320 - Quantitative Research Design & Methodology
- BUS-7380 - Qualitative Research Design and Methodology
- CMP-9701L - Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Electives:

The PHD-OL allows students to select courses from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 9 credit hours at the 7000 or 8000 level for the elective requirements. Students may choose from courses across the University.

Doctor of Philosophy in Human Resource Management, PhD

Description of Program

The Doctor of Philosophy in Human Resource Management (PhD-HRM) is a research-based 60-hour program designed to prepare leaders for positions in the private and public sectors of human resource management. Areas such as multiple generations in the workplace, discrimination, equal employment opportunity, employment law, compensation and benefits, labor relations, recruitment, staff retention, and professional development will be studied at a scholarly level. Students will dive into research on the various topics and apply to current day issues in Human Resources.

[Click here](#) for potential career opportunities within the PhD-HRM.

Learning Outcomes

- Evaluate human resource theories, concepts, and scholarly research
- Recommend best practices in hiring, retaining, supporting, and motivating employees
- Determine the impact of employment laws in domestic and multinational organizations
- Contribute to the body of theory and practice in human resource management

Basis for Admissions

Admission to the Doctor of Philosophy in Human Resources Management program requires a conferred master's degree and/or doctoral degree from a regionally or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PHD-HRM degree program in the School of Business and Economics has the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the PHD-HRM Pre-Candidacy Prospectus
- University Approval of Dissertation Manuscript and Oral Defense completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 38 months.

Dissertation Process

Faculty assist each Doctoral candidate to reach this academic goal through a systematic process leading to a high-quality completed dissertation. A PhD-HRM dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

This program can be completed with a minimum of 60 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

School of Technology and Engineering

Master of Science in Information Technology, MS

Description of Program

The Master of Science in Information Technology program is designed for IT professionals wishing to expand their technical skills and knowledge and prepare them for different IT careers. The program includes a series of core courses to provide a solid breadth of field knowledge and four different series of specialization courses aligned with professional credentials and structured to develop applied knowledge for different career goals. Following an applied practical approach, students learn how to administer IT systems and services and incorporate project management methodologies into technical planning, analysis, design, development, implementation, response, and documentation of IT solutions to support and improve enterprise operations.

[Click here](#) for potential career opportunities within the MSIT.

Learning Outcomes

- Demonstrate an applied knowledge of IT industry standards, resources, and techniques.
- Administer IT systems and services to optimize operations.

- Conduct technical analysis, design, response, and documentation to support enterprise operations.
- Incorporate project management methodology into planning, development, and implementation of IT solutions.
- Assess legal, ethical, privacy, and security considerations throughout the information technology life cycle.

Basis for Admissions

School of Technology and Engineering students entering the Master of Science in Information Technology program will require a bachelor's degree from a regionally or nationally accredited academic institution.

Degree Requirements

The Master of Science in Information Technology is a 30 credit program comprised of 15 core credits, 12 specialization credits and 3 capstone credits.

Students assume full responsibility for understanding both the foundational, specialization and capstone requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Students' Academic Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credits in transfer toward the Master of Science in Information Technology for graduate course work completed at an accredited college or university with a grade average of "B" or better. Courses considered for transfer must mirror courses in the program. The Dean of the School of Technology and Engineering must approve any courses considered for transfer. See the [Transfer Credit Policy](#) for additional information.

Grade Point Average of 3.0 (letter grade of "B") or higher

Official documents on file for basis of admission:

- Conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 21 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 16 months.

Course Sequence

The Master of Science in Information Technology program can be completed in 30 credit hours.

Students who complete at least 15 semester credit hours in a single area of specialization at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma.

The Master of Science in Information Technology program requires the foundation courses to be completed prior to enrolling in specialization courses. The program capstone will be completed as the last course in the degree program.

- TIM-5000 - Principles of Information Technology for the IT Professional
- TIM-5025 - Networks, Clouds and Mobile Computing
- TIM-5035 - Cybersecurity, Risk Management and Policy for IT Professionals
- TIM-5040 - Systems and Architectures for IT Professionals
- TIM-5050 - Principles of Project Management
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- TIM-6590 - Strategic Management of IT Systems and Services

Cloud and Networking Infrastructure Management Specialization

The MSIT Cloud and Networking Infrastructure Management Specialization focuses on developing the knowledge and skills needed to model, configure, and administer traditional and cloud network infrastructures, using an applied experiential approach.

Specialization Courses – 12 credit hours

- TIM-6410 - Cloud Computing
- TIM-6445 - Wireless Networking
- TIM-6121 - Distributed Algorithms and Parallel Computing
- TIM-6450 - Advanced Network Administration

General Information Management Specialization

The MSIT General Information Management Specialization focuses on developing the skills and knowledge needed to manage and support technical teams. This specialization provides students with a general overview of systems analysis and design, cybersecurity, data integration, IT asset management.

Specialization Courses – 12 credit hours

- TIM-6430 - Systems Analysis & Design
- TIM-6301 - Principles of Cybersecurity
- TIM-6530 - Big Data Integration
- TIM-6550 - IT Asset Management

Information Technology Project Management Specialization

The MSIT Information Technology Project Management Specialization focuses on developing the skills and knowledge needed to lead or support information technology projects and programs. As part of this specialization, students will explore strategies to control project risk and manage project teams and resources to ensure the delivery of quality technical products and services.

Specialization Courses – 12 credit hours

- TIM-6610 - Leadership in Project Management
- TIM-6630 - Managing Risk in Project Management
- TIM-6210 - Quality Management
- TIM-6640 - Program & Portfolio Management

Network Risk Management and Control Specialization

The MSIT Network Risk Management and Control Specialization focuses on developing the skills and knowledge needed to ensure network integrity, functionality, and security by using assessment tools and procedures to evaluate network health and effectiveness of control structures.

Specialization Courses – 12 credit hours

- TIM-6350 - Network Modeling and Design
- TIM-6360 - Advanced Network Risk Management
- TIM-6320 - Contingency Planning & Incidents
- TIM-6370 - Network Governance, Control and Assurance

Master of Science in Technology Management, MS

Description of Program

The Master of Science in Technology Management program prepares professionals for technical management and leadership roles in today's organizations, resulting in a deeper understanding of organizational needs, cost-effective project planning, resource management, and effective communication. During this program, you will develop your management and leadership skills and your knowledge of technical systems and concepts, business strategies, governance, and financial planning, to prepare you for the unique challenges of technical management in a rapidly evolving industry.

[Click here](#) for potential career opportunities within the MSTM.

Learning Outcomes

- Demonstrate an applied knowledge of technical management and leadership
- Communicate concepts and arguments associated with technology and innovation
- Manage legal, ethical, and security risks in technology-based systems
- Evaluate the scope and impact of emerging technologies on a local and global scale
- Design technology-based solutions to practical problems

Basis for Admissions

School of Technology and Engineering students entering the Master of Science in Technology Management (MSTM) with a bachelor's degree from a regionally or nationally accredited academic institution may immediately begin the MSTM program.

Degree Requirements

The Master of Science in Technology Management is a 30-credit program comprised of 15 core credits, 12 specialization credits and 3 capstone credits. Graduates of the program must complete 30 credit hours.

Students will select a discipline-specific specialization of their interest, which compliments the core coursework. The MSTM program prepares students to be forward-thinking strategically aligned organizational leaders.

Students assume full responsibility for understanding both the foundational, specialization and capstone requirements of the program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Students' Academic and Finance Advisors can assist with any questions related to program requirements.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Science in Technology Management for graduate course work completed at an accredited college or university with a grade of "B" or better. Courses considered for transfer must mirror courses in the program. The Dean of the School of Technology and Engineering must approve any courses considered for transfer. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 21 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 15 months.

Course Sequence

The Master of Science in Technology Management program can be completed in 30 credits.

Students who complete at least 15 semester credit hours in a single area of specialization at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma.

All Master of Science in Technology Management (MSTM) programs require the foundation courses to be completed prior to enrolling in specialization courses. The program capstone will be completed as the last course in the degree program.

- TIM-5002 - Principles of Information Technology for IT Managers
- TIM-5100 - Management and Governance in Technology
- TIM-5110 - Finance and Planning in Technology
- TIM-5120 - Technical Communication
- TIM-5050 - Principles of Project Management
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- TIM-6011 - Strategic Management of Technology

Cybersecurity Management Specialization

The MSTM Cybersecurity Management specialization focuses on developing the knowledge and skills needed to oversee and manage cybersecurity professionals. You will explore key topics of cybersecurity of managing risk, privacy, and security. Additionally, you will explore contingency planning, incident analysis, and cloud systems certification and accreditation. You will be exposed to activities that highlight services to optimize operations and justify fiscal resources required to meet the strategic and operational technology needs of the enterprise. Finally, you will conduct activities to incorporate strategic, operational and project planning and management into the implementation of IT solutions.

Specialization Courses – 12 credit hours

- TIM-6301 - Principles of Cybersecurity

- TIM-5030 - Managing Risk, Security, & Privacy in Information Systems
- TIM-6320 - Contingency Planning & Incidents
- TIM-6331 - Cloud and System Certification, and Accreditation

Data Science Management Specialization

The MSTM Data Science is designed to prepare students for Data Science leadership positions. You will explore key topics in the areas of technical management and leadership, data science, quantitative research design for technology professionals, analysis and interpretation of data, and data visualization techniques. You will be exposed to activities that highlight services to optimize operations and justify fiscal resources required to meet the strategic and operational technology needs of the enterprise. Finally, you will conduct activities to incorporate strategic, operational and project planning and management into the implementation of IT solutions.

Specialization Courses – 12 credit hours

- TIM-6500 - Principles of Data Science
- TIM-5221 - Quantitative Research Design for Technology Professionals
- TIM-6540 - Interpreting and Reporting Data
- TIM-6510 - Data Visualization and Communication

General Management Specialization

The MSTM General Specialization focuses on developing the knowledge and skills needed to oversee and manage technology management professionals. You will explore key topics of leadership in Agile projects, cybersecurity, risk management, concepts of data science, quality management, and contingency planning and incidents. You will be exposed to activities that highlight services to optimize operations and justify fiscal resources required to meet the strategic and operational technology needs of the enterprise. Finally, you will conduct activities to incorporate strategic, operational and project planning and management into the implementation of IT solutions.

Specialization Courses – 12 credit hours

- TIM-5035 - Cybersecurity, Risk Management and Policy for IT Professionals
- TIM-6500 - Principles of Data Science
- TIM-6210 - Quality Management
- TIM-6320 - Contingency Planning & Incidents

Information Technology Management Specialization

The MSTM Information Technology Management specialization is designed to prepare students for leadership positions. You will explore key topics of cybersecurity, risk management, systems analysis, systems architecture, and IT asset management. You will be exposed to activities that highlight services to optimize operations and justify fiscal resources required to meet the strategic and operational technology needs of the enterprise. Finally, you will conduct activities to incorporate strategic, operational and project planning, and management into the implementation of IT solutions.

Specialization Courses – 12 credit hours

- TIM-5035 - Cybersecurity, Risk Management and Policy for IT Professionals
- TIM-5040 - Systems and Architectures for IT Professionals
- TIM-6430 - Systems Analysis & Design
- TIM-6550 - IT Asset Management

Project and Program Management Specialization

The MSTM Project and Program Management specialization is designed to prepare students for project management leadership positions. You will explore key topics of leadership in Agile projects, leadership in Project Management, managing risk in projects, and program and portfolio management. You will be exposed to activities that highlight services to optimize operations and justify fiscal resources required to meet the strategic and operational technology needs of the enterprise. Finally, you will conduct activities to incorporate strategic, operational and project planning and management into the implementation of IT solutions.

Specialization Courses – 12 credit hours

- TIM-6610 - Leadership in Project Management
- TIM-6615 - Agile Project Management
- TIM-6630 - Managing Risk in Project Management
- TIM-6640 - Program & Portfolio Management

Doctor of Philosophy in Computer Science, PhD

Description of Program

The Doctor of Philosophy in Computer Science (PhD-CS) program takes an applied approach to computer science theory and research. Students will get hands on experience, explore advanced topics, learn the very latest concepts, and have the opportunity to propose their own research. They will also be able to build a portfolio of work while completing their doctoral studies.

[Click here](#) for potential career opportunities within the PhD-CS.

Learning Outcomes

- Develop knowledge in computer science based on a synthesis of current theories
- Explain theories, applications, and perspectives related to computer science
- Evaluate theories of ethics and risk management in computers and emerging technologies
- Formulate strategies for managing computing resources in global organizations
- Contribute to the body of theory and practice in computer science

Basis for Admissions

Admission to the PhD in Computer Science program requires a master's degree from a regionally accredited or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD-CS degree program also has the following graduation requirements:

- A minimum of 48 credit hours of graduate instructions must be completed through the University
- GPA of 3.0 (letter grade of "B") or higher
- Submission of approved final dissertation manuscript to the University Registrar, including the original unbound manuscript and an electronic copy
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Fundamental Competencies

All PhD-CS students are required to demonstrate competency in these areas:

- **Computer Competency** - Doctoral students are required to have computer skills necessary for completing a dissertation. Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents). Students must use computer programs for the statistical analysis of data (e.g., SAS). Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7-year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 40 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program requires a minimum of 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

**Students select one research methods and one directed research course based on their own research proposal.

- TIM-8102 - Principles of Computer Science
- TIM-8110 - Programming Languages & Algorithms

- TIM-7011 - Management of Computer Networks

Doctor of Philosophy in Cybersecurity, PhD

Description of Program

The Doctor of Philosophy in Cybersecurity (PhD-CY) program takes an applied approach to cybersecurity theory and research. Students will get hands on experience, explore advanced topics, learn the very latest concepts, and prepare for anticipated risks. The degree is designed to prepare researchers and technology strategies applicable to leading positions in private and public sectors. Students will explore governance, compliance, leading frameworks, models, and standards to reduce threats and vulnerabilities. Students will build portfolio of valuable capabilities, addressing internal and external issues through the intelligent manipulation of data while completing their doctoral studies.

[Click here](#) for potential career opportunities using the PhD-CY.

Learning Outcomes

- Advance theory and practical applications of cybersecurity.
- Formulate cybersecurity governance, policy, risk, and compliance.
- Devise strategic thought leadership for challenges in cybersecurity architecture and operations.
- Assess internal and external threats and vulnerabilities to reduce organizational cyber risk.
- Evaluate tools, data, and processes to enhance protection and foster resilience.

- Facilitate the protection of critical information resources from current and future loss.

Basis for Admissions

Admission to Doctor of Philosophy in Cybersecurity program requires a master's degree from a regionally or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD-CY degree programs have the following graduation requirements:

- A minimum of 48 credit hours of graduate instructions must be completed through the University.
- GPA of 3.0 (letter grade of "B") or higher.
- Satisfactory completion of the PhD-CY university approved Dissertation Manuscript and Oral Defense completed.
- Submission of approved final dissertation manuscript to the University Registrar, including the original unbound manuscript and an electronic copy.
- Official transcripts on file for all transfer credit hours accepted by the University.
- All financial obligations must be met before the student will be issued their complimentary diploma

Fundamental Competencies

All PhD-CY students are required to demonstrate competency in these areas:

- Graduate-Level Research Methods Competency– PhD-CY students are required to complete (TIM-7221 and TIM-7225), OR (TIM-7231 and TIM-7235), OR (TIM-7241 and TIM-7245) at the University.
- Graduate-Level Statistics Competency – PhD-CY students are required to complete TIM-7101 - Statistics with Technology Applications at the University.
- Computer Competency - Doctoral students are required to have computer skills necessary for completing a dissertation. Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents). Students must use computer programs for the statistical analysis of data (e.g., SAS). Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a

student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7-year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 44 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 40 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program requires a minimum of 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The PhD in Cybersecurity requires eight foundation/core courses, five specializations, two research, a pre-candidacy prospectus, and four dissertation courses for a total of 60 credit hours.

*Students select one pair of research methods and directed research courses based on their own research proposal.

The PhD in Cybersecurity requires the following courses for every specialization:

- TIM-7010 - Computer Networks & Mobile Computing
- TIM-8301 - Principles of Cybersecurity
- TIM-8305 - Cyber Risk, Contingencies, and Incidents
- TIM-8315 - Cyber Automation, Artificial Intelligence, and Machine Learning
- TIM-8330 - Advanced Risk Management
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- TIM-7101 - Statistics with Technology Applications
- TIM-8350 - Cyber Critical Infrastructure, Threats, Terrorism, & Warfare
- TIM-7211 - Introduction to Research Design and Methodology for Technology Leaders
- Specialization Course 4
- Specialization Course 5

General and Technology Specialization

The Doctor of Philosophy in Cybersecurity (PhD-CY), General and Technology specialization degree builds on the core computing principles and cybersecurity best practices, frameworks, and models. The degree provides a broad overview, adding governance and strategic views to compliment forensic, software development cloud, and systems certification content. Students use firsthand experience, explore advanced topics, learn the latest and anticipated concepts, consider the evolution of risks and mitigation, advanced threat detection, and propose their own research. The degree is designed to prepare researchers, consultants, and technology strategists capable of leadership roles and executive positions in private and public sectors.

Specialization Courses - 15 credit hours

- TIM-8310 - Cyber Forensics
- TIM-8325 - Cloud and Systems Certification & Accreditation
- TIM-8340 - Secure Software Development
- TIM-8335 - Governance, Laws, Privacy, and Compliance
- TIM-8390 - Strategic Management of Cybersecurity: General and Technology

Global Strategy and Operations Specialization

The Doctor of Philosophy in Cybersecurity (PhD-CY), Global Policy and Operations specialization builds on the core program general principles, best practices, frameworks, and models. The specialization adds specific global solutions through an integrated strategy and leadership capabilities to establish global operations. The focus includes a focus on solving challenges of multi-time zone, multi-continent, and a range of laws, languages, and cultures. Specific considerations include diverse technologies, challenging support structures, and cyber target domains. The complication of widely distributed infrastructure, diverse political influences, and complex supply chains form part of the predictive strategy and the creation of operational excellence.

Specialization Courses - 15 credit hours

- TIM-8345 - Global Governance, Audit, Privacy, and Compliance
- TIM-8355 - Secure Globally Distributed Infrastructure and Support
- TIM-8360 - Global Laws, Culture, and Ethics
- TIM-8365 - Global Cyber Policy, Operations, and Risks
- TIM-8390 - Strategic Management of Cybersecurity: General and Technology

Governance, Risk, and Compliance Specialization

The Doctor of Philosophy in Cybersecurity (PhD-CY), Governance, Risk, and Compliance specialization combines the four knowledge areas to complete research or synthesize cybersecurity solutions for enterprises subject to national exposures and global threats. The combined resolution of risk, compliance, audit, and privacy will enable graduates to create enhanced solutions while limiting the need for resources. The specialization investigates current and anticipated needs and solutions within all four

areas, addressing key issues for larger organizations while providing improved strategic alignment. It includes important access control, and threat discovery across complex environments. The specialization includes an emphasis on preempting future losses.

Specialization Courses - 15 credit hours

- TIM-8710 - General Cyber Law, Oversight, and Regulations
- TIM-8715 - Frameworks, Models, Standards, and Controls
- TIM-8720 - Industry Laws, Regulations, and Compliance
- TIM-8725 - Cyber Policy and Leading Cyber Operations
- TIM-8390 - Strategic Management of Cybersecurity: General and Technology

Secure Cloud Computing Specialization

The Doctor of Philosophy in Cybersecurity (PhD-CY), Secure Cloud Computing specialization builds on best practices, frameworks and models to synthesize unique solutions that optimize organization outcomes. The specialization investigates current and anticipated needs and solutions emphasizing the cloud computing. Learning and research adds practical and strategic insights to enable reduced risks for cloud computing and multi-cloud cybersecurity solutions. The degree is designed to prepare researchers, consultants, and technology strategists capable of leadership roles and executive positions in private and public sectors where advanced or complex cloud computing is important. Competencies include complex secure data communications, identity management, and access controls.

Specialization Courses - 15 credit hours

- TIM-8325 - Cloud and Systems Certification & Accreditation
- TIM-8370 - Advanced Networking & Identity Management
- TIM-8375 - Integration, Outsourcing, and Related Laws
- TIM-8380 - Secure Cloud Operations
- TIM-8390 - Strategic Management of Cybersecurity: General and Technology

Doctor of Philosophy in Data Science, PhD

Description of Program

The Doctor of Philosophy in Data Science (PhD-DS) focuses on data analytics, statistical modeling, and machine learning. Data science involves mining data and maintaining, processing, modeling data, and communicating the results in a professional or scientific setting. The PhD-DS program will prepare you for research spanning big data analytics, artificial intelligence, and data-driven decision-making by exploring each stage of the data science life cycle in depth from an applied and a theoretical perspective.

[Click here](#) for potential career opportunities within the PhD-DS.

Learning Outcomes

- Develop knowledge in data science based on a synthesis of current theories.
- Explain theories, applications, and perspectives related to data science.
- Evaluate theories of ethics and risk management in information systems.
- Formulate strategies for data and knowledge management in global organizations.
- Contribute to the body of theory and practice in data science.

Basis for Admissions

Admission to the Doctor of Philosophy in Data Science program requires a conferred master's or doctoral degree from a regionally or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD-DS degree program also has the following requirements:

- GPA of 3.0 (letter grade of "B") or higher
- University approval of Dissertation Manuscript and Oral Defense completed
- Submission of approved final dissertation manuscript to the University Registrar, including the original unbound manuscript and an electronic copy
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 40 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program may be completed in a minimum of 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Doctor of Philosophy in Technology Management, PhD

Description of Program

Visionary leaders can help change an organization and bring about new innovations. In the Ph.D. program in Technology and Innovation Management, student scholar-practitioners will learn how to become such leaders and be champions for new technologies and positive change in public and private organizations. The Doctor of Philosophy (Ph.D.) program is a research-based program designed to prepare leaders for positions in the private and public sectors by enhancing knowledge and competencies appropriate to a leadership role in technology and innovation management, administration, and technology management. Upon completion of the Ph.D. program, students are expected to have broad knowledge in the fields of business and technology management and an understanding of at least one specialized area of study.

[Click here](#) for potential career opportunities within the PhD-TM.

Learning Outcomes

The program learning outcomes for the Doctor of Philosophy in Technology Management degree:

- Develop knowledge in technology and innovation based on a synthesis of current theories
- Communicate with diverse audiences about theories, applications, and perspectives related to technology and innovation
- Evaluate theories of ethics and risk management in computers and emerging technologies
- Formulate strategies for managing technology and innovation in global organizations
- Contribute to the body of theory and practice in technology management

Basis for Admissions

Admission to the Doctor of Philosophy in Technology Management program requires a master's degree from a regionally or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The PhD-TM degree programs have the following graduation requirements:

- A minimum of 48 credit hours of graduate instructions must be completed through the University
- GPA of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the PhD-TM Pre-Candidacy Prospectus
- University approval of Dissertation Manuscript and Oral Defense completed
- Submission of approved final dissertation manuscript to the University Registrar, including the original unbound manuscript and an electronic copy
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Fundamental Competencies

All PhD-TM students are required to demonstrate competency in these areas:

- **Graduate-Level Research Methods Competency**– PhD-TM students are required to complete TIM-7211 , AND (TIM-7221 , TIM-7225), OR (TIM-7231 , TIM-7235), OR (TIM-7241 , TIM-7245) at the University.
- **Graduate-Level Statistics Competency** – PhD-TM students are required to complete TIM-7101 - Statistics with Technology Applications at the University.
- **Computer Competency** - Doctoral students are required to have computer skills necessary for completing a dissertation. Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents). Students must use computer programs for the statistical analysis of data (e.g., SAS). Students must produce a computer-based presentation (e.g., PowerPoint) for their dissertation oral examination.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 39 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program may be completed in a minimum of 60 credits. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The PhD in Technology Management requires six (seven if needed) core courses, six specializations, three research, pre-candidacy prospectus, and four dissertation courses for a total of 60 credit hours.

**Students select one pair of research methods and directed research courses based on their own research proposal.

The PhD in Technology Management requires the following courses for every specialization:

- TIM-7001 - Principles of Technology Innovation Management
- Specialization Course 1
- TIM-7011 - Management of Computer Networks
- Specialization Course 2
- TIM-7020 - Databases & Business Intelligence
- Specialization Course 3
- TIM-7031 - Managing Risk, Security, & Privacy in Information Systems
- Specialization Course 4
- TIM-7101 - Statistics with Technology Applications
- Specialization Course 5
- TIM-7040 - Technology Policy & Strategy
- Specialization Course 6
- TIM-7211 - Introduction to Research Design and Methodology for Technology Leaders

 - DIS-9902A - The Dissertation Proposal
 - DIS-9903A - Institutional Review Board (IRB) and Data Collection
 - DIS-9904A - The Dissertation Manuscript and Defense

Computer Science Specialization

Students in the Computer Science specialization will research the design and function of computers from the inside out. This is a broad specialization, allowing students to research a wide variety of computer topics and to prepare for a range of technology leadership roles. Graduates will be able to use this in-depth knowledge to contribute to new computer science research and lead the innovative integration of computer technologies in their organizations.

Specialization Courses - 18 credit hours

- TIM-8102 - Principles of Computer Science
- TIM-8110 - Programming Languages & Algorithms
- TIM-8122 - Distributed Algorithms and Parallel Computing
- TIM-8131 - Data Mining
- TIM-8140 - Software Engineering
- TIM-8150 - Artificial Intelligence

Cybersecurity Specialization

As organizations are producing more and more data, the risks associated with possible data theft become even greater. Therefore, organizations must have leaders who know how to keep the data secure. Students in the Cybersecurity specialization will research the latest trends to stay ahead of would-be cyber attackers. Graduates will be well-prepared to anticipate and mitigate risks in managing and deploying data-intensive systems and to assume a variety of technology leadership roles in government, private organizations, and research institutions.

Specialization Courses - 18 credit hours

- TIM-8301 - Principles of Cybersecurity
- TIM-8310 - Cyber Forensics
- TIM-8320 - Contingency Planning & Incidents
- TIM-8330 - Advanced Risk Management
- TIM-8340 - Secure Software Development
- TIM-8350 - Cyber Critical Infrastructure, Threats, Terrorism, & Warfare

Data Science Specialization

Gathering and maintaining data is just one piece of effective use of data. Data Science is an emerging field that deals with making sense of the mountains of data organizations produce and turning them into actionable knowledge. The Data Science specialization prepares students to be leaders and researchers in this new and exciting field by studying the most up-to-date tools and emerging research in this area.

Specialization Courses - 18 credit hours

- TIM-8131 - Data Mining
- TIM-8440 - Knowledge Management
- TIM-8501 - Exploratory Data Analysis

- TIM-8510 - Data Visualization & Communication
- TIM-8520 - Inferential and Predictive Analytics
- TIM-8530 - Big Data Integration

Engineering Management Specialization

This specialization is designed for leaders in all types of engineering and technology management fields. Students will research the latest tools and research involving assessing the potential of innovative ideas, protecting intellectual property, and bringing new ideas to fruition. Graduates will be able to use this knowledge to lead engineering and information systems initiatives and cutting-edge research in their organizations.

Specialization Courses - 18 credit hours

- TIM-8210 - Quality Management
- TIM-8220 - Engineering Law
- TIM-8501 - Exploratory Data Analysis
- TIM-8420 - Data Warehousing & Decision Support
- TIM-8430 - Systems Analysis & Design
- TIM-8601 - IT Project Management

Information Systems Specialization

This specialization is designed for scholars who want to research new ways for computers to work together to maintain, store, and process information. Students will research a variety of topics in information systems and will prepare for a range of information technology leadership and research roles. Graduates will be able to use this in-depth knowledge to lead the innovative integration of information technologies and information systems in their organizations.

Specialization Courses - 18 credit hours

- TIM-8301 - Principles of Cybersecurity
- TIM-8410 - Cloud Computing
- TIM-8420 - Data Warehousing & Decision Support
- TIM-8430 - Systems Analysis & Design
- TIM-8440 - Knowledge Management
- TIM-8601 - IT Project Management

IT Project Management Specialization

This specialization prepares students with the knowledge needed to contribute to innovation in the conception, planning, implementation, and deployment of a variety of information technology-related projects. Students will study research and theories in leadership, risk, and management of multiple projects. Graduates will be prepared to assume management and research roles in project management and information technology.

Specialization Courses - 18 credit hours

- TIM-8630 - Managing Risk in Project Management
- TIM-8210 - Quality Management
- TIM-8601 - IT Project Management
- TIM-8610 - Leadership in Project Management
- TIM-8620 - Project Management Systems & Technology
- TIM-8640 - Program & Portfolio Management

Sanford College of Education

Post-Baccalaureate Certificate in Education

Description of Program

The Post-Baccalaureate Certificate program is designed for students who have completed their bachelor's degree and are seeking academic expertise through a graduate level certificate program. In order to earn a Post-Baccalaureate Certificate, students must complete four courses (a total of 12 credit hours) within the chosen Post-Baccalaureate Certificate program.

The Post-Baccalaureate Certificate is prescribed, meaning students can only take what is listed for the particular Post-Baccalaureate Certificate (students may not substitute alternative courses). Students must complete all four courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the Post-Baccalaureate Certificate.

Basis for Admissions

Admission to the Post-Baccalaureate Certificate program requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Baccalaureate certificate program. Coursework must have been completed at an accredited college or university within the last five years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Baccalaureate Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 9 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 6 months.

Post-Baccalaureate Certificate Transfer into a Master's Degree Sequence

- Coursework completed within a Post-Baccalaureate Certificate program may be applied towards the specialization sequence within a master's program.
- Applying Post-Baccalaureate Certificate coursework towards a master's degree is contingent upon coursework and degree relevance under the most current master's degree program version.

Specialization coursework completed as part of a master's degree, where a degree was conferred, cannot be applied towards a Post-Baccalaureate Certificate program. However, a Post-Baccalaureate Certificate can be completed as part of master's coursework, assuming the student officially applies for the Post-Baccalaureate Certificate prior to completing the fourth course in the Post-Baccalaureate Certificate series.

Multimedia Instructional Design

This post-baccalaureate certificate focuses on the multimedia element of instructional design. You will consider design principles, mobile devices, ethical and legal considerations, and open source authoring tools. This certificate is a useful addition to your existing skills as an instructional designer.

Required Courses- 12 credit hours

- ID-5040 - Design Principles for Multimedia Learning
- EL-5007 - Ethics and Legal Issues
- EL-5009 - Mobile Devices for Teaching and Learning
- ID-5060 - Authoring Tools for Design and Development

School Safety, Security, and Emergency Management

Students who feel safe and secure at school are better able to learn by engaging the curriculum, their teachers, and their peers. This certificate offers certified teachers and classified staff three distinct and connected domains: school safety, school security, and school emergency management. You will learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice and other alternatives to student discipline; and how to contribute, implement, and improve school safety plans through a practitioner's perspective.

Required Courses - 12 credit hours

- SEM-5100 - Fundamentals of School Safety, Security, & Emergency Management
- SEM-5300 - Threat Assessment Fundamentals
- SEM-5400 - School Safety Plans for Practitioners
- SEM-5500 - Restorative Justice and Other Alternatives to Student Discipline

Trauma-Informed Educational Practices

This certificate will build on fundamental knowledge and skills related to teaching and learning with a focus on specific trauma-informed educational practices. This focus will extend across various educational settings and populations. You will explore the fundamentals of a trauma-informed approach to education, how trauma manifests in different populations, specific trauma-informed strategies for the classroom, and strengthening resilience among both students and educators.

Required Courses - 12 credit hours

- TRA-5100 - Fundamentals of a Trauma-Informed Approach to Education
- TRA-5200 - Trauma Across Educational Populations and Settings

- TRA-5300 - Trauma-Informed Strategies for Educational Environments
- TRA-5400 - Strengthening Resilience Among Learners and Educational Professionals

Master of Education, MEd

Description of Program

The MEd program is designed for students focused on developing the knowledge, skills, and dispositions required for advance practice and leadership roles within diverse fields such as PK-12 education, higher education, and adult learning environments. In this program, you will critically analyze a broad range of theories, trends, practices, and knowledge specific to your areas of interest represented in a distinct specialization. Your specialization prepares you for making informed, ethical decisions and improvements to current educational, organizational, and societal issues.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the MEd.

Learning Outcomes

- Use technology to advance goals and outcomes in educational settings
- Investigate evidence-based solutions for addressing educational, organizational, and community issues
- Explain educational theories, research, and practices to diverse audiences
- Recommend solutions to ethical dilemmas in diverse educational and organizational settings
- Integrate professional standards into practice for leading and educating diverse groups

Basis for Admissions

Admission to a master's program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution

Degree Requirements

Graduates of the University's MEd program must complete 30 credit hours. Students will select a discipline-specific specialization of their interest, which complements the core coursework. The MEd program includes 9 credit hours of foundational courses. The foundational courses are taken by all students regardless of their undergraduate degree to form and strengthen fundamental skills. The next 18 credit hours in the program encapsulate a specialization aligned with a student's career goals and interests. Specialization courses must be appropriate to the student's degree program. Students end the program with a 3 credit-hour capstone course. Students who are considering any degree program are strongly encouraged to check specific state requirements carefully to be sure any degree program they consider will be accepted for purposes of certification or recertification, promotion, or advancement on school district salary schedules.

The MEd degree program has the following graduation requirements:

- A minimum of 18 credit hours of graduate instruction must be completed through University
- Successful completion of any PK-12 core course signature assignments with a "B" or better
- Official transcripts on file for all transfer credits accepted by the University

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Education for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 21 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 months.

Additional MEd Information

Rio Salado College Post-Baccalaureate Transfer Students

The University's Post-Baccalaureate Master of Education (36 credit) program of study is part of an articulation agreement designed for Rio Salado College (RSC) teacher preparation post-baccalaureate transfer students. This collaborative educational partnership is designed to serve as a master's degree completion program specifically for RSC students. The Master's Degree in Education allows for up to 18 credits to be transferred to the University embracing the principle that transfer students should not be required to repeat competencies already achieved.

The credits may apply to the following specializations:

- Curriculum and Teaching
- Early Childhood Education
- Special Education
- English as Second Language
- General Education

Rio Salado students pursuing this program of study should work closely with an enrollment advisor specifically assigned to work with this unique partnership. The enrollment advisor will work with Rio Salado students to request a complete evaluation of credits toward this Post-Baccalaureate Master of Education Degree.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The MEd program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country. Certification requirements vary by state. Students are advised to contact their state department of education or local school district for guidance in obtaining certification or licensure, or for approval in fulfilling district level incentive programs. Prospective candidates are responsible for learning and following any requirements for licensure, recertification, etc. in the state(s) where they wish to apply the degree.

There are several reasons why an educator would want to pursue a graduate degree in education that does not lead to state licensing or certification.

Reasons may include:

- "Move up" steps on the salary schedule
- Improve skills and professionalism in general or to pursue a "leadership" position inside or outside the classroom (school-based or district level, or non PK-12)

- Advance as a "teacher leader" through a graduate degree (already has a bachelor's degree and certification)
- Meet the needs of increasingly diverse students
- Work outside of a traditional PK-12 classroom environment (i.e. trainer, educational consultant)

Sanford College of Education Curriculum

The Sanford College of Education curriculum emphasizes a combination of learning theory, instructional strategies, and technology integration for educators working with any grade level, and within professional associations, organizations or as a consultant. The emphasis is on students transforming theory immediately into practice and faculty tailoring instruction to enhance student understanding and achievement. The program aims to produce graduates who understand the scope, pace, and magnitude of the transformation of education within the world that is taking place; and to assist students to meet the challenges of state and national standards (if desired), while meeting the learning needs of educators who work beyond the classroom.

State of the Art Content

The Sanford College of Education sequence of courses undergoes constant review to ensure that while maintaining depth of focus, the program continually includes latest educational innovations and provides participants the tools to incorporate them into pedagogy. The curriculum content and related URL links are current and pertinent. All Sanford College of Education courses are continually updated to reflect the latest developments in instructional technology to support instruction.

MEd students may select a specialization track from the list of courses offered via the Sanford College of Education. All MEd students are required to take ED-6500 as the Capstone Course for their program.

Course Sequence

The Master of Education program can be completed in 30 credits.

- EDU-5000 - Foundations for Graduate Study in Education
- Specialization Course 1
- ED-5100 - Scholarly Writing and Using Research
- Specialization Course 2
- ED-5045 - Technology and a Vision for the Future - MEd -or- ID-5045 - Design Principles for Multimedia Learning - MEd *
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5
- Specialization Course 6
- ED-6500 - MEd Capstone

* May be substituted with a course from the student's specialization with Dean approval.

Adult Learning and Workforce Education (AL) Specialization

The Adult Learning and Workforce Education specialization prepares you to develop, implement, and manage systems that improve individual and organizational performance across a wide range of industries, including career development, human performance improvement, and workforce development agencies. In addition, this specialization supports your role in influencing organizational decision-making and public policy. This specialization will provide you with the tools and competencies required to reflect critically on workplace issues, solve organizational problems, and anticipate and respond to change.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- OL-5103 - Leading Change and Organizational Renewal
- GTD-5011 - Introduction to Best Practices for Training and Presenting to International Audiences
- ED-5038 - The Art and Science of Adult Education

- EL-5006 - Adult Learning Theories
- GTD-5000 - Human Performance and Improvement
- GTD-5013 - Evaluating Training Programs

Athletic Coaching (AC) Specialization

Coaching sports in the educational setting is a growing discipline with no formalized training process for those interested in this profession. This program is designed to enhance coaching leadership skills for both coaches and athletes. The curriculum focuses on practical and successful coaching strategies; introduces the student to the latest athletic performance improvement techniques; and examines the application of ethics and values in all aspects of coaching sport.

The specialization is designed for professional educators interested in athletic coaching opportunities and offers an outstanding professional development opportunity for those already serving as coaches by advancing knowledge and skills in the field.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- AC-5000 - Leadership in Coaching Today's Athlete
- AC-5002 - Legal Aspects in Coaching
- ED-5204 - Ethics in Sport
- AC-5006 - Sport Nutrition
- AC-5008 - Coaching Psychology
- AC-5010 - Performance Enhancement in Sport
- AC-5012 - Coaching Fundamentals of Speed Development
- AC-5014 - Coaching Theory, Methods, and Issues

Curriculum and Teaching (CT) Specialization

The purpose this specialization is to provide teachers with the tools and competencies to expand their professional effectiveness. Students will explore the latest practices in education, principles of teaching and learning, evaluation of current research and critique of effective curricula design.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- CT-5000 - Curriculum and Instructional Strategies
- CT-5003 - Principles of Teaching & Learning
- CT-5010 - Teaching, Learning, and Assessment Strategies and Principles
- CT-5011 - Learning and Teaching Styles, Multiple Intelligences, and Ways of Learning
- CT-5012 - Teaching Foundations for Language and Literacy
- CT-5013 - The Classroom: Management and Organization for Student Achievement

E-Learning (EL) Specialization

This specialization provides the professional educator with the knowledge to implement technology as a tool for teaching and learning. The specialization explores the design of activities to engage the traditional and the virtual student. The student will develop a skill set to effectively and efficiently integrate technology in a seamless manner to enhance delivery of teaching and learning experiences.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- EL-5001 - Introduction to Principles and Practices in E-Learning
- EL-5002 - Introduction to E-Learning Instructional Strategies
- EL-5004 - Designing for E-Learning
- EL-5006 - Adult Learning Theories
- EL-5007 - Ethics and Legal Issues
- EL-5009 - Mobile Devices for Teaching and Learning

Early Childhood Education (ECE) Specialization

This program is tailored for Master's degree students who desire to model, coach, and guide young children through the first years of life when social, physical, cognitive, and emotional development occur. Skilled educators create an environment that serves as a foundation for a Child's health and well-being. In this specialization, educators will learn to assess educational potential, create instructional programs, direct and coordinate learning activities, and manage early childhood classrooms.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- ECE-5002 - Growth and Development of Young Children
- ECE-5003 - Administration of Early Childhood Programs
- ECE-5005 - Children and Families in a Diverse Society
- ECE-5007 - Children's Literature
- ECE-5009 - Early Childhood Education Capstone
- ECE-5010 - Foundations of Early Childhood Education

English Language Learning (ELL) Specialization

As the diversity of student populations change globally, teaching English to non-native speakers is a skill in high demand. This program enhances skills in communicating with speakers of other languages and integrating techniques to successfully instruct students in English proficiency. (Note: Students seeking ELL/ESL certification should verify with appropriate state officials that this specialization meets applicable certification requirements.)

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- ED-5008 - Teaching Diverse Students
- ESL-5001 - Foundations of Instruction for Non-English Language Background Students
- ESL-5003 - Assessment of Linguistically Diverse Students
- ESL-5005 - English Language Learning
- ESL-5006 - Instructional Methodologies for English Language Learning
- ED-5023 - Multicultural Relationships in Educational Organizations

General Education Specialization

The General specialization allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 18 credit hours for the specialization in General Education. Students may take education courses at the 5000 level including up to two courses from other fields (Psychology, Technology and/or Business) to fulfill their specialization requirements. Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- EDL-5004 - School Law
- ED-5008 - Teaching Diverse Students
- ED-5012 - Leadership in Educational Organizations
- ED-5013 - School Finance
- ED-5023 - Multicultural Relationships in Educational Organizations
- ED-5029 - Measurement and Assessment in Education

Global Training and Development (GTD) Specialization

This specialization prepares students to develop and implement effective training in a variety of fields. Instructional design and the incorporation of technology and teaching strategies for the adult student are the focus of the specialization. Additionally, the student is prepared to address workplace issues such as the development of human capital and conflict resolution issues. The specialization prepares students to identify emerging workforce issues and to resolve the issues through effective training and instruction.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- GTD-5000 - Human Performance and Improvement
- GTD-5005 - Introduction to Successful Global Training Techniques
- GTD-5007 - The Role of Technology in the Global Training Marketplace
- GTD-5011 - Introduction to Best Practices for Training and Presenting to International Audiences
- GTD-5013 - Evaluating Training Programs
- GTD-5019 - Trainer as Consultant in the Global Marketplace
- ED-5036 - Innovation and Change
- ED-5038 - The Art and Science of Adult Education

Instructional Leadership (IL) Specialization

Contemporary schools are often funded and ranked on their ability to assess and guarantee learning. This specialization introduces analysis of the instructional capacity of schools, improving student achievement, and develops teacher leaders in providing assessment and improvement strategies. Organizational development and educational change are also addressed in this specialization. Students utilize reflective decision making to assist with the development and implementation of practical solutions to education issues.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- CT-5003 - Principles of Teaching & Learning
- ED-5012 - Leadership in Educational Organizations
- ED-5016 - Instructional Supervision and Leadership
- IL-5000 - Instructional Leader as Creator of Learning Culture
- IL-5001 - Instructional Leader as Advocate and Decision Maker

- IL-5002 - Instructional Leader as Community Conduit

International Education (IE) Specialization

The master's degree program in International Education allows students to focus on issues of educational development, comparative systems, and international policy. The program promotes an understanding of global perspectives that influence education in the United States. Skills will be developed in areas of cultural awareness, international education theory, and global trends. Students will develop the practical knowledge required to work within the context of complex global challenges influencing education around the world. The program provides a strong foundation for further study and prepares students for careers in international and community-based organizations.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- ED-5008 - Teaching Diverse Students
- ED-5012 - Leadership in Educational Organizations
- IE-5001 - Introduction to Global and Comparative Education
- IE-5003 - International Education Concepts and Theory
- IE-5005 - International Organizations in Global Education
- IE-5007 - Conflict Resolution in an International Context
- IE-5013 - Globalization and Educational Change
- IE-5021 - Education and National Development

Leadership in Higher Education (LHE) Specialization

This specialization prepares students to excel in higher education leadership and to pursue careers as higher education specialists and managers. The focus is on legal issues, finance, and organizational leadership in higher education.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- LHE-5004 - The Organization of Higher Education
- LHE-5005 - Exploring Legal Issues in Higher Education
- LHE-5008 - Financial Issues in Higher Education
- LHE-5009 - A History of Higher Education
- LHE-5010 - Topics in Higher Education
- LHE-5011 - Leadership for Higher Education
- LHE-5013 - The Community College

Organizational Leadership (OL) Specialization

Students develop skills to be effective organizational leaders by building a knowledge base in conflict resolution, organizational capacity, and executive leadership skills. The curriculum serves to enhance the student's understanding and practice of leadership in a variety of educational fields.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- OL-5100 - Resolving Conflict
- OL-5101 - Organizational Capacity

- OL-5102 - Applied Research for Organizational Leaders
- OL-5103 - Leading Change and Organizational Renewal
- ED-5036 - Innovation and Change
- ED-5041 - Adult Learning Strategies to Improve Organizational Efficacy

Reading Education (RDG) Specialization

This specialization in reading will strengthen and polish scholarship and expertise in the teaching of the skills and strategies needed for developing proficiency in literacy in grades K-12. There will be an exploration of relevant and salient topics in the teaching of literacy including theoretical foundations and frameworks, curriculum, instruction and assessment, as well as the historical, cultural, sociological, political, and economic trends and influences on literacy acquisition and development in American schools.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- RDG-5000 - Theoretical and Research Foundations of Language and Literacy
- RDG-5001 - Essential Elements of Elementary Reading and Writing Instruction
- RDG-5002 - The English Language: Etymology, Elements, and Implications for Instruction
- RDG-5003 - Vocabulary Instruction and Development for PK12
- RDG-5004 - Reading Comprehension Instruction and Development: Skills and Strategies for PK12
- RDG-5005 - Assessment of Reading and Writing Proficiency for PK12

School Safety, Security and Emergency Management (SEM) Specialization

Students who feel safe and secure at school are better able to learn by engaging the curriculum, their teachers, and their peers. This specialization offers certified teachers and classified staff three distinct and connected domains: school safety, school security, and school emergency management. You will learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice and other alternatives to student discipline; and how to contribute, implement, and improve school safety plans through a practitioner's perspective. You will demonstrate your proficiency through a capstone project in the final course.

Specialization Courses – 18 credit hours

- SEM-5100 - Fundamentals of School Safety, Security, & Emergency Management
- SEM-5200 - School Safety and Security Technologies
- SEM-5300 - Threat Assessment Fundamentals
- SEM-5400 - School Safety Plans for Practitioners
- SEM-5500 - Restorative Justice and Other Alternatives to Student Discipline
- SEM-5600 - Capstone for School Safety, Security, and Emergency Management

Special Education (SE) Specialization

This specialization prepares educators to address the needs of students with disabilities and gifted abilities by preparing such students to develop, implement and assess specially designed curriculum. Attention is given to teaching methods and strategies that illustrate an advocacy for these student groups. The specialization can be customized to meet the student's unique professional and personal goals, and allows the student to concentrate their coursework on the advanced and the disabled student, or select a single focus.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- SE-5001 - Assessment in Special Education
- SE-5002 - Instructing Students with Specific Learning Disabilities
- SE-5003 - Instructing Students with Emotional and/or Behavioral Disorders
- SE-5004 - Instructing Students with Intellectual Disabilities
- SE-5005 - Special Education Law
- SE-5006 - Teaching Strategies in Special Education
- SE-5010 - Introduction to Students with Disabilities

Sport and Athletic Management (SM) Specialization

Both coaching and athletic administration are growing as professional disciplines. This specialization is designed to enhance leadership skills, strengthen teaching and administrative abilities, and apply ethics and values to all aspects of athletics.

The Sport and Athletic Management specialization offers an outstanding professional development opportunity for those already serving as coaches and athletic administrators by advancing their knowledge and skills in the field.

Courses focus on leadership, legal aspects in athletics, financial analysis, marketing, sports governance, events and facilities management, and ethics. Basic concepts are addressed in each course and application of those concepts is emphasized. Courses will have a contemporary focus, emphasizing current problems and opportunities directly related to the student's work setting.

Specialization Courses – 18 credit hours

The following order is preferred, though students may petition the Dean for an exception:

- SM-5000 - Leadership and Administration of Athletic Programs
- SM-5002 - Legal Aspects in Athletics
- ED-5204 - Ethics in Sport
- SM-5006 - Sports Governance and Policy Development
- SM-5010 - Marketing in Athletics
- SM-5012 - Issues in Athletic Administration

Trauma-Informed Educational Practices (TRA) Specialization

This specialization will build on your fundamental knowledge and skills related to teaching, learning, and student support. You will consider various educational settings and learner population as you explore the fundamentals of a trauma-informed approach to education, including how trauma manifests in different populations, specific trauma-informed strategies for the classroom, involvement of multi-tiered systems of support, and strengthening resilience among both students and educators. You will demonstrate your proficiency through a capstone project in the final course of the specialization. All courses must be completed prior to the capstone course.

Specialization Courses – 18 credit hours

- TRA-5100 - Fundamentals of a Trauma-Informed Approach to Education
- TRA-5200 - Trauma Across Educational Populations and Settings
- TRA-5300 - Trauma-Informed Strategies for Educational Environments
- TRA-5400 - Strengthening Resilience Among Learners and Educational Professionals
- TRA-5500 - Trauma and Support Systems in Educational Environments
- TRA-5600 - Capstone in Trauma-Informed Educational Practices

Master of Education in Educational Leadership, MEd

Description of Program

In the Masters of Education (MEd) degree in Educational Leadership, you will develop knowledge, skills, and leadership traits required for educational leadership roles within diverse organizations. As you critically analyze a broad range of disciplinary theories, leadership trends, and traits, including data decision-making and evidence-based educational practice, you will be prepared to make research-based, ethical decisions that improve issues, systems, and practice within current and emerging educational organizations. While the degree is not specific to PK-12 education, the program does align with the Professional Standards for Educational Leaders (formerly ISLLC/ ELCC).

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the MEEDL.

Learning Outcomes

- Apply quality standards to enhance instructional rigor and instructional strategies fostering student learning and development and augment teacher professional development
- Select strategies to cultivate an inclusive and supporting learning environment to enhance accessibility, community collaboration, and student success
- Analyze the aspects of professional capacity and resource needs for a quality professional learning community promoting an effective and efficient learning environment for all teachers, staff, and students
- Synthesize current educational research and theory within educational evidence-based practice for ongoing school improvement
- Facilitate effective educational leadership vision and integrity through strategic planning involving data-driven decision-making and evidence-based practice

Basis for Admissions

A bachelor's degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The Master of Education (MEd) in Educational Leadership (EdL) requires 30 credit hours for degree completion. The MEEDL program includes one foundational course, taken by all students regardless of their undergraduate degree, which forms and strengthens fundamental skills. The next 24 credit hours in the program are core courses that capture the essence of educational leadership. Students end the program with a 3 credit hour capstone course.

- The MEEDL degree program has the following graduation requirements:
- A minimum of 24 credit hours of graduate instruction must be completed through the University
- Successful completion of all courses with a "B" or better
- Official transcripts on file for all transfer credits accepted by the University

The University may accept a maximum of 12 semester credit hours in transfer toward the MEEDL for graduate course work completed at an external, accredited college or university with a course grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 21 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 15 months.

Additional MEEDL Information

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The MEEDL program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country. Certification requirements vary by state. Students are advised to contact their state department of education or local school district for guidance in obtaining certification or licensure, or for approval in fulfilling district level incentive programs. Prospective candidates are responsible for learning and following any requirements for licensure, recertification, etc. in the state(s) where they wish to apply the degree.

There are several reasons why an educator would want to pursue a graduate degree in education that does not lead to state licensing or certification.

Reasons may include:

- "Move up" steps on the salary schedule
- Improve skills and professionalism in general or to pursue a "leadership" position inside or outside the classroom (school-based or district level, or non PK-12)
- Advance as a "teacher leader" through a graduate degree (already has a bachelor's degree and certification)
- Meet the needs of increasingly diverse students
- Work outside of a traditional PK-12 classroom environment (i.e. trainer, educational consultant)

Sanford College of Education Curriculum

The Sanford College of Education curriculum emphasizes a combination of learning theory, instructional strategies, and technology integration for educators working with any grade level, and within professional associations, organizations or as a consultant. The emphasis is on students transforming theory immediately into practice and faculty tailoring instruction to enhance student understanding and achievement. The program aims to produce graduates who understand the scope, pace, and magnitude of the transformation of education within the world that is taking place; and to assist students to meet the challenges of state and national standards (if desired), while meeting the learning needs of educators who work beyond the classroom.

State of the Art Content

The Sanford College of Education sequence of courses undergoes constant review to ensure that while maintaining depth of focus, the program continually includes latest educational innovations and provides participants the tools to incorporate them into pedagogy. The curriculum content and related URL links are current and pertinent. All Sanford College of Education courses are continually updated to reflect the latest developments in instructional technology to support instruction.

Course Sequence

- EDU-5000 - Foundations for Graduate Study in Education
- ED-5012 - Leadership in Educational Organizations
- EDL-5004 - School Law
- ED-5016 - Instructional Supervision and Leadership

- ED-5044 - Technology and a Vision for the Future
- EDL-5013 - School Finance
- ED-5015 - School Safety
- EDL-5033 - School Based Leadership
- ED-5031 - Policy and Politics in the Administration of Education
- ED-6600 - MEd-EdL Capstone

Post-Master's Certificate in Education

Description of Program

In order to earn a Post-Master's Certificate, students must complete six courses (a total of 18 credit hours) within the chosen Post-Master's Certificate program. With the exception of the General Education certificate, each Post-Master's Certificate program is prescribed, meaning students can only take what is listed for the particular Post-Master's Certificate program (students may not substitute alternative courses). Students must complete all six courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the Post-Master's Certificate.

Basis for Admissions

Admission to the Post-Master's Certificate program requires a conferred master's level or higher degree from a regionally or nationally accredited academic institution.

Scope

6 Courses (18 Credit hours) must be completed from the coursework outlined within the corresponding Post-Master's Certificate specialization. Courses taken as part of a master's program cannot be applied towards a Post-Master's Certificate program.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Master's certificate program. Coursework must have been completed at an accredited college or university within the last seven years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Master's Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 13 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 9 months.

Post-Master's Certificate Transfer into a Doctoral Sequence

- Specialization coursework completed as part of a doctoral degree, where a degree was conferred, cannot be applied towards a Post-Master's Certificate program. However, a Post-Master's Certificate can be completed as part of doctoral coursework, assuming the student officially applies for the Post-Master's Certificate prior to completing the fourth course in the Post-Master's Certificate series.
- Coursework completed within a Post-Master's Certificate program may be applied towards the specialization sequence within a doctoral program.
- Applying Post-Master's Certificate coursework towards a doctoral degree is contingent upon coursework and degree relevance under the most current doctoral degree program version.

Curriculum & Teaching (CT)

The nature and purpose of the Post-Master's Certificate in Curriculum and Teaching is to provide teacher -learners the knowledge, skills, and professional competencies that will enhance their instructional practice and leadership. Learners have the opportunity to explore, examine, and evaluate contemporary teaching and instructional practices, include the evaluation of broader curriculum programs.

Required Courses - 18 credit hours

- CT-7000 - Developing Instructional Strategies and Curriculum
- CT-7100 - Dispositions of Learner and Teacher
- CT-7200 - Design and Evaluation of Curriculum and Programs
- CT-7300 - Theories and Applications of Instructional Strategies
- CT-7400 - Assessment Practices
- CT-7500 - Advanced Capstone in Curriculum & Teaching

E-Learning (EL)

This specialization integrates curriculum development, instructional design and course delivery using technology and online learning management systems. The specialization focuses on providing a knowledge base of current research for the planning and implementation of teaching and delivery modalities using instructional design methodologies incorporating educational media.

Required Courses - 18 credit hours

- EL-7001 - Principles and Practices in E-Learning
- EL-7002 - E-Learning Instructional Strategies
- EL-7003 - Instructional Design and Engaging E-Learning Activities
- EL-7004 - The Online Learner
- EL-7006 - Facilitating Adult Learning Online
- EL-7007 - Developing Online Content Ethically and Legally

Early Childhood Education (ECE)

In this certificate, you will build on your existing knowledge and skills in early childhood education as you develop in advanced practice. Your focus will include curriculum, assessment, and program administration that aligns with research on the growth and development of young children. You will also investigate early childhood literacy and literature along with the roles of families, caregivers, schools, and communities as partners in early childhood education. This specialization supports your development as an advanced practitioner in the field of early childhood education.

Required Courses - 18 credit hours

- ECE-7002 - Topics in Early Childhood Growth, Development, and Educational Programs
- ECE-7005 - Early Childhood Curriculum and Assessment
- ECE-7007 - Early Childhood Literacy and Literature
- ECE-7009 - Families, Communities, and Schools as Partners in Early Childhood Education
- ECE-7010 - Principles of Early Childhood Education
- ECE-7030 - Topics in Early Childhood Program Administration

English Language Learning (ELL)

The pedagogy of language acquisition is of great importance in not only today's classrooms, but also the businesses and organizations with which we all interact. The English Language Learning (ELL) post-master's certificate will help you to build on your existing knowledge and skills to improve the teaching, assessment, and curriculum development for ELL programs. The final course offers you the opportunity to consider significant issues in ELL education. If you are seeking ELL/ESL certification, you should verify with appropriate state officials that this non-degree certificate meets applicable certification requirements.

Required Courses - 18 credit hours

- ESL-7100 - Second Language Foundations
- ESL-7200 - Teaching English Language Learners
- ESL-7300 - Assessing Diverse Learners
- ESL-7400 - Developing Curriculum for English Language Learners
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- ESL-7600 - Issues in ELL Education

General Education

The General Education certificate program allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 18 credit hours for the certificate in General Education. Students must take at least four education courses from any of the Education Post-Master's Certificate programs offered and may take up to two courses from the Post-Master's Certificate offered in other fields (Psychology, Technology and/or Business) to fulfill their General Education certificate requirements.

Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Recommended Courses - 18 credit hours

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education

- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9600 - Policy Development & Implementation in PK-12 Education

Note

Courses listed are examples and upon acceptance to the program the initial degree plan will include these courses. Students are encouraged to choose their General Education certificate courses based on personal and professional goals and to work with their Academic and Finance Advisor to revise their degree plan.

Instructional Leadership (IL)

Leaders are needed to assist school districts and state educational boards with improvement of instructional capacities in our schools. This Post-Master's Certificate provides a strong background in the supervision of instruction and the ability to assess and interpret data. The Post-Masters Certificate focuses on instructional improvements and reform to enhance student achievement.

Required Courses - 18 credit hours

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education

International Education and Globalization (IEG)

The International Education and Globalization specialization focuses on educational phenomena, practices, institutions, and organizations within different societies and cultures. This specialization includes an exploration of international organizations, policies, initiatives, and challenges faced by international and global practitioners. Further, this specialization prepares individuals to apply the concepts of organizational training, development, and leadership to the design, management, and evaluation of programs, institutions, and organizations. Additionally, this specialization will examine issues, challenges, and opportunities related to culture and society; as well as conflict, mediation, and resolution. Finally, this specialization explores the concepts of diversity, equity, inclusion, and justice in international and global contexts to enhance strategies and policy for practitioners.

Required Courses - 18 credit hours

- IEG-7100 - Introduction to International and Global Education
- IEG-7200 - Perspectives on Culture, Society, and Education
- IEG-7300 - Educational Conflict, Mediation, and Resolution
- IEG-7400 - Globalization and International Education Policy
- IEG-7500 - Ethical Issues and Responsibilities in International and Global Education
- IEG-7600 - Capstone: Theory and Leadership in International Education and Globalization

Leadership in Higher Education (LHE)

This certificate supports your ability to lead in a variety of higher education institutions. You will examine leadership across different functions, such as student services, strategic planning, and academic program and curriculum development, as well as different types of institutions, such as public, private, for profit, and non-profit. You will also explore the leader's role in other institutional operations related to legal and financial considerations.

Required Courses - 18 credit hours

- LHE-7100 - Leadership, Management, and Supervision in Higher Education
- LHE-7200 - Student Services in Higher Education

- LHE-7300 - Legal Issues in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- LHE-7600 - Strategic Planning and Operations in Higher Education

Organizational Leadership (OL)

Designed for professionals aspiring towards leadership roles in education, corporate, government, or community organizations, this Post-Master's Certificate equips Learners with the tools necessary to make things happen in any organization. This certificate concentrates on the strategies to forge alliances, build confidence, and inspire a shared vision. The curriculum is grounded in applied research and provides exploration of issues and resolutions in contemporary organizations.

Required Courses - 18 credit hours

- OL-7100 - Conflict Resolution and Mediation
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- OL-7102 - Leadership Ethics to Attain Organizational Excellence
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- OL-7104 - Leadership in Nonprofit Organizations
- EDL-9500 - Innovation for Change in Educational Organizations

Quantitative Research (QR)

The Post-Master's Certificate in Quantitative Research places an emphasis on acquiring the skills necessary not only to complete statistical calculations but to know how and when to apply and use appropriate statistical designs and methods. This is an 18 credit-hour certificate that will offer students from various disciplines the knowledge and skills to conduct quantitative research needed to measure or evaluate educational programs, learning or school outcomes, or other statistically based inquiries. The course sequence required for this certificate includes foundational level statistics courses, and advanced courses in design, methods, theory, and practice.

Required Courses - 18 credit hours

- EDR-8300 - The Research Process
- EDR-8201 - Statistics I
- EDR-8202 - Statistics II
- EDR-8500 - Advanced Quantitative Methodology and Designs
- EDR-8501 - Introduction to Multi-Level Modeling
- EDR-8502 - Introduction to Instrumentation and Psychometrics

School Safety, Security, and Emergency Management

The school safety, security, and emergency management certificate is designed to allow learners to focus on the three areas unique to the title. Students who feel safe and secure at school are better able to learn by engaging with the curriculum, their teachers, and their peers. This certificate offers K-12 professionals and other related emergency management or district management personnel the opportunity to learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice, and other alternatives to student discipline; and how to contribute, implement and improve school safety plans. Further, a theoretical underpinning of these issues and the needed response will be examined. Learners will demonstrate their proficiency through a capstone project in the final certificate course.

Required Courses - 18 credit hours

- SEM-7100 - Risk Analysis: Threat and Hazard Identification and Risk Assessment
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management

- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- SEM-7400 - Violence Prevention and Response
- SEM-7500 - All-Hazards Response and Recovery
- SEM-7600 - Capstone: Developing Strategies and Policies to Further Safety, Security, and Emergency Management Practices

Social Emotional Learning (SEL)

This post-master's certificate targets mid-career or advanced classroom teachers, school counselors or psychologists, and school/district administrators who desire a more intensive examination of the five core competencies identified by the Collaborative for Academic, Social, and Emotional Learning (CASEL): self-awareness, self-management, responsible decision-making, relationship skills, and social awareness. You will examine how these competencies are applied across classrooms, schools, homes, and communities.

Required Courses - 18 credit hours

- SEL-7100 - Foundations of Social Emotional Learning
- SEL-7200 - Implementing SEL in the Modern Classroom
- SEL-7300 - Integrating SEL into School Culture and Climate
- SEL-7400 - Incorporating SEL with Policy Development and Implementation
- SEL-7500 - Involving Caregivers and Communities
- SEL-7600 - Comprehensive Planning for SEL Initiatives

Special Education (SE)

The Post-Master's Certificate is designed for Learners who work with gifted and disabled students in a variety of settings. The course offerings cover a wide spectrum of issues related to individuals with disabilities, including the development and characteristics of learners, learning differences, and instructional strategies to address the needs of these students. Additionally, the Post-Master's Certificate will provide the skills to plan, assess, and deliver instruction to students with mental, physical, behavioral, learning disabilities, and the gifted student.

Required Courses - 18 credit hours

- SE-7100 - Advanced Topics in Special Education
- SE-7200 - Analyzing Data and Monitoring Student Progress
- SE-7300 - Leadership, Law, and Finance in Special Education
- SE-7400 - Implementing Programs for Students with Intellectual and Learning Disabilities
- SE-7500 - Implementing Programs for Students with Emotional and Behavioral Disorders
- SE-7600 - Advanced Capstone in Special Education

Sport and Athletic Management (SM)

Both coaching and athletic administration are growing as professional disciplines. This program is designed to enhance leadership skills, strengthen teaching and administrative abilities, and apply ethics and values to all aspects of athletics.

The Sport and Athletic Management specialization is for professional educators interested in K-12 athletic administration and offers an outstanding professional development opportunity for those already serving as coaches and athletic administrators by advancing their knowledge and skills in the field.

Courses focus on leadership, legal aspects in athletics, financial analysis, marketing, sports governance, events and facilities management, ethics. Basic concepts are addressed in each course and application of those concepts emphasized. Courses will

have a contemporary focus, emphasizing current problems and opportunities related to the content area. Most courses will emphasize projects and activities directly related to the student's work setting.

Required Courses - 18 credit hours

- SM-7100 - Development of Human Resource Strategies in Intercollegiate Athletics
- SM-7103 - Intercollegiate Sport Governance
- SM-7106 - Legal Aspects of Equity in Intercollegiate Athletics
- SM-7109 - Sport Compliance
- SM-7112 - Advising the Student Athlete
- SM-7115 - Facility Management and Programming

Trauma-Informed Educational Practices (TRA) Specialization

The post-master's certificate will build on fundamental knowledge and skills related to teaching and learning with a focus on specific trauma-informed educational practices. This focus will extend across various educational settings and populations. You will explore the fundamentals of a trauma-informed approach to education, how trauma manifests in different populations and communities, specific trauma-informed strategies for the classroom, and strengthening resilience among both students and educators.

Required Courses - 18 credit hours

- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- TRA-7200 - Linking Theory and Practice to Design Trauma-Sensitive Environments
- TRA-7300 - Social Emotional Learning and the Ethic of Care in Trauma-Sensitive Environments
- TRA-7400 - Relating Educator Dispositions to Learning in Trauma-Sensitive Environments
- TRA-7500 - Culturally Responsive Systems and Restorative Approaches for Building Trauma-Sensitive Environments
- TRA-7600 - Community-wide Trauma and Learning: Next Steps in Advanced Practice and Research

Education Specialist Degree, EdS

Description of Program

The EdS program is designed specifically for professionals who desire continuing education in response to the national and international need for professionals trained to work in diverse organizational settings. This program is tailored for students who aspire to engage in advanced levels of professional practice while increasing leadership and scholarship skills to develop solutions and communicate ideas to diverse stakeholders within a chosen field of study. Each specialization within the EdS prepares students for making informed, ethical decisions and improvements to current educational, organizational, and societal issues.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the EdS.

Learning Outcomes

- Develop skills to support educational practices across diverse instructional and organizational settings
- Communicate with diverse audiences about educational theories, research, and practices
- Analyze professional skills, dispositions, and technology options for learning and educating diverse groups

- Apply evidence-based solutions for addressing educational, organizational, and societal issues
- Analyze current research, theories, and instructional practices in educational and organizational environments

Basis for Admissions

Admission to the Education Specialist (EdS) program requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The EdS Program may be completed in 33 credits. An Academic and Finance Advisor or Enrollment Specialist evaluates each student individually and works with the student to create an academically sound Learning Plan based on prior academics and their professional goals.

The University may accept up to 12 semester credit hours in transfer with a maximum of 9 semester credit hours in transfer eligible toward the specialization courses in the Education Specialist degree for graduate coursework completed at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the EdS program. See the [Transfer Credit Policy](#) for additional information.

Individuals with a previously completed master's degree will meet the basis of admission to the Education Specialist Program. Students enrolled in the Education Specialist program are required to complete foundations, scholarly writing, specialization courses, and the capstone course with a Grade Point Average of 3.00 (B) or higher.

The Education Specialist (EdS) program emphasizes an applied, project based approach to development of appreciable improvements in the body of educational practice. The EdS attracts individuals who are primarily professionals either at the PK-12 level or the higher education level. (Enrollment managers, superintendents, principals, teacher leaders, and education faculty who primarily teach - not do research, educational consultants, trainers in organizations). The EdS capstone focuses on solving a problem in the workplace or in the professional field of education and results in a "product" or solution. This degree is also intended to help students increase their own workplace Leadership Skills.

Time to Completion

The University allows 5 years to complete all education specialist programs of 33 credits or less.

The median time to completion for this program is 23 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 months.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The EdS program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Course Sequence

The EdS in Education requires two Foundations courses, six Specialization courses, two Research courses, and one Capstone course for a total of 33 credit hours.

Both the Education Specialist (EdS) and Educational Specialist in Educational Leadership (EdS-EdL) require all foundations courses and specialization or core courses be completed prior to students starting the capstone course

- EDU-8050 - Foundations of Advanced Graduate Study and Research
- EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5
- Specialization Course 6
- EDR-8300 - The Research Process
- EDR-8400 - Advanced Qualitative Methodology and Designs -or- EDR-8500 - Advanced Quantitative Methodology and Designs
- ED-7053 - Education Specialist Capstone Project

Curriculum and Teaching (CT) Specialization

The nature and purpose of the Curriculum and Teaching specialization is to provide teacher -learners the knowledge, skills, and professional competencies that will enhance their instructional practice and leadership. You will have the opportunity to explore, examine, and evaluate contemporary teaching and instructional practices, including the evaluation of broader curriculum programs.

Specialization Courses – 18 credit hours

- CT-7000 - Developing Instructional Strategies and Curriculum
- CT-7100 - Dispositions of Learner and Teacher
- CT-7200 - Design and Evaluation of Curriculum and Programs
- CT-7300 - Theories and Applications of Instructional Strategies
- CT-7400 - Assessment Practices
- CT-7500 - Advanced Capstone in Curriculum & Teaching

E-Learning (EL) Specialization

This specialization integrates curriculum development, instructional design and course delivery using technology and online learning management systems. The specialization focuses on providing a knowledge base of current research for the planning and implementation of teaching and delivery modalities using instructional design methodologies incorporating educational media.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- EL-7001 - Principles and Practices in E-Learning
- EL-7002 - E-Learning Instructional Strategies
- EL-7003 - Instructional Design and Engaging E-Learning Activities
- EL-7004 - The Online Learner
- EL-7006 - Facilitating Adult Learning Online

- EL-7007 - Developing Online Content Ethically and Legally
- EL-7700 - Leading Online Learning for K-12 Students

Early Childhood Education (ECE) Specialization

In this specialization, you will build on your existing knowledge and skills in early childhood education as you focus on advanced practice. This focus will include curriculum, assessment, and program administration that aligns with research on the growth and development of young children. You will also investigate early childhood literacy and literature along with the roles of families, caregivers, schools, and communities as partners in early childhood education. This specialization supports your development as an advanced practitioner in the field of early childhood education.

Specialization Courses – 18 credit hours

- ECE-7002 - Topics in Early Childhood Growth, Development, and Educational Programs
- ECE-7005 - Early Childhood Curriculum and Assessment
- ECE-7007 - Early Childhood Literacy and Literature
- ECE-7009 - Families, Communities, and Schools as Partners in Early Childhood Education
- ECE-7010 - Principles of Early Childhood Education
- ECE-7030 - Topics in Early Childhood Program Administration

English Language Learning (ELL) Specialization

The pedagogy of language acquisition is of great importance in not only today's classrooms, but also the businesses and organizations with which we all interact. The English Language Learning (ELL) specialization in the EdS-Ed program will help you to build on your existing knowledge and skills to improve the teaching, assessment, and curriculum development for ELL programs. The final course offers you the opportunity to consider significant issues in ELL education. Please note that, if you are seeking ELL/ESL certification, you should verify with appropriate state officials that this specialization meets applicable certification requirements.

Specialization Courses – 18 credit hours

- ESL-7100 - Second Language Foundations
- ESL-7200 - Teaching English Language Learners
- ESL-7300 - Assessing Diverse Learners
- ESL-7400 - Developing Curriculum for English Language Learners
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- ESL-7600 - Issues in ELL Education

General Education Specialization

The General Education specialization allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students may take education courses at the 7000 or 9000 level including up to two courses from other fields (Psychology, Technology and/or Business) to fulfill their specialization requirements. Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Specialization Courses - 18 credit hours

Students will choose 6 courses from the following:

- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice

- EDL-9000 - Educational Leadership Theories
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EL-7001 - Principles and Practices in E-Learning
- SE-7100 - Advanced Topics in Special Education
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions

Note

Courses listed are examples and upon acceptance to the program, the initial degree plan will include these courses. Students are encouraged to choose their specialization courses based on personal and professional goals and to work with their Academic and Finance Advisor to revise their degree plan.

Instructional Leadership (IL) Specialization

Leaders are needed to assist school districts and state educational boards with improvement of instructional capacities in our schools. This specialization provides a strong background in the supervision of instruction and the ability to assess and interpret data. The specialization focuses on instructional improvement and reform to enhance student achievement.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment

Select Three of the Following:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

International Education and Globalization (IEG) Specialization

The International Education and Globalization specialization focuses on educational phenomena, practices, institutions, and organizations within different societies and cultures. This specialization includes an exploration of international organizations, policies, initiatives, and challenges faced by international and global practitioners. Further, this specialization prepares individuals to apply the concepts of organizational training, development, and leadership to the design, management, and evaluation of programs, institutions, and organizations. Additionally, this specialization will examine issues, challenges, and opportunities related to culture and society; as well as conflict, mediation, and resolution. Finally, this specialization explores the concepts of diversity, equity, inclusion, and justice in international and global contexts to enhance strategies and policy for practitioners.

Specialization Courses - 18 credit hours

- IEG-7100 - Introduction to International and Global Education
- IEG-7200 - Perspectives on Culture, Society, and Education
- IEG-7300 - Educational Conflict, Mediation, and Resolution
- IEG-7400 - Globalization and International Education Policy
- IEG-7500 - Ethical Issues and Responsibilities in International and Global Education
- IEG-7600 - Capstone: Theory and Leadership in International Education and Globalization

Leadership in Higher Education (LHE) Specialization

This specialization prepares you to lead in a variety of higher education institutions. You will examine leadership across different functions, such as student services, strategic planning, and academic program and curriculum development, as well as different types of institutions, such as public, private, for profit, and non-profit. You will also explore the leader's role in other institutional operations related to legal and financial considerations.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- LHE-7600 - Strategic Planning and Operations in Higher Education

Select Three of the Following:

- LHE-7200 - Student Services in Higher Education
- LHE-7300 - Legal Issues in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- EDL-9500 - Innovation for Change in Educational Organizations
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence

Organizational Leadership (OL) Specialization

Designed for professionals aspiring towards leadership roles in education, corporate, government, or community organizations, this specialization equips students with the tools necessary to make things happen in any organization. This specialization concentrates on the strategies to forge alliances, build confidence, and inspire a shared vision. This curriculum is grounded in applied research and provides exploration of issues and resolutions in contemporary organizations.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- OL-7100 - Conflict Resolution and Mediation

Required Specialization Courses:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education

- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- OL-7104 - Leadership in Nonprofit Organizations
- LHE-7600 - Strategic Planning and Operations in Higher Education
- OL-7102 - Leadership Ethics to Attain Organizational Excellence
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions

School Safety, Security and Emergency Management (SEM) Specialization

The school safety, security, and emergency management specialization is designed to allow learners to focus on the three areas unique to the specialization title. Students who feel safe and secure at school are better able to learn by engaging with the curriculum, their teachers, and their peers. This specialization offers K-12 professionals and other related emergency management or district management personnel the opportunity to learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice, and other alternatives to student discipline; and how to contribute, implement and improve school safety plans. Further, a theoretical underpinning of these issues and the needed response will be examined. Learners will demonstrate their proficiency through a capstone project in the final specialization course.

Specialization Courses - 18 credit hours

- SEM-7100 - Risk Analysis: Threat and Hazard Identification and Risk Assessment
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- SEM-7400 - Violence Prevention and Response
- SEM-7500 - All-Hazards Response and Recovery
- SEM-7600 - Capstone: Developing Strategies and Policies to Further Safety, Security, and Emergency Management Practices

Social Emotional Learning (SEL) Specialization

The Social Emotional Learning (SEL) specialization is focused on mid-career or advanced classroom teachers, school counselors or psychologists, and school/district administrators who desire a more intensive examination of the five core competencies identified by the Collaborative for Academic, Social, and Emotional Learning (CASEL): self-awareness, self-management, responsible decision-making, relationship skills, and social awareness. From a practitioner's perspective, you will examine how these competencies are applied across classrooms, schools, homes, and communities. While individuals outside of the K-12 school context would benefit from the specialization, the courses do use a K-12 lens.

Specialization Courses – 18 credit hours

- SEL-7100 - Foundations of Social Emotional Learning
- SEL-7200 - Implementing SEL in the Modern Classroom
- SEL-7300 - Integrating SEL into School Culture and Climate
- SEL-7400 - Incorporating SEL with Policy Development and Implementation
- SEL-7500 - Involving Caregivers and Communities
- SEL-7600 - Comprehensive Planning for SEL Initiatives

Special Education (SE) Specialization

The program is designed for students who work with gifted and disabled students in a variety of settings. The course offerings in this specialization cover a wide spectrum of issues related to individuals with disabilities, including the development and characteristics of students, learning differences, and instructional strategies to address the needs of these students. Additionally, the specialization will provide the skills to plan, assess, and deliver instruction to students with mental, physical, behavioral, learning disabilities, and the gifted student.

Specialization Courses – 18 credit hours

- SE-7100 - Advanced Topics in Special Education
- SE-7200 - Analyzing Data and Monitoring Student Progress
- SE-7300 - Leadership, Law, and Finance in Special Education
- SE-7400 - Implementing Programs for Students with Intellectual and Learning Disabilities
- SE-7500 - Implementing Programs for Students with Emotional and Behavioral Disorders
- SE-7600 - Advanced Capstone in Special Education

Sport and Athletic Management (SM) Specialization

The Education Specialist degree with a specialization in Sport and Athletic Management provides educators with leadership expertise in this growing field. The program is designed to allow students the ability to increase their understanding of the field of Sport and Athletic Management through practical application and doctoral research on the influences that impact sports and athletics. The program includes a combination of science-based academics, research methods, and real-world experience with an emphasis on the ever-changing financial, legal, political, and marketing concerns within the sports industry.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- SM-7100 - Development of Human Resource Strategies in Intercollegiate Athletics
- SM-7103 - Intercollegiate Sport Governance
- SM-7106 - Legal Aspects of Equity in Intercollegiate Athletics
- SM-7109 - Sport Compliance
- SM-7112 - Advising the Student Athlete
- SM-7115 - Facility Management and Programming
- SM-7118 - Financial Administration of Sports Facilities and Programs

Trauma-Informed Educational Practices (TRA) Specialization

The education specialist degree will build on fundamental knowledge and skills related to teaching and learning with a focus on specific trauma-informed educational practices. The focus of this degree will extend across various educational settings and populations and further enhance your knowledge of the fundamentals of a trauma-informed approach to education, how trauma manifests in different populations and communities, specific trauma-informed strategies for the classroom, and strengthening resilience among both students and educators.

Specialization Courses - 18 credit hours

- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- TRA-7200 - Linking Theory and Practice to Design Trauma-Sensitive Environments
- TRA-7300 - Social Emotional Learning and the Ethic of Care in Trauma-Sensitive Environments
- TRA-7400 - Relating Educator Dispositions to Learning in Trauma-Sensitive Environments
- TRA-7500 - Culturally Responsive Systems and Restorative Approaches for Building Trauma-Sensitive Environments
- TRA-7600 - Community-wide Trauma and Learning: Next Steps in Advanced Practice and Research

Education Specialist in Educational Leadership, EdS

Description of Program

In this program, you will build on the knowledge, skills, and leadership dispositions acquired through a master's degree and educational practice. You will critically analyze at an advanced level how a broad range of leadership theories, trends, and dispositions can be applied across diverse organizations. You will be prepared to make research-based, ethical decisions that improve issues, systems, and practice within current and emerging educational organizations. While the degree is not specific to PK-12 education, the program does align with the Professional Standards for Educational Leaders (PSEL).

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the EdS-EdL.

Learning Outcomes

- Apply quality standards to enhance instructional rigor and instructional strategies fostering student learning and development and augment teacher professional development
- Analyze the aspects of professional capacity and resource needs for a quality professional learning community promoting an effective and efficient learning environment for all teachers, staff, and students
- Facilitate effective educational leadership vision and integrity through strategic planning involving data-driven decision-making and evidence-based practice
- Evaluate and select strategies to cultivate an inclusive and supportive learning environment to enhance accessibility, community collaboration, and student success
- Synthesize current educational research and theories within evidence-based practice for ongoing school improvement

Basis for Admissions

Admission to the EdS-EdL requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The Education Specialist (EdS) in Educational Leadership (EdL) requires 33 credit hours for degree completion. The EdS-EdL program includes two foundational courses (6 credit hours) and eight core courses (24 credit hours) which must be completed prior to engaging in the final, 3 credit hour capstone course.

The EdS-EdL degree program has the following graduation requirements:

- A minimum of 21 credit hours of graduate instruction must be completed through the University
- Successful completion of all courses with a "B" or better
- Official transcripts on file for all transfer credits accepted by the University

The University may accept up to 12 semester credit hours earned with a grade of "B" or better for graduate coursework completed at an accredited college or university and evaluated to be substantially equivalent in content with the required course work for the EdS-EdL program. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all educational specialist programs of 33 credits or less.

The median time to completion for this program is 23 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 months.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The EdS-EdL program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Course Sequence

The EdS in Educational Leadership requires two Foundations courses, two Core courses, four Specialization courses, two Research courses, and one Capstone course for a total of 33 credit hours.

Both the Education Specialist (EdS) and Educational Specialist in Educational Leadership (EdS-EdL) require all foundations courses and specialization or core courses be completed prior to students starting the capstone course. Students will be able to choose between two specializations (PK-12 and Higher Education). Each specialization has a different set of core specialization courses.

- EDU-8050 - Foundations of Advanced Graduate Study and Research
- EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks
- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- **Required Specialization Courses:**
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- EDR-8300 - The Research Process
- EDR-8400 - Advanced Qualitative Methodology and Designs - OR - EDR-8500 - Advanced Quantitative Methodology and Designs
- ED-7055 - Capstone Project in EdS-EdL

Higher Education Specialization

Specialization Courses - 12 credit hours

- LHE-7300 - Legal Issues in Higher Education
- LHE-7600 - Strategic Planning and Operations in Higher Education
- **Select Two of the Following:**

- LHE-7200 - Student Services in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence
- EDL-9500 - Innovation for Change in Educational Organizations

PK-12 Specialization

Specialization Courses - 12 credit hours

Required Specialization Courses:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education

Select Two of the Following:

- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

Doctor of Education, EdD

Description of Program

The Doctor of Education degree program is designed for professionals who seek to lead improvements in practice within educational organizations. You will integrate theoretical constructs into your considerations of complex professional problems, developing strategies, tactics, and policies not only to improve practice and ensure regulatory compliance, but also with attention to issues of equity, inclusion, social justice, and ethical conduct.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the EdD.

Note: The program sequence below is open to new students and re-entry students gone more than 365 days only. Students who enrolled prior to April 1, 2019 must continue in the program sequence as stated in the catalog under which they enrolled.

Learning Outcomes

- Recommend policies advancing equity and social justice in educational organizations
- Select ethical and regulatory compliant actions supporting the mission and vision of organizations
- Develop leadership skills through the integration of theoretical constructs with professional practice
- Create strategic and tactical plans to improve organizations

- Construct theory-informed decisions for addressing complex problems of practice

Basis for Admissions

Admission to the Doctor of Education program requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution. Examples of acceptable doctoral degrees include doctor of philosophy (PhD), and doctor of education (EdD).

In addition to general requirements for admission to an EdD program, applicants to the EdD program with specialization in **Nursing Education** must provide a copy of the following:

- A valid and active RN license from the United States
- A master's degree in nursing (MSN)

Degree Requirements

The EdD Program requires 48 credits for degree completion. Students who choose the Nursing Education specialization must take two additional specialization courses for a total of 54 credit hours. Additional credit hours may be allowed as needed to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- Individuals with a previously completed master's degree will meet the basis of admission to the Doctor of Education Program.
- Doctoral courses are comprised of methods, the pre-candidacy prospectus, and the dissertation with a Grade Point Average of 3.00 (B) or higher.
- EdD students must demonstrate competency in specific subject areas prior to enrolling in any of the specialization or elective courses.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the EdD program. See the [Transfer Credit Policy](#) for additional information.

Note: Students who complete the University's EdS program may be eligible to apply up to 30 credits from the EdS program to the Sanford College of Education's Doctoral programs. School Dean (or their designee) approval is required to determine number of applicable credit hours from EdS to the selected doctoral program.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding the PhD in MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9911A - Applied Doctoral Introduction
- DIS-9912A - Applied Doctoral Proposal
- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 33 months (36 months for Nursing Education specialization).

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 33 months (36 months for Nursing Education specialization).

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The EdD program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The Doctor of Education (EdD) program emphasizes an applied, project based approach to development of appreciable improvements in the body of educational practice. The EdD attracts individuals who are primarily professional administrators either at the PK-12 level or the higher education level. (Deans, enrollment managers, superintendents, principals, teacher leaders, and education faculty who primarily teach - not do research, educational consultants, trainers in organizations). EdD research focuses on solving a problem in the workplace or in the professional field of education and results in a dissertation, but also produces a "product" or solution. This degree is also intended to help students increase their own workplace Leadership Skills. For EdD students, all the statistics they will need is embedded into the Research Courses. An oral presentation of the dissertation is required.

All foundation competency courses, specialization courses, and method coursework must be completed prior to students entering into the Comprehensive Assessment. Upon successful completion of the Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus, students become official Doctoral Candidates and may move onward to the dissertation coursework which is completed sequentially.

In the Doctor of Education, specializations such as Curriculum and Teaching (CT), Early Childhood Education (ECE), Educational Leadership (EL), English Language Learning (ELL), Instructional Leadership (IL), Special Education (SE), and Sport Management (SM) have a curriculum focused on the PK-12 environment.

- EDU-8050 - Foundations of Advanced Graduate Study and Research
- EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5 (**Nursing Education specialization only**)
- Specialization Course 6 (**Nursing Education specialization only**)
- EDR-8200 - Scholarly Literature Review
- EDR-8300 - The Research Process
- EDR-8201 - Statistics I
- EDR-8400 - Advanced Qualitative Methodology and Designs - or - EDR-8500 - Advanced Quantitative Methodology and Designs

- EDR-8206 - Applied Qualitative Analysis - or - EDR-8202 - Statistics II
- CMP-9601E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus
- DIS-9911A - Applied Doctoral Introduction
- DIS-9912A - Applied Doctoral Proposal
- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Curriculum and Teaching (CT) Specialization

The nature and purpose of the Curriculum and Teaching specialization is to provide teacher -learners the knowledge, skills, and professional competencies that will enhance their instructional practice and leadership. You will have the opportunity to explore, examine, and evaluate contemporary teaching and instructional practices, including the evaluation of broader curriculum programs.

Specialization Courses – 12 credit hours

- CT-7000 - Developing Instructional Strategies and Curriculum
- CT-7100 - Dispositions of Learner and Teacher
- CT-7200 - Design and Evaluation of Curriculum and Programs
- CT-7400 - Assessment Practices

E-Learning (EL) Specialization

This specialization integrates curriculum development, instructional design and course delivery using technology and online learning management systems. The specialization focuses on providing a knowledge base of current research for the planning and implementation of teaching and delivery modalities using instructional design methodologies incorporating educational media.

Specialization Courses - 12 credit hours

Select 4 courses from the following:

- EL-7001 - Principles and Practices in E-Learning
- EL-7002 - E-Learning Instructional Strategies
- EL-7003 - Instructional Design and Engaging E-Learning Activities
- EL-7004 - The Online Learner
- EL-7006 - Facilitating Adult Learning Online
- EL-7007 - Developing Online Content Ethically and Legally
- EL-7700 - Leading Online Learning for K-12 Students

Early Childhood Education (ECE) Specialization

In this specialization, you will build on your existing knowledge and skills in early childhood education as you focus on leadership in practice. This focus will include curriculum, assessment, and program administration that aligns with research on the growth and development of young children. You will also investigate the roles of families, caregivers, schools, and communities as partners in early childhood education. This specialization supports your development as a leader focused on problems of practice in the field of early childhood education.

Specialization Courses – 12 credit hours

- ECE-7002 - Topics in Early Childhood Growth, Development, and Educational Programs
- ECE-7005 - Early Childhood Curriculum and Assessment
- ECE-7009 - Families, Communities, and Schools as Partners in Early Childhood Education

- ECE-7030 - Topics in Early Childhood Program Administration

English Language Learning (ELL) Specialization

The pedagogy of language acquisition is of great importance in not only today's classrooms, but also the businesses and organizations with which we all interact. The English Language Learning (ELL) specialization within the EdD-Ed program contributes to your preparation as an advanced practitioner and leader in the field. You will examine the teaching, assessing, and developing curriculum for English language learners through the eyes of an advanced practitioner or local leader. In the final course, you will consider significant issues in ELL education, and one of these issues might inspire your dissertation-in-practice. Please note that, if you are seeking ELL/ESL certification, you should verify with appropriate state officials that this specialization meets applicable certification requirements.

Specialization Courses – 12 credit hours

- ESL-7200 - Teaching English Language Learners
- ESL-7300 - Assessing Diverse Learners
- ESL-7400 - Developing Curriculum for English Language Learners
- ESL-7600 - Issues in ELL Education

General Education Specialization

The General Education specialization allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of 12 credit hours for the specialization in General Education. Students may take education courses at the 7000 or 9000 level including up to two courses from other fields (Psychology, Technology and/or Business) to fulfill their specialization requirements. Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Specialization Courses - 12 credit hours

Students are required to take 4 specializations courses. Students can choose from any of the following specialization courses listed below.

- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9000 - Educational Leadership Theories
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EL-7001 - Principles and Practices in E-Learning
- SE-7100 - Advanced Topics in Special Education
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions

Note

Courses listed are examples and upon acceptance to the program the initial degree plan will include these courses. Students are encouraged to choose their specialization courses based on personal and professional goals and to work with their Academic and Finance Advisor to revise their degree plan.

Instructional Leadership (IL) Specialization

Leaders are needed to assist school districts and state educational boards with improvement of instructional capacities in our schools. This specialization provides a strong background in the supervision of instruction and the ability to assess and interpret data. The specialization focuses on instructional improvements and reform to enhance student achievement.

Specialization Courses – 12 credit hours

Students are required to take 4 specializations courses. Students will be required to take the first three specialization courses and then choose one of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment

Select One of the Following:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

International Education and Globalization (IEG) Specialization

The focus of the International Education and Globalization specialization is on educational phenomena, practices, institutions, and organizations within different societies and cultures. This specialization includes an exploration of international organizations, initiatives, ethics, and challenges faced by international and global practitioners. Further, this specialization prepares individuals to apply the concepts of organizational training, development, and leadership to the design, management, and evaluation of programs, institutions, and organizations. Additionally, this specialization will examine issues, challenges, and opportunities related to culture and society; as well as conflict, mediation, and resolution. Finally, this specialization explores the concepts of diversity, equity, inclusion, and justice in international and global contexts to enhance strategies and policy for practitioners.

Specialization Courses - 12 credit hours

- IEG-7100 - Introduction to International and Global Education
- IEG-7200 - Perspectives on Culture, Society, and Education
- IEG-7300 - Educational Conflict, Mediation, and Resolution
- IEG-7500 - Ethical Issues and Responsibilities in International and Global Education

Leadership in Higher Education (LHE) Specialization

This specialization prepares you to lead in a variety of higher education institutions. You will examine leadership across different functions, such as student services, strategic planning, and academic program and curriculum development, as well as different types of institutions, such as public, private, for profit, and non-profit. You will also explore the leader's role in other institutional operations related to legal and financial considerations.

Specialization Courses – 12 credit hours

Students are required to take 4 specializations courses. Students will be required to take the first three specialization courses and then choose one of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- LHE-7600 - Strategic Planning and Operations in Higher Education

Select One of the Following:

- LHE-7200 - Student Services in Higher Education
- LHE-7300 - Legal Issues in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- EDL-9500 - Innovation for Change in Educational Organizations
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence

Nursing Education (NUR) Specialization

The principal mission of this specialization is to prepare nurse educators and leaders in nursing education. In this interdisciplinary specialization, students take courses in the Sanford College of Education and the School of Health Professions, Department of Nursing. The recent shortage of nursing faculty has resulted in a scarcity of enrollment vacancies in U.S. nursing programs. It is this gap that the University's Nursing Education specialization is designed to fill.

Note: Students who choose the Nursing Education specialization must take two additional specialization courses for a total of 54 credit hours.

Specialization Courses – 18 credit hours

- NUR-7000 - Nursing Education Theories and Concepts
- NUR-7001 - Future of Nursing Education - Challenges for the Educational Leader
- NUR-7002 - Nurse as Educator
- NUR-7003 - Evidenced-Based Teaching in Nursing
- NUR-7004 - Teaching with Technology in Nursing Education
- NUR-7005 - Assessment and Evaluation in Nursing Education

Organizational Leadership (OL) Specialization

Designed for professionals aspiring towards leadership roles in education, corporate, government, or community organizations, this specialization equips students with the tools necessary to make things happen in any organization. This specialization concentrates on the strategies to forge alliances, build confidence, and inspire a shared vision. This curriculum is grounded in applied research and provides exploration of issues and resolutions in contemporary organizations.

Specialization Courses – 12 credit hours

Students are required to take 4 specializations courses. Students will be required to take the first three specialization courses and then choose one of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- OL-7100 - Conflict Resolution and Mediation

Select One of the Following:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment

- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- OL-7104 - Leadership in Nonprofit Organizations
- LHE-7600 - Strategic Planning and Operations in Higher Education
- OL-7102 - Leadership Ethics to Attain Organizational Excellence
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SEL-7300 - Integrating SEL into School Culture and Climate
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions

School Safety, Security and Emergency Management (SEM) Specialization

The school safety, security, and emergency management specialization is designed to allow learners to focus on the three areas unique to the specialization title. Students who feel safe and secure at school are better able to learn by engaging with the curriculum, their teachers, and their peers. This specialization offers K-12 professionals and other related emergency management or district management personnel the opportunity to learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice, and other alternatives to student discipline; and how to contribute, implement and improve school safety plans.

Specialization Courses - 12 credit hours

- SEM-7100 - Risk Analysis: Threat and Hazard Identification and Risk Assessment
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management
- SEM-7400 - Violence Prevention and Response
- SEM-7500 - All-Hazards Response and Recovery

Social Emotional Learning (SEL) Specialization

The Social Emotional Learning (SEL) specialization is focused on mid-career or advanced classroom teachers, school counselors or psychologists, and school/district administrators who desire a more intensive examination of the five core competencies identified by the Collaborative for Academic, Social, and Emotional Learning (CASEL): self-awareness, self-management, responsible decision-making, relationship skills, and social awareness. From a practitioner's perspective, you will examine how these competencies are applied across classrooms, schools, homes, and communities. While individuals outside of the K-12 school context would benefit from the specialization, the courses do use a K-12 lens.

Specialization Courses – 12 credit hours

To fulfill the four-course elective requirement, students are required to take SEL-7100 and SEL-7600, with a choice of two of the remaining four courses in between. SEL-7100 should be taken as the first course and SEL-7600 should be taken as the last course.

Required Course:

- SEL-7100 - Foundations of Social Emotional Learning

Select 2 courses from the following:

- SEL-7200 - Implementing SEL in the Modern Classroom
- SEL-7300 - Integrating SEL into School Culture and Climate
- SEL-7400 - Incorporating SEL with Policy Development and Implementation
- SEL-7500 - Involving Caregivers and Communities

Required Course:

- SEL-7600 - Comprehensive Planning for SEL Initiatives

Special Education (SE) Specialization

The program is designed for students who work with gifted and disabled students in a variety of settings. The course offerings in this specialization cover a wide spectrum of issues related to individuals with disabilities, including the development and characteristics of students, learning differences, and instructional strategies to address the needs of these students. Additionally, the specialization will provide the skills to plan, assess, and deliver instruction to students with mental, physical, behavioral, learning disabilities, and the gifted student.

Specialization Courses – 12 credit hours

- SE-7100 - Advanced Topics in Special Education
- SE-7200 - Analyzing Data and Monitoring Student Progress
- SE-7300 - Leadership, Law, and Finance in Special Education
- SE-7500 - Implementing Programs for Students with Emotional and Behavioral Disorders

Sport and Athletic Management Specialization

The Doctor of Education degree with a specialization in Sport and Athletic Management provides educators with leadership expertise in this growing field. The program is designed to allow students the ability to increase their understanding of the field of Sport and Athletic Management through practical application and doctoral research on the influences that impact sports and athletics. The program includes a combination of science-based academics, research methods, and real-world experience with an emphasis on the ever-changing financial, legal, political, and marketing concerns within the sports industry.

Specialization Courses – 12 credit hours

Select 4 courses from the following:

- SM-7100 - Development of Human Resource Strategies in Intercollegiate Athletics
- SM-7103 - Intercollegiate Sport Governance
- SM-7106 - Legal Aspects of Equity in Intercollegiate Athletics
- SM-7109 - Sport Compliance
- SM-7112 - Advising the Student Athlete
- SM-7115 - Facility Management and Programming
- SM-7118 - Financial Administration of Sports Facilities and Programs

Trauma-Informed Educational Practices (TRA) Specialization

The EdD is an applied practitioner degree, which affords students the opportunity to implement change and practices within their own environment. This degree will build on practice-based knowledge and skills related to teaching and learning with a focus on specific trauma-informed educational practices. This applied study will extend across various educational settings and populations. You will explore the fundamentals of practice in trauma-informed approaches to education, explore how trauma manifests in different populations and communities, specific trauma-informed strategies for the classroom, and practices common to strengthening resilience among both students and educators.

Specialization Courses - 12 credit hours

- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- TRA-7300 - Social Emotional Learning and the Ethic of Care in Trauma-Sensitive Environments
- TRA-7400 - Relating Educator Dispositions to Learning in Trauma-Sensitive Environments
- TRA-7500 - Culturally Responsive Systems and Restorative Approaches for Building Trauma-Sensitive Environments

Doctor of Education in Educational Leadership, EdD

Description of Program

The Doctor of Education (EdD) degree in Educational Leadership (EdL) is a practitioner-researcher degree designed to prepare educational leaders who desire to improve educational practice across private and public sectors of PK-12, higher education, military, and corporate learning organizations. You will acquire skills to ethically address the complex problems within educational practice using data-driven decision-making and other conceptual frames linking systematic inquiry with innovative solutions. The degree culminates in the completion of empirical research with direct implications for educational practice.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding the PhD in MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9911A - Applied Doctoral Introduction
- DIS-9912A - Applied Doctoral Proposal

- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Learning Outcomes

- Illustrate effective educational leadership vision and integrity through strategic planning involving data-driven decision-making and evidence-based practice
- Determine the aspects of professional capacity and resource needs for a quality professional learning community within a sector-specific learning organization
- Develop effective leadership traits to improve educational practice across diverse learning organizations within public and private sectors
- Devise informed evidence-based solutions to address a complex problem from educational practice
- Conduct empirical research to address a complex problem within educational practice

Basis for Admissions

Admission requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The Doctor of Education (EdD) in Educational Leadership (EdL) requires 54 credit hours for degree completion. Coursework includes foundations, educational leadership, research methods, the pre-candidacy prospectus, and the dissertation. Additional credit hours may be allowed as needed to complete dissertation research in alignment with the Satisfactory Academic Progress (SAP) and Academic Maximum Time Frame policies. Students who do not complete their program within these requirements may be dismissed.

The EdD-EdL degree program has the following graduation requirements:

- A minimum of 42 credit hours of graduate instruction must be completed through the University
- Official transcripts on file for all transfer credits accepted by the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- University Approval of Dissertation Manuscript and Oral Presentation completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

The University may accept up to 12 semester credit hours earned with a grade of "B" or better for graduate coursework completed at an accredited college or university and evaluated to be substantially equivalent in content with the required course work for the EdD-EdL program.

Note: Students who complete the University's EdS program may be eligible to apply up to 30 credits from the EdS program to the Sanford College of Education's Doctoral programs. School Dean (or their designee) approval is required to determine number of applicable credit hours from EdS to the selected doctoral program.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation

completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding the PhD in MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9911A - Applied Doctoral Introduction
- DIS-9912A - Applied Doctoral Proposal
- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 41 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 35 months.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The EdD-EdL program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

This program can be completed with a minimum of 54 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The EdD-EDL has two specializations (PK-12 and Higher Education). All EdD-EDL students will take the first two introductory courses and will then take their remaining specialization courses (four required and two electives courses) within the PK-12 specialization, and EdD-EDL students in Higher Education will then take their remaining specialization courses (four required and two electives courses) within the Higher Education specialization.

All EdD-EDL students, regardless of specialization, will then take a series of research courses, a comprehensive examination course, and a series of dissertation courses.

- EDU-8050 - Foundations of Advanced Graduate Study and Research
- EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks

Required Specialization Courses:

- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5

- Specialization Course 6
- EDR-8200 - Scholarly Literature Review
- EDR-8300 - The Research Process
- EDR-8201 - Statistics I
- EDR-8400 - Advanced Qualitative Methodology and Designs - or - EDR-8500 - Advanced Quantitative Methodology and Designs
- EDR-8206 - Applied Qualitative Analysis - or - EDR-8202 - Statistics II
- CMP-9602E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus
- DIS-9911A - Applied Doctoral Introduction
- DIS-9912A - Applied Doctoral Proposal
- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Higher Education Specialization

Specialization Courses - 18 credit hours

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- LHE-7300 - Legal Issues in Higher Education
- LHE-7600 - Strategic Planning and Operations in Higher Education

Select Two of the Following:

- LHE-7200 - Student Services in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence
- EDL-9500 - Innovation for Change in Educational Organizations

PK-12 Specialization

Specialization Courses - 18 credit hours

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education

Select Two of the Following:

- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

Doctor of Education in Instructional Design, EdD

Description of Program

Instructional design (ID) is a craft – a blend of science and art. Students who earn the Doctor of Education in Instructional Design (EdD-ID) will manage complex design projects and apply advanced design skills within work settings spanning all industry sectors. The EdD-ID program outcomes are aligned to the advanced and managerial ID competencies established by the International Board of Standards for Training, Performance, and Instruction (IBSTPI), the Association for Talent Development (ATD), and the standards of the Association for Educational Communication and Technology (AECT). These competencies and standards include planning, analyses, universal design, development, rapid prototyping, implementation, evaluation, and project management of instructional and training interventions.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the EdD-ID.

****Note:** Program availability may vary by state - please contact the Enrollment Office for more information**

Learning Outcomes

- Manage complex design processes and products collaboratively with diverse stakeholders.
- Evaluate technologies used in instructional and training solutions.
- Examine different principles, theories, and models related to instructional design.
- Develop strategies to address ethical, legal, and political factors influencing instructional and training solutions.
- Improve professional practice of instructional design.

Basis for Admissions

Admission requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The Doctor of Education in Instructional Design (EdD-ID) requires 54 credit hours for degree completion. Coursework includes foundations, educational leadership, research methods, the pre-candidacy prospectus, and the dissertation. Additional credit hours may be allowed as needed to complete dissertation research in alignment with the Satisfactory Academic Progress (SAP) and Academic Maximum Time Frame policies. Students who do not complete their program within these requirements may be dismissed.

The EdD-ID degree program has the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Successful completion of all courses with a "B" or better
- Official transcripts on file for all transfer credits accepted by the University

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer

credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the EdD program. See the [Transfer Credit Policy](#) for additional information.

Note: Students who complete the University's EdS program may be eligible to apply up to 30 credits from the EdS program to the Sanford College of Education's Doctoral programs. School Dean (or their designee) approval is required to determine number of applicable credit hours from EdS to the selected doctoral program.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Doctor of Philosophy in Education, PhD

Description of Program

The Doctor of Philosophy in Education (PhD) program prepares you for significant contributions to the body of knowledge in the broad field of education as well as a more narrowed area of specialization within the field. You will start with an understanding of theoretical frameworks, as theory is the foundation of the PhD program. You will build knowledge, skills, and dispositions in the content of your specialization as well as research more generally, culminating in your dissertation research. Along the way, you will examine ethical principles, professional standards, and opportunities for sharing your research through presentations and publications.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the PhD-Ed.

Learning Outcomes

- Develop deep knowledge of educational systems, theories, and research in an area of expertise
- Interpret theories, research, and ideas for different audiences through multiple methods of communication
- Integrate ethical principles and professional standards for a specific discipline within the field
- Conduct autonomous or collaborative research using high-level analytical skills
- Contribute to the body of knowledge specific to a discipline within the field

Basis for Admissions

Admission to the Doctor of Philosophy in Education requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation.

Degree Requirements

The PhD Program may be completed in 60 semester credit hours. Additional credit hours may be allowed as needed to complete dissertation research in alignment with the Satisfactory Academic Progress (SAP) and Academic Maximum Time Frame policies. Students who do not complete their program within these requirements may be dismissed.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the PhD program.

Note: Students who complete the University's EdS program may be eligible to apply up to 30 credits from the EdS program to the Sanford College of Education's Doctoral programs. School Dean (or their designee) approval is required to determine number of applicable credit hours from EdS to the selected doctoral program.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7-year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;

- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 45 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 37 months.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The PhD program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Research and Dissertation

The University has developed a logical step-by-step process that assists in completing the dissertation. The University provides a detailed Doctoral Student Experience (DSE) Manual that explains the process and the University's dissertation support structure.

The PhD doctoral research courses, the PhD comprehensive course and the PhD dissertation courses are specifically designed as a guide through the process in an orderly and meaningful fashion and lead to the oral defense.

The dissertation is the capstone academic achievement of the PhD. The PhD dissertation is a scholarly documentation of the research. To earn the PhD the student must demonstrate the ability, motivation, and commitment and the University will provide the faculty, the academic support and process to assist with the attainment of high academic goals. There is an oral dissertation defense.

The PhD research is aimed at contributing to the body of research knowledge - either new research or adding to research already studied in the field. PhD students take EDR-8201 - Statistics I and EDR-8202 - Statistics II as part of their program of study.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD degree in Education focuses on enhancing the body of knowledge of education. The PhD is intended for the student who wishes to primarily teach in higher education, conduct educational research or work in the area of educational research (full time faculty dedicated to teaching AND research, institutional researchers, etc.) The PhD research is aimed at contributing to the body of research knowledge - either new research or adding to research already completed in the field.

*The elective course can be satisfied with any doctoral level Sanford College of Education course. The course listed in the degree plan can be changed upon request. Students should contact their Academic and Finance Advisor for assistance.

This program can be completed with a minimum of 60 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Curriculum and Teaching (CT) Specialization

The nature and purpose of the Curriculum and Teaching specialization within the PhD program is to provide teacher -learners the knowledge, skills, and professional competencies that will enhance their contributions to the theoretical knowledge of the field. You will have the opportunity to explore, examine, and evaluate contemporary teaching and instructional practices, including the evaluation of broader curriculum programs.

Specialization Courses – 18 credit hours

- CT-7000 - Developing Instructional Strategies and Curriculum
- CT-7100 - Dispositions of Learner and Teacher
- CT-7200 - Design and Evaluation of Curriculum and Programs
- CT-7300 - Theories and Applications of Instructional Strategies
- CT-7400 - Assessment Practices
- CT-7500 - Advanced Capstone in Curriculum & Teaching

E-Learning (EL) Specialization

This specialization integrates curriculum development, instructional design and course delivery using technology and online learning management systems. The specialization focuses on providing a knowledge base through current research and analysis of the planning and implementation of teaching and delivery modalities. Coursework focuses on instructional design methodologies incorporating educational media.

Specialization Courses – 18 credit hours

Select 6 courses from the following:

- EL-7001 - Principles and Practices in E-Learning
- EL-7002 - E-Learning Instructional Strategies
- EL-7003 - Instructional Design and Engaging E-Learning Activities
- EL-7004 - The Online Learner
- EL-7006 - Facilitating Adult Learning Online
- EL-7007 - Developing Online Content Ethically and Legally
- EL-7700 - Leading Online Learning for K-12 Students

Early Childhood Education (ECE) Specialization

In this specialization, you will build on the foundational principles of early childhood education as you focus on research and theory. This focus will include curriculum, assessment, and program administration that aligns with theories about the growth and development of young children. You will also investigate early childhood literacy and literature along with the roles of families, caregivers, schools, and communities. This specialization supports your future work as a researcher contributing to the broader body of knowledge around early childhood education.

Specialization Courses – 18 credit hours

- ECE-7002 - Topics in Early Childhood Growth, Development, and Educational Programs
- ECE-7005 - Early Childhood Curriculum and Assessment
- ECE-7007 - Early Childhood Literacy and Literature
- ECE-7009 - Families, Communities, and Schools as Partners in Early Childhood Education
- ECE-7010 - Principles of Early Childhood Education
- ECE-7030 - Topics in Early Childhood Program Administration

English Language Learning (ELL) Specialization

The English Language Learning (ELL) specialization within the PhD program contributes to your preparation as a research scholar in the field. You will build on your existing knowledge and skills in preparation for continued research around teaching, assessing, and developing curriculum for English language learners. The final course offers you the opportunity to consider significant issues in ELL education, and one of these issues might inspire your dissertation topic and your future research agenda. Please note that, if you are seeking ELL/ESL certification, you should verify with appropriate state officials that this specialization meets applicable certification requirements.

Specialization Courses – 18 credit hours

- ESL-7100 - Second Language Foundations
- ESL-7200 - Teaching English Language Learners
- ESL-7300 - Assessing Diverse Learners
- ESL-7400 - Developing Curriculum for English Language Learners
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- ESL-7600 - Issues in ELL Education

General Education Specialization

The General Education specialization allows students to select courses from a broad range of electives to fit their personal and professional goals.

Students must complete a minimum of six specialization courses and one elective course. Students may take education courses at the 7000 or 9000 level including up to two courses from other fields (Psychology, Technology and/or Business) to fulfill their specialization requirements. Additional courses (i. e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

Specialization Courses - 18 credit hours

Students will take six of any of the following courses within the School of Education. Additional courses (i.e., more than two courses) from other disciplines may be considered to fill this requirement, with Dean approval.

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EL-7001 - Principles and Practices in E-Learning
- SE-7100 - Advanced Topics in Special Education
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions

Instructional Leadership (IL) Specialization

The program provides knowledge in educational leadership research, theory, and practices applicable to higher education. Research and analysis are conducted to identify future directions of national and global higher education focused on educational change through policy development and educational reform.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment

Select Three of the Following:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SE-7300 - Leadership, Law, and Finance in Special Education
- SEL-7600 - Comprehensive Planning for SEL Initiatives

International Education and Globalization (IEG) Specialization

The International Education and Globalization specialization focuses on educational phenomena, practices, institutions, and organizations within different societies and cultures. This specialization includes an exploration of international organizations, policies, initiatives, and challenges faced by international and global practitioners. Further, this specialization prepares individuals to apply the concepts of organizational training, development, and ethical leadership to the design, management, and evaluation of programs, institutions, and organizations. Additionally, this specialization will examine issues, challenges, and opportunities related to culture and society; as well as conflict, mediation, and resolution. Finally, this specialization explores the concepts of diversity, equity, inclusion, and justice in international and global contexts. For the Ph.D. student, this includes an exploration of policy and related theories of leadership.

Specialization Courses - 18 credit hours

- IEG-7100 - Introduction to International and Global Education
- IEG-7200 - Perspectives on Culture, Society, and Education
- IEG-7300 - Educational Conflict, Mediation, and Resolution
- IEG-7400 - Globalization and International Education Policy
- IEG-7500 - Ethical Issues and Responsibilities in International and Global Education
- IEG-7600 - Capstone: Theory and Leadership in International Education and Globalization

Leadership in Higher Education (LHE) Specialization

This specialization prepares you to lead in a variety of higher education institutions. You will examine leadership across different functions, such as student services, strategic planning, and academic program and curriculum development, as well as different types of institutions, such as public, private, for profit, and non-profit. You will also explore the leader's role in other institutional operations related to legal and financial considerations.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- LHE-7600 - Strategic Planning and Operations in Higher Education

Select Three of the Following:

- LHE-7200 - Student Services in Higher Education
- LHE-7300 - Legal Issues in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- EDL-9500 - Innovation for Change in Educational Organizations
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence

Organizational Leadership (OL) Specialization

Designed for professionals aspiring towards leadership roles in education, corporate, government, or community organizations, this specialization equips students with the tools necessary to make things happen in any organization. This specialization concentrates on the strategies to forge alliances, build confidence, and inspire a shared vision. This curriculum is based in applied research, providing exploration of issues and resolutions in contemporary organizations and the opportunity to contribute new knowledge in the field.

Specialization Courses – 18 credit hours

Students will be required to take the first three specialization courses and then choose three of the remaining specialization courses listed below.

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- OL-7100 - Conflict Resolution and Mediation

Select Three of the Following:

- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education
- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

School Safety, Security and Emergency Management (SEM) Specialization

The school safety, security, and emergency management specialization is designed to allow learners to focus on the three areas unique to the specialization title. Students who feel safe and secure at school are better able to learn by engaging with the curriculum, their teachers, and their peers. This specialization offers K-12 professionals and other related emergency management or district management personnel the opportunity to learn about diverse topics such as technologies to manage safety, security, and emergencies; threat assessments of people and facilities; restorative justice, and other alternatives to student discipline; and how to contribute, implement and improve school safety plans. Further, a theoretical underpinning of these issues and the needed response will be examined. Learners will demonstrate their proficiency through a capstone project in the final specialization course.

Specialization Courses - 18 credit hours

- SEM-7100 - Risk Analysis: Threat and Hazard Identification and Risk Assessment
- SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management

- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management
- SEM-7400 - Violence Prevention and Response
- SEM-7500 - All-Hazards Response and Recovery
- SEM-7600 - Capstone: Developing Strategies and Policies to Further Safety, Security, and Emergency Management Practices

Social Emotional Learning (SEL) Specialization

The Social Emotional Learning (SEL) specialization is focused on mid-career or advanced classroom teachers, school counselors or psychologists, and school/district administrators who desire a more intensive examination of the five core competencies identified by the Collaborative for Academic, Social, and Emotional Learning (CASEL): self-awareness, self-management, responsible decision-making, relationship skills, and social awareness. From a practitioner's perspective, you will examine how these competencies are applied across classrooms, schools, homes, and communities. While individuals outside of the K-12 school context would benefit from the specialization, the courses do use a K-12 lens.

Specialization Courses – 18 credit hours

- SEL-7100 - Foundations of Social Emotional Learning
- SEL-7200 - Implementing SEL in the Modern Classroom
- SEL-7300 - Integrating SEL into School Culture and Climate
- SEL-7400 - Incorporating SEL with Policy Development and Implementation
- SEL-7500 - Involving Caregivers and Communities
- SEL-7600 - Comprehensive Planning for SEL Initiatives

Special Education (SE) Specialization

The program is designed for students who work with gifted and disabled students in a variety of settings. The course offerings in this specialization cover a wide spectrum of issues related to individuals with disabilities, including the development and characteristics of students, learning differences, and instructional strategies to address the needs of these students. Additionally, the specialization will provide the skills to plan, assess, and deliver instruction to students with mental, physical, behavioral, learning disabilities, and the gifted student, using analysis of contemporary research.

Specialization Courses – 18 credit hours

- SE-7100 - Advanced Topics in Special Education
- SE-7200 - Analyzing Data and Monitoring Student Progress
- SE-7300 - Leadership, Law, and Finance in Special Education
- SE-7400 - Implementing Programs for Students with Intellectual and Learning Disabilities
- SE-7500 - Implementing Programs for Students with Emotional and Behavioral Disorders
- SE-7600 - Advanced Capstone in Special Education

Sport and Athletic Management (SM) Specialization

The Doctor of Philosophy in Sport and Athletic Management is a rigorous, research-based degree program requiring students to apply educational concepts and management principles in the planning, organizing, leading, and directing of sports and athletics. Emphasis is placed on the production, facilitation, promotion, and organization of sport products and services. Because this growing field requires scholar-practitioners with proficiency across a wide range of skills, the curriculum allows for a multifaceted exploration aligned with industry standards. In this program, students will further their knowledge of competencies in athletic administration and coaching; explore working problems within the profession to discern solutions; and build an understanding of educational theories related to this field.

Specialization Courses - 18 credit hours

Select 6 courses from the following:

- SM-7100 - Development of Human Resource Strategies in Intercollegiate Athletics
- SM-7103 - Intercollegiate Sport Governance
- SM-7106 - Legal Aspects of Equity in Intercollegiate Athletics
- SM-7109 - Sport Compliance
- SM-7112 - Advising the Student Athlete
- SM-7115 - Facility Management and Programming
- SM-7118 - Financial Administration of Sports Facilities and Programs

Trauma-Informed Educational Practices (TRA) Specialization

The PhD degree is a theoretically-driven degree, which asks students to explore and integrate components of theoretical, fundamental knowledge related to teaching and learning with a focus on specific trauma-informed educational practices. This exploration will extend across various educational settings and populations and will examine the theoretical fundamentals of a trauma-informed approach to education, how trauma manifests in different populations and communities, specific trauma-informed strategies for the classroom, and theory which supports strengthening resilience among both students and educators.

Specialization Courses - 18 Credit Hours

- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- TRA-7200 - Linking Theory and Practice to Design Trauma-Sensitive Environments
- TRA-7300 - Social Emotional Learning and the Ethic of Care in Trauma-Sensitive Environments
- TRA-7400 - Relating Educator Dispositions to Learning in Trauma-Sensitive Environments
- TRA-7500 - Culturally Responsive Systems and Restorative Approaches for Building Trauma-Sensitive Environments
- TRA-7600 - Community-wide Trauma and Learning: Next Steps in Advanced Practice and Research

Doctor of Philosophy in Educational Leadership, PhD

Description of Program

The Doctor of Philosophy (PhD) degree in Educational Leadership (EdL) is a theoretical research degree designed to prepare educational leaders who desire to improve educational policy and research across private and public sectors of PK-12, higher education, military, and corporate learning organizations. You will acquire skills to ethically address the complex problems within educational practice using data-driven decision-making and other theoretical frames linking systematic inquiry with innovative, research-based solutions. The degree culminates in the completion of empirical dissertation research with direct implications for educational theory and policy.

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the PhD-EdL.

Learning Outcomes

- Examine educational leadership, research, and policy from practice-based, evidence-based, and research-based perspectives

- Determine the aspects of professional capacity and resource needs for a quality professional learning community within sector-specific learning organizations
- Develop effective leadership traits to improve educational practice for diverse learning organizations within public and private sectors
- Devise a research- and theoretically-based examination of a complex problem within educational leadership
- Conduct theoretically-based empirical research to address a complex problem within educational leadership, research, or policy

Basis for Admissions

Admission requires a conferred post-baccalaureate master's degree and/or doctoral degree from a regionally or nationally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The Doctor of Philosophy (PhD) in Educational Leadership (EdL) requires 60 credit hours for degree completion. Coursework includes foundations, educational leadership, research methods, the pre-candidacy prospectus, and the dissertation. Additional credit hours may be allowed as needed to complete dissertation research in alignment with the Satisfactory Academic Progress (SAP) and Academic Maximum Time Frame policies. Students who do not complete their program within these requirements may be dismissed

The PhD-EdL degree program has the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Successful completion of all courses with a "B" or better
- Official transcripts on file for all transfer credits accepted by the University

The University may accept up to 12 semester credit hours earned with a grade of "B" or better for graduate coursework completed at an accredited college or university and evaluated to be substantially equivalent in content with the required course work for the PhD-EdL program. See the [Transfer Credit Policy](#) for additional information.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);

- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 46 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 39 months.

Certification and Licensing

The Sanford College of Education serves educational leaders by providing online graduate studies in education to reach worldwide populations. The PhD-EdL program is designed to reach national and international markets and does not purport to provide licensure or certification in any particular state or country.

Research and Dissertation

The University has developed a logical step-by-step process that assists in completing the dissertation. The University provides a detailed Doctoral Student Experience (DSE) Manual that explains the process and University's dissertation support structure.

The PhD-EdL doctoral research courses, the PhD-EdL comprehensive course and the PhD-EdL dissertation courses are specifically designed as a guide through the process in an orderly and meaningful fashion and lead to the oral defense.

The dissertation is the capstone academic achievement of the PhD-EdL. The PhD-EdL dissertation is a scholarly documentation of the research. To earn the PhD-EdL the student must demonstrate the ability, motivation, and commitment and the University will provide the faculty, the academic support and process to assist with the attainment of high academic goals. There is also an oral defense.

The PhD-EdL research is aimed at contributing to the body of research knowledge - either new research or adding to research already studied in the field. PhD-EdL students take EDR-8201 - Statistics I and EDR-8202 - Statistics II as part of their program of study.

Dissertation Process

Faculty assists each Doctoral student to reach this goal through a systematic process leading to a high-quality completed dissertation. A PhD-EdL dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

This program can be completed with a minimum of 60 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

The PhD-EDL has two specializations (Pk-12 and Higher Education). All PhD-EDL students will take seven total specialization courses. All PhD-EDL students will take the first two introductory courses and will then take their remaining specialization courses (four required and three elective courses) within the PK-12 specialization, and PhD-EDL students in Higher Education will then take their remaining specialization courses (four required and three elective courses) within the Higher Education specialization.

All PhD-EDL students, regardless of specialization, will then take a series of research courses, comprehensive examination course, and a series of dissertation courses.

- EDU-8050 - Foundations of Advanced Graduate Study and Research
 - EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks
- Required Specialization Courses:**
- Specialization Course 1
 - Specialization Course 2
 - Specialization Course 3

- Specialization Course 4
- Specialization Course 5
- Specialization Course 6
- Specialization Course 7
- EDR-8200 - Scholarly Literature Review
- EDR-8300 - The Research Process
- EDR-8201 - Statistics I
- EDR-8400 - Advanced Qualitative Methodology and Designs
- EDR-8500 - Advanced Quantitative Methodology and Designs
- EDR-8206 - Applied Qualitative Analysis - or - EDR-8202 - Statistics II
- CMP-9702E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Higher Education Specialization

Specialization Courses - 21 credit hours

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- LHE-7300 - Legal Issues in Higher Education
- LHE-7600 - Strategic Planning and Operations in Higher Education

Select Three of the Following:

- LHE-7200 - Student Services in Higher Education
- LHE-7400 - Academic Program and Curriculum Development in Higher Education
- LHE-7500 - Financial Considerations in Higher Education
- EDL-9500 - Innovation for Change in Educational Organizations
- OL-7100 - Conflict Resolution and Mediation
- OL-7102 - Leadership Ethics to Attain Organizational Excellence

PK-12 Specialization

Specialization Courses - 21 credit hours

Required Specialization Courses:

- EDL-9000 - Educational Leadership Theories
- EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice
- EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education
- EDL-9300 - Legal Issues in PK-12 Education

Select Three of the Following:

- EDL-9400 - PK-12 Curriculum, Instruction, and Assessment
- EDL-9500 - Innovation for Change in Educational Organizations
- EDL-9600 - Policy Development & Implementation in PK-12 Education
- EDL-9700 - Finance & Budgeting in PK-12 Education
- OL-7100 - Conflict Resolution and Mediation
- SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management

- TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions
- SEL-7600 - Comprehensive Planning for SEL Initiatives
- SE-7300 - Leadership, Law, and Finance in Special Education

Doctor of Philosophy in Instructional Design, PhD

Description of Program

Instructional design (ID) is a craft – a blend of science and art. Students who earn the Doctor of Philosophy in Instructional Design (PhD-ID) will make research-based contributions to the learning sciences through the synthesis of research, theory, and practice. Such contributions will relate to the ID competencies established by the International Board of Standards for Training, Performance, and Instruction (IBSTPI), the Association for Talent Development (ATD), and the standards of the Association for Educational Communication and Technology (AECT).

Please be advised that this program is NOT accredited in Kentucky by the Education Professional Standards Board and is NOT recognized for initial, additional, or renewal of certification or salary enhancement (rank change) for P-12 educators in Kentucky. For more information, please visit the Education Professional Standards Board's website at <http://www.epsb.ky.gov/mod/page/view.php?id=12>.

[Click here](#) for potential career opportunities within the PhD-ID.

Note: Program availability may vary by state - please contact the Enrollment Office for more information

Learning Outcomes

- Manage complex design processes and products collaboratively with diverse stakeholders.
- Examine different principles, theories, and models related to instructional design.
- Develop strategies to address ethical, legal, and political factors influencing design and development solutions.
- Evaluate technologies used in instructional and training solutions.
- Contribute to the theoretical body of knowledge in instructional design.

Basis for Admissions

A conferred graduate degree from a regionally accredited academic institution or an international institution determined to be equivalent through an approved evaluation service.

Degree Requirements

The PhD Program may be completed in 60 semester credit hours. Additional credit hours may be allowed as needed to complete dissertation research in alignment with the Satisfactory Academic Progress (SAP) and Academic Maximum Time Frame policies. Students who do not complete their program within these requirements may be dismissed.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the PhD-ID program. See the [Transfer Credit Policy](#) for additional information.

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

School of Health Professions

Post-Master's Certificate in Nursing

Description of Program

In order to earn a Post-Master's Certificate, students must complete four courses (12 credit hours) within the chosen Post-Master's Certificate program. With the exception of the General Business program, each Post-Master's Certificate program is prescribed, meaning students can only take what is listed for the particular Post-Master's Certificate program (students may not substitute alternative courses with the exception of the School of Business and Economics doctoral level elective course). Students must complete all four courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

The Post-Master's Certificate in Nursing Quality and Safety is not eligible for Title IV funding.

[Click here](#) for potential career opportunities within the Post-Master's Certificate in Nursing.

Certificate Learning Outcomes

- Implement appropriate theories, models, frameworks, and concepts from nursing and non-nursing disciplines when designing interventions that influence healthcare outcomes for diverse populations in a variety of settings.
- Collaborate with interdisciplinary teams, to evaluate fiscally appropriate healthcare delivery systems that integrate research and clinical expertise to provide evidence-based, patient-centered care.
- Evaluate economic, policy, environmental, and social forces that impact nursing practice, health care delivery and quality of health care.
- Participate in the analysis, implementation and evaluation of strategies for improving nursing practice through the implementation of health information systems and technologies.
- Demonstrate a professional commitment to creating an environment of lifelong learning for patients, families, communities, and other healthcare practitioners.

Basis for Admission

Admissions to the Post-Master's Certificate program requires a minimum of a conferred Master of Science in Nursing degree from an accredited university.

Scope

4 Courses (12 Credit hours) must be completed from the coursework outlined within the corresponding Post-Master's Certificate specialization. Courses taken as part of a master's program cannot be applied towards a Post-Master's Certificate program.

Certificate Requirements

Post-Master's Certificate has the follow graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 12 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 10 months.

Post-Master's Certificate Transfer into a Doctoral Sequence

Specialization coursework completed as part of a doctoral degree, where a degree was conferred, cannot be applied towards a Post-Master's Certificate program.

- Coursework completed within a Post-Master's Certificate program may be applied towards the specialization sequence within a doctoral program.
- Applying Post-Master's Certificate coursework towards a doctoral degree is contingent upon coursework and degree relevance under the most current doctoral degree program version.

Post-Master's Certificate - Nursing Quality and Safety

This specialization prepares nurses to assume a broader leadership role in risk management and quality and safety improvement within a healthcare organization, and to actively participate in and lead interdisciplinary teams. In addition to the American Association of Colleges of Nursing (AACN) Graduate Essentials (2021), the specialization outcomes are based upon the Graduate-Level Quality and Safety Education in Nursing (QSEN) Competencies: Knowledge, Skills and Attitudes (2012).

The Nursing Quality and Safety Post-Master's Certificate is designed to offer graduate-level education to Registered Nurses (RN) with a minimum of an earned Master of Science in Nursing to expand their career options.

Disclosure: Please note that National University is not affiliated with QSEN and cannot guarantee that this Post-Master's Certificate will provide all the training necessary to pass a certification exam.

Required Courses - 12 credit hours

- MSN-5200 - Patient Safety in Nursing
- MSN-5220 - Analytics in Quality and Patient Safety
- MSN-5230 - Performance and Process Improvement in Nursing
- MSN-5240 - The Nursing Quality Professional

Doctor of Health Administration, DHA

Description of Program

Under the framework of interprofessional education, the Doctor of Health Administration (DHA) program will provide a high-quality educational experience that prepares students for success in mid-career and senior level executive positions in the healthcare industry. The program will present essential competencies and learning experiences to enable and prepare graduates to lead and effect change in complex and diverse healthcare organizations.

[Click here](#) for potential career opportunities within the DHA.

****Note:** Program availability may vary by state - please contact the Enrollment Office for more information**

Learning Outcomes

- Assess community needs through research, collaboration, and relationship building
- Recommend ethically sound policies that promote accountability and professionalism
- Facilitate change by leveraging technology and human capital within the healthcare industry
- Develop health related organizations by using data to inform strategy and address industry problems
- Construct and cultivate financial structures to ensure organizational viability

Basis for Admissions

In order to enter in the Doctor of Health Administration applicants must have a conferred master's degree from a regionally or nationally accredited academic institution with minimum grade point average of 3.0 or higher on a 4.0 scale. To be considered for admission to the DHA program, applications require:

- Completion of the application for admission
- Curriculum vitae or résumé
- Demonstration of at least 3 years of work-related experience in mid-level or higher healthcare management or health-related positions

EXCEPTION: Applicants without requisite healthcare experience/education may seek conditional admission from the School Dean.

Degree Requirements

The DHA degree requires a minimum of 60 credit hours at the graduate level beyond the master's degree.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university while enrolled in a doctoral program with a grade of "B" or better.

The DHA degree program have the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- University approval of dissertation project and successful completion of the dissertation defense
- Submission of the approved project to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University

- All financial obligations must be met before the student will be issued their complimentary diploma
- Students are required to own or otherwise have access to a computer/laptop equipped with a webcam, a microphone, and a high-speed Internet connection in order to complete course assignments throughout their program

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Click below for more information on the Dissertation Completion Pathway.

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 44 months.

Doctoral Student Experience (DSE): An Applied Dissertation Process

Faculty assists each Doctoral student to reach this high academic goal through a systematic process leading to a high-quality, completed applied project. The applied dissertation is a scholarly documentation of the completed project, which uses current knowledge to solve a real-world problem. This process requires care in choosing a project topic, documenting its importance, planning the methodology, and connecting the importance of the project to the field. These activities lead smoothly into writing the applied dissertation and presenting the defense of the project.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses as they work on their applied project. These courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the course sequence. If additional time is required to complete any of the courses, students must enroll in supplemental courses and pay the tuition for those courses. Continuous enrollment will only be permitted when students demonstrate progress toward completing the requirements of the applied doctoral project. The Project Committee determines progress.

Course Sequence

This program can be completed with a minimum of 60 credit hours, but may require additional credit hours, depending on the time required to complete the applied doctoral project. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- DHA-7100 - Applied Doctoral Studies in Healthcare Administration

- DIS-9913A - Institutional Review Board (IRB) and Data Collection
- DIS-9914A - Applied Doctoral Manuscript

Recommended Elective Courses - 6 credit hours

The Doctor of Health Administration program allows students to select electives from a broad range of courses to fit their personal and professional goals. Electives have been agreed upon by the Deans of the Schools of Business and Economics, Sanford College of Education, JFK School of Psychology and Social Sciences, and Technology and Engineering. A complete listing of the approved electives can be located through the following resources: the DHA Program Handbook, the Health Administration Forum of The Commons, or by contacting the School of Health Professions Academic and Financial Advisor(s).

Students must complete a minimum of 6 credit hours (2 elective courses) for the program.

Doctor of Nursing Practice in Executive Leadership, DNP

Description of Program

The DNP in Executive Leadership specialization is designed for experienced nurses who want to expand their career options. This specialty prepares advanced degree nurses to assume a broader leadership role as a nurse executive within a healthcare organization and to actively participate in and lead interdisciplinary teams. In addition to the American Association of Colleges of Nursing (AACN) Essentials (2021), the specialization outcomes were based upon the American Organization for Nursing Leadership (AONL) Nurse Executive Competencies (2015).

The DNP program includes both didactic and practice experience courses to meet the degree requirements. Click here to view the [DNP Handbook](#).

The University's DNP program will utilize both the American Association of Colleges of Nursing (AACN) Essentials (2021) and the American Organization of Nurse Leaders (AONL) competencies (2015) in the development of program and course outcomes. The program includes a minimum of 570 practice experience hours. A minimum of 1000 post-baccalaureate clinical/practice experience hours is required for program completion. The experiential learning component is focused on the development of executive nursing leadership competencies across a variety of healthcare settings and organizations.

[Click here](#) for potential career opportunities within the DNP.

****Note: Program availability may vary by state - please contact the Enrollment Office for more information****

Learning Outcomes

- Evaluate data to inform nursing practice, organizational health, and care delivery
- Develop data-informed, literature-based strategic plans for organizations
- Interface with other nursing professionals with regards to the fostering of culture of accountability and responsibility for professional judgment and actions
- Create new explanatory and predictive models to advance healthcare organizations and nursing care delivery in a global society
- Recommend health policies, which ensure stewardship of resources, promote social justice, and community partnership in maintaining health

Basis for Admissions

Admission to the Doctor of Nursing Practice in Executive Leadership requires:

1. Earned Master of Science in Nursing (MSN) from a regionally or nationally accredited program (an institution accredited by either a regional accreditation agency or an agency recognized by the Council for Higher Education (CHEA))
2. A total of 1000 post-baccalaureate supervised clinical/practice experience hours are required for DNP program completion. Up to 430 of supervised clinical/practice experience hours accumulated during an MSN program, Advanced Practice Registered Nurses (APRN) program/certificate, or post-master's certificate may be applied to the University's DNP program
3. GPA 3.0 or above on a 4.0 scale
4. Current, active, unencumbered licensure as a registered nurse (RN). (Require license number and expiration date.)
5. Employment verification or verified access to an applicable healthcare environment for practice experience requirements and completion
6. May require candidacy review process including telephone and/or video interview and writing samples
7. Also required are transcripts, current resume, or curriculum vitae

Degree Requirements

The Doctor of Nursing Practice in Executive Leadership degree requires a minimum of 46 credit hours at the graduate level beyond the master's degree. The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university while enrolled in a doctoral program with a grade of "B" or better.

The DNP degree program have the following graduation requirements:

- A minimum of 34 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Complete required practice experience hours
- Satisfactory completion of DNP Project
- Submission of the approved final DNP Project
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma
- Students are required to own or otherwise have access to a computer/laptop equipped with a webcam, a microphone, and a high-speed Internet connection in order to complete course assignments throughout their program

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The estimated time to completion for this program is 30 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule approved by the Dean for this program, and applying no doctoral level transfer credits, can expect to finish in as little as 30 months.

Doctoral Student Experience (DSE): An Applied Dissertation Process

Faculty assists each Doctoral student to reach this high academic goal through a systematic process leading to a high-quality, completed applied project. The applied dissertation is a scholarly documentation of the completed project, which uses current evidence to solve a real-world non clinical issues in nursing leadership. . This process requires care in choosing a project topic, documenting its need, planning the methodology, and connecting the importance of the project to the site of study and the nursing field. These activities lead smoothly into writing the applied dissertation and presenting the defense of the project.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses as they work on their applied project. These courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the course sequence. If additional time is required to complete any of the courses, students must enroll in supplemental courses and pay the tuition for those courses. Continuous enrollment will only be permitted when students demonstrate progress toward completing the requirements of the applied doctoral project. The Project Committee determines progress. DNP students will continue to complete practice hours in to meet program requirements while completing the DIS 99XX course sequence.

Program Specific Accreditation Information

The Doctor of Nursing Practice (DNP) degree program is fully accredited by the Commission on Collegiate Nursing Education (CCNE) (<http://www.ccneaccreditation.org>).

Course Sequence

The DNP program requires a minimum of 46 credits. Additional credit hours may be allowed as needed to complete the scholarly paper. If granted, additional courses will be added to the student degree program in alignment with the Satisfactory Academic Process (SAP) and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- DNP-7000 - Leadership and Interprofessional Collaboration
- DNP-7001 - Contemporary Topics in Health Care
- DNP-7002 - Healthcare Economics and Finance
- DNP-7003 - Informatics in Healthcare Delivery
- DNP-7004 - Advanced Health Policy & Advocacy
- DNP-7005 - Translation of Evidence into Practice
- DNP-7106 - Program Planning and Evaluation
- DNP-7107 - Health Outcomes Research

- DIS-9911A - Applied Doctoral Introduction *
- DIS-9912A - Applied Doctoral Proposal *

- DIS-9913A - Institutional Review Board (IRB) and Data Collection *
- DIS-9914A - Applied Doctoral Manuscript *

* DNP students will continue to earn practice hours to obtain executive leadership experience and to meet program requirements upon successful completion of the practice experience and DIS courses as indicated.

John F Kennedy School of Psychology and Social Sciences

Department of Psychology

Post-Baccalaureate Certificate in Psychology

Description of Program

The Post-Baccalaureate Certificate in Psychology is designed for individuals who would like to learn more about human behavior. Students select courses from a broad range of electives to fit their personal and professional goals. Several emphasis areas will be available to students, for example, Health Psychology, I/O Psychology, Forensic Psychology, and Gender and Sexual Fluidity. Students may use their coursework in preparation for graduate studies or to pursue a variety of career options including research, human resources, business and public service.

[Click here](#) for potential career opportunities within the Post-Baccalaureate Certificate.

Basis for Admissions

Admission to a Post-Bachelor's Certificate program requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Baccalaureate certificate program. Coursework must have been completed at an accredited college or university within the last five years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Baccalaureate Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 9 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 6 months. Students in the Applied Behavior Specialization can expect to finish in 15 months.

Post-Baccalaureate Certificate Transfer into a Master's Degree Sequence

- Coursework completed within a Post-Baccalaureate Certificate program may be applied toward the specialization sequence within a master's program
- Applying Post-Baccalaureate Certificate coursework toward a master's degree is contingent upon coursework and degree relevance under the most current master's degree program version

Specialization coursework completed as part of a master's degree, where a degree was conferred, cannot be applied toward a Post-Baccalaureate Certificate program.

Areas of Emphasis and Specific Courses - 12 credit hours

Students can select any four courses from all the courses listed below or they can select a group of four courses based on an area of specialization.

Child and Adolescent Developmental Psychology

- PSY-5702 - Pre-Natal and Early Childhood Development
- PSY-5703 - Child and Adolescent Development
- PSY-6704 - Gender Development in Children and Adolescents
- PSY-6705 - Child and Adolescent Psychopathology

Educational Psychology

- PSY-6802 - Educational Psychology for Diverse Populations
- PSY-6114 - Psychological Tests and Measurements
- PSY-6115 - Psychology of Learning
- PSY-6803 - Gifted and Talented Education for Diverse Populations

Forensic Psychology

- PSY-5114 - Policy and Justice in Forensic Psychology
- PSY-5113 - Psychological Evaluation and Treatment in Correctional Settings
- PSY-5112 - Theories of Criminal Behavior
- PSY-5505 - Diversity in Forensic Psychology

Gender and Sexual Fluidity

- PSY-6201 - Psychology of Sexuality and Sexual Orientation
- PSY-6202 - Psychology of Gender
- PSY-6203 - Introduction to Transgender and Non-Binary Studies
- PSY-6206 - Psychology of LGBTQ+ Studies

General Psychology *

- PSY-5109 - Theories of Personality
- PSY-6102 - Multicultural Psychology
- PSY-6103 - Human Communication
- PSY-6104 - Positive Psychology

* Students may select courses from a broad range of electives at the 5000 or 6000 level (with the exception of Foundations and Internship courses)

Health Psychology

- PSY-5302 - Stress and Coping

- PSY-5303 - Behavioral Nutrition
- PSY-5304 - Collaborative Care and Mental Health Policy
- PSY-6304 - Coaching for Health and Wellness
- **Industrial/Organizational Psychology**
- PSY-5402 - Organizational Development
- PSY-5403 - Personnel Selection and Recruitments
- PSY-5111 - Applied Statistics in I/O PSY
- PSY-6425 - Survey Methods and Organizational Behavior
- **Sport Psychology**
- PSY-6909 - Applied Sport Psychology
- PSY-6905 - Professional Ethics in Sport Psychology
- PSY-6907 - Kinesiology
- PSY-6908 - Psychopathology in Sport
- **Threat Assessment and Management**
- PSY-6512 - Threat Assessment
- PSY-6513 - Threat Management
- PSY-6514 - Special Topics in Threat Assessment and Management
- PSY-6515 - Capstone in Threat Assessment and Management

Master of Arts in Psychology, MA

Description of Program

The Master of Arts (MA) program enables students to pursue advanced study in psychology that can lead to careers in the helping professions, industry, government, and nonprofit organizations. The program also provides students with the foundational knowledge and skills necessary for doctoral-level study.

[Click here](#) for potential career opportunities within the MA in Psychology.

Learning Outcomes

- Analyze theories and principles in psychology to inform professional contexts
- Examine research methods and data analysis in psychology
- Apply psychological principles and research in personal, social, and organizational issues
- Relate ethical principles of psychology in academic and professional issues
- Examine diversity issues in professional contexts
- Model clear and effective communication for fellow professionals and the public

Basis for Admissions

Admission to the Master of Arts program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution.

Degree Requirements

The Master of Arts in Psychology with a specialization in Gender and Sexual Fluidity or General Psychology require a total of 30 credit hours at the graduate level.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Arts in Psychology for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

All master's degree programs have the following graduation requirements:

- A minimum of 18 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 25 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 16 to 18 months depending on the specialization.

Course Sequence

The Master of Arts in Psychology program can be completed in 30 credits.

Students who complete at least 15 semester credit hours in a single area of specialization at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma.

In some cases, specialization courses listed on the initial degree plan can be changed at the student's request. Please contact your Academic and Finance Advisor for more information.

- PSY-5101 - Foundations for Graduate Study in Psychology
- PSY-5103 - Professional Ethics, Law, and Psychology
- PSY-5104 - Theories of Human Development and Functioning
- PSY-5107 - Research Design
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- Specialization Course 4
- Specialization Course 5
- Capstone Course

Gender and Sexual Fluidity Specialization

The purpose of the Gender and Sexual Fluidity specialization is to provide an in-depth understanding of the social, cultural, and biological foundations of human sexuality, gender, and sexual orientation.

Specialization Courses - 15 credit hours

- PSY-5109 - Theories of Personality
- PSY-6201 - Psychology of Sexuality and Sexual Orientation
- PSY-6202 - Psychology of Gender
- PSY-6203 - Introduction to Transgender and Non-Binary Studies
- PSY-6206 - Psychology of LGBTQ+ Studies
Required Capstone Course
- PSY-6207 - Capstone: Gender and Sexual Fluidity

General Psychology Specialization

The General Psychology specialization allows students to select courses from a broad range of specialization courses to fit their personal and professional goals.

Students must complete a minimum of 18 credit hours for the specialization in General Psychology (9 credit hours are from elective courses and 9 credits hours are from required courses). Students may take psychology courses at the 5000, 6000 level including up to two courses from other fields (MFT, Business, Technology and/or Education) to fulfill their specialization requirements. Courses from other disciplines may be considered to fill this requirement, with Dean approval.

Specialization Courses - 15 credit hours

Required Courses

- PSY-5109 - Theories of Personality
 - PSY-5108 - Cognitive and Affective Basis of Behavior
- Select 3 courses from the following recommended* course list:
- PSY-6102 - Multicultural Psychology
 - PSY-6103 - Human Communication
 - PSY-6110 - Clinical Survey of Substance Abuse and Dependence
 - PSY-6114 - Psychological Tests and Measurements
 - PSY-6121 - Theories of Psychotherapy and Counseling
- Required Capstone Course
- PSY-6106 - Capstone Course: Psychology

Note

*Courses listed are examples and upon acceptance to the program the initial degree plan will include these courses. Students are encouraged to choose their specialization courses based on personal and professional goals and to work with their Academic Advisor to revise their degree plan. Additionally, courses from the Department of Psychology Master of Science Programs cannot be used for specialization courses.

Master of Science in Child and Adolescent Developmental Psychology, MS

Description of Program

This 30 credit Master of Science (MS) program in Child and Adolescent Developmental Psychology enables students to pursue advanced study in child and adolescent developmental psychology that can lead to careers in the helping professions, industry, government, and for profit and nonprofit organizations for which clinical training is not necessary. The child and adolescent developmental psychology master's degree program also provides students with the foundational knowledge and skills necessary for doctoral-level study.

This educational program offers students, at the culmination of the degree, the choice between a Capstone project or a non-clinical internship. During the internship, students complete approximately 100 hours of working in the field. The internship allows students to demonstrate a wide range of professional competencies and communication skills that reflect the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired throughout the program.

[Click here](#) for potential career opportunities within the Masters of Science in Child and Adolescent Developmental Psychology.

Learning Outcomes

- Synthesize theories and principles applicable to the field of child and adolescent developmental psychology through written communication
- Appraise research methods and data analysis applicable in the framework of child and adolescent developmental psychology
- Investigate empirically supported interventions for research, administration or practice of child and adolescent developmental psychology
- Employ ethical principles of psychology in academic and professional matters of child and adolescent developmental psychology
- Examine diversity issues in the context of child and adolescent developmental psychology

Basis for Admissions

Admission to a master's program requires a conferred bachelor's degree from a regionally accredited academic institution or an international institution that is determined to be equivalent through an approved evaluation service.

Degree Requirements

The Master of Science degree in Child and Adolescent Developmental Psychology requires a total of 30 credits for completion.

The University may accept a maximum of 12 semester credits in transfer toward the Master of Science in Child and Adolescent Developmental Psychology for graduate course work completed at an accredited college or university with a grade average of "B" or better. See the [Transfer Credit Policy](#) for additional information.

- PSY-5703 must be completed at the University

Graduation requirements for the Master's Degree in Psychology vary according to specialization selected.

All master's degree programs have the following graduation requirements:

- A minimum of 18 credit hours of graduate instruction must be completed through the University
- Completion of subject area competency requirements for the graduate program
- Elective courses must be relevant to the department's graduate program
- Cumulative grade point average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from a regionally accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 18 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 16 months.

Course Sequence

The Master of Science in Child and Adolescent Developmental Psychology program can be completed in 30 credits.

All Master of Science programs require the foundation course to be completed prior to enrolling in specialization courses. If students choose the capstone stone, this course will be completed as the last course in the degree program.

- PSY-5701 - Foundations of Child and Adolescent Developmental Psychology
- PSY-5702 - Pre-Natal and Early Childhood Development
- PSY-5703 - Child and Adolescent Development
- PSY-6704 - Gender Development in Children and Adolescents
- PSY-5107 - Research Design
- PSY-6705 - Child and Adolescent Psychopathology
- PSY-5706 - Ethics in Development Psychology
- PSY-5110 - Applied Statistics
- PSY-6708 - ADHD and Autistic Spectrum
- PSY-6709 - Capstone in Child and Adolescent Developmental Psychology - OR - PSY-6710 - Internship in Child and Adolescent Developmental Psychology

Master of Science in Forensic Psychology, MS

Description of Program

The 30-credit Master of Science (MS) in Forensic Psychology provides students with knowledge and understanding of human behavior as it is presented by individuals who are involved in the legal system. The coursework for all students in this program examines policy and justice, victims and offenders, diversity and ethics, basics of risk and threat assessment and management, theories of criminal behavior, and evaluation and treatment in offender populations.

The MS in forensic psychology degree is not designed to lead towards licensure or certification but will provide students with a broad overview of the field which will allow students to better understand forensic psychology as a whole, gain scholarly knowledge in their personal areas of interest, and prepare for a career in a diverse range of forensic psychology-oriented professions.

Employment options available with this training include, but are not limited to, correctional facilities, child welfare and advocacy organizations, community based clinics and organizations, probation and other law enforcement or government agencies, court related services, and mental health institutions.

Students are able to choose a non-clinical internship course/project or a research driven capstone course/project. This provides students with the option to choose between a path in which they can explore practical applications in an internship setting or engage in a research driven capstone project.

[Click here for potential career opportunities within the Masters of Science in Forensic Psychology.](#)

Learning Outcomes

- Analyze theories and principles in psychology within forensic settings
- Explain usage of diagnostic and assessment tools within forensic settings
- Examine diversity issues within forensic settings
- Evaluate ethical behavior within forensic settings
- Synthesize research within forensic settings

Basis for Admissions

Admission to the Master of Science program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution.

Additional State requirements may need to be met for Basis of Admissions into a program:

Basis for Admissions - Washington State Students (MS)

Washington State has asked that we provide you the following information before you enroll in the program:

- The University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree granting institutions under the Degree-Granting Institutions Act
 - This authorization is subject to periodic review and authorizes the University to offer field placement components for specific degree programs
 - The Council may be contacted for a list of currently authorized programs
 - Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs
 - Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov
- The transferability of credits earned at the University is at the discretion of the receiving college, university, or other educational institution
 - Students considering transferring to any institution should not assume that credits earned in any program of study at the University will be accepted by the receiving institution
 - Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at the University to satisfy an admission requirement of another institution is at the discretion of the receiving institution
 - Accreditation does not guarantee credentials or credits earned at the University will be accepted by or transferred to another institution
 - To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned
- The Master of Science (MS) in psychology programs provides support to students in securing quality internship placements that include but are not limited to Internship Coordinators and full-time faculty to help guide students through this process, speak with potential placement sites that have been identified as a possible fit for the student, a national database of potential placements sites, and training materials to help student present in a professionally and appropriate manner
 - The MS program cannot require potential placement site to hire students thus it is the responsibility of the student to present their self in a professional manner and secure a placements site and supervisor

- We encourage student to contact the Internship Coordinator for any additional individualized support they may need in this process

Degree Requirements

The Master of Science degree in Forensic Psychology requires a total of 30 credits for completion.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Science in Forensic Psychology for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information. Graduation requirements for the Master's Degree in Psychology vary according to specialization selected.

All master's degree programs have the following graduation requirements:

- A minimum of 18 credit hours of graduate instruction must be completed through the University
- Completion of subject area competency requirements for the graduate program
- Elective courses must be relevant to the department's graduate program
- Cumulative grade point average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from a regionally accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 19 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 16 months.

Course Sequence

The Master of Science in Forensic Psychology program can be completed in 30 credits.

All Master of Science programs require the foundation course to be completed prior to enrolling in specialization courses. If students choose the capstone stone, this course will be completed as the last course in the degree program.

- PSY-5501 - Principles of Forensic Psychology
- PSY-6516 - Fundamentals of Risk and Threat Assessment
- PSY-5114 - Policy and Justice in Forensic Psychology
- PSY-5112 - Theories of Criminal Behavior
- PSY-5107 - Research Design
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3

- Specialization Course 4
- Capstone Course

General Specialization

The Master of Science (MS) in Forensic Psychology General Specialization provides students with the knowledge and understanding of human behavior and how it is exhibited in legal setting and environments. The coursework in this degree program examines the use and application of psychology principles in correctional settings, characteristics of victimization and offenders, antecedents of aggression, and offender treatment strategies. This master's level degree is not designed to lead towards licensure or certification. Employment options available with this training include, but are not limited to, correctional facilities, child welfare and advocacy organizations, community-based clinics and organizations, and mental health institutions. Students in this program are able to choose a non-clinical internship course/project or a research driven capstone course/project. This provides students with the option to choose between a path in which they can explore practical applications in an internship setting or engage in a research driven capstone project.

Specialization Courses - 15 credit hours

- PSY-5113 - Psychological Evaluation and Treatment in Correctional Settings
- PSY-5505 - Diversity in Forensic Psychology
- PSY-5110 - Applied Statistics
- PSY-6517 - Investigative Psychology: Application of Offender Profiling and Characteristics
Select one of the following:
- PSY-6510 - Capstone in Forensic Psychology
- PSY-6511 - Internship in Forensic Psychology

Threat Assessment and Management Specialization

In the threat assessment and management specialization, students will dive deeper into this field and learn the essential elements of threat assessment and management, including the use of assessment tools, interviewing, and information gathering, risk factors and mitigation strategies, and team processes for different types of threats including workplace violence, intimate partner violence and stalking, school violence, or other areas of targeted violence. While this specialization does not lead to licensure, the specialization will require students to review key components critical for the exam to become a Certified Threat Manager (CTM) with the Association of Threat Assessment Professionals (ATAP) which they may wish to take as part of their professional career. Employment options available with this training include, but are not limited to law enforcement or government agencies, court related services, educational institutions, private industries, and practices specifically working in the threat management field. Students in the threat assessment and management specialization will complete their program with an applied course that allows students to put into practice what they have learned by employing assessment and management practices to real world examples.

Specialization Courses - 15 credit hours

- PSY-6512 - Threat Assessment
- PSY-6513 - Threat Management
- PSY-5110 - Applied Statistics
- PSY-6514 - Special Topics in Threat Assessment and Management
- PSY-6515 - Capstone in Threat Assessment and Management

Master of Science in Health Psychology, MS

Description of Program

This 30 credit Master of Science (MS) in Health Psychology program enables students to pursue advanced study in health psychology that can lead to careers in the helping professions, industry, government, and nonprofit organizations for which clinical training is not necessary. The health psychology master's degree program also provides students with the foundational knowledge and skills necessary for doctoral-level study.

This educational program offers students, at the culmination of the degree, the choice between a Capstone project and a non-clinical internship. During the internship, students complete approximately 100 hours of working in the field. The internship allows students to demonstrate a wide range of professional competencies and communication skills that reflect the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired throughout the program.

[Click here](#) for potential career opportunities within the Masters of Science in Health Psychology.

Learning Outcomes

- Synthesize theories and principles applicable to the field of health psychology through written communication
- Appraise research methods and data analysis applicable in the framework of health psychology
- Investigate empirically supported interventions for research, administration, or practice of health psychology
- Employ ethical principles of psychology in academic and professional matters of health psychology
- Examine diversity issues in the context of health psychology

Basis for Admissions

Admission to a master's program requires a conferred bachelor's degree from a regionally accredited academic institution or an international institution that is determined to be equivalent through an approved evaluation service.

Additional State requirements may need to be met for Basis of Admissions into a program:

Basis for Admissions - Washington State Students (MS)

Washington State has asked that we provide you the following information before you enroll in the program:

- The University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree granting institutions under the Degree-Granting Institutions Act
 - This authorization is subject to periodic review and authorizes the University to offer field placement components for specific degree programs
 - The Council may be contacted for a list of currently authorized programs
 - Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs

The Master of Science in Health Psychology program can be completed in 30 credits.

All Master of Science programs require the foundation course to be completed prior to enrolling in specialization courses. If students choose the capstone stone, this course will be completed as the last course in the degree program.

- PSY-5301 - Foundations in Health Psychology
- PSY-5302 - Stress and Coping
- PSY-5303 - Behavioral Nutrition
- Elective Course 1
- PSY-5107 - Research Design
- PSY-5304 - Collaborative Care and Mental Health Policy
- Elective Course 2
- PSY-5110 - Applied Statistics
- Elective Course 3
- PSY-6305 - Capstone in Health Psychology - OR - PSY-6311 - Internship in Health Psychology

Electives

Please select three of the following:

- PSY-6104 - Positive Psychology
- PSY-6110 - Clinical Survey of Substance Abuse and Dependence
- PSY-6107 - Adult Psychopathology
- PSY-6117 - Psychology of Trauma
- PSY-6304 - Coaching for Health and Wellness

Master of Science in Industrial and Organizational Psychology, MS

Description of Program

This 30 credit Master of Science (MS) in Industrial and Organizational Psychology (I/O) program allows students to pursue advanced studies in I/O psychology that can lead to careers in helping professions, industry, government, and nonprofit organizations for which clinical training is not necessary. The I/O psychology master's degree program also provides students with the foundational knowledge and necessary skills for doctoral-level studies.

This educational program offers students, at the culmination of the degree, the choice between a Capstone project and a non-clinical internship. During the internship, students complete approximately 100 hours of working in the field. The internship allows students to demonstrate a wide range of professional competencies and communication skills that reflect the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired throughout the program.

[Click here](#) for potential career opportunities within the Masters of Science in Industrial and Organizational Psychology.

Learning Outcomes

- Synthesize theories and principles applicable to the field of industrial and organizational (I/O) psychology through written communication
- Appraise research methods and data analysis applicable in the framework of I/O psychology
- Investigate empirically supported interventions for research, administration, or practice of I/O psychology
- Employ ethical principles of psychology in academic and professional matters of I/O psychology
- Examine diversity issues in the context of I/O psychology

- PSY-6425 - Survey Methods and Organizational Behavior
- PSY-6429 - Capstone in I/O Psychology - OR - PSY-6411 - Internship in I/O Psychology

Electives

Please select two of the following:

- PSY-6421 - Psychology of Leadership
- PSY-6422 - Work Motivation and Employee Engagement
- PSY-6423 - Training and Evaluation
- PSY-6414 - Small Group Theory and Team Processes

Master of Science in Sport Psychology, MS

Description of Program

The Master of Science in Sport Psychology (MSPSYSP) degree program is focused on developing the skills and personal and professional growth that are required for effective practice in the field of Sport Psychology. The program is designed to provide an integrated learning experience for adult students seeking specific training in the profession of Sport Psychology (SP). Students in this program will critically analyze a broad range of theories and practical knowledge in SP. Degree requirements also includes involvement in ongoing internship/field work and supervision. This training prepares students for applied sport psychology work in a variety of settings including youth and recreational sports facilities, high school athletics, collegiate athletic departments, professional sports organizations, and private practice. Additional program description, requirements, policies, and procedures are further described in the [SP Program Handbook](#).

[Click here](#) for potential career opportunities within the MS in Sport Psychology.

Learning Outcomes

- Explore theories and principles in sport psychology to inform professional contexts and promote performance enhancement
- Examine research methods and data analysis in sport psychology
- Apply psychological principles and research to personal, social, and organizational issues
- Develop a personalized approach to professional services
- Employ ethical principles of sport psychology in academic and professional matters
- Examine diversity issues in professional contexts

Basis for Admissions

Admission to the Master of Science program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution.

Additional State requirements may need to be met for Basis of Admissions into a program:

Basis for Admissions - Washington State - MS in Sport Psychology

Washington State has asked that we provide you the following information before you enroll in the specializations in the MS in Sport Psychology:

- The University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree granting institutions under the Degree-Granting Institutions Act
 - This authorization is subject to periodic review and authorizes the University to offer field placement components for specific degree programs
 - The Council may be contacted for a list of currently authorized programs
 - Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs

- Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov
- The transferability of credits earned at the University is at the discretion of the receiving college, university, or other educational institution
 - Students considering transferring to any institution should not assume that credits earned in any program of study at the University will be accepted by the receiving institution
 - Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at the University to satisfy an admission requirement of another institution is at the discretion of the receiving institution
 - Accreditation does not guarantee credentials or credits earned at the University will be accepted by or transferred to another institution
 - To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned
- The Master of Science in Sport Psychology provides support to students in securing quality internship placements that include but are not limited to Program Coordinators and full-time faculty to help guide students through this process, speak with potential placement sites that have been identified as a possible fit for the student, a national database of potential placements sites, and training materials to help student present in a professionally and appropriate manner
 - The Master of Science in Sport Psychology cannot require potential placement site to hire students thus it is the responsibility of the student to present their self in a professional manner and secure a placements site and supervisor
 - We encourage students to contact the Program Coordinator for any additional individualized support they may need in this process

Degree Requirements

The Master of Science in Sport Psychology program requires a total of 36 credit hours at the graduate level.

The University may accept a maximum of 12 semester credit hours in transfer toward the Master of Science in Sport Psychology for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

All master's degree programs have the following graduation requirements:

- A minimum of 24 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 25 to 27 months depending on the option to take 2,12-week Field Work courses.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 18 to 21 months depending on the option to take 2,12-week Field Work courses.

Course Sequence

The Master of Science in Sport Psychology program can be completed in 36 credits.

- PSY-6904 - Foundations of Sport Psychology
- PSY-6905 - Professional Ethics in Sport Psychology
- PSY-6909 - Applied Sport Psychology
- PSY-6910 - Counseling Skills for Sport Psychology
- PSY-6912 - Diversity, Culture and Society
- PSY-6906 - Research Methods in Sport Psychology
- PSY-6907 - Kinesiology
- PSY-6908 - Psychopathology in Sport
- PSY-6911 - Psychological Foundations of Human Behavior
- PSY-6913 - Team Building and Group Dynamics
- PSY-6914 - Psychology of Athletic Injury -or- PSY-6915 - Field Work I *
- PSY-6917 - Capstone in Sport Psychology -or- PSY-6916 - Field Work II *

*A course material fee of \$197.00 will be charged for PSY-6915 - Field Work I and PSY-6916 - Field Work II. The course material fee will be waived for PSY-6916 - Field Work II, if the student took PSY-6915 - Field Work I and paid the course material fee of \$197.00.

Post-Master's Certificate in Psychology

Description of Program

The Post-Master's Certificate in Psychology allows students to select courses from a broad range of electives to fit their personal and professional goals. Several emphasis areas will be available to students, for example, Health Psychology, I/O Psychology, Substance-Related and Addictive Disorders, and Psychology of Gender and Sexual Fluidity. Completion of this certificate will assist individuals in pursuing a variety of career opportunities in research and education in both the public and the private sector in setting such as schools, hospitals, clinics, research centers, business, and health care teams.

[Click here](#) for potential career opportunities within the Post-Master's Certificate.

Basis for Admissions

Admission to the Post-Master's Certificate program requires a conferred master's level or higher degree from a regionally or nationally accredited academic institution.

Scope

6 Courses (18 Credit hours) must be completed to earn a Post-Master's Certificate specialization. Courses taken as part of a master's program cannot be applied toward a Post-Master's Certificate program.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Master's certificate program. Coursework must have been completed at an accredited college or university within the last seven years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Master's Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 12 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 10 - 13 months depending on the specialization.

Post-Master's Certificate Transfer into a Doctoral Program

Post-Master's Certificate program courses may be used to satisfy doctoral degree requirements if the Post-Master's Certificate course is required by the doctoral program in which the student is enrolled.

Coursework completed as part of an earned doctoral degree cannot be applied toward a Post-Master's Certificate program. However, a Post-Master's Certificate can be completed as part of doctoral coursework, if the student officially applies for a Post-Master's Certificate prior to completing the fourth course in a Post-Master's Certificate series.

Areas of Emphasis and Specific Courses - 18 credit hours

Students can select any six courses from all the courses listed below or they can select a group of six courses based on an area of specialization.

General Psychology *

- PSY-8100 - Theories of Personality
- PSY-8130 - Multicultural Psychology
- PSY-8138 - Cognition, Emotion, and Motivation
- PSY-8139 - Positive Psychology
- PSY-8140 - Community Psychology
- PSY-8141 - Human Communication- Interviewing Skills

* Students may select courses from a broad range of electives at the 7000 or 8000 level (with the exception of Foundations and Internship courses)

Gerontology

- PSY-8335 - Psychology of Aging
- PSY-8336 - Mental Health and Aging
- PSY-8337 - Aging, Families, and Elder Care
- PSY-8338 - Multicultural Perspectives of Aging
- PSY-8340 - Death and Dying
- PSY-8341 - Positive Aging
- Health Psychology**
- PSY-8306 - Health Psychology
- PSY-8307 - Psychosocial Factors in Health
- PSY-8308 - Behavioral Nutrition
- PSY-8309 - Eating Disorders and Obesity
- PSY-8310 - Complementary and Alternative Medicine
- PSY-8311 - Consultation and Interventions in Health Care Settings
- Industrial/Organizational Psychology**
- PSY-8407 - Industrial/Organizational Psychology
- PSY-8408 - Leadership and Management
- PSY-8409 - Work Motivation and Attitudes
- PSY-8410 - Organizational Development
- PSY-7113 - Recruitment, Selection, and Training
- PSY-8413 - Consulting in Business, Education, and Health
- Psychology of Gender and Sexual Fluidity**
- PSY-7121 - Socio-Contextual Psychology of Gender
- PSY-7122 - Family Processes and Social Context
- PSY-7123 - Key Theories and Concepts in Sexuality and Gender Studies
- PSY-7124 - Sexuality and Sexual Fluidity
- PSY-7125 - LGBTQ Identity and Relationship Development through the Life Cycle
- PSY-7126 - Special Topics: Research, Policy, & Advocacy from a Global Perspective
- Social Policy and Behavioral Health Administration**
- PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness
- PSY-8507 - Comparative Analysis of Evidence-based Interventions
- PSY-8509 - Behavioral Health Services Policy
- PSY-8511 - Behavioral Health Administration and Management
- PSY-8408 - Leadership and Management
- PSY-8409 - Work Motivation and Attitudes
- Substance-Related and Addictive Disorders**
- PSY-8152 - Co-occurring Substance Related and Addictive Disorders and other Mental Conditions
- PSY-8153 - Family Systems Approaches for Substance-Related and Addictive Disorders
- PSY-8154 - Substance Related and Addictive Disorder Assessment and Treatment Planning
- PSY-8155 - Group Counseling in the Treatment of Substance Use Disorder
- PSY-8156 - Research in Substance-Related and Addictive Disorders
- PSY-8157 - Clinical Survey in Substance-Related and Addictive Disorders
- Trauma and Disaster Relief**
- PSY-8312 - Concepts of Trauma and Resiliency
- PSY-8313 - Trauma across the Developmental Continuum
- PSY-8314 - Disaster Response and Trauma Responsive Practices
- PSY-8315 - Community Trauma and Resilience
- PSY-8316 - Diversity in Trauma and Disaster Response
- PSY-8317 - Research Ethics in Trauma and Disaster Response

Doctor of Philosophy in Psychology, PhD

Description of Program

The Doctor of Philosophy (PhD) program was designed in response to the growing interest in psychology as a discipline of study and the need for advanced studies, including research beyond the master's level. This degree program emphasizes theory, research, and scholarship, culminating in a dissertation.

[Click here](#) for potential career opportunities within the PhD in Psychology.

Learning Outcomes

- Appraise theories and principles in psychology to inform professional contexts
- Evaluate research methods and data analysis in psychology
- Select psychological principles and research for application to personal, social, and organizational issues
- Evaluate ethical principles of psychology in academic and professional issues
- Critique diversity issues in professional contexts
- Design clear and effective communication for fellow professionals and the public

Basis for Admissions

In order to enter the Doctor of Philosophy in Psychology, applicants must have a conferred master's degree from a regionally or nationally accredited academic institution. There are two options for entering the doctoral program in psychology:

1. **Direct Entry** – Individuals with a previously completed master's degree in any area of Psychology, Mental Health Counseling, Marriage and Family Therapy, or Social Work may immediately begin the 60-credit PhD program.
2. **Evaluation Track** – Individuals who have previously completed a master's degree in an area other than one listed above must complete the Standard Curriculum course. Students in the Evaluation Track will begin their degree plan with PSY-7101. They will then be required to complete the Standard Curriculum course prior to taking the remaining courses in their degree plan.

In order to enter the Doctor of Philosophy, Counseling Psychology specialization applicants must have a conferred clinical master's degree in a mental health or related field that included a practicum/internship, from a regionally accredited institution, and/or licensed in a mental health field.

Standard Curriculum - Three credit hours determined based on formal evaluation. These credit hours are in addition to the 60 credits listed below.

- PSY-7120 - Overview of the Psychological Concepts

Degree Requirements

The PhD in Psychology degree requires a minimum of 60 credit hours at the graduate level beyond the master's degree.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university while enrolled in a doctoral program with a grade of "B" or better.

The PhD degree programs in psychology have the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher

- Satisfactory completion of the Pre-Candidacy Prospectus course
- University approval of dissertation manuscript and successful completion of the dissertation defense
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 81 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 46 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

The PhD program may be completed in 60 credits (not including required Standard Curriculum courses) but *may require additional credit hours*, depending on the time required to complete the dissertation research. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- PSY-7101 - Foundations for Doctoral Study in Psychology
- Specialization Course 1
- Standard Curriculum Course, if needed
- PSY-7102 - Scholarly Writing and Professional Communication in Psychology

- Specialization Course 2
- PSY-7103 - Research Methods
- Specialization Course 3
- PSY-7104 - Statistics I
- Specialization Course 4
- PSY-7105 - Tests and Measurements -OR- PSY-7116 - Tests and Measurements in Industrial/Organizational Psychology (I/O specialization)
- Elective Course*
- PSY-7500 - Advanced Quantitative Methods
- Specialization Course 5
- PSY-7501 - Advanced Qualitative Methods
- Specialization Course 6
- PSY-7112 - Research Design Planning
- CMP-9701P - Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Exceptions:

- The preferred elective course for the Industrial/Organizational Psychology specialization is PSY-8413. Students that would like to work with the I/O Psychology Internship Coordinator to participate in an internship will need to enroll in PSY-7118 Internship in I/O Psychology, after the I/O Psychology Internship Coordinator approves the internship site and plan
- The preferred elective course for Substance-Related Disorders is PSY-8118 Grant Writing in Psychology or PSY-8511 Behavioral Health Administration and Management or PUB-7005 Public Budgeting and Finance.
- The preferred elective course for Social Policy and Behavioral Health Administration is PSY-8118 Grant Writing in Psychology or PSY-8140 Community Psychology. Students that would like to work with the Internship Coordinator to participate in an internship will need to use this elective to enroll in PSY-8508 Internship in Social Policy and Mental Health Administration, after the Internship Coordinator approves the internship site and plan.

Counseling Psychology Specialization

The Doctor of Philosophy in Psychology specialization in counseling psychology is designed for mental health professionals who are licensed or pre-licensed having a foundation of clinical knowledge and skills at the master level. The program is intended for professionals who seek to improve their theoretical knowledge and clinical skills, while preparing them to advance their career in the mental health field. In addition, the program is designed to provide for the meaningful integration of theory, practical application, research, and scholarship, culminating in a dissertation.

PhD-PSY specialization students will learn about clinical supervision, psychopharmacology, program evaluation, research, and cognitive and personality assessment. In addition, students in this program can choose to deepen their knowledge and skills in several areas of their interest. For example, students can choose courses in psychopathology, addictions assessment and treatment, multicultural psychology, and other areas of interest.

Specialization Courses - 18 credit hours

Required Specialization Courses - 6 Credit Hours

- PSY-8147 - Psychopharmacology

- PSY-8109 - Cognitive and Personality Assessment
- **Select four Specialization Courses from the following:**
- PSY-8130 - Multicultural Psychology
- PSY-8144 - Group Therapy
- PSY-8145 - Child and Adolescent Psychology
- PSY-8148 - Adult Psychopathology
- PSY-8146 - Theories of Psychotherapy and Counseling
- PSY-8604 - Addiction Treatment and Special Populations
- PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness
- PSY-8118 - Grant Writing in Psychology
- PSY-8107 - Program Evaluation and Monitoring in Psychology
- Any PSY-8000 Level Course

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

General Psychology Specialization

The General Psychology specialization allows students to select courses from a broad range of electives to fit their personal and professional goals. This specialization also prepares students to apply principles of psychology and conduct research related to their area of interest in a variety of settings.

*Courses listed are examples and upon acceptance to the program, the initial degree plan will include these courses. Students in the General Psychology specialization are encouraged to choose six courses (18 credit hours) based on personal and professional goals and will work with their Academic and Finance Advisor to revise their degree plan. Students can select any PSY-8000 level course for this specialization. Courses from other disciplines may fill this requirement, with Department of Psychology approval. Please consult the course descriptions for a full list of available courses. Note: an internship course cannot count towards the degree program.

Specialization Courses - 18 credit hours

- PSY-8138 - Cognition, Emotion, and Motivation *
- PSY-8118 - Grant Writing in Psychology *
- PSY-8130 - Multicultural Psychology *
- PSY-8139 - Positive Psychology *
- PSY-8140 - Community Psychology *
- PSY-8141 - Human Communication- Interviewing Skills *

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Gerontology Specialization

The Gerontology specialization is designed to assist in training individuals interested in working with older adults and their families. As the world's population continues to age, the demand will continue for individuals trained in gerontology. Coursework in this certificate prepares individuals for career opportunities in health facilities, mental health clinics, numerous government agencies, and community organizations.

Specialization Courses - 18 credit hours

Select 6 courses from the following:

- PSY-8335 - Psychology of Aging
- PSY-8336 - Mental Health and Aging
- PSY-8337 - Aging, Families, and Elder Care
- PSY-8338 - Multicultural Perspectives of Aging
- PSY-8339 - Psychological Practice in Gerontology
- PSY-8340 - Death and Dying
- PSY-8341 - Positive Aging

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Health Psychology Specialization

The purpose of the Health Psychology specialization is to provide an in-depth understanding of the total matrix of factors influencing psychological and physical health and illness, prepare students to apply biopsychosocial principles in a variety of settings, and carry out research related to health psychology in a variety of settings. Eighteen (18) credit hours of coursework are devoted to Health Psychology.

Specialization Courses - 18 credit hours

- PSY-8306 - Health Psychology
- PSY-8307 - Psychosocial Factors in Health
- PSY-8308 - Behavioral Nutrition
- PSY-8309 - Eating Disorders and Obesity
- PSY-8310 - Complementary and Alternative Medicine
- PSY-8311 - Consultation and Interventions in Health Care Settings

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Industrial/Organizational Psychology Specialization

In the PhD-PSY in Industrial-Organizational Psychology specialization, you will learn to apply psychological theories to critical issues in the fields of business and industry. Specifically, you'll gain expertise in the dynamics of leadership and management, the best practices for enhancing employee motivation and engagement, and the structure and procedures of organizational development. You will become adept at applying the scientific method to investigate issues of critical relevance to individuals, businesses, and society; including employee stress and well-being, workforce diversity, and work-life balance. The application of tests and measurements and the interpretation of their results as applied to employee selection, performance appraisals, and training evaluations will also be addressed. During the program, you will have the option to complete an internship, where you can apply your newly gained knowledge and skills in an organizational setting. The internship course offers you the opportunity to train in the field, build your professional resume, and network with organizational practitioners. This I/O specialization was created to align with the Society for Industrial and Organizational Psychology's (SIOP) guidelines for education and training, and thus it offers course work which allows for the development of key competencies required for success in the field. In particular, the I/O specialization will prepare you to assume leadership positions in industry, government, consulting, and education.

Specialization Courses - 18 credit hours

- PSY-8407 - Industrial/Organizational Psychology
- PSY-8408 - Leadership and Management
- PSY-8409 - Work Motivation and Attitudes
- PSY-8410 - Organizational Development
- PSY-7113 - Recruitment, Selection, and Training

- PSY-7117 - Advanced Statistics in IO Psychology

Note

*The preferred elective course for the Industrial/Organizational Psychology specialization is PSY-8413.

Students that would like to work with the I/O Psychology Internship Coordinator to participate in an internship will need to enroll in PSY-7118 Internship in I/O Psychology, after the I/O Psychology Internship Coordinator approves the internship site and plan.

Psychology of Gender and Sexual Fluidity Specialization

The purpose of the Psychology of Gender and Sexual Fluidity specialization is to provide an in-depth understanding of the social, cultural, and biological foundations of human sexuality, gender, and sexual orientation, prepare students to apply principles of psychology related to gender diversity in a variety of settings, and carry out research related to gender diversity in a variety of settings. Eighteen (18) credit hours of coursework are devoted to Psychology of Gender and Sexual Fluidity studies.

Specialization Courses - 18 credit hours

- PSY-7121 - Socio-Contextual Psychology of Gender
- PSY-7122 - Family Processes and Social Context
- PSY-7123 - Key Theories and Concepts in Sexuality and Gender Studies
- PSY-7124 - Sexuality and Sexual Fluidity
- PSY-7125 - LGBTQ Identity and Relationship Development through the Life Cycle
- PSY-7126 - Special Topics: Research, Policy, & Advocacy from a Global Perspective

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Social Policy and Behavioral Health Administration Specialization

Social Policy and Behavioral Health Administration Specialization will focus on two areas: social policy and behavioral health administration. These two areas are highly related in the field and will allow future psychologists the ability to be leaders in the field in different settings (e.g., government, community-based organizations, etc.) and influence decision-making. The specialization contains 21 credits with 4 required courses and 3 electives from a list of 7 courses in PSY, DMFT, and PUB. Students will have the ability to design their specialization with the electives. For example, they may choose organizational-focused courses or complete a supervised internship experience.

Specialization and Elective Courses - 21 credit hours

Required Specialization Courses - 12 credit hours

- PSY-8509 - Behavioral Health Services Policy
 - PSY-8511 - Behavioral Health Administration and Management
 - PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness
 - PSY-8507 - Comparative Analysis of Evidence-based Interventions
- Select two Specialization Courses and one Elective Course from the following:
- PUB-7005 - Public Budgeting and Finance
 - PSY-8118 - Grant Writing in Psychology
 - PSY-8140 - Community Psychology
 - PSY-8408 - Leadership and Management
 - PSY-8409 - Work Motivation and Attitudes
 - PSY-8410 - Organizational Development
 - PSY-8508 - Internship in Social Policy and Mental Health Administration
 - DMFT-8704 - Systems Consultation

Note

*The preferred elective course for Social Policy and Behavioral Health Administration is PSY-8118 Grant Writing in Psychology or PSY-8140 Community Psychology. Students that would like to work with the Internship Coordinator to participate in an internship will need to use this elective to enroll in PSY-8508 Internship in Social Policy and Mental Health Administration, after the Internship Coordinator approves the internship site and plan.

Sport and Performance Psychology Specialization

The PhD Specialization in Sport and Performance Psychology offers a strong base in theory and research, promotes an awareness of ethics and a respect for diversity, and will help you advance your critical thinking and mental performance coaching skills. Taught by professors who all hold doctoral degrees, you will analyze the latest theories and trends in sport psychology literature and gain an in-depth understanding of the essential applied strategies for enhancing performance. In addition, you will gain advanced knowledge about leadership, motivation, and ethics in sport and performance psychology. Also, you will explore topics related to sport injury and rehabilitation and diversity in sport.

Specialization Courses - 18 credit hours

- PSY-7220 - Advanced Applied Theory in Sport & Performance Psychology
- PSY-7221 - Motivation in Sport & Performance Psychology
- PSY-7222 - Leadership Development in Sport & Performance Psychology
- PSY-7223 - Prof Ethics in Sport Psyc
- PSY-7224 - Psyc of Sports Injury & Rehab
- PSY-7225 - Diversity, Culture, & Society

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Substance-Related and Addictive Disorders Specialization

Substance-related and addictive disorders remain a public health concern with all ages. Looking on current data on the staggering demand for treatment for substance use and addictive disorders, the demand for professionals who understand the theoretical underpinnings and are able to conduct research in this field becomes clear. The purpose of the substance-related and addictive disorders specialization is to provide mental health professionals, providers and researchers knowledge and expertise in the area of substance related and addictive disorders. Dynamics of substance-use and addictive disorders, with an emphasis on assessment and treatment planning will be explored. Coursework also examines research and theories related to substance use and addictive disorders, as well as co-occurring disorders.

Specialization Courses - 18 credit hours

- PSY-8157 - Clinical Survey in Substance-Related and Addictive Disorders
- PSY-8155 - Group Counseling in the Treatment of Substance Use Disorder
- PSY-8152 - Co-occurring Substance Related and Addictive Disorders and other Mental Conditions
- PSY-8153 - Family Systems Approaches for Substance-Related and Addictive Disorders
- PSY-8154 - Substance Related and Addictive Disorder Assessment and Treatment Planning
- PSY-8156 - Research in Substance-Related and Addictive Disorders

Note

*The preferred elective course for Substance-Related Disorders is PSY-8118 Grant Writing in Psychology or PSY-8511 Behavioral Health Administration and Management or PUB-7005 Public Budgeting and Finance.

Trauma and Disaster Relief Specialization

Increasing natural disasters, incidents of abuse and neglect, terrorism, war, violence, and conflict on a local, national, and global level have created a demand for individuals trained in identifying and treating the aftermath of trauma. Victims, witnesses, and relief workers who experience trauma may also find themselves facing a variety of psychological issues, difficulties in interpersonal relationships, physical health problems and be placed at future risk. Mental health workers would benefit from understanding the various facets of trauma, its impact on coping skills, and treatment, intervention, and prevention strategies.

Exposure to trauma and disaster can lead to emotional and behavioral issues for victims, survivors, relief workers, and bystanders. The Trauma and Disaster Relief specialization prepares students to work with individuals who have witnessed natural disasters, accidents, abuse, physical injury, bullying, etc., and who are now grappling with how to cope or to integrate memories or feelings related to that experience.

Specialization Courses - 18 credit hours

- PSY-8312 - Concepts of Trauma and Resiliency
- PSY-8313 - Trauma across the Developmental Continuum
- PSY-8314 - Disaster Response and Trauma Responsive Practices
- PSY-8315 - Community Trauma and Resilience
- PSY-8316 - Diversity in Trauma and Disaster Response
- PSY-8317 - Research Ethics in Trauma and Disaster Response

Note

*The Elective course in the PhD in Psychology degree can be satisfied by any 8000-level course in the Department of Psychology.

Department of Social Sciences

Bachelor of Social Work, BSW

Description of Program

The Bachelor of Social Work (BSW) Degree Program prepares students for critical anti-racist entry-level generalist practice with individuals, families, groups, organizations, and communities. Through courses and practicum experience, students gain the knowledge, skills, and values essential for equity-focused generalist practice in a variety of social work settings. The BSW degree also qualifies students to begin their study for a Master of Social Work degree with advanced standing.

BSW students are required to get 400 hours of practicum experience in two different social service agencies. The first practicum is 100 hours and takes place in conjunction with SWR-380: Social Work Practicum I. This class is 12 weeks long and includes a 1-hour Zoom class meeting per week. The second practicum is divided into two sections. The first is 150 hours and co-occurs with SWR-490: Social Work Practicum IIa. The second is 150 hours and co-occurs with SWR-491: Social Work Practicum IIb. Those two classes are also 12 weeks long and include a 1-hour/week Zoom meeting.

[Click here](#) for potential career opportunities within the Bachelor of Social Work.

****The University is not currently enrolling students in this program ****

Learning Outcomes

- Demonstrate ethical and professional behavior
- Advance human rights and social, racial, economic, and environmental justice.
- Engage anti-racism, diversity, equity, and inclusion (A DEI) in practice.
- Engage in practice-informed research and research-informed practice.
- Engage in policy practice.

- Engage with individuals, families, groups, organizations, and communities.
- Assess individuals, families, groups, organizations, and communities.
- Intervene with individuals, families, groups, organizations, and communities.
- Evaluate practice with individuals, families, groups, organizations, and communities.

Basis for Admissions

To be considered for admission to the BSW program, all prospective students must provide one of the documents listed in the table below.

Additionally, students must be able to meet the 48-semester credit hour of General Education courses requirement prior to applying to the BSW program. These courses can be completed with National University in our class-based modality and applied to the BSW program once accepted or can be transfer credits from another institution as long as those transfer credits are identified as meeting the requirements of the General Education coursework.

Documentation	
Official transcripts from a regionally or nationally accredited high school, high school level proficiency test, or have documented home school completion.	N/A
Or	
Unofficial Associate of Arts or Associate of Science degree from a regionally or nationally accredited institution posted transcript that can be degree-verified through the National Student Clearinghouse (NSC). Except where prohibited by accreditation.	If an unofficial is unable to be verified through NSC, an official Associate of Arts or Associate of Science degree from a regionally or nationally accredited institution is required. Students that hold an non AA or AS degree will need to be evaluated in order to be approved.
Or	
A signed attestation of associate degree conferral and an unofficial transcript that can be degree-verified through the National Student Clearinghouse (NSC)*	N/A

* **Note:** Students who provide an attestation of conferral for a degree conferral date that has not yet occurred are not permitted to attend courses until official documentation is received. Degree conferral dates must be within six months from the date of application to NU.

Note: To be considered for transfer credit, the courses must be completed at the associate and bachelor degree levels; remedial and developmental courses cannot be accepted as transfer credit. Courses must also be completed at a regionally or nationally accredited academic institution. Transfer credit for BSW Core, Foundation & Elective courses must come from CSWE Accredited programs and be approved by the APD. For more information on transfer credit, please visit the [Transfer Credit Policy](#).

Additional Requirements

In addition to the NU application for enrollment, applicants to the BSW Program must submit the following materials:

- Statement of intent that addresses their interest in social work and commitment to anti-racism, diversity, equity, and inclusion.
- Statement of professional ethics and conduct
- List of potential practicum sites in their area of residence

- Current resume
- Background check completed through NU's designated provider (the background check must be completed before the start of SWR-465 - Social Work with Families)

Degree Requirements

- The Bachelor of Social Work degree requires 120 semester credit hours.
- A Grade Point Average of 2.0 (letter grade of "C"), or higher is required to remain in academic good standing and to be eligible for graduation.
 - Students who want to be admitted to Advanced Standing in most MSW programs, including the NU MSW, are required to have a 3.0 (letter grade of "B") in the BSW.
- Official transcripts are required to be on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma
- Official documents must be on file demonstrating all requirements of basis for admissions have been met
- The University may accept a maximum of 90 semester credit hours in transfer toward the bachelor's degree for coursework completed at an accredited or approved college or university with a grade of "C-" or better.
 - Transfer credit for BSW Core and Foundation courses must be from CSWE Accredited programs and be approved by the APD.

Credit Hour Requirements

The Bachelors of Social Work requires 120 semester credit hours for graduation which must be aligned with the following credit hour categories;

48 – Credit Hours from the General Education courses satisfied by transfer credits

9 – Credit Hours of Preparation Courses

54 – Credit Hours of Core Courses

6 – Credit Hours of Elective Courses

3 – Credit Hours of Social Work Capstone Course

Total - 120 Credit Hours

Note: Students are required to satisfy the General Education course requirements and Preparation course requirements before they may begin on the Bachelor of Social Work Core courses.

Time to Completion

The University allows 180 attempted credit hours to complete all 120 credit bachelor programs.

Estimated time to completion for this program is 74 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program may be able to finish in as little as 47 months depending on the amount of transfer credit.

Course Sequence

- Preparation Course 1
- Preparation Course 2
- Preparation Course 3*
- SWR-350 - Social Welfare Policy I
- SWR-355 - Documentation in Social Work
- SWR-360 - Diversity, Rights, & Justice
- SWR-365 - HBSE I
- SWR-370 - The Helping Process
- SWR-375 - Generalist Practice I
- SWR-380 - Social Work Practicum I
- SWR-450 - HBSE II
- SWR-455 - Generalist Practice II
- Mathematics Course
- SWR-460 - Social Welfare Policy II
- SWR-465 - Social Work with Families
- SWR-470 - Social Work Research Methods
- SWR-475 - Small Group Theory & Practice
- SWR-480 - Organizational Theory/Behavior
- SWR-485 - Social Justice & Macro Practice
- SWR-490 - Social Work Practicum IIa
- SWR-491 - Social Work Practicum IIb
- Elective Course 1
- Elective Course 2
- SWR-495 - Social Work Capstone

Note

*The Preparation Course SWR-300: Introduction to Social Work will be taken as part of the Social Work Core Requirement.

Preparation Courses - 9 Credit Hours

- PSY-2001 - Introductory Psychology
- SOC-2010 - Introduction to Sociology
- SWR-300 - Introduction to Social Work

Social Work Core Requirement - 54 Credit Hours

- SWR-350 - Social Welfare Policy I
- SWR-355 - Documentation in Social Work
- SWR-360 - Diversity, Rights, & Justice
- SWR-365 - HBSE I
- SWR-370 - The Helping Process
- SWR-375 - Generalist Practice I
- SWR-380 - Social Work Practicum I
- SWR-450 - HBSE II
- SWR-455 - Generalist Practice II
- MTH-2010 - Data in Context
- SWR-460 - Social Welfare Policy II
- SWR-465 - Social Work with Families

- SWR-470 - Social Work Research Methods
- SWR-475 - Small Group Theory & Practice
- SWR-480 - Organizational Theory/Behavior
- SWR-485 - Social Justice & Macro Practice
- SWR-490 - Social Work Practicum IIa
- SWR-491 - Social Work Practicum IIb

Elective Courses - 6 Credit Hours

Please select two of the following courses:

- SWR-391 - Social Work in Child Welfare
- SWR-392 - Social Work & Human Sexuality
- SWR-393 - Intimate Partner Violence
- SWR-394 - Social Work & Substance Use
- SWR-395 - Generalist Practice & Mental Health

Social Work Capstone Course - 3 Credit Hours

- SWR-495 - Social Work Capstone

Post-Baccalaureate Certificate in Marriage and Family Therapy

Description of Program

The Post-Baccalaureate Certificate in Marriage and Family Therapy is designed for students who have completed at least their bachelor's degree and are seeking academic expertise or to meet state-level requirements for licensure through a graduate level certificate program. In order to earn a Post-Baccalaureate Certificate, students must complete four courses (a total of 12 credit hours*) within the chosen Post-Baccalaureate Certificate program. Students can customize this certificate program as described below. Students must complete all four courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

In order to be eligible for clinical work (if needed), students in this certificate need to demonstrate passing grades in all pre-requisite (or equivalent) courses from an accredited university. The six content areas for pre-requisite coursework include: one course in theoretical foundations, one course in professional ethics, one course in clinical assessment, one course in diagnosis/psychopathology, and two courses in treatment methods/models of therapy/counseling. Certificate students will need to provide a copy of their transcripts to confirm successful completion (passing grades) of these pre-requisite courses.

Note: Students who have made application for licensure are encouraged to verify with state licensure divisions or boards that the courses they select will meet the specific state requirements before enrolling in this certificate program.

*Note: The Marriage and Family Sciences Trauma Studies Post-Baccalaureate certificate requires completion of 18 credit hours.

[Click here](#) for potential career opportunities using the Post-Baccalaureate Certificate.

Basis for Admissions

Admission to the Post-Baccalaureate Certificate program requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution. An interview with an administrative faculty member is available for any applicant to the certificate program but is required for those using the certificate to be qualified for licensure (for those who will be doing clinical courses as a part of the certificate, a background check is also required).

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Baccalaureate certificate program. Coursework must have been completed at an accredited college or university within the last five years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Baccalaureate Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 12 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 10 months.

Post-Baccalaureate Certificate Transfer into a Master's Degree Sequence

- Coursework completed within a Post-Baccalaureate Certificate program may be applied towards the master's program.
- Applying Post-Baccalaureate coursework towards a master's degree is contingent upon coursework and degree relevance under the most current version of the master's degree.

Specialization coursework completed as part of a master's degree, where a degree was conferred, cannot be applied towards a Post-Baccalaureate Certificate program. However, a Post-Baccalaureate Certificate can be completed as part of master's coursework, assuming the student officially applies for the Post-Baccalaureate Certificate prior to completing the fourth course in the Post Baccalaureate Certificate series.

Marriage and Family Therapy

Students can select any four courses from all the courses listed below or they can select a group of courses based on an area of specialization.

Areas of Emphasis and Specific Courses - 12 credit hours

Students can select any four courses from all the courses listed below or they can select a group of courses based on an area of specialization.

Child and Adolescent Family Therapy

- MFT-6104 - Family Therapy with Children
- MFT-6106 - Families in Crisis
- MFT-6113 - Assessing and Treating Family Violence
- MFT-6550 - Child and Adolescent Family Therapy: Historical and Theoretical Foundations
- MFT-6551 - Child and Adolescent Family Therapy: Clinical Applications

Couple Therapy

- MFT-6105 - Couple and Sex Therapy
- MFT-6109 - Sex Therapy in MFT
- MFT-6115 - Emotionally Focused Couples Therapy
- MFT-6116 - Systemic Treatment of Infidelity and Sex Addiction
- MFT-6510 - Couple Therapy: Historical and Theoretical Foundations
- MFT-6511 - Couple Therapy: Clinical Applications

General Family Therapy

- MFT-5104 - Treatment Planning and Traditional Family Therapy
- MFT-5105 - Recovery-Oriented Care and Postmodern Family Therapy
- MFT-6104 - Family Therapy with Children
- MFT-6105 - Couple and Sex Therapy

Note: Students may complete the recommended courses listed above or they may select any four MFT master's level courses (with the exception of MFT-5101).

LGBTQ couple and Family Therapy

- MFT-6109 - Sex Therapy in MFT
- MFT-6203 - Human Sexuality
- MFT-6540 - LGBTQ Couple and Family Therapy: Historical and Theoretical Foundations
- MFT-6541 - LGBTQ Couple and Family Therapy: Clinical Applications
- MFT-6542 - Transgender Individuals in Families: Clinical Perspectives

Medical Family Therapy

- MFT-6112 - Fundamentals of Psychopharmacology
- MFT-6118 - Gerontology and Systemic Intervention Master's
- MFT-6530 - Medical Family Therapy: Historical and Theoretical Foundations
- MFT-6531 - Medical Family Therapy: Clinical Applications

Military Family Therapy

- MFT-6113 - Assessing and Treating Family Violence
- MFT-6116 - Systemic Treatment of Infidelity and Sex Addiction
- MFT-6520 - Military Family Therapy: Historical and Theoretical Foundations
- MFT-6521 - Military Family Therapy: Clinical Applications

MFT Dual Licensure

The MFT Dual Licensure certificate program is focused on assisting students to complete the additional course work needed to add the Licensed Professional Counselor (LPC) license to their LMFT.

Specialization Courses – 12 credit hours

Students seeking this certificate are required to complete the four courses listed below.

- PSY-6109 - Career and Lifestyle Development
- PSY-8144 - Group Therapy
- PSY-6121 - Theories of Psychotherapy and Counseling
- PSY-6114 - Psychological Tests and Measurements *

Note

* PSY-6114 is the recommended elective; however, the fourth course can be modified based on unique state licensure requirements. During an interview with an administrative faculty member the fourth course will be determined.

Systemic Sex Therapy

The Systemic Sex Therapy Certificate is focused on developing the skills and personal and professional growth that are required for effective practice in the field of Marriage and Family Therapy while working with individuals and couples facing sexual difficulties.

Specialization Courses – 12 credit hours

Students in this certificate are required to complete the four courses listed below.

- MFT-6710 - Systemic Sex Therapy: Historical and Theoretical Foundations
- MFT-6711 - Systemic Sex Therapy: Clinical Applications
- MFT-6712 - Diversity of Sexual Expression in MFT
- MFT-6713 - Techniques for Treating Sexual Functioning and Behavior in MFT

Systemic Treatment of Addictions

The Systemic Treatment of Addictions Certificate program is focused on developing the skills and personal and professional growth that are required for effective practice in the field of Marriage and Family Therapy while working with individuals and families who are facing addictions or co-occurring disorders.

Specialization Courses – 12 credit hours

Students in this certificate are required to complete the four courses listed below.

- MFT-6111 - Systemic Interventions in Addictions
- MFT-6810 - Addictions: Historical and Theoretical Foundations
- MFT-6811 - Addictions: Clinical Applications
- MFT-6812 - Systemic Treatment of Co-occurring Disorders

Trauma Studies

The Post-Baccalaureate Certificate in Trauma Studies program is focused on developing the skills and personal and professional growth that are required for effective practice in ones chosen field (MFT, Social Work, etc.), while working with individuals and families who might have been exposed to traumatic events and dealing with effects related to traumatic experiences.

Specialization Courses – 18 credit hours

The first three courses are required:

- MFS-6000 - Foundations of Trauma Studies
- MFS-6001 - Assessment and Treatment Planning of Trauma
- MFS-6002 - Global Implications of Trauma

Select three courses from the following:

- MFS-6003 - The Neurobiology of Trauma and Art-Based Interventions
- MFS-6004 - Somatic Approaches/Vicarious Trauma and Self-care
- MFS-6005 - Working with Trauma in Family Systems, Systemic Trauma: Self, Culture, and Society
- MFT-6106 - Families in Crisis
- MFT-6113 - Assessing and Treating Family Violence
- MFT-6610 - Trauma and Family Therapy: Historical and Theoretical Foundations
- MFT-6611 - Trauma and Family Therapy: Clinical Applications

Master of Arts in Marriage and Family Therapy, MA

Description of Program

The Masters of Arts in Marriage and Family Therapy (MAMFT) degree program is focused on developing the skills and personal and professional growth that are required for effective practice in the field of Marriage and Family Therapy. The program is designed to provide an integrated learning experience for adult students seeking specific training in the profession of Marriage and Family Therapy (MFT). Students in this program will critically analyze a broad range of theories and practical knowledge in MFT. Degree requirements also include involvement in ongoing clinical work and supervision. This training prepares students for therapeutic and educational work in a variety of settings including mental health centers, public service agencies, correctional institutions, industry, medical settings, and private practice. Additional program description, requirements, policies, and procedures are further described in the [MFT Program Handbook](#) and the [Clinical Training Handbook](#).

Graduates of the master's level program will be well prepared to begin the process of seeking licensure in their home state or area.

[Click here](#) for potential career opportunities using the MAMFT.

Note: Program availability may vary by state - please contact the Enrollment Office for more information

Learning Outcomes

The goals (referred to as Student Learning Outcomes) of the (MAMFT) program are:

1. Employ competence in working with diverse populations in clinical settings. (SLO #1)
2. Students/graduates** will evaluate family systems oriented clinical skills across a variety of contexts. (SLO #2)
3. Examine family systems theory oriented models of therapy (SLO #3)
4. Formulate a decision-making process for ethical dilemmas congruent with the AAMFT Code of Ethics. (SLO #4)
5. Integrate relevant research to inform the practice of marriage and family therapy (SLO #5).

The MAMFT degree is structured to assist students to seek licensure in the state or jurisdiction of their choice. To allow this, courses can be added to the standard 45 credit program (up to a total program requirement of 60 credits) to assist with meeting licensure requirements. Eligible transfer credits can be applied to the program to support the respective state licensure requirement.

A core goal of the Master of Arts in Marriage and Family Therapy (MAMFT) degree is to qualify students to become licensed as Marriage and Family Therapists and pursue a career within this field. The University recognizes that today's professionals are much more likely to move, live, and work in multiple states during their professional careers. With over 25% (n=16) of states now requiring 60 credit hour degrees to qualify for MFT licensure, and with more states proposing this change, it is recommended that students consider a degree plan and electives that maximize portability of the degree throughout the U.S.

The University recognizes that a majority of states do not yet require 60 credit hour degrees and thus desire to allow students to keep the cost of their education as low as possible while still balancing the need of having a degree that allows for transportability between states during their professional career. Due to the nature of the MFT profession and differences that exist today in state licensing requirements, the University allows students the ability to select additional electives above the required 45-credit degree plan, up to 60 credits.

Basis for Admissions

In addition to evidence of a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution, applications for admission to the Department of Social Sciences Master's programs require prior to the first date of attendance:

- Current resume or CV
- Statement of Intent
- Licensure plan (not required for applicants with an existing MFT license)

- Statement of professional ethics and conduct
- List of clinical site possibilities in the area of residence
- Course transfer/waive request (if applicable)
- Interview with an MFT faculty member
- Background check - All students in the MFT program that currently live or who have ever lived in the United States are required to complete a background check through the University's designated provider prior to acceptance in the MFT program. International students and students holding a current MFT or other (e.g., LPC, LCSW) clinical license are exempt from the requirement. Some students will do this as part of the application process, all students will have this completed before starting work in their clinical placements. (See the MFT application packet for further details)

Degree Requirements

The MAMFT degree requires a minimum of 45 credit hours at the graduate level beyond the bachelor's degree. While not required for graduation, students who need to complete a program requiring more than 45 credits and up to 60-credits or who need specific additional courses for their state licensure requirements will be allowed to complete optional elective courses to meet these requirements, which will constitute the total credit requirements for graduation from the program.

The University may accept a maximum of 15 semester credit hours in transfer toward the master's degree for graduate coursework completed toward a graduate degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content to the required course work in the MAMFT program. See the [Transfer Credit Policy](#) for additional information.

The MAMFT program has the following graduation requirements:

- A minimum of 36 credit hours of graduate instruction must be completed through the University
- Successful completion of all required degree program courses with a Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Beyond these standard graduation requirements, the MAMFT program has the following degree requirements:

1. **Online Video Conferencing** – In order to complete some of the course requirements and to participate in the online supervision process that is used during the practicum and internship courses, students are required to participate in several online video conferencing meetings throughout their time in the program. In order to participate in these video conference sessions, students are required to own or otherwise have access to a computer, a web cam, a headset, a video recording device, and a high-speed internet connection.
2. **Client Contact** – MAMFT students will be required to complete 300 hours of direct client contact, which includes conducting face-to-face therapy with individuals, couples, families, and groups. At least 150 hours of client contact must be relational (e.g., couple or family). See section below for new client contact requirements starting January 1, 2022. For more information, please read the practicum and internship course descriptions or the Clinical Training Handbook.
3. **Supervision** – In conjunction with client contact, MAMFT students must receive a total of 100 hours of supervision, at least fifty-two (52) of which must be individual supervision conducted by an AAMFT Approved Supervisor, AAMFT Supervisor Candidate, or state-approved supervisor. At least 50 of the supervision hours must also involve a supervisor's review of the student's therapy with clients via video/audio recording or live observation. See section below for new client contact requirements starting January 1, 2022. In some cases, students may be required to pay for local supervision. This will depend on the clinical placement location and/or local supervisor they contract with to complete their practicum and internship requirements. The decision and responsibility to pay for local supervision is entirely up to the student and not a requirement of the University.
4. **Liability Insurance** – Prior to beginning any clinical experience, students are required to submit proof of professional liability insurance. This is included with a student membership in the American Association for Marriage and Family

Therapy (for California students it is also included in the student membership in the California Association of Marriage and Family Therapists).

5. **Clinical Hours Tracking** – the MAMFT program uses a web-based system to document completion of clinical hours. Students, local approved clinical supervisors and University faculty training supervisors all have access to the system in order to support the successful completion of the clinical training requirements for the program. Students will be allowed access to the system upon request after they have completed at least six courses.

Time to Completion

The University allows 6 years to complete all Master's programs of 36 credits or more.

The median time to completion for this program is 49 months.

Time to completion varies depending upon the pace at which a student completes courses and the number of transfer credits accepted. As most University students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 33 months.

Practicum Information

New Practicum/Internship Requirements starting January 1, 2022

Hours Requirement

Marriage and Family Therapy Master's students must complete two practicum courses, two internship courses, and a final Capstone internship course over a minimum of 52 weeks. During this time students will need to acquire a minimum of 300 total direct therapy hours, 150 of which must be relational, unless a higher amount is required by the state licensure statutes. Teletherapy is permissible, but at least 50 of the 300 hours must consist of in-person therapy. Additionally, only 50 of the hours may be comprised of co-therapy and at least 50 of the hours must be related to the student's specialization (as applicable).

In conjunction with client contact hours, master's students must complete 100 hours of supervision, 52 of which must be direct individual supervision with the approved local supervisor. Telesupervision is permissible, but at least 12 hours of in-person supervision (1 hour a month) is required. Also, within the total supervision hours, at least 50 hours of supervision must include observable data, or review of the student's clinical work through live observation, co-therapy, or review of video or audio recordings of the student's clinical sessions. Additionally, students must meet for 2 hours each week via videoconference for University Group Training Supervision with a University faculty training supervisor during the practicum and internship courses. Per COAMFTE standards, students only count therapy hours during weeks that they receive supervision from an AAMFT Approved Supervisor.

Preparation Process

Students are eligible to begin clinical training after completion of the ninth course (students in states that require 60 credits are encouraged to begin after the twelfth course). Students are not permitted to start their first clinical course until all the below courses are successfully completed:

Foundations Courses

MFT-5101 - Foundations for Graduate Study in Marriage and Family Therapy

MFT-5104 - Treatment Planning and Traditional Family Therapy

MFT-5105 - Recovery-Oriented Care and Postmodern Family Therapy

Fundamental Courses

MFT-5103 - Systemic Evaluation and Case Management

MFT-5102 - Legal, Ethical and Professional Development in Marriage and Family Therapy

MFT-6102 - Psychopathology, Diagnosis, and Systemic Treatment

Prior to enrolling in the first practicum course, students must complete the Practicum Preparation Process (PPP) and receive clinical readiness approval. As part of the PPP, students will be required to secure a local clinical placement as well as a local supervisor. The local supervisor must be an AAMFT Approved Supervisor (or Supervisor Candidate) or someone who meets state requirements for supervision that includes relational/systemic supervision training of post-graduate (or, if stated by state licensure law, student requirements) MFTs seeking state licensure within their state.

The Marriage and Family Therapy programs provide support to students in securing quality internship placements by having a team of full-time faculty and a clinical coordinator whose primary responsibility is supporting students in the process of searching, vetting, and maintaining sites and supervisors. This team also ensures student preparation for engaging in clinical work through the Practicum Preparation Process. The program keeps a database of previously approved sites in all states where students have completed clinical training. Students searching for sites and supervisors are welcome to contact previous sites the program has used or select a new site that fits their interest and meets the programs requirements.

Requirements in the Clinical Courses

A few requirements are needed within each clinical course. First, in addition to the above-mentioned weekly supervision, it is recommended that students engage in 6-7 direct client hours per week, or 70 hours for each of the first four clinical courses if they are eligible for the 300-hour program requirement. More hours will be needed weekly (8-10) if the state requires that students obtain more than 300 hours. Students who have significantly fewer hours than the recommended at the end of each course will see this reflected in their clinical course grades and may need to take additional internship classes. Second, students must receive satisfactory evaluations from their local site supervisor and their University faculty training supervisor in each clinical course. Third, students must take the AATBS practice exam online and submit the results to *NCUOne*. This is a practice exam for the national licensing exam or the California licensing exam. Information about preparing for and taking this practice exam is provided in the applicable course syllabus. Finally, students must prepare and give a presentation demonstrating their competence in their preferred model of therapy. This presentation will be given in an online video conference and must include video clips from actual therapy sessions of one case. Students must pass the Final Case Presentation and acquire the needed hours to graduate.

MFT-6930 - MFT Practicum I

MFT-6931 - MFT Practicum II

MFT-6932 - MFT Internship I / MFT-6932CA - MFT Internship I

MFT-6933 - MFT Internship II / MFT-6933CA - MFT Internship II

If students are not ready to take the Internship & Capstone course by the end of MFT-6933/MFT-6933CA the following extension courses may be added MFT-6935 - MFT Internship Extension I or MFT-6936 - MFT Internship Extension II or MFT-6937 - MFT Internship Extension III or MFT-6938 - MFT Practicum III (Extension course for Rhode Island Students).

MFT-6934 - MFT Internship and Capstone / MFT-6934CA - MFT Internship and Capstone is taken as the last course after any additional extension courses that might be required.

Non-degree students are eligible to enroll in the clinical courses pending review and approval by the Program Leadership.

Internship Information

MA in Marriage and Family Therapy As a final requirement of MFT-6934 - MFT Internship and Capstone Presentation / MFT-6934CA - MFT Internship and Capstone Presentation , the student must prepare and give a presentation detailing their preferred model of therapy. This presentation will be given in an online video conference and must include video clips from actual therapy sessions in which the student demonstrates how they use the presented theory of therapy with their clients. Students must pass the Final Case Presentation in order to graduate.

Course Sequence

The basic MAMFT is a 45-credit hour program. Students that need to take additional requirements for state licensure may need to satisfy up to 60 credit hours.

- MFT-5101 - Foundations for Graduate Study in Marriage and Family Therapy
- MFT-5104 - Treatment Planning and Traditional Family Therapy
- MFT-5105 - Recovery-Oriented Care and Postmodern Family Therapy
- MFT-6103 - Cultural Diversity, Gender, and Family Development
- MFT-5103 - Systemic Evaluation and Case Management
- MFT-5102 - Legal, Ethical and Professional Development in Marriage and Family Therapy
- MFT-6102 - Psychopathology, Diagnosis, and Systemic Treatment
- MFT-6105 - Couple and Sex Therapy
- Specialization Course 1
- Specialization Course 2
- MFT-5106 - Research Methods and Evidence Based Practice
- MFT-6101 - Human Development and Family Dynamics Across the Lifespan
- State Specific/Elective Course 1 **
- State Specific/Elective Course 2 **
- State Specific/Elective Course 3 **
- MFT-6930 - MFT Practicum I *
- State Specific/Elective Course 4 **
- MFT-6931 - MFT Practicum II *
- MFT-6932 - MFT Internship I *
- State Specific/Elective Course 5 **
- MFT-6933 - MFT Internship II *
- Additional Practicum Extension Courses as needed
- MFT-6934 - MFT Internship and Capstone *

Note:* Designates MFT Practicum I as 2 credits, MFT Practicum II as 2 credits, MFT Internship I as 2 credits, MFT Internship II as 2 credits, and MFT Internship and Capstone as 1 credit

Note ** State Specific Licensure Requirements (for states that require more than 45 credits)

State Specific and Elective Courses

While the Marriage and Family Therapy program requires only 45 Credit Hours to graduate, some students may need additional specific courses or additional credit hours in order to meet state licensure requirements. These courses can be selected from relevant Marriage and Family Therapy courses as needed. Any additional courses required for licensure will become a part of the total credit requirements for the student's degree plan.

To assist students in taking courses that align with their state licensing requirements, if needed students can select from a predetermined list of courses to fill their course requirements or they can request approval to take any of the specialization courses in the MAMFT curriculum. If there are not state specific requirements for certain courses, we recommend students take MFT-6104 - Family Therapy with Children and MFT-6106 - Families in Crisis.

Students should review their state educational requirements and speak with their Academic and Finance Advisor or faculty member to determine the best fit.

Specializations

Obtaining a specialization at the master's level offers students the opportunity to focus their studies in a specific content area. By focusing on this specialized area, students gain both content and application knowledge that enables them to become an "expert" in the particular area.

Students in the MAMFT program may elect to complete a specialization in one of the six areas described below.

The following requirements must be met to receive the selected specialization:

1. All courses required for licensure in the selected state
2. Completion of the customized research course (MFT-5106)
3. Completion of the two specialization courses as listed below
4. Completion of at least 50 hours of client contact with clients focused in the selected specialization (supervised by a qualified MFT supervisor)

Note: Students may receive a certificate if all coursework is completed but the 100 hours of supervised experience cannot be completed.

Child and Adolescent Family Therapy Specialization

The Child and Adolescent Family Therapy specialization is designed to prepare students to work in therapeutic settings with children and adolescents using a family therapy, systems approach. Students in this specialization are required to complete the two content courses listed below, the research course (MFT-5106) focusing on issues related to working with children, adolescents, and families as well as completing at least 100 hours of clinical experience in an approved setting with a qualified local supervisor.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6550 - Child and Adolescent Family Therapy: Historical and Theoretical Foundations
- MFT-6551 - Child and Adolescent Family Therapy: Clinical Applications

Couple Therapy Specialization

The Couple Therapy specialization is designed to prepare students to work primarily, using a family therapy, systems perspective, with couples in therapeutic settings. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to working with couples, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6510 - Couple Therapy: Historical and Theoretical Foundations
- MFT-6511 - Couple Therapy: Clinical Applications

General Family Therapy Specialization

The General Family Therapy specialization allows students to select courses from a broad range of electives to fit their state requirements as well as their personal and professional ambitions. In this specialization, students are required to complete two content courses selected from any of the master's level specialization courses (6 credit hours), the standard research course (MFT-5106), and the standard clinical experience as listed above.

This specialization utilizes the standard course sequence listed above.

LGBTQ Couple and Family Therapy Specialization

The LGBTQ Couple and Family Therapy specialization is designed to prepare students to work with clients in the LGBTQ community and to specialize in working with couples and families using a family therapy, systems oriented approach. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to working with LGBTQ couples and families, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students can choose any two of the following courses:

- MFT-6540 - LGBTQ Couple and Family Therapy: Historical and Theoretical Foundations
- MFT-6541 - LGBTQ Couple and Family Therapy: Clinical Applications
- MFT-6542 - Transgender Individuals in Families: Clinical Perspectives

Medical Family Therapy Specialization

The Medical Family Therapy specialization is designed to prepare student to work with individuals, couples, and family that are facing chronic and acute medical difficulties. Medical Family Therapy incorporates a family therapy, systems perspective in helping clients to understand and manage their medical difficulties. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to medical family therapy, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6530 - Medical Family Therapy: Historical and Theoretical Foundations
- MFT-6531 - Medical Family Therapy: Clinical Applications

Military Family Therapy Specialization

The Military Family Therapy specialization prepares students to work primarily, using a family systems perspective, with individuals, couples, and families that are affiliated with the military. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to working with military families, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6520 - Military Family Therapy: Historical and Theoretical Foundations
- MFT-6521 - Military Family Therapy: Clinical Applications

Systemic Sex Therapy Specialization

This specialization is designed for students that are interested in working with individuals and couples that are facing sexual difficulties. Courses in this specialization cover the historical and theoretical foundations of systemic sex therapy, including how religion, culture and society have informed sexual behaviors. Students will learn about sexual disorders, models of therapy and assessment, creating a non-judgmental therapeutic alliance with clients and ethical issues specific to this field of practice. Additionally, students will learn how to apply this knowledge within the practice of marriage and family therapy. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to working with clients struggling with sexual issues, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

Obtaining a specialization at the master's level allows students to focus their education and develop additional expertise in their particular area of study. It also provides the foundation (additional course work and supervised practice are required) for post-graduate pursuit of certification through the American Association of Sexuality Educators, Counselors and Therapists (AASECT).

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6710 - Systemic Sex Therapy: Historical and Theoretical Foundations
- MFT-6711 - Systemic Sex Therapy: Clinical Applications

Systemic Treatment of Addictions Specialization

This specialization is designed for students that are interested in working with individuals and families facing addiction issues and co-occurring disorders. Courses in this specialization examine the historical and theoretical foundations of addictive disorders, the philosophies of co-occurring disorders and various systematic theories and evidence-based models for treatment. Students will also learn methods for assessing substance-related and addictive disorders in the context of family therapy and ethical issues related to working in the field of addictions as a Marriage and Family Therapist. Students in this specialization are required to complete two of the content courses listed below, the research course (MFT-5106) focusing on issues related to working with clients struggling with addiction issues, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

Obtaining a specialization at the master's level allows students to focus their education and develop expertise in their particular area of study. It also provides the foundation (additional course work and supervised practice are required) for post-graduate pursuit of certification or licensure in many states of the United States.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students can choose any two of the following courses:

- MFT-6810 - Addictions: Historical and Theoretical Foundations
- MFT-6811 - Addictions: Clinical Applications
- MFT-6812 - Systemic Treatment of Co-occurring Disorders

Trauma Informed Systemic Therapy Specialization

This specialization is designed for students that are interested in helping individuals and families cope with the effects of traumatic events. Courses in this specialization are aligned with the International Association of Trauma Professionals (IATP) and cover a range of topics such as the nature and impact of psychological trauma, posttraumatic stress disorder and the human capacity for healing. Students will also learn about the historical and theoretical foundations of trauma, crisis-related issues in marriage and family therapy and systems-based theories and models in the context of family violence. Students in this specialization are required to complete the two content courses listed below, the research course (MFT-5106) focusing on issues related to working with clients who have experienced trauma in their lives, and at least 100 hours of clinical experience in an approved setting with a qualified local clinical supervisor.

Obtaining a specialization at the master's level allows students to focus their education and develop expertise in their particular area of study.

This specialization utilizes the standard course sequence listed above.

Specialization Courses - 6 credit hours

Students must complete the following courses:

- MFT-6610 - Trauma and Family Therapy: Historical and Theoretical Foundations
- MFT-6611 - Trauma and Family Therapy: Clinical Applications

California Licensure Track

The Masters of Arts in Marriage and Family Therapy-California Licensure Track is focused on developing the skills and personal and professional growth that are required for effective practice in the field of Marriage and Family Therapy. This option has been accepted by the Board of Behavioral Sciences (BBS); the MFT licensing board in California. The program is designed to provide an integrated learning experience for adult students seeking specific training in the profession of Marriage and Family Therapy (MFT). Students in this program will critically analyze a broad range of theories and practical knowledge in MFT. Degree requirements also include involvement in ongoing clinical work and supervision. This training prepares students for therapeutic and educational work in a variety of settings including mental health centers, public service agencies, correctional institutions, industry, medical settings, and private practice. Additional program description, requirements, policies, and procedures are further described in the MFT Program Handbook and Clinical Training Handbook.

Graduates of this master's level track within the MAMFT program will be well prepared to begin the process of seeking licensure in California.

California Licensure Track Course Sequence

- MFT-5101 - Foundations for Graduate Study in Marriage and Family Therapy
- MFT-5104 - Treatment Planning and Traditional Family Therapy
- MFT-5105 - Recovery-Oriented Care and Postmodern Family Therapy
- MFT-6103 - Cultural Diversity, Gender, and Family Development
- MFT-5103 - Systemic Evaluation and Case Management
- MFT-6201 - California Law and Professional Ethics
- MFT-6102 - Psychopathology, Diagnosis, and Systemic Treatment
- MFT-6105 - Couple and Sex Therapy
- MFT-6104 - Family Therapy with Children
- MFT-6106 - Families in Crisis
- MFT-5106 - Research Methods and Evidence Based Practice
- MFT-6101 - Human Development and Family Dynamics Across the Lifespan
- MFT-6109 - Sex Therapy in MFT

- MFT-6111 - Systemic Interventions in Addictions
- MFT-6112 - Fundamentals of Psychopharmacology
- MFT-6930 - MFT Practicum I *
- MFT-6113 - Assessing and Treating Family Violence
- MFT-6931 - MFT Practicum II *
- MFT-6932CA - MFT Internship I *
- MFT-6118 - Gerontology and Systemic Intervention Master's
- MFT-6933CA - MFT Internship II *
- Additional Practicum Extension Courses as needed
- MFT-6934CA - MFT Internship and Capstone *

Note: * Designates Practicum I as 2 credits, MFT Practicum II as 2 credits, MFT Internship I as 2 credits, MFT Internship II as 2 credits, and MFT Internship and Capstone as 1 credit

Master of Science in Clinical Mental Health Counseling, MS

Description of Program

The Master of Science in Clinical Mental Health Counseling degree program is focused on training highly skilled counselors to provide impactful and culturally sensitive mental health services in their communities. The program is designed to provide the theoretical and practical knowledge needed to operate in a variety of professional counseling settings and to provide services for individual clients and groups from diverse backgrounds. Our curriculum provides an in-depth exploration of counseling theories, ethical and legal standards, and evidence-based approaches of diagnosis and treatment. Throughout the program students will examine issues related to social justice and advocacy for accessibility and equity for clients. Students will also explore avenues for advancing the counseling profession.

[Click here](#) for potential career opportunities using the MSCMHC.

Note: Program availability may vary by state - please contact the Enrollment Office for more information

Learning Outcomes

- Interpret ethical and legal standards within professional counselors' roles and functions
- Examine advocacy and social justice theories of social, cultural diversity in counseling
- Apply models of human growth and development in the practice of counseling
- Apply theories and models of career development
- Demonstrate essential foundational counseling skills
- Employ group work principles in practice of group counseling
- Select appropriate assessment and testing rolls for use in counseling practice
- Implement program evaluation and evidence-based practice using relevant scholarly work and research methods
- Demonstrate the practice dimensions of clinical mental health counseling

Basis for Admissions

Admission requires a conferred bachelor's level or higher degree from a regionally or nationally accredited academic institution.

In addition to evidence of a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution, applications for admission to the Clinical Mental Health Counseling program require prior to the first date of attendance:

- Current resume or CV
- Statement of Intent
- Licensure plan
- Statement of professional ethics and conduct
- List of clinical site possibilities in the area of residence
- Technology Checklist
- Interview with a MSCMHC faculty member

Degree Requirements

The Master of Science in Clinical Mental Health Counseling (MSCMHC) degree requires a minimum of 60 credits hours at the graduate level beyond the bachelor's degree.

The University may accept a maximum of 12 semester credit hours in transfer toward the MSCMHC for graduate course work completed at an external accredited college or university with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The MSCMHC program has the following graduation requirements:

- A minimum of 48 credit hours of graduate instructions must be completed through the University.
- Successful completion of all required degree program courses with a Grade Point Average of 3.0 (letter grade of B) or higher.
- Official documents on file for basis of admission: a conferred bachelor's degree from an accredited academic institution.
- Official transcripts on file for all transfer credit hours accepted by the University.
- All financial obligations must be met before the student will be issued their complimentary diploma.

Beyond these standard graduation requirements, the MSCMHC has the following degree requirements:

1. **Online Video Conferencing** - In order to complete some of the course requirements and to participate in the online supervision process that is used during the practicum course and the internship courses, students are required to participate in several online video conferencing meetings throughout their time in the program. To participate in these video conference sessions, students are required to own or otherwise have access to a computer, a web cam, a headset, a video recording device, and a high-speed internet connection.
2. **Client Contact**
 - **Practicum** - MSCMHC students will be required to complete 40 hours of direct client contact. Please read the practicum course description or the Clinical Training Handbook.
 - **Internship** - MSCMHC students will be required to complete 240 hours of direct client contact. Please read the internship course description or the Clinical Training Handbook.
3. **Supervision** - In conjunction with client contact, practicum and internship students have weekly interaction with supervisors that averages one hour per week of individual and/or triadic supervision throughout the internship.
4. **Liability Insurance** - Prior to beginning any clinical experience, students are required to submit proof of professional liability insurance.
5. **Clinical Hours Tracking** - The MSCMHC program uses a web-based system to document completion of clinical hours. Students, local approved clinical supervisor and University faculty supervisors all have access to the system to support the successful completion of the clinical training requirements for the program. Students will be provided with an authorization code.

Time to Completion

The University allows 6 years to complete all Master's programs of 36 credits or more.

The median time to completion for this program is 40 months.

Time to completion varies depending upon the pace at which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 32 months.

Course Sequence

The Master of Science in Clinical Mental Health Counseling program can be completed in 60 credits.

- COUN-6000 - Orientation and Foundations of Clinical Mental Health Counseling
- COUN-6101 - Ethical and Legal Issues in Counseling
- COUN-6107 - Human Growth and Development
- COUN-6104 - Social and Cultural Diversity in Counseling
- COUN-6100 - Theories and Models of Counseling
- COUN-6103 - Counseling and Psychotherapeutic Techniques
- COUN-6111 - Career Development and Counseling
- COUN-6112 - Research Methods and Program Evaluation in Counseling
- COUN-6115 - Group Counseling
- COUN-6105 - Assessment, Tests, and Measurements in Counseling
- COUN-6110 - Psychopathology
- COUN-6114 - Clinical Assessment, Diagnosis, and Treatment
- COUN-6109 - Abuse, Crisis, and Trauma Counseling
- COUN-6050 - Clinical Mental Health Counseling Clinical Practicum
- Elective Course 1
- COUN-6051 - Clinical Mental Health Counseling Internship I
- COUN-6102 - Substance Use Disorders and Addiction Counseling
- Elective Course 2
- COUN-6052 - Clinical Mental Health Counseling Clinical Internship II
- Elective Course 3

Elective Courses

Elective courses are dependent of the student's State requirements.

Students will select three of the following:

- COUN-6106 - Human Sexuality
- COUN-6108 - Marriage and Family Systems
- COUN-6113 - Psychopharmacology
- COUN-6116 - Contemporary Issues in Counseling
- COUN-6117 - Advanced Ethical Practice and Record Management

Master of Social Work, MSW

Description of Program

Our CSWE-accredited Master of Social Work (MSW) degree program will prepare you for diverse career opportunities within a variety of social service settings. Using a curriculum that aligns with competencies from the Council on Social Work Education

(CSWE), you'll gain knowledge, skills, and experience that you can transfer directly into the workplace. This program consists of two tracks to accommodate those with an undergraduate degree in social work and those that are new to the field.

The Western Association of Schools and Colleges (WASC) accredits public and private schools, colleges, and universities in the U.S.

Accreditation of a baccalaureate or master's social work program by the Council on Social Work Education's Commission on Accreditation indicates that the program meets or exceeds criteria for the assessment of program quality evaluated through a peer-review process. An accredited program has sufficient resources to meet its mission and goals and the Commission on Accreditation has verified that it demonstrates compliance with all sections of the Educational Policy and Accreditation Standards. Accreditation applies to all program sites and program delivery methods of an accredited program. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

[Click here](#) for potential career opportunities within the MSW.

Learning Outcomes

Learning outcomes are derived from the Council on Social Work Education's (CSWE) nine core competencies

1. Demonstrate ethical and professional behavior
2. Advance human rights and social economic, and environmental justice
3. Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice.
4. Engage in practice informed research and research informed practice.
5. Engage in policy practice.
6. Engage with individuals, families, groups, organizations, and communities.
7. Assess individuals, families, groups, organizations, and communities.
8. Intervene with individuals, families, groups, organizations, and communities.
9. Evaluate practice with individuals, families, groups, organizations, and communities.

Basis for Admissions

Admission to an NU master's program requires a conferred bachelor's degree from a regionally accredited academic institution or an international institution that is determined to be equivalent through an approved evaluation service.

Admission into MSW — Advanced Standing track requires a Bachelor of Social Work (BSW) or Bachelor of Science in Social Work (BSSW) degree from a CSWE-accredited program within the past five years (with some approved exceptions)

The MSW program will allow for transfer of up to six credit hours for the Advanced Standing track and 12 credits for the Generalist track. Transfer credits for the Generalist track must be completed at a regionally accredited institution and must be awarded a "B"/3.0 or higher grade. For the Advanced Standing track, students may apply for transfer of up to six credit hours of graduate credit hours from a CSWE-accredited MSW program (grades must be "B" or higher) under the following guidelines.

1. Coursework which would be over five years old at the completion of the degree program (as defined by the student's plan of study) may not be used
2. Acceptance of transfer credits will depend upon how they fit within the MSW requirements and the student's overall plan of study
3. Only applicants from CSWE-accredited graduate social work programs will be considered for admission as transfer students for the Advanced Standing track

Additional State requirements may need to be met for Basis for Admissions into a program:

Basis for Admissions - Washington State Students

Washington State has asked that we provide you the following information before you enroll in the program:

- The University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree granting institutions under the Degree-Granting Institutions Act
 - This authorization is subject to periodic review and authorizes the University to offer field placement components for specific degree programs
 - The Council may be contacted for a list of currently authorized programs
 - Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs
 - Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov
- The transferability of credits earned at the University is at the discretion of the receiving college, university, or other educational institution
 - Students considering transferring to any institution should not assume that credits earned in any program of study at the University will be accepted by the receiving institution
 - Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at the University to satisfy an admission requirement of another institution is at the discretion of the receiving institution.
 - Accreditation does not guarantee credentials or credits earned at the University will be accepted by or transferred to another institution
 - To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned
- The Master of Social Work (MSW) program provides support to students in securing quality internship placements that include, but are not limited to the Field Education Director and full-time faculty to help guide students through this process, speak with potential placement sites that have been identified as a possible fit for the student, a national database of potential placements sites, and training materials to help student present in a professionally and appropriate manner
 - The MSW program cannot require potential placement site to hire students thus it is the responsibility of the student to present their self in a professional manner and secure a placements site and supervisor
 - We encourage students to contact the Field Education Director for any additional individualized support they may need in this process

Degree Requirements

Admission to a University master's program requires a conferred bachelor's degree from a regionally accredited academic institution or an international institution that is determined to be equivalent through an approved evaluation service. Admission into MSW-Advanced Standing requires a Bachelor of Social Work (BSW) degree from a CSWE accredited program.

Time to Completion

Advanced Standing track - 36 Credits

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 24 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most University students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 12 months.

Generalist track - 60 Credits

The University allows 6 years to complete all Master's programs of 36 credits or more.

The median time to completion for this program is 48 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most University students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 24 months.

Practicum Information

MSW practicum courses require approval from the MSW Field Education Director prior to enrollment in the practicum courses. Students wishing to enroll in a practicum course should begin the approval process with their Academic and Finance Advisor at least three to four months prior to their anticipated practicum enrollment date. MSW students must complete two practicum courses (3 credits each) for the Advanced Standing track and four practicum courses (3 credits each) for the Generalist track. Prior to enrolling in the first practicum course, students must complete the Practicum Preparation Process (PPP) and receive approval. As part of the PPP, students, with the support of the Field Education Director, will be required to secure a local practicum placement as well as a local supervisor. In order to finish the practicum requirements and continue on to the practicum, students must meet bi-weekly in the practicum seminar. Students are required to complete a minimum of 400 hours total Generalist Practicum I and II combined (200 hours during MSW-6009 and 200 hours during MSW-6010). Students are required to complete a minimum of 500 hours total for Advanced Practicum I and II combined (250 hours during MSW-6901 and 250 hours during MSW-6902). Students who have significantly fewer hours than that will be asked to meet with the Field Education Director and may be required to complete a practicum extension course. Students must also receive satisfactory evaluations from their local site supervisor and their University faculty supervisor in order to complete the practicum sequence. Students must complete the required number of hours in order to graduate.

The MSW program faculty and staff support students in securing quality practicum placements guiding students through this process, speaking with potential placement sites that have been identified as a possible fit for the student, providing a national database of potential placements sites, and providing training materials to help student present professionally and appropriately. The MSW program cannot require a potential placement site to accept students; thus, it is the responsibility of the student to present themselves professionally while securing placements site and supervisor. We encourage students to contact the Field Director for any additional individualized support they may need in this process.

The practicum courses for the MSW program are MSW-6009, MSW-6010, MSW-6901, and MSW-6902. Additional details can be found in the course descriptions.

For Washington state students: For practicum placement it is the responsibility of the student to secure a site for their practicum placement(s). The Field Education Director will provide support in the process, but it is ultimately the student's responsibility to actively engage in finding, and securing, a practicum site.

Liability Insurance

The University requires that students in practicum courses must purchase liability insurance prior to practicum. Many practicum sites require students to show evidence of liability coverage prior to beginning a practicum. The University requires students participating in practicum to purchase student professional liability insurance, typically available at a lower student rate through the National Association of Social Workers (NASW).

Certification and Licensing

As of November 2021, the University's MSW program is fully accredited through the Council on Social Work Education (CSWE), the accrediting body for MSW programs in the United States. The practice of social work is regulated in every jurisdiction in North America. Licensure requirements include graduation from a CSWE-accredited program or program in candidacy, and success on the appropriate national examination. Many jurisdictions license new MSW graduates, using the Masters examination. All states offer a clinical social work license, which typically requires two-three years of post-MSW licensure supervised work in a clinical setting, as well as successful passage of the national Association of Social Work Boards (ASWB) Advanced Clinical Exam. Some state regulatory boards may have requirements for specialized accreditations or other unique course/credit requirements above and beyond the University's standard MSW degree plan that may affect licensure. Although licensure laws are governed by individual states and can change frequently, the MSW program administration seeks to remain current with various licensing regulations. A student has the responsibility to be familiar with licensing regulations in their jurisdiction.

Program Specific Accreditation Information

The University's MSW program was granted full accreditation status in November 2021 by the Council on Social Work Education's (CSWE) Commission on Accreditation.

The University is committed to meet or exceed all CSWE Educational Standards and Accreditation Standards. Accreditation is a quality-control process that indicates the educational program meets professional standards, and it applies to all program sites and delivery methods. Accreditation provides reasonable assurance about the quality of the program and the competence of students graduating from the program.

Because the University is an online university based in California, it is considered an out-of-state program in all states other than CA. Some states require that programs receive state authorizations before offering certain program to current residents of that state, even if a state licensing board will accept the degree to pursue licensure. The University has pursued and received those state-level approvals. Full initial accreditation by the CSWE is accepted by all states as meeting the minimum standards for licensure.

Washington State students can contact the Washington Department of Health/Health Professions Quality Assurance division to ensure the University's MSW program will qualify them for licensure as a Social Worker in the state.

Generalist Course Sequence

The Master of Social Work, Generalist track program can be completed in 60 credit hours.

The Master of Social Work, Generalist track program requires the foundation courses to be completed prior to enrolling in the Advanced Standing track. The program capstone will be completed as the last course in the degree program.

Core Courses:

- MSW-5000 - Introduction to Social Work
- MSW-5001 - Human Behavior and the Social Environment
- MSW-5002 - Professional Practice with Individuals and Families
- MSW-6003 - Professional Practice with Organizations and Communities
- MSW-6004 - Social Work in Behavioral Health
- MSW-6005 - Ethics and Diversity in Social Work

- MSW-6002 - Social Welfare Policy
 - MSW-6007 - Research Methods in Social Work
 - MSW-6008 - Social Work in Interdisciplinary Settings
 - MSW-6009 - Generalist Practicum I
 - MSW-6010 - Generalist Practicum II
- Advanced Courses:**
- MSW-6101 - Advanced Social Work with Children and Families
 - MSW-6102 - Advanced Social Work Practice with Marginalized Populations
 - MSW-6103 - Advanced Social Work in Medical Practice - or - Elective Course*
 - MSW-6104 - Advanced Social Work Practice in Mental Health
 - MSW-6105 - Forensic Clinical Social Work Practice
 - MSW-6106 - Advanced Leadership Skills for Clinical Practice
 - MSW-6901 - Advanced Practicum I
 - MSW-6902 - Advanced Practicum II
 - MSW-6903 - Capstone - or - MSW-6903CA - Capstone **

Note:

* Students can take MSW-6103 or any Elective Course at the 6000 level in the JFK School of Psychology and Social Sciences.

**Students in California are required to complete MSW-6903CA as the Capstone Course.

Advanced Standing Course Sequence

The Master of Social Work - Advanced Standing track can be completed in 36 credit hours.

Core Courses:

- MSW-5000 - Introduction to Social Work
- MSW-6002 - Social Welfare Policy
- MSW-6007 - Research Methods in Social Work

Advanced Courses:

- MSW-6101 - Advanced Social Work with Children and Families
- MSW-6102 - Advanced Social Work Practice with Marginalized Populations
- MSW-6103 - Advanced Social Work in Medical Practice - or - Elective Course*
- MSW-6104 - Advanced Social Work Practice in Mental Health
- MSW-6105 - Forensic Clinical Social Work Practice
- MSW-6106 - Advanced Leadership Skills for Clinical Practice
- MSW-6901 - Advanced Practicum I
- MSW-6902 - Advanced Practicum II
- MSW-6903 - Capstone - or - MSW-6903CA - Capstone**

Note:

* Students can take MSW-6103 or any Elective Course at the 6000 level in the JFK School of Psychology and Social Sciences.

**Students in California are required to complete MSW-6903CA as the Capstone Course.

Post-Master's Certificate in Marriage and Family Therapy

Description of Program

The Post-Master's Certificate program in Marriage and Family Therapy is comprised 6 courses (18 credit hours). Students must complete the program as listed below. Students must complete all six courses with a cumulative GPA of 3.0 or better in order to receive a certificate.

In order to be eligible for clinical work (if needed), students in this certificate need to demonstrate passing grades in all pre-requisite (or equivalent) courses from an accredited university. The six content areas for pre-requisite coursework include: one course in theoretical foundations, one course in professional ethics, one course in clinical assessment, one course in diagnosis/psychopathology, and two courses in treatment methods/models of therapy/counseling. Certificate students will need to provide a copy of their transcripts to confirm successful completion (passing grades) of these pre-requisite courses.

Note: Students who have made application for licensure are encouraged to verify with state licensure divisions or boards that the courses they select will meet the specific state requirements before enrolling in this certificate program.

[Click here](#) for potential career opportunities using the Post-Master's Certificate in MFT.

Basis for Admissions

Admission to the Post-Master's Certificate program requires a conferred master's level or higher degree from a regionally or nationally accredited academic institution. An interview with a faculty member is available for any applicant to the certificate program but is required for those using the certificate to be qualified for licensure (for those who will be doing clinical courses as a part of the certificate, a background check is also required).

Scope

Six Courses (18 Credit hours) must be completed to earn a certificate. Courses taken as part of a master's program cannot be applied towards a Post-Master's Certificate program.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to a Post-Master's certificate program. Coursework must have been completed at an accredited college or university within the last seven years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Master's Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 22 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 12 months.

Students who choose to complete the post-master's certificate in Marriage and Family Therapy can select any six (6) doctoral level MFT courses listed below (the first course in the PhDMFT and DMFT programs and dissertation courses are excluded) to meet the requirements of the certificate program. Based on approval from the Dean or designee, courses from the Department of Psychology can be included in the certificate. As can be seen, these courses are focused in particular specialization areas and can be grouped accordingly or taken as six distinct courses.

Post-Master's Certificate Transfer into a Doctoral Program

Post-Master's Certificate program courses may be used to satisfy doctoral degree requirements if the certificate course is required by the doctoral program in which the student is enrolled.

Coursework completed as part of an earned doctoral degree cannot be applied towards a Post-Master's Certificate program. However, a Post-Master's Certificate can be completed as part of doctoral coursework if the student officially applies for a Post-Master's Certificate prior to completing the fourth course in a Post-Master's Certificate series.

Areas of Emphasis and Specific Courses - 18 credit hours

Students can select any six courses from all the courses listed below or they can select a group of six courses based on an area of specialization.

Child and Adolescent Family Therapy

- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- MFT-8208 - Child and Adolescent Assessment and Diagnosis
- MFT-8209 - Family Therapy with Adolescents
- MFT-8210 - Early Childhood and Parenting Interventions
- MFT-8211 - Neurodevelopmental Disorders in Children and Adolescents

Couple Therapy

- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- MFT-8308 - Emotion and Differentiation Focused Couple Therapy
- MFT-8309 - Cognitive Behavioral Couple Therapy Models and Evidence Based Practice
- MFT-8310 - Systemic Sex Therapy
- MFT-8311 - The Couple Life Cycle in MFT Practice and Supervision

Culture, Diversity and Social Justice in a Global Context

- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- MFT-8701 - Language of Diversity
- MFT-8702 - A Systemic Evaluation of Global Concerns and Diversity
- MFT-8703 - Social Justice Advocacy in the United States
- MFT-8704 - Culturally Sensitive Care in MFT

Education and Supervision

- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction

- MFT-8721 - Constructing a Professional Identity
- MFT-8722 - Teaching Systemic Theories
- MFT-8723 - Analyzing Supervision Interventions
- MFT-8724 - Employing Technology in Supervision

General Family Therapy

This area of emphasis allows students to select courses from a broad range of electives to fit their personal and professional goals

Note: Students can select any six (6) doctoral level MFT courses (excluding the first course in the program and dissertation courses) to meet the requirements of the General Family Therapy emphasis. Courses from the Department of Psychology can be included in the General Family Therapy emphasis with approval from the Dean or designee.

Medical Family Therapy

- PSY-8147 - Psychopharmacology
- MFT-8402 - Medical Family Therapy
- MFT-8403 - Medical Family Therapy Applications
- MFT-8404 - Families, Health, and Illness
- MFT-8408 - Loss and Bereavement
- MFT-8601 - Gerontology and Systemic Intervention

Systemic Leadership

- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- DMFT-8705 - Systemic Leadership
- MFT-8712 - Leadership Development in Public and Non-Profit Community Organizations
- MFT-8713 - Public or Corporate Policy Making
- MFT-8714 - Leadership in Higher Education

Therapy with Military Families

- MFT-8103 - Assessing and Treating Family Violence
- MFT-8115 - Family Systems Approaches to Addiction
- MFT-8507 - Military and Veteran Cultures Across the Lifespan
- MFT-8508 - Trauma and Resilience in Military and Veteran Couples and Families
- MFT-8509 - Ethical Challenges and Moral Injuries Across Military and Veteran Populations
- MFT-8510 - Behavioral Health Care with Military and Veteran Populations

Doctorate of Marriage and Family Therapy, DMFT

Description of Program

The Doctorate of Marriage and Family Therapy (DMFT) at the University is designed to provide a high quality and rigorous education and training experience for students who wish to prepare for professional life as a systemically-trained mental health professional. A high standard of excellence is expected. In support of this, program faculty is selected for their expertise and ability to support students and facilitate exceptional educational attainment. The program is focused on developing the skills requisite for effective practice in the field of marriage and family therapy. The DMFT offers training in program development and evaluation, grant writing, advanced clinical education, research coursework and opportunities, and supervision training and experience. Graduates of the DMFT will be prepared to develop and evaluate programs, write grants, deliver clinical services, supervise other clinicians, serve in administrative positions, oversee the business of mental health practices, and participate in education and scholarship in the field of marriage and family therapy. Additional program description, requirements, policies, and procedures are further described in the [DMFT Program Handbook](#).

[Click here](#) for potential career opportunities within the DMFT.

Learning Outcomes

- Cultivate competence in working with diverse populations in professional settings
- Appraise ethical conduct in professional contexts
- Prepare applied projects designed to make a measurable difference
- Develop relational/systemic knowledge and skills

Basis for Admissions

Admission to the DMFT program in the Department of Social Sciences will be determined by the degree used to meet basis of admission and/or clinical experience. Applicants must have earned a master's degree from a nationally or regionally accredited university. The qualifying master's degree must have been completed in a program in the Social Sciences (e.g., counseling, education, family studies, MFT, psychology, social work, sociology).

All applicants complete the additional application steps outlined below (e.g., complete MFT specific applicant packet, one-on-one interview with MFT faculty, complete a national background check).

Degree Requirements

The DMFT degree requires a minimum of 60 credit hours at the graduate level beyond the master's degree.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the DMFT program.

The Doctorate of Marriage and Family Therapy (all specializations) has the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Successful completion of all required degree program courses with a Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Beyond these standard graduation requirements, the DMFT program has the following degree requirements:

1. **Online Video Conferencing.** In order to complete some of the course requirements, students are required to participate in online video conferencing meetings throughout their time in the program. In order to participate in these video conference sessions, students are required to own or otherwise have access to a computer, a webcam, a headset, a video recording device, and a high-speed Internet connection.
2. **Doctoral Internship.** DMFT students are required to complete a 9-month, 20 hour a week, doctoral internship that aligns with their doctoral specialization. Students are required to have a local supervisor with whom they can meet in-person for a minimum of 4 hours per month (i.e., one hour per week). For more information, please read the practicum and internship course descriptions.
3. **Liability Insurance.** Prior to beginning any clinical experience, DMFT students are required to submit proof of professional liability insurance.
4. **Supervision Coursework.** DMFT students who desire to become a clinical supervisor in the future are encouraged to pursue the required training in in MFT supervision methodology. Students seeking to qualify for the AAMFT or state Approved Supervisor designation will have to complete the direct supervision and supervision mentoring requirements outside of the program.

5. **Doctoral Comprehensive Evaluation (Portfolio).** In pursuit of an applied doctoral degree at the University, students will gain expertise in their academic discipline and in one or more specializations that complement their academic discipline. The three doctoral portfolio courses are intended to assure that students identify goals they will work to accomplish during the program, as well as examine their personal and professional identity as a relational/systemic practitioner. Throughout this process, students refine their professional development plans and provide artifacts indicating they have acquired competencies in several key domains. The DMFT Portfolio is a living document with major updates throughout the program.
6. **Doctoral Project.** The capstone of applied doctoral training is the completion of an applied project process. The DMFT program uses a facilitated capstone process that is purposefully designed to help students follow a step-by-step sequence in the preparation and completion of a doctoral project. For students in the DMFT program, the applied project must be related to marriage and family therapy and be consistent with the student's selected area of specialization. (Note: The applied project portion of the DMFT program can be completed with a minimum of 12 credit hours in Applied Doctoral Experience [ADE] Courses, but may require additional credit hours, depending on the time the student takes to complete the project).

Competencies

All DMFT students are required to demonstrate competency in the areas listed below.

1. **Competency in Writing Skills.** DMFT students are required to successfully complete both DMFT-7501 and DMFT-7502 at the University (or equivalent courses can be transferred in). Students are required to show competency in writing skills for research purposes throughout their graduate coursework. Students may request on their own behalf or may be recommended to complete an English writing course if the School Dean or faculty determines communication skills are insufficient for doctoral-level work.
2. **Graduate-Level Research Methods Competency.** DMFT students are required to successfully complete DMFT-7503 at the University and demonstrate the ability to successfully complete a doctoral proposal.
3. **Graduate-Level Applied Project Design and Analysis Competency.** DMFT students are required to successfully complete DMFT-7113 at the University, as well as carry out, complete, write-up and defend the proposed applied project.
4. **Graduate-Level Clinical Competency.** All students pursuing a clinical specialization in the DMFT program (all specializations but Systemic Organizational Leadership) are required to enroll in a clinical practicum at the University. DMFT students who are fully licensed MFTs will complete the supervision practicum (MFT-8971). DMFT students who do not enter the program as fully licensed marriage and family therapists must take DMFT-8951. Successful completion of a practicum course, including relevant evaluations and presentations, is deemed to be evidence of clinical competence.
5. **Graduate-Level Program Evaluation Competency.** DMFT students are required to successfully complete DMFT-7112 at the University, which involves demonstrating competence in completing a program evaluation.
6. **Computer Competency.** DMFT students are required to have the computer skills that are necessary for completing a doctoral project. Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents). The doctoral project oral presentation requires the student to produce a computer-based presentation (i.e., PowerPoint).

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 64 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 54 months.

Practicum Information

Marriage and Family Therapy DMFT students must complete at least one 3-credit practicum course (with a clinical, supervision, organizational focus). Prior to enrolling in the required practicum course, students must complete the Practicum Preparation Process (PPP) and receive approval to enroll in this course. As part of the PPP, students enrolling in DMFT-8951 will be required to secure a local clinical placement as well as a local clinical supervisor who is an AAMFT Approved Supervisor (or Supervisor Candidate) or who meets state requirements for supervision of post-graduate MFTs seeking state licensure. If students are currently licensed to practice marriage and family therapy independently in their state, they generally complete a supervision practicum and are not required to have a local on-site supervisor. Students in the Systemic Organizational Leadership specialization will secure a placement that allows them to engage in leadership and/or managerial duties as well as practicum mentor/supervisor appropriate for their practicum activities. DMFT students will receive supervision, mentoring, and evaluation from the University's Clinical Faculty.

The practicum course for DMFT students in the DMFT is DMFT-8951 or MFT-8971 or DMFT-8972 (each is 3 credit hours). Additional details can be found in the course description for these courses.

Internship Information

Students typically begin their doctoral internship in the middle portion of their program, at some point after completing the first portfolio course (CMP-9611M). Final approval of a student's internship plan rests with the Director of MFT Doctoral Programs.

DMFT students must complete a 9-month supervised internship. DMFT students who plan to engage in clinical work as part of their internship must meet weekly with a local supervisor who is an AAMFT Approved Supervisor, AAMFT Supervisor Candidate, or state-approved supervisor. DMFT students who are fully licensed MFTs can elect to complete an internship with a focus on such areas as applied scholarship, teaching, entrepreneurship, or administration within the field of marriage and family therapy. These students are required to have weekly consultation with professional appropriate for the proposed internship activities who will serve as a mentor/supervisor. This local supervisor is not required to be a clinical supervisor (i.e., AAMFT Approved or state-approved supervisor), but is a content expert specific to the students' area of specialization. Students in the Systemic Organizational Leadership specialization will complete their internship in a setting that allows them to develop and enhance their leadership and managerial skills. They will meet weekly with a mentor/supervisor who can provide guidance in systemic organizational leadership.

Supervisors are approved on a case-by-case basis by the Director of MFT Doctoral Programs.

MFT Supervision Training

In addition to the practicum and internship courses, students in the DMFT program are encouraged to receive training in supervision methodology. The supervision course may be conducted in connection with the requirements established by AAMFT for students to become Approved Supervisors or through a state-approved MFT supervision course.

Doctoral Project

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed doctoral project. This process requires care in choosing a topic, documenting its importance, planning the methodology, and carrying out the project. These activities lead smoothly into the writing and oral presentation of the doctoral project.

A doctoral candidate must be continuously enrolled throughout the series of doctoral project courses. Doctoral project courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the doctoral project course sequence. If additional time is required to complete any of the doctoral project courses,

students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing doctoral project requirements. The Doctoral Project Committee determines progress.

Course Sequence

This program can be completed with a minimum of 60 credit hours, but may require additional credit hours, depending on the time required to complete the doctoral project. If granted, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- DMFT-7000 - Foundations of Relational/System Ethics and Practice
- DMFT-7501 - Foundations of Relational/Systemic Intervention
- DMFT-7502 - Fundamentals of Scholarly Writing
- Specialization Course 1
- DMFT-7201 - Program Development for MFTs
- CMP-9611M - DMFT Portfolio I
- DMFT-7503 - Relational/Systemic Approaches to Research and Scholarship
- DMFT-7112 - Program Evaluation and Monitoring in MFT
- Specialization Course 2
- Core Course *
- Relational/Systemic Theories & Applications Course **
- CMP-9612M - DMFT Portfolio II
- Specialization Course 3
- Select One of the Following:

- | |
|---|
| <ul style="list-style-type: none">• DMFT-8951 - DMFT Doctoral Practicum
-OR-• MFT-8971 - MFT Supervision Practicum
-OR-• DMFT-8972 - Systemic Organizational Leadership Practicum |
|---|
- DMFT-8981 - Relational/Systemic Doctoral Internship I
 - DMFT-8982 - Relational/Systemic Doctoral Internship II
 - DMFT-8983 - Relational/Systemic Doctoral Internship III
 - Specialization Course 4
 - DMFT-7113 - Relational/Systemic Applied Methodologies
 - CMP-9613M - DMFT Portfolio III
 - DIS-9911A - Applied Doctoral Introduction
 - DIS-9912A - Applied Doctoral Proposal
 - DIS-9913A - Institutional Review Board (IRB) and Data Collection
 - DIS-9914A - Applied Doctoral Manuscript

Core and Relational/Systemic Theories & Applications Course Options

*Core Course Options

Students may choose one of the following:

- DMFT-7202 - Grant Writing Concepts and Approaches for MFTs
- MFT-8721 - Constructing a Professional Identity
- MFT-8722 - Teaching Systemic Theories

- MFT-8723 - Analyzing Supervision Interventions
- MFT-8724 - Employing Technology in Supervision
- DMFT-8705 - Systemic Leadership
- MFT-8712 - Leadership Development in Public and Non-Profit Community Organizations
- MFT-8713 - Public or Corporate Policy Making
- MFT-8714 - Leadership in Higher Education

****Relational/Systemic Theories & Applications Course Options**

Students may choose one of the following:

- DMFT-7115 - Relational/Cybernetic Applications in Larger Systems
- DMFT-8704 - Systems Consultation
- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction

Child and Adolescent Therapy Specialization

The Child and Adolescent Therapy specialization is designed to prepare students to work in therapy settings with children and adolescents from a family therapy/systems perspective. Students in this specialization are required to focus their course projects, internship work, and doctoral project on issues related to working with children and adolescents. Twelve (12) credit hours of coursework are devoted to Child and Adolescent Therapy.

Required Courses - 12 credit hours

- MFT-8208 - Child and Adolescent Assessment and Diagnosis
- MFT-8209 - Family Therapy with Adolescents
- MFT-8210 - Early Childhood and Parenting Interventions
- MFT-8211 - Neurodevelopmental Disorders in Children and Adolescents

Couple Therapy Specialization

The Couple Therapy specialization is designed to prepare students to work primarily with couples in therapy settings from a family therapy/systems perspective. Students in this specialization are required to focus their course projects, internship work, and doctoral project on issues related to working with couples. Twelve (12) credit hours of coursework are devoted to Couple Therapy.

Required Courses - 12 credit hours

- MFT-8308 - Emotion and Differentiation Focused Couple Therapy
- MFT-8309 - Cognitive Behavioral Couple Therapy Models and Evidence Based Practice
- MFT-8310 - Systemic Sex Therapy
- MFT-8311 - The Couple Life Cycle in MFT Practice and Supervision

General Family Therapy Specialization

The General Family Therapy specialization allows students to select courses from a broad range of electives to fit their personal and professional ambitions. In this specialization, students select four courses (12 credit hours) from the Marriage and Family Therapy curriculum at the 8000 level. Courses from the Department of Psychology may be considered to fill this requirement with approval on a case-by-case basis. Students in this specialization are required to focus their course projects, internship work, and doctoral project on issues related to marriage and family therapy. Four additional courses (theory or treatment-focused) chosen from any of the Department of Social Sciences specialization courses (or from Psychology with approval) listed in the Catalog that will help the student develop the desired expertise.

Systemic Administration and Entrepreneurship Specialization

The Systemic Administration and Entrepreneurship specialization is designed to prepare students to use their relational/systemic skills in a variety of contexts such as, private practice, mental health agencies and organizations, business or schools. Students can focus their specialization on the leadership, managerial, or practitioner role in such settings. Students in this clinical specialization are required to focus their course projects, internship work, and doctoral projects on issues broadly related to administration and/or entrepreneurship. Twelve (12) hours of coursework are devoted to systemic administration and entrepreneurship. A unique aspect of this specialization is that students may select up to two of their four specialization courses from the School of Business or the Department of Psychology.

Specialization Courses - 12 credit hours

Select four courses from the following:

- BUS-7130 - Business Leadership & Strategy
- DMFT-8702 - Practice/Organization Marketing
- DMFT-8704 - Systems Consultation - Can be used as a Specialization Course if not already being used to satisfy the **Relational/Systemic Theories & Applications requirement**
- DMFT-8705 - Systemic Leadership - Can be used as a Specialization Course if not already being used to satisfy the **Core Course requirement**
- DMFT-8706 - The Business of Therapy
- PSY-8408 - Leadership and Management
- PSY-8409 - Work Motivation and Attitudes
- PSY-8410 - Organizational Development
- PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness
- PSY-8507 - Comparative Analysis of Evidence-based Interventions
- PSY-8509 - Behavioral Health Services Policy
- PSY-8511 - Behavioral Health Administration and Management
- PUB-7005 - Public Budgeting and Finance

Systemic Organizational Leadership Specialization

The Systemic Organizational Leadership specialization is designed to prepare students to assume leadership roles in agencies and organizations. Students will be taught to apply systems theory to leadership roles and functioning within organizations. This is a non-clinical specialization in that students will complete their practicum and internship in organizational settings and activities, rather than clinical work. Students in this specialization will also focus course assignments and doctoral project on issues related to systemic leadership. Twelve credit hours of coursework are devoted to systemic organizational leadership. Up to two of four specialization courses can be taken outside of the Department of Social Sciences.

Specialization Courses - 12 credit hours

Select four courses from the following:

- DMFT-8702 - Practice/Organization Marketing
- DMFT-8704 - Systems Consultation - Can be used as a Specialization Course if not already being used to satisfy the **Relational/Systemic Theories & Applications requirement**
- DMFT-8705 - Systemic Leadership - Can be used as a Specialization Course if not already being used to satisfy the **Core Course requirement**
- DMFT-8715 - Creating and Sustaining Optimal Organizational Systems
- DMFT-8716 - Managing and Addressing Conflict and Dysfunction within Organizations
- DMFT-8717 - Project Management and Strategic Planning
- PSY-8408 - Leadership and Management

- PSY-8409 - Work Motivation and Attitudes
- PSY-8410 - Organizational Development
- PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness
- PSY-8509 - Behavioral Health Services Policy
- PSY-8511 - Behavioral Health Administration and Management
- PUB-7005 - Public Budgeting and Finance

Therapy with Military Families Specialization

The Therapy with Military Families specialization is designed to prepare students to work primarily with individuals, couples, and families who are affiliated with the military using a family therapy/systems perspective. Students in this specialization are required to focus their course projects, internship work, and doctoral project on issues related to working with military personnel and their families. Twelve (12) credit hours of coursework are devoted to Therapy with Military Families.

Required Courses - 12 credit hours

- MFT-8507 - Military and Veteran Cultures Across the Lifespan
- MFT-8508 - Trauma and Resilience in Military and Veteran Couples and Families
- MFT-8509 - Ethical Challenges and Moral Injuries Across Military and Veteran Populations
- MFT-8510 - Behavioral Health Care with Military and Veteran Populations

Doctor of Philosophy in Marriage and Family Therapy, PhD

Description of Program

The Doctor of Philosophy (PhD) in Marriage and Family Therapy program at the University is designed to provide a high quality and rigorous education and training experience for students who wish to prepare for professional life as marriage and family therapists. The program is the first primarily distance based MFT doctoral program to be accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE). A high standard of excellence is expected. In support of this, program faculty is selected for their expertise and ability to support students and facilitate exceptional educational attainment. The program is focused on developing the skills and personal and professional growth requisite for effective practice in the field of marriage and family therapy. The doctoral program offers advanced clinical education and training, research coursework and opportunities, and supervision training and experience. Graduates of the doctoral program will be prepared to carry out advanced clinical work and supervision and/or education and research in the field of marriage and family therapy. Additional program description, requirements, policies, and procedures are further described in the [PhD-MFT Program Handbook](#).

[Click here](#) for potential career opportunities within the PhD-MFT

Learning Outcomes

The Ph.D. in Marriage and Family Therapy (PhDMFT) program at the University involves an outcome-based education framework that includes Program Goals and Student Learning Outcomes (SLO). These outcomes are continually measured to determine the program and faculty effectiveness along with student progress. Please see the Program Handbook for more information on the program's education framework.

1. Develop relational/systemic innovations addressing contemporary issues in the field of marriage and family therapy (SLO #1)
2. Students/graduates will develop expertise in an area of specialization related to the field of marriage and family therapy (SLO #2)
3. Cultivate competence in working with diverse populations in various contexts (SLO #3)
4. Create new knowledge in marriage and family therapy through independent research (SLO #4)

5. Appraise relational/systemic ethical behaviors in various settings (SLO #5)

Basis for Admissions

Admission to the Doctoral programs in the Department of Social Sciences will be determined by the degree used to meet basis of admission and/or clinical experience. In order to enter the **PhDMFT program**, applicants must have earned a master's degree from a nationally or regionally accredited university. The qualifying master's degree must have been completed in a clinical program (e.g., MFT, psychology, social work, counseling). There are two options for entering the doctoral program in MFT:

1. Applicants with a previously completed master's degree in marriage and family therapy from a COAMFTE accredited program meet the educational requirements to enter the 63-credit Ph.D. program. These applicants will still need to complete the additional application steps outlined below (e.g., complete MFT specific applicant packet, one-on-one interview with MFT faculty, complete a national background check).
2. Applicants with a completed master's degree in a related clinical discipline (counseling, clinical psychology, or social work) and who are licensed or license eligible (i.e., in the process of pursuing licensure) in a clinical discipline must have their previous transcripts evaluated for potential waiver credit to meet some or all of the foundational curriculum requirements (taken from the MAMFT program).

Degree Requirements

The PhD in Marriage and Family Therapy degree requires a minimum of 63 credit hours at the graduate level beyond the master's degree.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed toward a doctoral degree at an accredited college or university with a grade of "B" or better. Transfer credit is only awarded for course work that is evaluated to be substantially equivalent in content with the required course work for the PhD degree program in Marriage and Family Therapy.

The PhD degree program in Marriage and Family Therapy (all specializations) has the following graduation requirements:

- A minimum of 51 credit hours of graduate instruction must be completed through the University
- Successful completion of all required degree program courses with a Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Beyond these standard graduation requirements, the Marriage and Family Therapy doctoral program has the following degree requirements:

1. **Online Video Conferencing** – In order to complete some of the course requirements and to participate in weekly online supervision process that is used during the practicum and internship courses, students are required to participate in online video conferencing meetings throughout their time in the program. In order to participate in these video conference sessions, students are required to own or otherwise have access to a computer, a web cam, a headset, a video recording device, and a high-speed internet connection.
 1. **Client Contact** – Doctoral students will be required to complete 800 hours of direct client contact, which includes conducting face-to-face therapy with individuals, couples, families, and groups. At least 400 hours of client contact must be relational (e.g., with couples or family members). For more information, please read the practicum and internship course descriptions.
2. **Supervision** – In conjunction with client contact, doctoral students must receive a total of 160 hours of supervision conducted by an AAMFT Approved Supervisor, AAMFT Supervisor Candidate, or state-approved supervisor. In some cases, students may be required to pay for local supervision. This will depend on the clinical placement location and/or local supervisor they contract with to complete their practicum and internship requirements. The decision and responsibility to pay for local supervision is entirely up to the student and not a requirement of the University.

3. **Doctoral Internship (Advanced Practical Experience Component, or APEC)** – Doctoral students are required to complete a 9-month, 20 hour a week, doctoral internship that aligns with their doctoral specialization. Students will be required to have a local supervisor with whom they can meet in-person with a minimum of 4 hours per month (i.e. one hour per week). For more information, please read the practicum and internship course descriptions.
4. **Liability Insurance** – Prior to beginning any clinical experience, PhDMFT students are required to submit proof of professional liability insurance.
5. **Supervision Coursework** – In addition to advanced coursework in marriage and family therapy, students in the doctoral program must complete a course in MFT supervision methodology. The supervision course will be conducted in connection with the requirements established by AAMFT for students to become Approved Supervisors. Not all requirements will be completed for the students to achieve the designation while in the program at the University. The supervision coursework is pre-approved by the AAMFT to count for the 30-hour supervision course requirement. Students will have to complete the direct supervision and supervision mentoring requirements outside of the program in order to qualify for the Approved Supervisor designation.
6. **Doctoral Portfolio** – Students are required to complete three 4-week portfolio courses in which they develop a portfolio that showcases their academic, research, clinical, and professional competence. Students will upload a variety of documents to the portfolio, such as their degree plan, resume, and key course assignments, as evidence of their progress and abilities. Students must pass the final portfolio course, which is the last course taken, in order to become a doctoral candidate and advance to the dissertation sequence.
7. **Dissertation** – The capstone of doctoral training is the completion of the dissertation process. All programs at the University use a facilitated dissertation process that is purposefully designed to help students follow a step-by-step sequence in the preparation and completion of a doctoral dissertation. For students in the MFT program, the dissertation must be related to marriage and family therapy and be consistent with the student's selected area of specialization. (Note: The dissertation portion of the PhDMFT program can be completed with a minimum of 12 credit hours in Dissertation Courses, but *may require additional credit hours*, depending on the time the student takes to complete the dissertation research.)

Competencies

All PhD students are required to demonstrate competency in the areas listed below.

1. **Competency in Research Writing Skills** - PhD students are required to complete both MFT-7101 and MFT-7102 at the University. Students are required to show competency in writing skills for research purposes throughout their University graduate coursework. Students may request on their own behalf or may be recommended to complete an English writing course if the School Dean or faculty determines communication skills are insufficient for doctoral-level work.
2. **Graduate-Level Research Methods and Statistics Competency** - PhD students are required to complete MFT-7103, MFT-7110, MFT-7111, MFT-7112, and either MFT-7113 or MFT-7114 at the University. These courses prepare students for the dissertation and enhance their ability to critique published research and conduct independent research.
3. **Computer Competency** - PhD students are required to have the computer skills that are necessary for completing a dissertation. Students must be able to prepare documents using advanced word processing skills (e.g., creation of tables and figures, headers and footers, page breaks, tables of contents, hanging indents). In addition, students need to use computer programs for the statistical analysis of data (e.g., SPSS). The dissertation oral examination requires the student to produce a computer-based presentation (e.g., PowerPoint).

Time to Completion

The University allows 8 years to complete all doctoral programs of 60 credits or more.

The median time to completion for this program is 74 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most University students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 59 months.

Practicum Information

PhDMFT students must complete at least one 3-credit practicum course. Prior to enrolling in the required practicum course, students must complete the Practicum Preparation Process (PPP) and receive approval to enroll in this course. As part of the PPP, students who are not fully licensed MFTs (LMFTs) will be required to secure a local clinical placement as well as a local clinical supervisor who is an AAMFT Approved Supervisor (or Supervisor Candidate) or who meets state requirements for supervision of post-graduate MFTs seeking state licensure. Students who are LMFTs will complete a supervision practicum with the University, and a local supervisor is not required. Doctoral students will receive weekly supervision, mentoring, and evaluation from the University Clinical Faculty.

The two practicum courses for non-LMFT doctoral level degree seeking marriage and family therapy students are MFT-8951 (Group practicum; 3 credit hours) or MFT-8952 (Individualized practicum; 3 credit hours). Additional details can be found in the course description.

MFT Supervision Training

In addition to the practicum and internship courses, students in the PhDMFT program must complete a course in MFT supervision methodology. The supervision course will be conducted in connection with the requirements established by the American Association for Marriage and Family Therapy (AAMFT) for students to become AAMFT Approved Supervisors. Not all requirements will be completed for the student to achieve the designation while in the program at the University. The supervision course in the PhDMFT program is pre-approved by the AAMFT to count for the 30-hour supervision course requirement. Students will have to complete the direct supervision and supervision mentoring requirements outside of the program in order to qualify for the Approved Supervisor designation.

PhDMFT students must enroll in MFT-8970, or as an alternative to completing the supervision course at the University, students may elect to complete the training directly through AAMFT. Upon completion of the AAMFT training, students must submit documentation through their Academic and Finance Advisor for approval and the course requirements (credit hours) for MFT-8970 will be met.

Internship (Advanced Practical Experience Component; APEC) Information

Thus, doctoral students in the PhDMFT program typically begin their internship experience after completing the following courses:

- MFT-7101 - Foundations for Doctoral Study in MFT
- All Foundational Curriculum Leveling Courses
- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- CMP-9701M - Doctoral Portfolio I
- MFT-7102 - Scholarly Writing in MFT
- MFT-8951 - MFT Doctoral Practicum I or MFT-8952 - MFT Doctoral Practicum II
- MFT-8970 - MFT Supervision
- MFT-7103 - Research Methods in MFT
- Specialization Course 1
- MFT-7110 - Quantitative Analysis in MFT
- Specialization Course 2
- MFT-7111 - Quantitative Measurement and Design in MFT
- CMP-9702M - Doctoral Portfolio II
- Specialization Course 3

- MFT-7112 - Qualitative Measurement and Design
- Specialization Course 4

Final approval of a student's internship plan rests with the Director of MFT Doctoral Programs.

MFT doctoral students must complete a 9-month internship (APEC) under the direction of an AAMFT Approved Supervisor, AAMFT Supervisor Candidate, or state-approved supervisor. Students will identify two emphases for their internship from the following ten possibilities: advanced research, grant-writing, teaching, supervision, consultation, advanced clinical theory, clinical practice/innovation, program development, leadership, or policy.

For doctoral students who have not previously completed their clinical hours for licensure, a key requirement of this internship is to complete at least 800 hours of direct client contact, 400 of which must be relational (they must select either advanced clinical theory or clinical practice/innovation as one of their APEC emphases). In conjunction with client contact, doctoral students must complete 160 hours of supervision. All local supervision will occur in-person. Client contact and supervision hours obtained prior to practicum can count provided the hours are consistent with the hours required to obtain independent licensure as a Marriage and Family Therapist in the student's state. These hours must be documented and signed appropriately. Students are required to submit a summary of client contact and supervision hours during the Practicum Preparation and APEC Contract Processes. Documentation of the completion of all required hours is submitted during the third Portfolio course.

Doctoral students who have completed the required 800 hours of client contact and 160 hours of supervision prior to enrolling in the doctoral internship can elect to complete an internship focused on two of the other eight emphases identified above. These students are required to have an on-site in-person supervisor who will serve as a mentor and supervisor. Supervisors are approved on a case-by-case basis by the Director of MFT Doctoral Programs. Students in a non-clinical internship are required to have a supervisor who will be available to the intern for at least one hour of in-person supervision per week.

The APEC or internship process for doctoral MFT students is offered as a series of three 1-credit courses including MFT-8991, MFT-8992, and MFT-8993. Additional details can be found in the course descriptions.

Dissertation Process

Faculty assists each University Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. A PhD dissertation is a scholarly documentation of research that makes an original contribution to the field of study. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Degree Plan

Credit Hours – This program can be completed with a minimum of 63 credit hours, but *may require additional credit hours*, depending on the need for Foundational Curriculum courses and the time required to complete the dissertation research. If granted, additional dissertation courses will be added to the student's degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Foundation Curriculum (FC) – Up to 30 credit hours may be required as determined by formal review during the applicant evaluation process. Any required courses from the Foundational Curriculum are completed in addition to the minimum of 63 credits required to complete the MFT doctoral degree plan. Students who need three or fewer FC courses will complete them as a part of the PhDMFT program. Those needing four or more courses will complete them as part of a Post-Master's Certificate Program.

Foundation Curriculum* - All Foundation Curriculum Areas (FCA) below must be met	
<i>Content Area</i>	<i>Number of required Credit hours</i>
FCA 1: Foundations of Relational/Systemic Practice, Theories & Models	6
FCA 2: Clinical Treatment with Individuals, Couples and Families	6
FCA 3: Diverse, Multicultural and/or Underserved Communities	3
FCA 4: Research & Evaluation	3
FCA 5: Professional Identity, Law, Ethics & Social Responsibility	3
FCA 6: Biopsychosocial Health & Development Across the Life Span	3
FCA 7: Systemic/Relational Assessment & Mental Health Diagnosis and Treatment	3
FCA 8: Contemporary Issues	Some Coverage
FCA 9: Community Interactions & Collaboration	Some Coverage
Clinical Experience	3
Must include face-to-face client contact under the supervision of a licensed mental health professional.	
Total Credit Hours:	30
* Courses must have been completed at a regionally accredited institution and passed with a B or higher, and be approved by University MFT faculty	

Course Sequence

The PhD in Marriage and Family Therapy requires the following courses for every specialization:

- MFT-7101 - Foundations for Doctoral Study in MFT
- MFT-8101 - Advanced Theories in MFT
- MFT-8102 - Dynamics of Family Interaction
- CMP-9701M - Doctoral Portfolio I
- MFT-7102 - Scholarly Writing in MFT

For students who are not LMFTs

- MFT-8951 - MFT Doctoral Practicum I Or
- MFT-8952 - MFT Doctoral Practicum II

For students who are LMFTs:

- MFT-8971 - MFT Supervision Practicum

- MFT-8970 - MFT Supervision
- MFT-7103 - Research Methods in MFT
- Specialization Course 1
- MFT-7110 - Quantitative Analysis in MFT
- Specialization Course 2
- MFT-7111 - Quantitative Measurement and Design in MFT
- CMP-9702M - Doctoral Portfolio II
- Specialization Course 3
- MFT-7112 - Qualitative Measurement and Design
- Specialization Course 4
- MFT-8991 - MFT Advanced Practical Experience Component (APEC I)
- MFT-8992 - MFT Advanced Practical Experience Component (APEC II)
- MFT-8993 - MFT Advanced Practical Experience Component (APEC III)
- MFT-7113 - Advanced Qualitative Design and Analysis OR
- MFT-7114 - Advanced Quantitative Design and Analysis
- CMP-9703M - Doctoral Portfolio III
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Couple Therapy Specialization

The Couple Therapy specialization is designed to prepare students to work primarily with couples in therapy settings from a family therapy, systems perspective. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to working with couples. Twelve (12) credit hours of coursework are devoted to couple therapy.

Required Courses - 12 credit hours

- MFT-8308 - Emotion and Differentiation Focused Couple Therapy
- MFT-8309 - Cognitive Behavioral Couple Therapy Models and Evidence Based Practice
- MFT-8310 - Systemic Sex Therapy
- MFT-8311 - The Couple Life Cycle in MFT Practice and Supervision

Child and Adolescent Therapy Specialization

The Child and Adolescent Therapy specialization is designed to prepare students to work in therapy settings with children and adolescents from a family therapy, systems perspective. Students in this specialization are required to focus their course projects, internship work, and dissertation research on issues related to working with children and adolescents. Twelve (12) credit hours of coursework are devoted to Child and Adolescent Therapy.

Required Courses - 12 credit hours

- MFT-8208 - Child and Adolescent Assessment and Diagnosis
- MFT-8209 - Family Therapy with Adolescents
- MFT-8210 - Early Childhood and Parenting Interventions
- MFT-8211 - Neurodevelopmental Disorders in Children and Adolescents

Culture, Diversity and Social Justice in a Global Context Specialization

The Culture, Diversity, and Social Justice in a Global Context specialization is designed to prepare students to work with diverse clients and serve in diversity and inclusion positions within organizations and institutions. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to culture, diversity, and social justice in a global context. Twelve (12) credit hours of coursework are devoted to culture, diversity, and social justice in a global context.

Required Courses - 12 credit hours

- MFT-8701 - Language of Diversity
- MFT-8702 - A Systemic Evaluation of Global Concerns and Diversity
- MFT-8703 - Social Justice Advocacy in the United States
- MFT-8704 - Culturally Sensitive Care in MFT

Education and Supervision Specialization

The Education and Supervision specialization is designed to prepare students to serve as teachers, mentors, and supervisors—mentors for the next generation of marriage and family therapists. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to education and supervision. Twelve (12) credit hours of coursework are devoted to education and supervision.

Required Courses - 12 credit hours

- MFT-8721 - Constructing a Professional Identity
- MFT-8722 - Teaching Systemic Theories
- MFT-8723 - Analyzing Supervision Interventions
- MFT-8724 - Employing Technology in Supervision

General Family Therapy Specialization

The General Family Therapy specialization allows students to select courses from a broad range of electives to fit their personal and professional ambitions. In this specialization, students must select four courses (12 credit hours) from the Marriage and Family Therapy curriculum at the 8000 level. Courses from the Department of Psychology may be considered to fill this requirement with approval on a case-by-case basis. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to marriage and family therapy.

Required Courses - 12 credit hours

Students select four electives (theory or treatment-focused) chosen from any of the Department of Social Sciences doctoral level specialization courses (or from Psychology with approval) listed in the Catalog that will help the student develop the desired expertise.

Medical Family Therapy Specialization

The Medical Therapy specialization is designed to prepare students to work with individuals, couples, and families who are facing chronic or acute medical difficulties. Medical Family Therapy incorporates a family therapy, systems perspective in helping client families to understand and deal with their medical difficulties. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to medical family therapy. Twelve (12) credit hours of coursework are devoted to medical family therapy.

Required Courses – 12 credit hours

- MFT-8402 - Medical Family Therapy
- MFT-8403 - Medical Family Therapy Applications
- MFT-8404 - Families, Health, and Illness

- MFT-8408 - Loss and Bereavement

Systemic Leadership Specialization

The Systemic Leadership specialization is designed to prepare students to assume leadership roles in agencies and organizations. Students will be taught to apply systems theory to leadership roles and functioning within organizations. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to systemic leadership. Twelve (12) credit hours of coursework are devoted to systemic leadership.

Required Courses - 12 credit hours

- DMFT-8705 - Systemic Leadership
- MFT-8712 - Leadership Development in Public and Non-Profit Community Organizations
- MFT-8713 - Public or Corporate Policy Making
- MFT-8714 - Leadership in Higher Education

Therapy with Military Families Specialization

The Therapy with Military Families specialization is designed to prepare students to work primarily with individuals, couples, and families that are affiliated with the military through using a family therapy, systems perspective. Students in this specialization are required to focus their course projects, Advanced Practical Experience Component (internship), and dissertation research on issues related to working with military personnel and their families. Twelve (12) credit hours of coursework are devoted to therapy with military families.

Required Courses – 12 credit hours

- MFT-8507 - Military and Veteran Cultures Across the Lifespan
- MFT-8508 - Trauma and Resilience in Military and Veteran Couples and Families
- MFT-8509 - Ethical Challenges and Moral Injuries Across Military and Veteran Populations
- MFT-8510 - Behavioral Health Care with Military and Veteran Populations

College of Law and Public Service

JFK School of Law at National University

Juris Doctor

Note

School of Public Service

Master of Law and Business, MLB

Description of Program

The fully online, asynchronous Master of Law and Business is designed for non-lawyers seeking practical knowledge of the law to achieve their goals in business and other industries where legal knowledge is an asset. Course work includes the foundational concepts of civil litigation, legal research, document drafting, and ethical conduct, and examines the interaction and use of law in interrelated professional environments. All students are required to complete a Capstone course to demonstrate knowledge mastery.

Master of Law and Business students will choose from 4 specializations that allow them to concentrate in a particular area of interest: Healthcare Law, Compliance, and Ethics; Employment Law and Labor Relations; Cross-Cultural Perspectives; and Privacy and Compliance.

[Click here](#) for potential career opportunities within the MLB.

****The University is not currently enrolling students in this program ****

Learning Outcomes

- Examine the structure and operation of the U.S. legal system
- Demonstrate ethical, professional communication within legal and/or business fields
- Transform legal research into a well-crafted written document
- Explore the function of distinct civil actions within the U.S. court system
- Evaluate contract formation principles through critical thinking and problem-solving behaviors
- Synthesize legal and/or business theories to support sustainable real-world objectives

Basis for Admissions

Admission to the Master of Law and Business program requires a conferred bachelor's and/or a conferred master's or doctoral degree from a regionally or nationally accredited academic institution or from an international institution determined to be equivalent through an approved evaluation. A written Statement of Purpose is also required. GRE, GMAT, or LSAT scores are not required.

Degree Requirements

The Master of Law and Business (MLB) requires 30 credit hours for degree completion. The MLB program includes 18 credit hours of foundational courses. The foundational courses are taken by all students to instill and fortify fundamental law and business concepts. The following 9 credit hours in the MLB program concentrate on the specialization which corresponds to the student's goals and interests. Students complete the program with a 3 credit hour Capstone course.

Students assume full responsibility for understanding the foundational, specialization, and capstone requirements of the MLB program. Switching programs after completing coursework may result in reevaluation, monetary loss, loss of credit hours and/or the need to take additional credit hours. Academic and Finance Advisors can assist students with any questions related to program requirements.

The University may accept a maximum of 9 semester credits in transfer toward the MLB for graduate course work completed at an accredited college or university with a grade of "B" or better. Courses considered for transfer must substantially mirror courses in the MLB program. The Dean's office must approve courses considered for transfer. See the [Transfer Credit Policy](#) for additional information.

Time to Completion

The University allows 5 years to complete all Master's programs of 36 credits or less.

The median time to completion for this program is 20 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted, if any. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Course Sequence

The Master of Law and Business program can be completed in 30 credits.

Students who complete at least 9 semester credit hours in a single area of specialization in the MLB program at the University (not counting foundational courses) may elect to have the specialization recorded on their transcript and diploma.

The Master of Law and Business program requires the foundation courses to be completed prior to enrolling in specialization courses. Foundation courses must be taken in the listed sequence. MLB-5000 will be completed as the first course in the degree program and the program capstone will be completed as the last course in the degree program.

- MLB-5000 - Introduction to U.S. Law and Legal Systems
- MLB-5010 - Legal Research, Writing, and Analysis
- MLB-5020 - Ethics and Professional Conduct
- MLB-5030 - Civil Procedure and Litigation
- MLB-5040 - Contract Law: Analysis and Drafting
- MLB-5050 - Strategic Professional Communication
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- MLB-6000 - MLB Capstone

Cross-Cultural Perspectives Specialization

The Cross-Cultural Perspectives Specialization is intended to increase awareness in multicultural interactions by focusing on diversity challenges in global organizations, understanding immigration law and policies, and bridging the linguistic communication gap. During the program, students engage in situational problem-solving and analyze the evolving complexities in this dynamic multi-faceted field. By the program conclusion graduates will be equipped with the tools to effectively communicate with people of different backgrounds, to comprehend the intricacies and purpose of applicable law, and to engage in effective strategies and best practices across cultural divides.

Specialization Courses - 9 credit hours

- MLB-5300 - Spanish for Professionals in Law and Business
- MLB-5310 - Immigration Law
- GBM-5001 - Global Leadership and Change

Employment Law and Labor Relations Specialization

The Employment Law and Labor Relations Specialization is intended to immerse students in the dynamics of human interaction focused on labor and employment laws, regulations that govern human resources, and relationships within organizations. During the program, students engage in situational problem-solving and analyze the evolving complexities in this multi-faceted field. By the program conclusion graduates will be equipped with the tools to navigate the applicable law and understand the regulatory frameworks within the industries, and to strategically work toward implementation of effective strategies and best practices.

Specialization Courses - 9 credit hours

- MLB-5200 - Law and Organizational Management
- HRM-5012 - Global Employee Relations
- HRM-5013 - Global Cultural Effectiveness

Health Care Law, Compliance, and Ethics Specialization

The Healthcare Law, Compliance, and Ethics Specialization is intended to immerse students in the relevant healthcare-related laws, regulations, ethics, and compliance policies which exist across multiple industries. During the program, students engage in situational problem-solving and analyze the evolving complexities in this dynamic multi-faceted field. By the program conclusion graduates will be equipped with the tools to interpret and evaluate regulatory, compliance, and ethical issues in the field, and to work toward implementation of effective strategies and best practices.

Specialization Courses - 9 credit hours

- MLB-5100 - Healthcare Legal Compliance
- MHA-5004 - Health Policy & Analysis
- MHA-5010 - Health Law and Ethics

Privacy and Compliance Specialization

The Privacy and Compliance Specialization is intended to empower students with the ability to navigate the complex landscape of privacy requirements, deconstruct different compliance frameworks and laws, and recognize, secure, and defend intellectual property rights. During the program, students engage in situational problem-solving and analyze the evolving complexities in this dynamic multi-faceted field. By the program conclusion graduates will be equipped with the tools to assess the effectiveness of privacy portfolios, compliance programs, and intellectual property laws, and to engage in effective strategies and best practices.

Specialization Courses - 9 credit hours

- MLB-5400 - Intellectual Property
- PAC-5010 - Privacy Law and Data Protection
- PAC-5020 - Internal and External Compliance

Post-Master's Certificate in Public Service

Description of Program

In order to earn a Post-Master's Certificate, students must complete six courses (18 credit hours) within the chosen Post-Master's Certificate program. With the exception of the General Business program, each Post-Master's Certificate program is prescribed, meaning students can only take what is listed for the particular Post-Master's Certificate program (students may not substitute alternative courses with the exception of the School of Business and Economics doctoral level elective course). Students must complete all six courses with a cumulative GPA of 3.0 or better in order to receive the certificate.

[Click here](#) for potential career opportunities within the Post-Master's Certificates.

Basis for Admissions

Admission to the Post-Master's Certificate program requires a completed master's level or higher degree from a regionally or nationally accredited institution or university.

Scope

6 Courses (18 Credit hours) must be completed from the coursework outlined within the corresponding Post-Master's Certificate specialization. Courses taken as part of a master's program cannot be applied towards a Post-Master's Certificate program.

Certificate Requirements

The University may accept a maximum of 3 semester credit hours from a graduate-level program to the University's Post-Master's certificate program. Coursework must have been completed at an accredited college or university within the last seven years with a grade of "B" or better. See the [Transfer Credit Policy](#) for additional information.

The Post-Master's Certificate has the following graduation requirements:

- Cumulative Grade Point Average of 3.0 (letter grade of "B") or higher
- Official documents on file for basis of admission: a conferred master's level or higher degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Time to Completion

The University allows 2 years to complete all certificate programs.

The median time to completion for this program is 14 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 10 months.

Post-Master's Certificate Transfer into a Doctoral Sequence

Specialization coursework completed as part of a doctoral degree, where a degree was conferred, cannot be applied towards a Post-Master's Certificate program.

- Coursework completed within a Post-Master's Certificate program may be applied towards the specialization sequence within a doctoral program.
- Applying Post-Master's Certificate coursework towards a doctoral degree is contingent upon coursework and degree relevance under the most current doctoral degree program version.

Criminal Justice Specialization

The Criminal Justice Post-Master's Certificate connects ethical, managerial, and theoretical decision making with strategic planning and public policy within local, State, Federal, and multinational criminal justice agencies, departments, and organizations. This Post-Master's Certificate specialization is intended to encourage students to focus on developing competencies across a wide spectrum of criminal justice subjects and issues required for career advancement in law enforcement, the courts, corrections, and criminal investigation.

Required Courses – 18 credit hours

- CJ-7011 - Ethics and Criminal Justice
- CJ-7101 - Management Issues in Justice Agencies

- CJ-7102 - Theory in Justice Administration
- CJ-7104 - Strategic Planning and Implementation in Criminal Justice
- CJ-7105 - Public Policy and Criminal Justice
- School of Business and Economics Doctoral Level Elective

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

Homeland Security - Leadership and Policy Specialization

This specialization prepares senior leaders of public administration, law enforcement, public safety, and emergency medical care and disaster preparedness agencies for positions of executive leadership in the general field of homeland security. Curriculum covers terrorism, strategy, intelligence, emergency management, and critical infrastructure security issues. The program also provides senior-level homeland security professionals the opportunity to apply theory and emerging concepts to real world issues through innovative approaches to complex problems.

Required Courses – 18 credit hours

- HS-7000 - Homeland Security and Terrorism
- HS-7004 - Local Emergency Management and Civil Preparedness
- HS-7010 - Transportation Security
- HS-7013 - Intelligence and Law Enforcement
- HS-7014 - Strategy, Resiliency, and Coping with Fear
- School of Business and Economics Doctoral Level Elective

Doctoral Level Elective

The Post-Master's Certificate allows students to select one course from a broad range of electives to fit their personal and professional goals. Students must complete a minimum of 3 credit hours at the doctoral level (7000 or 8000) offered from the School of Business and Economics.

Doctor of Criminal Justice, DCJ

Description of Program

The Doctor of Criminal Justice (DCJ) explores the multicultural network connecting distinct legal traditions and codes in a global setting. The University's DCJ is designed to prepare scholar/practitioners to actively and effectively engage all facets of the criminal justice system so they can contribute to the critical tasks of leading and managing programs aimed at administering equitable justice to all persons. The program will prepare students to effectively collaborate, plan, organize, budget and carry out large scale operations designed to ensure safety of citizens, communities and the United States. In addition, students will also be well trained to carry out research involving the application and analysis to address issues of professional practice.

The DCJ is designed to prepare students to effectively collaborate, plan, organize, budget and carry out large scale operations designed to ensure safety of citizens, communities and the United States. In addition to the application of justice, our students will also be well trained to carry out research involving the application and analysis to address issues of professional practice.

[Click here](#) for potential career opportunities within the DCJ.

Note: Program availability may vary by state - please contact the Enrollment Office for more information

Learning Outcomes

- Develop policies and budgets to support effective administration of criminal justice agencies
- Evaluate risks and opportunities in criminal justice agencies based on legal, professional, and ethical expectations
- Integrate management and leadership theories into criminal justice practice
- Generate independent research to address issues in criminal justice and inform professional practice

Basis for Admissions

Admission to the Doctor of Criminal Justice program will be determined by the degree used to meet the basis for admission. In order to enter the doctoral program, applicants are required to have a conferred master's degree from a nationally or regionally accredited academic institution.

Degree Requirements

Admission to the Doctorate programs requires a master's degree from an accredited institution.

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The DCJ degree programs have the following graduation requirements:

- A minimum of 45 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the DCJ Prospectus
- University Approval of Dissertation Manuscript and Oral Presentation completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);

- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 45 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 36 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

This program can be completed with a minimum of 54 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

- CJ-7101 - Management Issues in Justice Agencies
- CJ-7102 - Theory in Justice Administration
- CJ-7011 - Ethics and Criminal Justice
- PUB-7005 - Public Budgeting and Finance
- PUB-7017 - Public Personnel Administration
- CJ-7104 - Strategic Planning and Implementation in Criminal Justice
- Specialization Course 1
- Specialization Course 2
- Specialization Course 3
- BUS-7100 - Scholarly Literature Review
- BUS-7105 - Statistics I
- BUS-7320 - Quantitative Research Design & Methodology
- BUS-7380 - Qualitative Research Design and Methodology
- CMP-9601CJ - Pre-Candidacy Prospectus
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Homeland Security Specialization

Specialization prepares the next generation of leaders within the areas of public administration, law enforcement, public safety, and emergency medical care and disaster preparedness agencies for senior level positions in the field of homeland security. This specialization focuses on exploring advanced concepts and methods, and applying theory and emerging concepts in terrorism/intelligence through innovative approaches to complex problems. This specialization also assists in providing our doctoral graduates with the knowledge to more effectively respond to a wide array of issues, challenges and threats that our nation may face and that the student may face as a leader within the homeland security enterprise.

Specialization Courses - 9 credit hours

- HS-7000 - Homeland Security and Terrorism
- HS-7004 - Local Emergency Management and Civil Preparedness
- HS-7013 - Intelligence and Law Enforcement

Organizational Leadership Specialization

This specialization serves to enhance the understanding and practice of organizational leadership using an interdisciplinary approach between business and education theory and research. This specialization has broad appeal among practicing professionals (middle and upper management, and military personnel) with a background in business administration, human resources, nonprofit administration, and related fields, whose professional goal may be organizational consulting or a generalist leadership position in corporate, government, not-for-profit, educational or community organizations.

Specialization Courses – 9 credit hours

Select 3 courses from the following:

- OLB-7001 - Conflict Resolution and Mediation
- OLB-7002 - Building Organizational Capacity
- OLB-7004 - Theory and Practice of Organizational Leadership
- OLB-7005 - Ethical Leadership
- OLB-7006 - Communicating Change

Policing Specialization

This specialization provides students with a broad academic exposure to effective police tactics and techniques, public policy issues, and leadership theories. The specialization is keenly suited for students interested in advancing their careers law enforcement, private security, and public safety. Students will examine current police issues within today's multicultural and digital environment.

Specialization Courses - 9 credit hours

- CJ-7010 - Effective Police Tactics, Techniques, and Methodologies
- CJ-7105 - Public Policy and Criminal Justice
- OLB-7008 - Executive Leadership

Public Administration Specialization

In this specialization, students engage in the application of theoretical knowledge to the practice of public administration. Course content centers on public management and policy, public budgeting, and public/government relations. The purpose of this specialization is to aid students in refining the skills necessary to excel in public sector administration at the local, state, and federal levels. Whether interested in practice or academia, professionals across all public sector organizations, including military personnel, along with those in related fields such as nonprofit management or administration will benefit from this specialization.

Specialization Courses – 9 credit hours

Select 3 courses from the following:

- PUB-7000 - Public Administration
- PUB-7002 - Administrative Law
- PUB-7008 - Principles of Organization and Management

Doctor of Public Administration, DPA

Description of Program

The Doctor of Public Administration (DPA) program is a 54-credit program designed for mid and senior managers to enhance their knowledge and build competencies appropriate to a leadership role in public administration. This curriculum offers a solid grounding in applied research with a wide range of public management and policy topics. The degree program is intended to

engage students in their application of theoretical knowledge to advance the practice of public administration. Students will review literature and apply research methods for practical application. The curriculum lays the foundation for students to evaluate theories and practice models in the field as well as contribute to the current body of public administration knowledge.

[Click here](#) for potential career opportunities within the DPA.

Learning Outcomes

- Evaluate current problems and ethical issues in public organizations
- Formulate domestic and global solutions to public service and policy issues
- Create practical strategies for public organizations from evidence-based research
- Contribute to the applied literature within the field of public administration

Basis for Admissions

Admission to the Doctor of Public Administration program requires a conferred master's degree and/or doctoral degree from a regionally or nationally accredited academic institution.

Degree Requirements

The University may accept a maximum of 12 semester credit hours in transfer toward the doctoral degree for graduate coursework completed at an accredited college or university with a grade of "B" or better.

The DPA degree programs have the following graduation requirements:

- A minimum of 48 credit hours of graduate instruction must be completed through the University
- Grade Point Average of 3.0 (letter grade of "B") or higher
- Satisfactory completion of the DPA Pre-Candidacy Prospectus
- University Approval of Dissertation Manuscript and Oral Defense completed
- Submission of the approved final dissertation manuscript to the University Registrar, including the original unbound dissertation manuscript and an electronic copy
- Official documents on file for basis of admission: a conferred master's degree from an accredited academic institution
- Official transcripts on file for all transfer credit hours accepted by the University
- All financial obligations must be met before the student will be issued their complimentary diploma

Dissertation Completion Pathway

The University's mission is dedicated to assisting students in achieving their academic aspirations and helping them become valuable contributors to their community and profession. To support our mission, the University now offers a dissertation completion pathway for students who have successfully completed their doctoral coursework and achieved doctoral candidacy at a previous institution but were unable to complete their dissertation. The University's Dissertation Completion Pathway (DCP) offers a unique opportunity for students to complete their doctorate in one of the doctoral programs offered at the University (excluding the PhD in MFT, DMFT, and DNP). Students successfully meeting the entrance and application requirements will complete a minimum of 23 credit hours to earn their doctorate.

Vision

The vision for the Dissertation Completion Pathway is to provide "all-but-dissertation" or ABD students a structured approach for completing their dissertation and help them achieve their academic goals in obtaining their doctorate. This pathway provides a student-centered, high touch, and structured pathway that recognizes past academic coursework while providing the student with the preparation and guidance to earn their doctoral degree.

Basis for Admissions

- Must have completed all required doctoral program coursework and/or achieved doctoral candidacy from a regionally-accredited institution;
- Previous doctoral program must academically align with a degree program and specialization offered by the University (excluding PhD MFT, DMFT, and DNP);
- 7 -year maximum for block transfer of credits into an existing University degree program (from official transcripts). Credits aged between 8 and 15 years can be accepted as an exception to policy, with Dean approval;
- Minimum GPA of 3.0 in previous doctoral program coursework;
- Complete the Enrollment Application for the DCP including all required documents and acknowledgements;
- Cannot be academically dismissed from previous doctoral program;
- Completion of a memorandum of understanding and statement of intent.

General Pathway Requirements

The DCP can be completed with a minimum of 23 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Dissertation Completion Pathway students must achieve the following general requirements:

- The DCP requires the successful completion of a minimum of 23 semester credit hours;
- Grade Point Average of "B," 3.0, or higher must be maintained throughout the DCP;
- Official transcripts on file for all transfer credit hours accepted by the University;
- Official documents on file for basis of admission;
- All financial obligations must be met before the student will be issued their diploma

DCP Course Sequence

The DCP is a structured pathway that recognizes past academic coursework while providing the guidance needed to complete a doctoral degree. This pathway includes DCP bridge courses designed specifically to support ABD students prior to entering the doctoral prospectus course and the dissertation courses.

- DCP-8001 - Scholarly Writing and Synthesis of Literature
- DCP-8002 - Designing Scholarly Research
- DCP-8003 - Dissertation Intensive (including a required synchronous intensive)
- CMP-9XXX - School based Prospectus course
- DIS-9901A - Components of the Dissertation
- DIS-9902A - The Dissertation Proposal
- DIS-9903A - Institutional Review Board (IRB) and Data Collection
- DIS-9904A - The Dissertation Manuscript and Defense

Time to Completion

The University allows 7 years to complete all doctoral programs of 60 credits or less.

The median time to completion for this program is 45 months.

Time to completion varies depending upon the pace in which a student completes courses and the number of transfer credits accepted. As most students are working adults, balancing educational, professional, and personal commitments, our academic and finance advisors will work with you to develop a program schedule that works best for your needs.

Students following the preferred schedule designed by the Dean for this program, and applying no transfer credits, can expect to finish in as little as 41 months.

Dissertation Process

Faculty assists each Doctoral student to reach this high goal through a systematic process leading to a high-quality completed dissertation. This process requires care in choosing a topic, documenting its importance, planning the methodology, and conducting the research. These activities lead smoothly into the writing and oral presentation of the dissertation.

A doctoral candidate must be continuously enrolled throughout the series of dissertation courses. Dissertation courses are automatically scheduled and accepted without a break in scheduling to ensure that students remain in continuous enrollment throughout the dissertation course sequence. If additional time is required to complete any of the dissertation courses, students must re-enroll and pay the tuition for that course. Continuous enrollment will only be permitted when students demonstrate progress toward completing dissertation requirements. The Dissertation Committee determines progress.

Course Sequence

This program can be completed with a minimum of 54 credit hours, but may require additional credit hours, depending on the time required to complete the dissertation research. If needed, additional courses will be added to the student degree program in alignment with the SAP and Academic Maximum Time to Completion policies. Students who do not complete their program in accordance with these policies may be dismissed.

Course Descriptions

Course Codes and Course Length

Course Codes

The University course codes include a course prefix and number. The course prefix identifies the content area of a course and the number identifies the course-level (e.g., Undergraduate, Master's, etc.). Courses in this catalog section are listed by School and content area in numerical order.

Example: *The course prefix “ACC” indicates Accounting content*

Course Numbering

Course numbering used at the University are as follows:

Undergraduate	1000 to 4999
Master’s	5000 to 6999; 5000-8 to 6999-8
Doctoral and Advance Studies Certificates	7000 to 8999; 7000-8 to 8999-8
Doctoral Sequence Courses	9000 to 9799; 9901A-D to 9914A-D

Course Length

Course length varies by course and program. Please refer to the course listing in this catalog to determine the length of a specific course.

Accounting

ACC-7000 - Advanced Managerial Accounting

Semester Credits: 3 Weeks: 8

This course focuses on formulating, evaluating, and interpreting accounting information for managerial decision making. Managerial accountants (MAs) are organizational members who support managers and leaders by providing information on costs, budgets, and projections needed to make business decisions. During this course, you will identify and evaluate current developments affecting the field of managerial accounting. Driven by business activities, emerging trends, and reporting standards, MAs must adapt practices and processes to be able to provide leaders and managers accurate cost information to compete effectively within industries and markets.

ACC-7010 - Advanced Accounting and Fraud Examination Techniques

Semester Credits: 3 Weeks: 8

Students in this course will examine the nature of fraud in a business setting. Topics explored include prevention, detection and investigation, and the resolution of cases of fraud that may be found in the corporate world. The course will help differentiate types of fraud found in organizational management and consumer instances, as well as other possible fraudulent acts, and how to react to discovered fraud as an auditing interest. Delineation on how, why, and what to do when fraud is uncovered in a corporation will also be discussed.

ACC-7015 - Advanced Forensic Accounting Theory and Practice

Semester Credits: 3 Weeks: 8

This course reviews the role of the forensic accountant in investigations and audits. Topics covered are the legal environment, Sarbanes-Oxley Act Of 2002, audit and investigation, dispute resolution and litigation services, information security, financial statement analysis, and tax fraud. Students will emerge from the course with an understanding of the roles of forensic accountants and familiarity with their tools and practices.

ACC-7030 - Advanced Auditing Methods and Practice**Semester Credits: 3 Weeks: 8**

Students in this course will examine auditing theory and the application of auditing standards and methods in practice settings. These include auditing and assurance services, audit planning, substantive testing, and internal control evaluation. The evidence and procedures used by external auditors and how they report on financial statements are also examined.

ACC-7035 - Advanced Accounting Theory and Policy**Semester Credits: 3 Weeks: 8**

This course focuses on the evaluation and analysis of accounting pronouncements, concepts, and standards and how these elements affect decision making. The relationship between standard-setting processes, global economics, and politics and broadly explored. The scope of this course merges aspects of financial accounting, managerial accounting, auditing, theory, and policy to create a framework that is applicable to the complex issues in the field of accountancy.

Athletic Coaching**AC-5000 - Leadership in Coaching Today's Athlete****Semester Credits: 3 Weeks: 8**

Coaches face a wide array of tough decisions and need effective leadership and management skills to plot a successful course for their schools. In this course, students will investigate the methods, principles, and decision-making responsibilities of a coach. Through readings, interactive discussions, and independent activities, students will have the opportunity to equip themselves with skills in leadership, management, communication, and curriculum development, and they will apply these skills by taking on the role of a head coach and tackling some of the problems involved in coaching student athletes in today's society.

AC-5002 - Legal Aspects in Coaching**Semester Credits: 3 Weeks: 8**

This course will help you to develop an understanding of how law and legal precedence is applied within interscholastic sport settings. While you are likely to work in an organization with its own legal counsel, you also need to develop awareness of the legal obligations and implications of your role. In this course, you will analyze specific athletic dilemmas based on common situations and current events.

AC-5006 - Sport Nutrition**Semester Credits: 3 Weeks: 8**

In this course, students will explore the principles, background, and rationale for current nutritional guidelines for athletes. Using a physiological basis, students will explore the science behind sport nutrition. Students will also develop a practical, comprehensive understanding as it relates to sport and the influence of nutrition on exercise performance, training, and recovery.

AC-5008 - Coaching Psychology

Semester Credits: 3 Weeks: 8

In this course, students will explore the principles, responsibilities, and issues involved with the coaching and motivating the student athlete. Students will gain knowledge of the fields of Positive Psychology and Sport Psychology. Students will develop their knowledge on strengthening a student athlete's daily performance and team achievement in athletics.

AC-5010 - Performance Enhancement in Sport**Semester Credits: 3 Weeks: 8**

In this course, students will be introduced to the exercise programming strategies of the National Strength and Conditioning Association. Students will be shown how a systematic approach to exercise program design uniquely blends the science of acute variables with the concepts of flexibility, cardio respiratory, core, balance, reactive, speed, agility and quickness and resistance training to develop safe and effective exercise programs for athletes in various sports.

AC-5012 - Coaching Fundamentals of Speed Development**Semester Credits: 3 Weeks: 8**

In this course, students will examine the trend of athletic performance with an emphasis on speed training. Students will be exposed to all aspects of speed training including the latest research on the topic. Special emphasis will be placed on speed and power training for the athlete.

AC-5014 - Coaching Theory, Methods, and Issues**Semester Credits: 3 Weeks: 8**

In this course, students focus on the components of successful coaching. Topics include: personal objectives, coaching styles, roles of head coach, training rules and practice, current coaching methods, drug/alcohol and domestic violence policies for student athletes, stress and burnout, and coaching philosophy.

BSW Preparation**MTH-2010 - Data in Context****Semester Credits: 3 Weeks: 8**

In this course, you will build upon your prior knowledge in mathematical and quantitative reasoning and apply them in professional settings. Basic descriptive and inferential statistical analyses are covered from a practical and conceptual standpoint and applied to common organizational procedures and data reports.

PSY-2001 - Introductory Psychology**Semester Credits: 3 Weeks: 8**

Psychology is the study of behavior and mental processes. This course introduces the student to major concepts, theories, and fields within psychology. Major topics of psychology will be covered including methodology, biological psychology, development, learning and cognition, abnormal/clinical psychology, social psychology, positive psychology, and applied psychology. You will have the opportunity to apply psychological principles to case studies and to everyday life examples. This course is a pre-requisite for all undergraduate PSY courses.

SOC-2010 - Introduction to Sociology**Semester Credits: 3 Weeks: 8**

In this course, you will be introduced to key ideas and theories within the sociology discipline. The course examines the role of

personality, socialization, social change, prejudice, and large group behavior as they relate to cultural development. Social identity creation is discussed within relevant theoretical frameworks.

Business Management

BTM-7101 - Doctoral Studies in Business

Semester Credits: 3 Weeks: 8

This course is the first step in transitioning from knowledge consumer to knowledge producer. Scholar-practitioners will learn to use business theory, advance scholarly inquiry, aid business practices, and form realistic program completion goals. Preparation will be done in the context of an examination of modern trends in business theory.

BUS-7101 - Changing Times: Business Administration in the 21st Century

Semester Credits: 3 Weeks: 8

This course serves as an introduction to the PhD–BA and as the foundation for further doctoral-level study in business. The PhD–BA degree is designed to encourage you to become a scholar-practitioner, using business theory to inform further scholarly inquiry and positively impact business practices. You will examine requirements for the degree—including each milestone and deliverable—and will develop a plan for achieving your academic and research goals. This preparation will be done in the context of an examination of modern trends in business theory and in beginning the transition from being consumers of knowledge to being producers of knowledge.

BUS-7102 - Applied Doctoral Studies in Business

Semester Credits: 3 Weeks: 8

In this course you will be introduced to the applied business doctoral academic journey. You will explore what it means to become an academic learner. You will compare and contrast the applied degree to a research degree to show which is applicable in differing environments. You will discuss the use of conceptual frameworks and theories in research and be introduced to scholarly writing and reference management. Your course will conclude with you developing a researchable applied business research question and a brief research plan.

BUS-7110 - The Business Environment

Semester Credits: 3 Weeks: 8

It is important for scholar-practitioners to understand both the internal and external influences on business—the business environment. In this course, students will examine theories related to those environmental factors including business ethics, international business, and marketing. Internal environmental factors include management and organizational behavior.

BUS-7112 - Business Strategy and Innovation

Semester Credits: 3 Weeks: 8

In this course you will explore the ideas and methods for encouraging innovation as part of successful organizational strategic planning. You will use organizational assessment tools to evaluate a company's human resource practices and assess how strategic planning includes elements of technology and sustainability to ensure competitive advantage in global markets.

BUS-7120 - Business Financial Systems

Semester Credits: 3 Weeks: 8

The allied fields of economics, accounting, and finance are key areas where a highly knowledgeable leader can greatly contribute to the success of a business. Financial professionals secure and manage the money needed to run a business; economists

determine how markets will react in certain situations; and accountants provide analysis and accountability to the entire process. In this course, scholar-practitioners will work towards information fluency in theories related to these critical knowledge areas.

BUS-7130 - Business Leadership & Strategy

Semester Credits: 3 Weeks: 8

Good plans aligned against clear strategic goals can help business leaders achieve those goals. This course is an overview of the theories involved in strategic planning to aid business. Students will explore the difference between strategic thinking and strategic planning, how to choose a strategy that is right for each business, and how to design a strategic plan. This course will investigate how to analyze customers and the competition and ask key questions that help design the most effective strategic plan for each business.

Business Research

BUS-7100 - Scholarly Literature Review

Semester Credits: 3 Weeks: 8

In this course, you will engage in the process of scholarly literature reviews and academic writing. With an emphasis on how to (a) conduct effective literature searches, specifically in preparation for the dissertation, (b) develop a plan for writing comprehensive, critical, and synthesized reviews of research literature, and (c) critically review and write about underlying theory/conceptual frameworks, you will develop a foundation for future research. The overarching goal of this course is for you to conduct an exhaustive search of the peer-reviewed research literature in your topic area and identify potential areas of inquiry for your dissertation.

BUS-7105 - Statistics I

Semester Credits: 3 Weeks: 8

In this course, you will cultivate a statistical mindset through learning and nurturing skills needed to perform and interpret univariate inferential statistics. The course will facilitate building your statistical confidence in assessing and performing statistics. The course will cover univariate parametric and non-parametric statistical tests, interpretation of statistical output, and introduce skills needed to select statistical tests based on quantitative research questions.

BUS-7106 - Statistics II

Semester Credits: 3 Weeks: 8

In this course, you will learn advanced statistical principles and how to apply them to quantitative research in the study of organizations. You will be provided an overview of advanced statistical concepts used in empirical research, including inferential analysis. Advanced computations will be performed using commonly used statistical software. The focus involves helping you build independent scholarly skills with an emphasis on understanding multivariate data; the use, comprehension, and evaluation of sophisticated statistical concepts, and presentation of statistical results.

BUS-7320 - Quantitative Research Design & Methodology

Semester Credits: 3 Weeks: 8

During this course, as a scholar-practitioner, you will build the skills essential for designing quantitative studies; analyzing the data collected in these studies, and interpreting the results of data analyses. You will explore designs and statistical techniques to use with their envisioned dissertation research.

BUS-7380 - Qualitative Research Design and Methodology

Semester Credits: 3 Weeks: 8

During this course, you will examine qualitative methods for studying human behavior including grounded theory, narrative analysis, ethnography, mixed methods, and case studies. You will explore designs and methodologies to use with your envisioned research.

Child and Adolescent Developmental Psychology

PSY-5701 - Foundations of Child and Adolescent Developmental Psychology

Semester Credits: 3 Weeks: 8

This course is an introduction to graduate studies in child and adolescent development. In this course, current and historical theories, major developmental principles, and research in child and adolescent development will be explored. In addition, graduate-level skills—such as academic integrity, effective use of the University Library, comprehension of complex scholarly texts and research articles, and use of APA format and style in professional communication—are also introduced. Students will complete the course with a roadmap to navigate their way to completion of their educational aspirations.

PSY-5702 - Pre-Natal and Early Childhood Development

Semester Credits: 3 Weeks: 8

Prenatal and early childhood development comprises multiple processes, including physical and biological, cognition and language, and socioemotional development. During this course, students will trace the development of each of these processes throughout the prenatal and early childhood periods. Using discipline related research skills; students will analyze the latest research in the field, and will emerge with a grounding not only in classic theory but also in current research directions. The diverse social context in which development occurs will also be critically examined, including how the role of family, school, and peers impacts development.

PSY-5703 - Child and Adolescent Development

Semester Credits: 3 Weeks: 8

This course focuses on physical, cognitive, and psychosocial development from childhood through adolescence. Students will gain an understanding of the physical, cognitive, and psychosocial development that occurs during childhood and adolescence, guided by theories of human development and scholarly literature. Diverse factors that protect, promote, and pose risks to development will be considered. This course will provide students an opportunity to strengthen their information literacy skills, build upon their academic writing skills, and reflect on interventions that promote development for children and adolescents.

PSY-5706 - Ethics in Development Psychology

Semester Credits: 3 Weeks: 8

The APA Code of Ethics is a comprehensive document. However, its application can be complex. Ethical decision making involves commitment to principles, a comprehensive understanding of the issues involved and the ability to view issues from the viewpoint of different stakeholders. This course provides you with an opportunity to apply the Ethical Principles specifically in the setting of Child and Adolescent Developmental Psychology. You will also be able to develop an understanding of several basic ethical concepts in the framework of Child and Adolescent Developmental Psychology. This course also emphasizes the importance of knowing state laws and regulations, which may differ from the ethics standards established by the American Psychological Association or other national organizations.

PSY-6704 - Gender Development in Children and Adolescents

Semester Credits: 3 Weeks: 8

This course is designed to provide a basic understanding of gender development in children and adolescents. Students will explore theoretical explanations of gender development and the latest research on this topic. They also will learn how cognitive, social, biological, and cultural influences impact gender development, identity, and perception into adolescence.

PSY-6705 - Child and Adolescent Psychopathology**Semester Credits: 3 Weeks: 8**

This course explores the etiology of child and adolescent behavior disorders. Students will examine the sociobiocultural influences on abnormal child and adolescent development. Theoretical underpinnings and classifications of abnormal child and adolescent development including familial attributes will be explored.

PSY-6708 - ADHD and Autistic Spectrum**Semester Credits: 3 Weeks: 8**

Attention-deficit hyperactivity disorder (ADHD) and autism spectrum disorders (ASD) are prevalent neurodevelopmental disorders that present in child and adolescent developmental psychology settings. This course evaluates theory and research for ADHD and ASD. In this course, students will examine, separately, various diagnostic approaches as well as the origins and interventions related to ADHD and ASD. In addition, students will learn about the combined effects of ADHD and ASD.

PSY-6709 - Capstone in Child and Adolescent Developmental Psychology**Semester Credits: 3 Weeks: 8**

The Capstone course in Child and Adolescent Developmental Psychology is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MS program. The Capstone course culminates in a review of the evidence based practices related to a specific issue of interest to the student in Child and Adolescent Developmental Psychology.

PSY-6710 - Internship in Child and Adolescent Developmental Psychology**Semester Credits: 3 Weeks: 12**

Students seeking a master's degree in Child and Adolescent Developmental psychology may opt to complete their degree by taking an internship in Child and Adolescent Developmental psychology instead of the Capstone course. During the internship experience, students will meet weekly with their assigned University professor as well as their approved internship site supervisor to discuss their experiences. Weekly assignments include submission of required evaluations and preparation for the final theoretically grounded presentation summarizing the internship experience. Internship experiences are designed to guide candidates through specific standards-aligned experiences with resulting growth in competencies demonstrated through application in practice.

Computer Science**TIM-8102 - Principles of Computer Science****Semester Credits: 3 Weeks: 8**

This course supplies an overview of computer science, setting the baseline for key topics in the field. In this course, you will study the importance of algorithms, the value of diverse languages, and the solutions created within the field. This course will also outline the role of theory, practice, and research in general and within the degree. A breadth of introductory topics will extend to data communications, cloud computing, data, artificial intelligence. The foundations of computer science will survey automata, theory of computation, neural networks, intelligence, and the importance of human interaction.

TIM-8190 - Computer Science Policy and Strategy

Semester Credits: 3 Weeks: 8

This course is an advanced examination of the theories, concepts, and strategies for managing technology policies while developing and implementing computer science projects. During this final course in the PhD-CS program, before starting the dissertation sequence, you will research and design an information technology policy strategy for software development and implementation. You will also evaluate ways to improve the competitive position of an organization, recommend coding control structures for data integrity and security, and plan ways to address business concerns regarding the adoption of new technologies.

Counseling

COUN-6000 - Orientation and Foundations of Clinical Mental Health Counseling

Semester Credits: 3 Weeks: 8

In this course you will be introduced to professional, clinical mental health counseling with respect to the multiple roles and functions counselors serve in their respective communities, specialty areas, and the multidisciplinary health care system. You will be provided with introductory knowledge about the counseling profession including credentialing, professional organizations, standards, and accreditation. In this course you will also be provided with an orientation to the University and to the essential skills needed to pursue a Master of Science degree in clinical mental health counseling. Graduate-level skills, such as goal building, time management, academic integrity, effective use of the University Library, the use of APA form and style in professional communication, and critical thinking skills will be introduced.

COUN-6050 - Clinical Mental Health Counseling Clinical Practicum

Semester Credits: 3 Weeks: 12

In this course you will be required to complete supervised counseling practicum experiences for a minimum of 100 clock hours in your community. You will complete at least 40 clock hours of direct service with actual clients that contributes to the development of counseling skills. You will have weekly synchronous supervision with a counseling faculty member for two hours a week for 12 weeks. You will have opportunities to use theory and counseling skills in a community setting while working with diverse clients and to practice interviews and documentation in clinical practice.

COUN-6051 - Clinical Mental Health Counseling Internship I

Semester Credits: 3 Weeks: 12

After successful completion of a clinical mental health practicum, you will continue your supervised counseling experience. In this course you will earn at least 300 clock hours of supervised counseling internship with clients in a clinical mental health setting. You will complete at least 120 clock hours of direct service with actual clients. You will have weekly synchronous supervision with a counseling faculty member for two hours a week for 12 weeks. You will have opportunities to use biopsychosocial history and assessments as you manage a caseload. You will practice advocacy and interface with the legal system on behalf of clients.

COUN-6052 - Clinical Mental Health Counseling Clinical Internship II

Semester Credits: 3 Weeks: 12

After successful completion of the first internship experience, you will continue your supervised counseling experience. In this course you will earn at least 300 clock hours of supervised counseling internship with clients in a clinical mental health setting. You will complete at least 120 clock hours of direct service with actual clients. You will have weekly synchronous supervision with a counseling faculty member for two hours a week for 12 weeks. You will have opportunities to use biopsychosocial history and assessment as you conceptualize cases and implement evidence-based techniques. You will practice termination skills when closing cases.

COUN-6100 - Theories and Models of Counseling

Semester Credits: 3 Weeks: 8

In this course you will focus on the ethical and legal issues as they relate to the practice of professional counseling. You will be introduced to the ethical standards of the American Counseling Association and learn to apply the Code of Ethics in various counseling situations with a diverse population. In this course you will also explore the importance of counseling supervision and maintaining professional dispositions. Emphasis will be placed on the evolving role of counselors in relation to scope and practice and the increase of technology in the profession.

COUN-6101 - Ethical and Legal Issues in Counseling

Semester Credits: 3 Weeks: 8

In this course you will focus on ethical and legal issues as they relate to practice of clinical mental health counseling. You will be introduced to the ethical standards of the American Counseling Association and learn to apply the Code of Ethics in various counseling situations with diverse populations. In this course you will also explore the importance of counseling supervision and maintaining professional dispositions. Emphasis will be placed on the evolving role of counselors in relation to scope and practice and the increase of technology in the profession.

COUN-6102 - Substance Use Disorders and Addiction Counseling

Semester Credits: 3 Weeks: 8

In this course you will explore the history and development of addictions counseling. You will also learn about the theories and models of addictions counseling. Neurobiological and medical foundation in relation to the ethology of addictions will be explored. You will also be introduced to motivational interviewing as a foundational treatment for addictions counseling. This course will help you to develop a foundational knowledge about process and behavioral addictions and understand common co-occurring disorders.

COUN-6103 - Counseling and Psychotherapeutic Techniques

Semester Credits: 3 Weeks: 8

In this course you will develop basic counseling skills essential to creating a therapeutic working alliance with clients. Evidenced-based counseling strategies for prevention and intervention will be introduced. Initial skill development for clinical interviews and case conceptualization will be explored. Additionally, you will understand the core characteristics of an effective counselor. In this course you will also explore the impact of technology on counseling techniques.

COUN-6104 - Social and Cultural Diversity in Counseling

Semester Credits: 3 Weeks: 8

In this course you will be introduced to the multicultural counseling competencies. You will also learn about the models and theories foundational to multicultural counseling. Specific multicultural populations will be explored with attention focused on multicultural evidenced based treatments. You will be challenged to confront personal biases and obstacles to multicultural orientation.

COUN-6105 - Assessment, Tests, and Measurements in Counseling

Semester Credits: 3 Weeks: 8

In this course you will focus on the historical perspective of assessment and testing in counseling. You will learn basic concepts of testing for both group and individuals. You will also learn to apply statistical principles in the selection of testing and assessments. In this course you will also explore the importance of using ethically and culturally relevant strategies for administering and interpreting assessments and tests. Emphasis will be placed on the use of assessments and tests in various domains.

COUN-6106 - Human Sexuality

Semester Credits: 3 Weeks: 8

In this course you will study the biopsychosocial development of human sexuality. Research about sexuality, sexual development, sexual function, sexual orientation, gender issues and other sexual dynamics will be reviewed. The treatment of sexual disorders, sexual trauma, and abuse will be an area of focus. Students will apply the information from this course to the practice of professional counseling.

COUN-6107 - Human Growth and Development

Semester Credits: 3 Weeks: 8

In this course you will study the theories of individuals across the lifespan. Specifically, the students will learn of the myriad of factors that affect human development, including: biological, neurological, and physiological factors. Focus will also be placed on the systemic and environmental factors that affect human development. Emphasis will be placed on ethically and culturally sensitive approaches to enhance wellness and resilience. The unique impact of crisis and trauma on human development will be investigated.

COUN-6108 - Marriage and Family Systems

Semester Credits: 3 Weeks: 8

In this course you will be introduced to the history and development of marriage, couple, and family counseling. You will review the theories and models of family systems and dynamics focusing on assessment and intervention. Cultural factors relevant to marriage, couple, and family functioning will also be explored. In this course you will also be challenged to reflect on your family of origin and how it impacts your current functioning.

COUN-6109 - Abuse, Crisis, and Trauma Counseling

Semester Credits: 3 Weeks: 8

In this course you will learn strategies for crisis intervention and trauma-informed care. You will also explore psychological first aid and community-based strategies for crisis and trauma counseling. This course will discuss abuse, crisis, disasters, and trauma and their effect on diverse populations. This course will also focus on the impact of abuse, crisis, and trauma on individuals with mental health diagnoses.

COUN-6110 - Psychopathology

Semester Credits: 3 Weeks: 8

This course will introduce you to the classifications of the *Diagnostic and Statistical Manual of Mental Disorders (DSM)* and the *International Classifications of Diseases*. You will learn the process of diagnosing, the structure of the DSM, and concepts related to differential diagnoses. You will also learn about the scope and practice of counselors in the diagnostic process.

COUN-6111 - Career Development and Counseling

Semester Credits: 3 Weeks: 8

In this course you will be introduced to a foundational aspect of professional counseling: career counseling. You will explore the theories and models of career development. You will develop an understanding of the interconnectedness of work, mental health, and other life roles. This course will also provide you with the opportunity to recognize areas of advocacy with diverse clients in career and educational development. Developing strategies to address career needs in an ethically and culturally relevant manner will also be an area of focus.

COUN-6112 - Research Methods and Program Evaluation in Counseling

Semester Credits: 3 Weeks: 8

In this course you will focus on the importance of research in the counseling profession. You will also understand how to critique counseling literature to help inform practice. Additionally, you will explore the use of ethically and culturally relevant strategies for conducting research and program evaluation. You will be able to understand the qualitative, quantitative, and mixed methods used in research and program evaluation. The focus will also be on identifying evidence-based counseling practices and conducting needs assessments.

COUN-6113 - Psychopharmacology**Semester Credits: 3 Weeks: 8**

This course will provide you with relevant information about the use of psychotropic medications in the context of counseling. You will learn the commonly prescribed medications for mental health disorders including the benefits and side effects. This information will help you prepare for consultation and participation in integrated behavioral health care.

COUN-6114 - Clinical Assessment, Diagnosis, and Treatment**Semester Credits: 3 Weeks: 8**

This course will challenge you to synthesize the concepts of clinical assessment, diagnosis, and treatment. You will learn how these concepts work together to inform evidence-based treatment. You will utilize case conceptualization models to develop treatment plans. You will also explore various forms of documentation for clinical mental health counseling.

COUN-6115 - Group Counseling**Semester Credits: 3 Weeks: 8**

In this course you will focus on understanding the theoretical foundations of group counseling and group work. You will explore the dynamics of group process, including the stages of group development. You will continue to develop the personal and professional characteristics of a counselor, particularly those essential to the group leader. This course will introduce you to the components of groups in various settings and explore ethically and culturally relevant strategies for designing and facilitating groups.

COUN-6116 - Contemporary Issues in Counseling**Semester Credits: 3 Weeks: 8**

In this course you will study the specific requirements for your state of residence for professional, clinical mental health counselors. You will learn the requirements for child abuse assessment and reporting for counselors in your state. You will explore the unique cultures of your state of residence and the social and psychological implications of socioeconomic position for clients. This course will provide opportunities to apply strategies for suicide Risk Assessment and Intervention. You will also understand the unique considerations for telementalhealth and technology assisted counseling.

COUN-6117 - Advanced Ethical Practice and Record Management**Semester Credits: 3 Weeks: 8**

In this course you will study the importance of records management in maintaining ethical practice. You will explore how business and family law impacts professional practice. You will also study the current rules and laws applicable to counseling in your state of residence. You will look at the details of the ethical principles governing counseling and you will examine the ethics of the evolving telemental health practice of counselors.

Criminal Justice**CJ-5004 - Organized Crime**

Semester Credits: 3 Weeks: 8

This course provides students with an opportunity to examine the various types of white collar crime, methods of detection, investigation, and the social impact of such crimes. The specifics of organized crime such as family structure, revenue sources, and investments will be introduced. The differences and common bonds between organized and white collar crime will be evaluated. Students will also evaluate the political influences in organized crime and cases related to white collar crimes.

CJ-5007 - Current Issues in Law Enforcement**Semester Credits: 3 Weeks: 8**

In this course, you will investigate important issues facing the nation's local, state, and federal law enforcement agencies. Major issues such as emergency management and response, national security, technology and communication, and drug enforcement, will be discussed. You will evaluate issues and law enforcement response from a local, state, and federal perspective. You will also assess the importance of cooperation among agencies and evaluate alternative law enforcement responses based on evidence-based practices. This course provides students with the opportunity to investigate the most important issues facing the leadership of the nations' local, state, and federal law enforcement agencies. Major problems such as drug enforcement, organized crime, white-collar crime, and the war on terrorism and cooperation among law enforcement, first responder, and health officials provide the core focus of student efforts.

CJ-5101 - Introduction to Criminal Justice**Semester Credits: 3 Weeks: 8**

In this course, students will explore the different components of the criminal justice system in the United States. Through a legal, criminological, historical, and societal perspective, the foundations of crime and justice, police, courts, corrections, and juvenile justice will be evaluated. Special attention will be given to police, court, and corrections from arrest to conviction. Students will examine concepts of ethics and discuss current issues in the criminal justice system. Integration of technology such as databases and the use of technology in policing and corrections will be studied.

CJ-7010 - Effective Police Tactics, Techniques, and Methodologies**Semester Credits: 3 Weeks: 8**

The course will examine police tactics, techniques, and methodologies, exposing the student to best practices in evidence collection, agency collaboration, and investigation of cybercrime. You will develop a keen understanding of the latest techniques and technologies that may be employed in a criminal investigation, as well as the research and development techniques used to generate new tactics and methodologies with an emphasis on cybercrime and forensic science.

CJ-7011 - Ethics and Criminal Justice**Semester Credits: 3 Weeks: 8**

This course provides a comprehensive review of ethics and moral behavior in criminal justice. The theoretical foundations of ethics will be introduced and applied to criminal justice practice. You will evaluate the ethical challenges faced by criminal justice professionals and the policies and practices in place to prevent unethical behavior. The ethical obligations in crime scene investigation, evidence handling, and testimony in court will also be addressed in this course.

CJ-7101 - Management Issues in Justice Agencies**Semester Credits: 3 Weeks: 8**

This course examines current management issues within the criminal justice field. You will explore concepts and skills needed to address issues and problems confronting the criminal justice system. Issues such as the societal and cultural changes affecting criminal justice agencies will be examined. In addition, you will gain in-depth exposure to the application of theoretical and administrative principles.

CJ-7102 - Theory in Justice Administration

Semester Credits: 3 Weeks: 8

In this course, students will analyze the internal organizational structure, roles, and functions of criminal justice agencies. Students will apply administration and managerial concepts and theories to demonstrate competencies in this area. Students will also learn to formulate policies for coordination and control procedures.

CJ-7104 - Strategic Planning and Implementation in Criminal Justice

Semester Credits: 3 Weeks: 8

Strategic planning is necessary for effectively planning both current and future organizational goals of a criminal justice organization. This course will allow you to examine the tools and skills needed in the strategic planning process while understanding the importance of the planning process. This course will also strengthen your ability to analyze, develop, and implement strategic plans to achieve criminal justice goals for an organization as well as to assess and manage improvements for an organization in a specific geographical location. Several criminal justice agencies will be examined within the course to provide you with the widest perspective possible before you begin developing your own strategic planning documents.

CJ-7105 - Public Policy and Criminal Justice

Semester Credits: 3 Weeks: 8

In this doctoral level course, students will examine public policy and criminal justice. Students will analyze the various significant policy models used in the criminal justice system. Students will assess how various participants such as politicians, the police, and the corrections sector impact criminal justice public policy. Students will specify how the media influence criminal justice public policy. Finally, students will evaluate how the courts shape criminal justice public policy.

Curriculum and Teaching

CT-5000 - Curriculum and Instructional Strategies

Semester Credits: 3 Weeks: 8

In this Master's level course, students will be provided with an overview of curriculum and instructional topics. Historical precedents involving policy and theories influencing the development and application of curriculum and instruction will be reviewed. Information and corresponding learning activities will be presented to support the current understanding of a quality curriculum and corresponding research-based best- instructional strategies. Accountability involving assessment and high-stakes testing as a supportive component to effective curriculum and instruction will be examined. Upon completion of the course, students will be better prepared to understand, develop, and apply curriculum, instruction, and assessment in the PK-12 classroom.

CT-5003 - Principles of Teaching & Learning

Semester Credits: 3 Weeks: 8

In this course, students will analyze the influence of emotional, social, and cultural contexts affecting PK-12 student learning. Students will examine learning theories, instructional models, differentiated learning strategies, mindfulness, and informed instructional decision making that inform PK-12 teaching practices.

CT-5010 - Teaching, Learning, and Assessment Strategies and Principles

Semester Credits: 3 Weeks: 8

In this course, you will be provided with an overview of theories, principles, practices, design, implementation, evaluation, and issues in curriculum and instruction. You will apply theories to practice, explore components of the curriculum, analyze current issues related to curriculum, evaluate learning theory, and integrate theory into curriculum components and practices. Topics include curriculum design and development, curriculum standards, high stakes testing, the information processing model, and models of teaching and learning.

CT-5011 - Learning and Teaching Styles, Multiple Intelligences, and Ways of Learning**Semester Credits: 3 Weeks: 8**

This course allows you to engage with the multiple ways that individuals learn and how these many ways of learning can inform your teaching. You will evaluate multiple theoretical frameworks and applications, including teaching styles, multiple intelligences, and the debate about the existence and value of learning styles that effect ways of learning. Throughout the course, you will move beyond understanding the theories to translating your knowledge and skills to the practice of teaching. The course will culminate with a unit and lesson plans designed by you that integrate multiple learning and teaching styles that reflect multiple intelligence theory and ways of learning within authentic classroom scenarios.

CT-5012 - Teaching Foundations for Language and Literacy**Semester Credits: 3 Weeks: 8**

In this course, students will learn about the foundations and principles of language and literacy development in a child's early years. Theory, strategies, and activities, as well as a summative assessment, are presented throughout this course to assist teachers in gaining a thorough perspective on promoting language and literacy fluency. Students will be asked to reflect on their own understanding of language development and pedagogical strategies of language acquisition.

CT-5013 - The Classroom: Management and Organization for Student Achievement**Semester Credits: 3 Weeks: 8**

In this Master's level course, students will be provided with models and strategies for effective classroom management for today's classroom. Students will investigate research-based instructional practices in classroom management. A classroom management system will be created. Methods for engaging students in the classroom will be explored. Classroom organizational tactics will be analyzed. Students will examine various ways to use discipline and conflict resolution strategies in the classroom. Theories regarding classroom management will be applied.

CT-7000 - Developing Instructional Strategies and Curriculum**Semester Credits: 3 Weeks: 8**

In this course, you will analyze instructional strategies based on the principles of universal design for learning, including integrating strategies for providing multiple means through which PK-12 learners access the curriculum. You will plan instructional strategies for curriculum aligned to standards that support current educational requirements, including the use of technology to engage, comprehend, and express learning. You will also consider other educational issues, trends, and recommendations for change in the PK-12 classroom related to instructional strategies.

CT-7100 - Dispositions of Learner and Teacher**Semester Credits: 3 Weeks: 8**

In this course, you will examine dispositions of both learners and teachers. This examination will include the effect of dispositions on learner motivation, participation, and comprehension as well as the impact of teacher dispositions on overall learning and classroom culture. The course includes considerations for dispositions related to inclusivity, technology, social emotional development, and successful collaboration throughout community.

CT-7200 - Design and Evaluation of Curriculum and Programs

Semester Credits: 3 Weeks: 8

This course starts with the distinction between curriculum and programs in K-12 education. While both are important, evaluation of each one is different. In addition to exploring evaluation processes, you will also examine the development of both curriculum and programs. This examination will incorporate theories, trends, and future directions, including technology recommendations to design and develop innovative curriculum for K-12 learning environments.

CT-7300 - Theories and Applications of Instructional Strategies

Semester Credits: 3 Weeks: 8

You will take a closer look at instructional strategies in this course, with particular attention to supporting theories and practical applications in K-12 learning environments. You will assess learning theories that frame instructional strategies, including theories and frameworks for remote learning. You will recommend instructional strategies, justify approaches to inclusive instruction, and design inclusive learning experiences in K-12 education.

CT-7400 - Assessment Practices

Semester Credits: 3 Weeks: 8

This course offers the opportunity for you to consider the critical role of assessment in curriculum and teaching. You will examine assessment types and processes, including how trends in assessment and other accountability practices inform instructional decisions, curriculum development, and continuous improvement in K-12 environments. You will integrate the assessment for learning process and the universal design for learning perspective, as well as recommend strategies for effective assessment practices across classrooms, schools, and districts.

CT-7500 - Advanced Capstone in Curriculum & Teaching

Semester Credits: 3 Weeks: 8

In this final course of the curriculum and teaching specialization, you will synthesize your work across all courses into a capstone project of your own design. This project will integrate theory and practice related to a specific topic of your choosing related to curriculum and teaching. As you prepare your project you will evaluate the impacts of current trends, technologies, and issues of diversity, equity, inclusion, and social justice within curriculum and teaching. In one of your last assignments in the specialization, you will compose your philosophy of teaching based on research, theory, and personal reflection.

Cybersecurity

TIM-8305 - Cyber Risk, Contingencies, and Incidents

Semester Credits: 3 Weeks: 8

Cybersecurity has the primary objective of averting losses and restoring proper operations should there be a loss. During this course you will study the foundations of risk and the opportunities to reduce cybersecurity losses for organizations. Risk assessment abilities and research options form the base of cyber defenses and determine the need for subsequent resources. The course continues with measuring risk and events leading to the identification of potential incidents and solutions. Learning about contingencies consider the needs of the organization, maintaining operations, and preparing for the best recovery should there be a loss.

TIM-8315 - Cyber Automation, Artificial Intelligence, and Machine Learning

Semester Credits: 3 Weeks: 8

Tracking and responding to cyber events requires massive databases integrating content from all devices at every location. Cyber

threat analysis and response implies long term access and complex manipulation of event databases. In this course you will learn techniques to capture and display relevant data and leverage automation to reduce losses. Data manipulation, automated sense-making, appropriate fast reactions, machine learning, data analysis, and presentation are rapidly developing cybersecurity techniques. You will also leverage required capabilities for the defense of the organization, respond to enhanced threat complexity and capabilities, and address the need to counter data poisoning by threat actors.

TIM-8325 - Cloud and Systems Certification & Accreditation

Semester Credits: 3 Weeks: 8

Information technology systems require formal review to ensure not only that they function correctly, but also that they are secure. In this course you will learn the issues and lack of proper defenses for internal and commercial off-the-shelf (COTS) systems and solutions. In addition, you will investigate the benefits and implications of cloud computing and proper processes to leverage innovative solutions to decrease risk, such as FedRAMP. With the redefinition of the "perimeter" that must be defended and new threat vectors, you will explore and research novel approaches to safe computing and cybersecurity monitoring.

TIM-8335 - Governance, Laws, Privacy, and Compliance

Semester Credits: 3 Weeks: 8

Prerequisites: Masters Degree

This course provides the source, role, and implementation of governance within the cybersecurity arena and the entire organization, including related policy. The execution considers the breadth of state and federal laws plus regulations to establish a further domain for cyber objectives. Important global laws and regulations round out the foundation, leading to effective compliance. Learning includes a focus on specific industries and agencies, including banks, hospitals, government, etc. During this course you will prepare to enable governance, compliance, privacy, and related solutions for medium to very large organizations, including the ability to support the significant changes anticipated in laws.

TIM-8345 - Global Governance, Audit, Privacy, and Compliance

Semester Credits: 3 Weeks: 3

Prerequisites: Masters Degree

This course addresses cybersecurity complexity implied by global influences in terms of laws, locations, facilities, and operations. During this course you will combine cyber global governance, audit, privacy, and compliance to support a comprehensive cyber response. Your foundation would enable the organization's integrated abilities to defend the technical systems that facilitate its global operations for both global and local needs across all locations. You will address the diversity of laws and audit practices, different views of privacy, and multiple compliance implications that require a carefully balanced practical solutions that harnessing theory.

TIM-8355 - Secure Globally Distributed Infrastructure and Support

Semester Credits: 3 Weeks: 8

Organizations with a global footprint need to balance a single approach for cybersecurity with a range of diverse influences from people, governments, and organizations. In this course, you will explore cybersecurity challenges relating to communication systems, various local support capabilities, and supply chain challenges. Further learning considers the variety of contracts available in different countries, available service levels, and approaches to management, maintenance, and controls. Within diversity and continuous change, the course adds theoretical and practical approaches to constant revision, thereby facilitating viable solutions for local and global needs.

TIM-8360 - Global Laws, Culture, and Ethics

Semester Credits: 3 Weeks: 8

Global organizations need to balance a wide range of influences that compromise options to achieve required outcomes from multiple external and internal demands. Global laws adjust to local expectations in each individual country, implying diverse needs that need to be matched with carefully devised controls. You will learn about diverse cultures across nations, regions, and within organizations implying careful and pragmatic approaches to integrate diversity. You will also discover diverse views and approaches to ethics that will require careful responses and protection of all stakeholders.

TIM-8365 - Global Cyber Policy, Operations, and Risks**Semester Credits: 3 Weeks: 8**

This course combines all the previous cybersecurity insights and extends the learning to include policy and operations to reduce risk. You will learn about policy in commercial organizations that need to balance costs with safety to serve all their stakeholders. Policy supplies the expectations and sanctions to all persons that use the information systems and is authorized by the Board. You will also learn government views that complement laws and standards. The operational functions and implied architecture of the organization adds practical insights, all aligned to reduce risk within the organization and all its stakeholders.

TIM-8370 - Advanced Networking & Identity Management**Semester Credits: 3 Weeks: 8**

Cloud computing provides benefits and new challenges for cybersecurity. Unknown entities can review or divert communications and any person can try to authenticate or intercept access. This course provides insights regarding cybersecurity exposures relating to networking to remote sites and managing identities and access. Your aim is to enable the security of data assets where there is no perimeter defense. You will learn about improved networking options for confidentiality, integrity, and availability. Identity options include active directory options, extensions, controls, and alternatives. Other options consider virtual perimeters, other forms of trust, protocols, and anticipating the evolution of issues, including quantum computing.

TIM-8375 - Integration, Outsourcing, and Related Laws**Semester Credits: 3 Weeks: 8**

The evolution of modern secure cloud computing will require a variety of vendors for solutions to organizations. Combining internal information systems with multiple cloud and solution suppliers requires careful cybersecurity integration and negotiation. You will learn about combining solutions, system changes, upgrades, changes to security, and multiple laws. Options to adjust architecture, orchestrate multiple adjustments, and selecting business optimization will introduce you to innovative approaches and risk mitigation. You will need to enable third parties and outsource arrangements to broker solutions. Global needs will expose you to different laws about security, data residency, regulations, audit, and diverse suppliers.

TIM-8380 - Secure Cloud Operations**Semester Credits: 3 Weeks: 8**

Secure cloud operations rely on equipment, processes, and personnel from providers, client organizations, and the networks linking all parties. Each are subject to the laws, regulations, and threats. In this course you will learn the theory and practice relating to delivering reliable and secure cloud services while coping with ongoing change. Concurrently, new uses for cloud computing and core technology evolution add further complexity. While operations might be tactical, the complexity and need to integrate diverse influences, calls for negotiation, resilience, strategy, and use of maturity models. One must attain and maintain acceptable delivery capabilities within local and global change.

TIM-8390 - Strategic Management of Cybersecurity: General and Technology**Semester Credits: 3 Weeks: 8**

Prerequisites: Masters Degree

This advanced course integrates all cyber content learning across the degree and specialization, combining theory and practice for the holistic cybersecurity strategy. During this final content course, you will construct a response addressing cyber governance, policy, risk, compliance, and assurance. You will contribute technical leadership by addressing architecture and operational needs to reduce both threats and vulnerabilities from internal and external sources. The evaluation of tools, data, and processes must facilitate resilience and support the protection of critical information from current and future losses.

TIM-8710 - General Cyber Law, Oversight, and Regulations

Semester Credits: 3 Weeks: 8

This course addresses a broad background of current laws, governmental oversight from a variety of agencies, and industry regulations. The focus is the broad requirements across industries, organizations, and consumers. It excludes a focus on specific industries and agencies, such as banks, dams, or defense. During this course you will prepare to defend organizations and enable generic compliance, reduce privacy risks, and prepare to follow proposed laws and regulations. The scope includes all active laws and prepare for new requirements. You will also learn about demands from foreign powers and other states that apply to a broad range of organizations.

TIM-8715 - Frameworks, Models, Standards, and Controls

Semester Credits: 3 Weeks: 8

This course reviews a range of frameworks, models, standards, and controls to address a wide variety of needs. You will learn about broad and specific solutions responding to industries or laws. Depending on the specific expectations of the industry, the type of organization, and its location, you will consider appropriate solutions. In practice, one would need to find a way of combining diverse needs into a reasonable approach to establish controls without hampering effective value delivery within the organization. Most frameworks, models, standards, and controls change frequently, implying the need for continuous improvement and strategic planning.

TIM-8720 - Industry Laws, Regulations, and Compliance

Semester Credits: 3 Weeks: 8

This course focuses on United States law, regulations, and compliance that targets specific industries at both federal and state levels. Your learning in this course focuses on additional depth for the 16 critical infrastructures and attaining compliance across multiple requirements. In addition, regulations relating to centralized controls and related bodies frequently specify techniques and approaches. In developing areas of the law and regulations, the migration from federal to state and state to federal implies regular change and complexity for compliance. Your learning includes anticipation of changes and multi-period adjustments across internal and external stakeholders.

TIM-8725 - Cyber Policy and Leading Cyber Operations

Semester Credits: 3 Weeks: 8

Cybersecurity policy provides guidance to all stakeholders and supports the governance that must be applied throughout the organization. The deployment of policy and leadership of cyber operations provides the execution channel for policy. In this course, you will learn about the structures that support policy and governance. You will review needs and devise solutions to enable sound cybersecurity responses, including both the creation of policy and its implementation. In addition, consideration is given to the needs of distributed organizations, outsourcing, and the implications of links to external parties.

Data Science

TIM-7250 - Research Design in Data Science

Semester Credits: 3 Weeks: 8

This advanced Data Science research design course immerses you in diverse methodologies, equipping you with a multifaceted approach to data-driven investigations. From the foundations of quantitative research, which harnesses statistical analyses to draw generalizable conclusions from large datasets to the cutting-edge realm of Constructive Research focuses on models, frameworks, tools, and software used by industry to improve value creation. Throughout the course, you will delve into DSR (Design Science Research) and examine how it integrates theoretical and empirical constructs with industry practices to develop applied and testable models, enhancing the Data Science landscape. Common approaches include experimental design, where controlled experiments are conducted to test hypotheses, observational studies that involve data collection without intervention, and exploratory research to uncover patterns and relationships in data. Furthermore, cross-sectional and longitudinal designs allow for the examination of data at specific time points or over time.

TIM-7255 - Advanced Research Design in Data Science**Semester Credits: 3 Weeks: 8**

Technical, quantitative research involves statistical analysis of data collected from a larger number of participants to determine an outcome that can be applied to a general population. Technical constructive research focuses on models, frameworks, tools, and software used by the industry to improve value creation. A constructive approach to research of a technical nature integrates theoretical and empirical constructs with standard practices and experience to develop an applied and testable model to improve the field of Data Science. During this course, you will work through the scientific research process and apply your knowledge of both quantitative and constructive research design to develop a technical research proposal that you can use to support your research interests through the remainder of your program.

TIM-8500 - Principles of Data Science**Semester Credits: 3 Weeks: 8**

This course provides an introduction and overview of data science in order to make informed decisions about business needs. The objective of this course is to introduce you to the nature and methods of data science at the doctoral level. While data science is a varied and nuanced field that generally combines computer science with advanced mathematics, its application in research and industry ranges from understanding problem statements to producing insights using validated methods. You will explore data science life cycle and determine appropriate design methods and management of data to fit the context of research and/or industry issues.

TIM-8515 - Multivariate Analysis**Semester Credits: 3 Weeks: 8**

This course examines the use of multivariate analysis to provide statistical and applied insight to data science problems. You will apply a variety of multivariate methods by selecting the appropriate models for the research questions posed and the data type. You will engage in hypothesis testing using parameters of multivariate data. Specifically, you will develop problem solutions by analyzing multidimensional data to derive meaningful insights into problem statements. Finally, you will present your results and actionable insights in an appropriate format for your audience.

TIM-8520 - Inferential and Predictive Analytics**Semester Credits: 3 Weeks: 8**

Establishing insights concerning population estimates, while understanding and communicating knowledge about variance in likely outcomes, is a fundamental skill of a data scientist. At the doctoral level, you will apply this understanding to the delivery of documentation for an audience of stakeholders who hinge key business decision-making on understanding the likelihood of an event's occurrence. Within the academic setting, this understanding drives the development of foundational knowledge for research in the resolution of problem settings. In this course you will learn how to understand probability functions to apply your knowledge as a decision-maker or educator.

TIM-8521 - Statistical Modeling

Semester Credits: 3 Weeks: 8

Introducing statistical techniques is essential for extracting meaningful insights from data focusing on projects and research of Data Science. Through a comprehensive eight-week journey, students will explore topics such as normal distribution, hypothesis testing, power of test, type I and type II errors, sampling distributions, bootstrapping methods, diagnostic tools, validation techniques, and more. The course emphasizes practical applications, equipping learners with the skills to make data-driven decisions and extract hidden patterns from datasets. By mastering these inferential statistics techniques, students will be well-prepared to tackle complex real-world problems and enhance their expertise in the field of Data Science.

TIM-8535 - Univariate Analysis

Semester Credits: 3 Weeks: 8

This course examines current techniques and methods utilized in manipulating data in quantitative analysis. You will analyze processes within data science that help organize large data sets. You will explore the differences in statistical reasoning based on Frequentists and Bayesian philosophy and will analyze output based on Artificial Neuron Network analysis.

TIM-8536 - Current Topics in Data Science

Semester Credits: 3 Weeks: 8

Exploring univariate data analysis, beginning with the fundamentals of clustering univariate data, students learn to group similar data points an essential skill for identifying patterns in various fields. Moving on to advanced analytical methods, students extract deeper insights and discern trends. The next focus is on predictive analytics, where students acquire the skills to forecast outcomes using univariate data implementing predictive techniques, processes, and diagnostics. The natural language processing, underlining the criticality of effectively communicating analytical results is also a subject explored. Each section is carefully crafted to provide a detailed and practical learning experience, making this course ideal for anyone seeking to master the spectrum of univariate data analysis, from basic clustering techniques to advanced predictive and communication strategies.

TIM-8540 - Critical Analysis, Interpreting, and Reporting Data

Semester Credits: 3 Weeks: 8

The ability to generate insights from data is a critical data science competency. As part of this course, you will expand upon your understanding of ethics regarding data reporting. As such, you will be required to develop standards needed to improve integrity and validity of data. This course also covers textual and tabular reporting concepts and formats used in data science. During this course, you will evaluate methods for communicating data outputs and outcomes. You will end the course by creating a data presentation report and executive memo that adheres to industry standards.

TIM-8555 - Predictive Analysis

Semester Credits: 3 Weeks: 8

A comprehensive exploration of advanced predictive modeling and machine learning techniques. The course equips students with the skills needed to harness the power of data for making informed decisions. The course dives into regression models, decision trees, support vector machines, and ensemble methods like random forests and gradient boosting. Students will also learn about clustering methods, time series analysis, and the application of these techniques in real-world scenarios. Through hands-on projects and assessments, participants will become proficient in building predictive models, evaluating models, and effectively leveraging machine learning algorithms. It also equips students to interpret and communicate their findings effectively.

TIM-8590 - Data, Information, Knowledge Policy and Strategy

Semester Credits: 3 Weeks: 8

New data science technologies and programs should be aligned to the organizational mission, vision, and values; thus, it is

important for technology leaders to develop data, information, and knowledge management policies. During this advanced course in data and knowledge management, you will develop an enterprise data governance strategy that integrates industry standards and best business practices in data science. You will also design metrics to measure and analyze data integrity to ensure data validity, evaluate various influences on enterprise data and knowledge management, and recommend data management solutions.

DMFT Courses

DMFT-7000 - Foundations of Relational/System Ethics and Practice

Semester Credits: 3 Weeks: 8

This doctoral-level course is designed for students without a background in relational/systemic clinical theory. It focuses on the key elements of relational/systemic ethics and clinical practice, including the theories commonly used in marriage and family therapy (MFT). The purpose of the course is to prepare students for the foundational and specialization courses in the DMFT program. In this course you will examine the core elements of relational/systemic ethics, systems theory and cybernetics, and MFT theories. An emphasis is on the implications of using a relational/systemic clinical lens, including how doing so impacts your professional identity.

DMFT-7112 - Program Evaluation and Monitoring in MFT

Semester Credits: 3 Weeks: 12

In this doctoral-level course, you will focus your attention on the fundamentals of evaluating and monitoring human services programs. The purpose of this course is to prepare you to conduct quantitative, qualitative, and mixed methods formative and summative program evaluations. Special emphasis is placed on evaluating programs and clinical outcomes using the relational/systemic perspective of Marriage and Family Therapy. In this course, you will develop your abilities to collaborate with stakeholders in developing evaluation plans that ensure evaluation processes meet the needs of multiple stakeholders. You will consider the various ethical implications of program evaluation and will identify ethical considerations in implementing an evaluation plan and reporting results.

DMFT-7113 - Relational/Systemic Applied Methodologies

Semester Credits: 3 Weeks: 12

In this course you will explore various relational/systemic methodologies, including those that might be used in applied doctoral projects. As you do so, you will analyze the foundations and key elements of each, as well as address relevant ethical and diversity-related issues. In addition, as you examine the different types of applied scholarship, you will identify those that seem most relevant to your proposed doctoral project and will sketch an initial blueprint for applying them in your doctoral project.

DMFT-7115 - Relational/Cybernetic Applications in Larger Systems

Semester Credits: 3 Weeks: 8

Relational/systemic practice is not bound to the therapy room and carries relevance beyond the family system. In this course you will examine the key elements of relational dynamics and cybernetics as they present in larger macrosystems. You will then explore the application of these concepts relative to the assessment and intervention of organizational and social systems, such as state and federal government, corporations, organizations, and polarized cultural groups. The overall focus of this course will equip you to strategize systemic change on a broader scale through methods that target second/third-order cybernetic change. Emphasis will be placed on engaging such large-scale change in a manner that is culturally sensitive and ethical.

DMFT-7201 - Program Development for MFTs

Semester Credits: 3 Weeks: 12

This doctoral-level course focuses on the fundamentals of developing human services programs from a marriage and family

therapy (MFT) systemic/relational perspective. You will review and analyze well-designed prevention, early intervention, and clinical treatment programs by providing case conceptualization and (treatment/program) planning using integrated, multiple systems perspectives. You will understand the different stages and implementations of evidence-based programs. Then, you will develop a program of your choice using a standard format for program proposals: problem statement, goals and objectives, methodology or program description, evaluation plan, and executive summary. Throughout, you will apply relational/systemic theory and concepts as appropriate to identify key contributions that MFTs can bring to the process of program development.

DMFT-7202 - Grant Writing Concepts and Approaches for MFTs

Semester Credits: 3 Weeks: 12

This doctoral-level course focuses on the fundamental concepts of and approaches to grant writing and responses to Requests for Proposals (RFPs). The purpose of this course is to prepare students to seek, identify, and respond to different types of funding opportunities. Special emphasis is placed on developing applications and responses using the systemic/relational conceptual framework of Marriage and Family Therapy as a template for developing prevention, early intervention, or full-scale/multidisciplinary programs. Particular focus will be devoted to using internet resources to access grantors' grant and program announcements, requests for proposals, strategic plans, and funding priorities. You will consider the ethical and political implications of various funding sources in pursuing funds.

DMFT-7501 - Foundations of Relational/Systemic Intervention

Semester Credits: 3 Weeks: 8

In this course, you will be prepared for success in the doctorate of marriage and family therapy program (DMFT) at the University. You are introduced to relevant academic communities, professional standards, and doctoral-level expectations while completing an applied doctoral degree in MFT. In addition to a review of the evolution of the MFT field, you will examine the system-based framework and the various environments in which relational/systemic interventions can be applied. Critical thinking, research appraisal, and the role of culture in systemic practice are emphasized. You will also explore potential topics for an applied doctoral project. Upon course completion, you will have a professional growth plan that will contribute to the achievement of your professional goals.

DMFT-7502 - Fundamentals of Scholarly Writing

Semester Credits: 3 Weeks: 12

This course focuses on the review of literature and scholarly writing in the field of Marriage and Family Therapy. The course emphasizes preparation for an applied doctoral project focused on issues at the local, community, or societal level. In this course, you will a) conduct effective literature searches; b) write comprehensive, critical, and synthesized reviews of the literature; c) explore and examine frameworks; d) explain ethical issues related to the topic; and e) address diverse, marginalized, and/or underserved populations in the literature and applied projects.

DMFT-7503 - Relational/Systemic Approaches to Research and Scholarship

Semester Credits: 3 Weeks: 12

This research methods course provides you with the skills needed to critique existing research and apply the findings to successfully complete an applied doctoral project. In this course you will explain the foundational aspects of MFT research and consider the elements involved in critiquing research relevant to different applied projects. You will also address ethical and diversity issues in relational/systemic research. You will apply this knowledge and these skills to develop an applied project outline.

DMFT-8702 - Practice/Organization Marketing

Semester Credits: 3 Weeks: 12

In this doctoral course, students are introduced to the fundamentals of marketing as applied to the MFT practice organization and

marketing. Topics such as strategizing, networking, advertising, public speaking, publishing and volunteering will be reviewed. Students will have an opportunity to develop essential marketing skills needed to thrive in agency work and/or private practice, including finding a niche, maximizing one's scope of practice, building one's brand, creating a consulting base and establishing a service contract. Students will also have an opportunity to develop a personalized marketing plan.

DMFT-8704 - Systems Consultation

Semester Credits: 3 Weeks: 12

This doctoral-level course invites students to look at an organization from a systems-based perspective, examining the patterns of interactions, current events, and managerial solutions, while keeping in mind foundational concepts of general systems theory (GST). Students will learn how to use their systemic training to consult with personnel from a variety of organizations including medical field, academia, corporations, justice system, faith-based organizations, military, sports organizations, and family businesses. Students will have an opportunity to design a proposal to offer systems consultation services.

DMFT-8705 - Systemic Leadership

Semester Credits: 3 Weeks: 12

What makes a person an effective leader? This doctoral level course will engage students in developing a better understanding of the leadership role, styles, philosophy, and behaviors. The students will also examine and apply the concepts of general systems theory (GST) and their application to the creation of a successful leadership style.

DMFT-8706 - The Business of Therapy

Semester Credits: 3 Weeks: 12

This doctoral-level course provides an exploration of the business aspects of marriage and family therapy for students in the DMFT program. The emphasis of the course is on providing a working knowledge of business development and management as it relates to private practice and family therapy businesses. The purpose of the course is to assist students in understanding the principles and processes needed to develop, manage, and grow a successful family therapy business.

DMFT-8715 - Creating and Sustaining Optimal Organizational Systems

Semester Credits: 3 Weeks: 8

Developing and maintaining healthy organizations requires effort and insight. In this course you will review resources necessary as a leader to create and sustain optimal organizational systems. You will explore theories, models, and approaches for organizational development and maintenance. As you do so, you will attend to relevant diversity, equity, and inclusion issues, as well as examine the ways systems theory informs such efforts.

DMFT-8716 - Managing and Addressing Conflict and Dysfunction within Organizations

Semester Credits: 3 Weeks: 8

Whenever individuals interact, conflict is inevitable. Whether that conflict is constructive or destructive is another matter. In this course you will examine leadership approaches for dealing with conflict and dysfunctional organizational systems. The centrality of power, hierarchy, and communication in organizational functioning will be considered. You will explore the bidirectional nature of conflict and dysfunction, as well as preventive and intervention strategies for addressing these challenges. You will also attend to the application of relational/systemic ethics within organizations. Emphasis will also be placed on culturally competent methods for addressing organization conflict and dysfunction.

DMFT-8717 - Project Management and Strategic Planning

Semester Credits: 3 Weeks: 8

Organizations cannot thrive unless they have a vision or plan for their future. Strategic planning is a key competency of effective

organizational leaders. In addition, part of organizational change involves successfully managing organizational projects—whether routine or facilitative of organizational change. The focus of this course is twofold. You will address the components and process of strategic planning. In addition, you will examine the fundamentals of project management. In both of these endeavors, you will identify the value of sensitivity to culture and diversity, as well as systemic dynamics.

DMFT-8951 - DMFT Doctoral Practicum

Semester Credits: 3 Weeks: 12

This course provides DMFT students with an opportunity to engage in ongoing advanced therapeutic practice. Emphasis is placed on the continued development of therapy and assessment skills, theoretical integration, and personal growth. Because all students must have at least a master's degree in marriage and family therapy or related discipline to register for this course, we assume all students are at least minimally competent as clinicians. The emphasis in the DMFT Practicum is on continued growth, and development in professional identity as a doctoral level therapist. Students with an LMFT license (or equivalent) are not required to have an on-site supervisor. All other students must have an on-site supervisor. All students will participate weekly in the online supervision group, and students who are not LMFTs will also meet at least weekly with their on-site supervisor. All students must be clinically active throughout Practicum, though there are no specific hours requirements. All students must document what they actually do. If students are using the DMFT Practicum to work toward full licensure as LMFTs, they must be sure that they are also meeting the appropriate State regulatory board requirements for Associate license (or equivalent) supervision.

DMFT-8972 - Systemic Organizational Leadership Practicum

Semester Credits: 3 Weeks: 12

In this course you will have an opportunity to demonstrate your relational/systemic competence. Emphasis is placed on demonstrating organizational and leadership skills with diverse populations, advanced application of relational/systemic models, ethical decision-making, cultural humility, organizational conceptualization, and professional growth. A goal of the course is for you to consolidate, develop and enhance your identity as a relational/systemic practitioner in organizational contexts. In this course you will engage in professional discussions, share examples of your organizational and leadership skills, navigate person of the leader issues, and explore the landscape of systemic organizational leadership. You must be professionally active during the course and participate in weekly consultation.

DMFT-8981 - Relational/Systemic Doctoral Internship I

Semester Credits: 1 Weeks: 12

During this course you will carry out your internship contract by engaging in activities for 20 hours per week to advance your clinical, research, scholarly, and/or professional skills. You will meet weekly with a local supervisor/mentor who was chosen for their fit with your proposed internship activities. Your internship activities should reflect your program specialization. Towards the end of the course, you will submit the agreed upon deliverables for the internship experience, demonstrating progress on your own goals, as well as your growth relative to the learning outcomes for the course.

DMFT-8982 - Relational/Systemic Doctoral Internship II

Semester Credits: 1 Weeks: 12

During this course you will carry out your internship contract by engaging in activities for 20 hours per week to advance your clinical, research, scholarly, and/or professional skills. You will meet weekly with a local supervisor/mentor who was chosen for their fit with your proposed internship activities. Your internship activities should reflect your program specialization. Towards the end of the course, you will submit the agreed upon deliverables for the internship experience, demonstrating progress on your own goals, as well as your growth relative to the learning outcomes for the course.

DMFT-8983 - Relational/Systemic Doctoral Internship III

Semester Credits: 1 Weeks: 12

During this course you will carry out your internship contract by engaging in activities for 20 hours per week to advance your clinical, research, scholarly, and/or professional skills. You will meet weekly with a local supervisor/mentor who was chosen for their fit with your proposed internship activities. Your internship activities should reflect your program specialization. Towards the end of the course, you will submit the agreed upon deliverables for the internship experience, demonstrating progress on your own goals, as well as your growth relative to the learning outcomes for the course.

Dissertation Completion Pathway

DCP-8001 - Scholarly Writing and Synthesis of Literature

Semester Credits: 3 Weeks: 12

This course builds upon previous doctoral coursework to assist you in creating a synthesized review of current, peer-reviewed literature focused on your eventual dissertation or applied doctoral project topic. You will develop effective literature search strategies. Techniques to synthesize and organize research literature will be addressed. You will practice scholarly writing skills reflecting a synthesis of divergent viewpoints and contrasting perspectives.

DCP-8002 - Designing Scholarly Research

Semester Credits: 3 Weeks: 12

Prerequisites: You will enroll in this course after successfully completing DCP-8001 - Scholarly Writing and Synthesis of Literature

In this course, you will develop a first draft of the evidence-based and aligned problem, gap, and purpose statements and align this with an appropriate methodology and design. At this stage, the aim is not to determine or approve your research proposal since this is ultimately a discussion between you and your chair. However, the work completed during 8002 could potentially serve as a starting point for writing your dissertation/applied doctoral project. This course is designed to continue to build upon prior doctoral-level research coursework and bridge you to the pre-dissertation prospectus.

DCP-8003 - Dissertation Intensive

Semester Credits: 2 Weeks: 6

This course allows maximum engagement and interaction between DCP faculty, support services staff, and cohort groups. You will develop a sense of urgency and strategies for being academically successful. The course allows you to find cohort members and allows faculty to teach strategies for success. You will learn to integrate work from other DCP bridge courses to help solidify your study design, methodology, and approach while formulating the information in the context of the available literature

*Note – Students should work with their Academic and Finance Advisor for scheduling the enrollment start date of the course to align and plan the travel requirements of the intensive session.

Doctoral Sequence

DIS-9901A - Components of the Dissertation

Semester Credits: 3 Weeks: 12

Students in this course will be required to complete Chapter 1 of their dissertation proposal including a review of literature with substantiating evidence of the problem, the research purpose and questions, the intended methodological design and approach, and the significance of the study. A completed, committee approved (against the minimum rubric standards) Chapter 1 is required to pass this course successfully. Students who do not receive approval of Chapter 1 to minimum standards will be able to take up to three supplementary 8-week courses to finalize and gain approval of Chapter 1.

DIS-9901B - Components of the Dissertation Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course are required to complete Chapter 1 of their dissertation proposal, which includes the research problem to be investigated, its background the study's purpose, and supporting evidence for the study's significance. A completed, committee-approved (against the minimum rubric standards) Chapter 1 is required before student may advance to DIS-9902A. Students who do not receive approval of Chapter 1 will take DIS-9901C to finalize and gain approval of Chapter 1.

DIS-9901C - Components of the Dissertation Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course are required to complete Chapter 1 of their dissertation proposal, which includes the research problem to be investigated, its background the study's purpose, and supporting evidence for the study's significance. A completed, committee-approved (against the minimum rubric standards) Chapter 1 is required before student may advance to DIS-9902A, Students who do not receive approval of Chapter 1 will take DIS-9901D to finalize and gain approval of Chapter 1.

DIS-9901D - Components of the Dissertation Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course are required to complete Chapter 1 of their Dissertation Proposal, which includes the research problem, background of the study, purpose of the study, and supporting evidence for the significance of the study. Your Committee must approve (against the minimum rubric standards) Chapter 1 before you may advance to DIS-9902A. Students who do not receive approval of Chapter 1 will be dismissed from the program.

DIS-9902A - The Dissertation Proposal

Semester Credits: 3 Weeks: 12

Students in this course will be required to work on completing Chapters 1-3 of their dissertation proposal and receive committee approval for the Dissertation Proposal (DP) in order to pass the class. Chapter 2 consists of the literature review. Chapter 3 covers the research methodology method and design and to includes population, sample, measurement instruments, data collection and analysis, limitations, and ethical considerations. In this course, a completed, committee-approved Chapters 2 and 3 are required and, by the end of the course, a final approved dissertation proposal (against the minimum rubric standards). Students who do not receive approval of the dissertation proposal will be able to take up to three supplementary 8-week courses to finalize and gain approval of these requirements.

DIS-9902B - The Dissertation Proposal Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to complete Chapters 1-3 of their dissertation proposal and receive committee approval for the Dissertation Proposal (DP). Chapter 2 consists of the literature review. Chapter 3 covers the research methodology to include population, sample, measurement instruments, data collection and analysis, limitations, and ethical considerations. In this course, a completed, committee approved Chapters 2 and 3 are required in addition to a completed, approved dissertation proposal (against the minimum rubric standards) before students may move to DIS-9903A. Students who do not receive approval of the dissertation proposal will be enrolled in DIS-9902C to finalize and gain approval of these requirements.

DIS-9902C - The Dissertation Proposal Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to complete Chapters 1-3 of their dissertation proposal and receive committee approval for the Dissertation Proposal (DP). Chapter 2 consists of the literature review. Chapter 3 covers the research

methodology to include population, sample, measurement instruments, data collection and analysis, limitations, and ethical considerations. In this course, a completed, committee approved Chapters 2 and 3 are required in addition to a completed, approved dissertation proposal (against the minimum rubric standards) before students may move to DIS-9903A. Students who do not receive approval of the dissertation proposal will be enrolled in DIS-9902D to finalize and gain approval of these requirements.

DIS-9902D - The Dissertation Proposal Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to complete Chapters 1-3 of their Dissertation Proposal and receive Committee approval for the Dissertation Proposal (DP). Chapter 2 consists of the literature review. Chapter 3 covers the research methodology to include population, sample, measurement instruments, data collection and analysis, limitations, and ethical considerations. In this course, a completed, Committee approved Chapters 2 and 3 are required, in addition to a completed and approved Dissertation Proposal (against the minimum rubric standards) before students may move to DIS-9903A. Students who do not receive approval of the Dissertation Proposal will be dismissed from the program.

DIS-9903A - Institutional Review Board (IRB) and Data Collection

Semester Credits: 3 Weeks: 12

Students in this course will be required to prepare, submit, and obtain approval of their IRB application, collect data, and submit a final study closure form to the IRB. Students still in data collection at the end of the 12-week course will be able to take up to three supplementary 8-week courses to complete data collection and file an IRB study closure form.

DIS-9903B - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to prepare, submit, and obtain approval of their IRB application, collect data, and submit a final study closure form to the IRB. They then will be enrolled in DIS-9904A. Students still in data collection at the end of this course will be enrolled in DIS-9903C to complete data collection and file an IRB study closure form.

DIS-9903C - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to prepare, submit, and obtain approval of their IRB application, collect data, and submit a final study closure form to the IRB. They then will be enrolled in DIS-9904A. Students still in data collection at the end of this course will be enrolled in DIS-9903D to complete data collection and file an IRB study closure form.

DIS-9903D - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will be required to prepare, submit, and obtain approval of their IRB application, collect data, and submit a final study closure form to the IRB. They then will be enrolled in DIS-9904A. Students still in data collection at the end of this course will be removed from the program.

DIS-9904A - The Dissertation Manuscript and Defense

Semester Credits: 3 Weeks: 12

In this dissertation course students work on completing Chapters 4 and 5 and the final Dissertation Manuscript. Specifically, students will complete their data analysis, prepare their study results, and present their findings in an Oral Defense and a completed manuscript. A completed, Committee approved (against the minimum rubric standards) Dissertation Manuscript and successful Oral Defense are required to complete the course and graduate. Students who do not receive approval for either or

both their Dissertation Manuscript or defense can take up to three supplementary 8-week courses to finalize and gain approval of either or both items as needed.

DIS-9904B - The Dissertation Manuscript and Defense Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will work on completing Chapters 4 and 5 and the final Dissertation Manuscript. Specifically, students will complete their data analysis, prepare their study results, and present their findings in an oral defense and a completed manuscript. A completed, committee approved (against the minimum rubric standards) Dissertation Manuscript and Defense are required to complete the course and graduate. Students who do not receive approval for either or both their Dissertation Manuscript or defense will be enrolled in DIS-9904C to finalize and gain approval of either or both items as needed.

DIS-9904C - The Dissertation Manuscript and Defense Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will work on completing Chapters 4 and 5 and the final Dissertation Manuscript. Specifically, students will complete their data analysis, prepare their study results, and present their findings in an oral defense and a completed manuscript. A completed, committee approved (against the minimum rubric standards) Dissertation Manuscript and Defense are required to complete the course and graduate. Students who do not receive approval for either their Dissertation Manuscript or defense will be enrolled into DIS-9904D to finalize and gain approval of either or both items as needed.

DIS-9904D - The Dissertation Manuscript and Defense Supplemental

Semester Credits: 3 Weeks: 8

Students enrolled in this course will work on completing Chapters 4 and 5 and the final Dissertation Manuscript. Specifically, students will complete their data analysis, prepare their study results, and present their findings in an oral defense and a completed manuscript. A completed, committee approved (against the minimum rubric standards) Dissertation Manuscript and Defense are required to complete the course and graduate. Students who do not receive approval for either their Dissertation Manuscript or defense will be removed from the program.

DIS-9911A - Applied Doctoral Introduction

Semester Credits: 3 Weeks: 12

In this 12-week course, you will complete all relevant subsections of Section 1: Foundation. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. Section 1 must be completed and approved by your committee in order to pass the course and move forward. If you do not receive committee approval of Section 1, you will be able to take up to three supplemental 8-week courses to finalize and gain approval of Section 1.

DIS-9911B - Applied Doctoral Introduction Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to complete all relevant subsections of Section 1: Foundation. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. Section 1 must be completed and approved by your committee in order to pass the course and move forward. If you do not receive committee approval of Section 1, you will be enrolled in DIS-9911C to finalize and gain approval of Section 1.

DIS-9911C - Applied Doctoral Introduction Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to complete all relevant subsections of Section 1: Foundation. You will use your

school-specific template and guidance from your chair to determine which subsections apply to your individual work. Section 1 must be completed and approved by your committee in order to pass the course and move forward. If you do not receive committee approval of Section 1, you will be enrolled in DIS-9911D to finalize and gain approval of Section 1.

DIS-9911D - Applied Doctoral Introduction Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to complete all relevant subsections of Section 1: Foundation. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. Section 1 must be completed and approved by your committee in order to pass the course and move forward. If you do not receive committee approval of Section 1, you will be dismissed from the program.

DIS-9912A - Applied Doctoral Proposal

Semester Credits: 3 Weeks: 12

In this 12-week course, you will compose all relevant subsections of Section 2: Methodology and Design and complete your proposal. Both of these components must be approved by your committee in order to pass the course and move forward. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. If you do not receive approval of Section 2 and the complete proposal, you will be able to take up to three 8-week supplementary courses to finalize and gain approval of Section 2 and your completed proposal.

DIS-9912B - Applied Doctoral Proposal Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to compose all relevant subsections of Section 2: Methodology and Design and complete your proposal. Both of these components must be approved by your committee in order to pass the course and move forward. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. If you do not receive approval of Section 2 and the complete proposal, you will be enrolled in DIS-9912C to finalize and gain approval of Section 2 and your completed proposal.

DIS-9912C - Applied Doctoral Proposal Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to compose all relevant subsections of Section 2: Methodology and Design and complete your proposal. Both of these components must be approved by your committee in order to pass the course and move forward. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. If you do not receive approval of Section 2 and the complete proposal, you will be enrolled in DIS-9912D to finalize and gain approval of Section 2 and your completed proposal.

DIS-9912D - Applied Doctoral Proposal Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to compose all relevant subsections of Section 2: Methodology and Design and complete your proposal. Both of these components must be approved by your committee in order to pass the course and move forward. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. If you do not receive approval of Section 2 and the complete proposal, you will be dismissed from the program.

DIS-9913A - Institutional Review Board (IRB) and Data Collection

Semester Credits: 3 Weeks: 12

In this course, you will prepare, submit, and obtain a determination from the Institutional Review Board (IRB) application before

collecting data and, if applicable, executing your project modeling. You will also submit documentation that you have closed data collection. If you are still collecting data or modeling your project at the end of this 12-week course, you will be able to take up to three supplemental 8-week courses to complete the required components.

DIS-9913B - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to prepare, submit, and obtain a determination from the Institutional Review Board (IRB) before collecting data and, if applicable, executing your project modeling. You will also submit documentation that you have closed data collection. If you are still collecting data or modeling your project at the end of this 8-week course, you will be enrolled in DIS-9913C to finalize and gain approval of the required components.

DIS-9913C - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to prepare, submit, and obtain a determination from the Institutional Review Board (IRB) before collecting data and, if applicable, executing your project modeling. You will also submit documentation that you have closed data collection. If you are still collecting data or modeling your project at the end of this 8-week course, you will be enrolled in DIS-9913D to finalize and gain approval of the required components.

DIS-9913D - Institutional Review Board (IRB) and Data Collection Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to prepare, submit, and obtain a determination from the Institutional Review Board (IRB) before collecting data and, if applicable, executing your project modeling. You will also submit documentation that you have closed data collection. If you are still collecting data or modeling your project at the end of this 8-week course, you will be dismissed from the program.

DIS-9914A - Applied Doctoral Manuscript

Semester Credits: 3 Weeks: 12

In this 12-week course, you will complete all relevant subsections of Section 3: Findings, Implications, and Recommendations, finalize your manuscript, and disseminate your findings. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. The final manuscript, which includes Section 3 and the dissemination of findings, must be approved by your committee in order to pass the course and be eligible to graduate. If you do not receive committee approval of all components, you will be able to take up to three supplemental 8-week courses to finalize these requirements and be eligible to graduate.

DIS-9914B - Applied Doctoral Manuscript Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to complete all relevant subsections of Section 3: Findings, Implications, and Recommendations, finalize your manuscript, and disseminate your findings. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. The final manuscript, which includes Section 3 and the dissemination of findings, must be approved by your committee in order to pass the course and be eligible to graduate. If you do not receive committee approval of all components, you will be enrolled in DIS-9914C to finalize these requirements and be eligible to graduate.

DIS-9914C - Applied Doctoral Manuscript Supplemental

Semester Credits: 3 Weeks: 8

This course provides additional time for you to complete all relevant subsections of Section 3: Findings, Implications, and Recommendations, finalize your manuscript, and disseminate your findings. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. The final manuscript, which includes Section 3 and the dissemination of findings, must be approved by your committee in order to pass the course and be eligible to graduate. If you do not receive committee approval of all components, you will be enrolled in DIS-9914D to finalize these requirements and be eligible to graduate.

DIS-9914D - Applied Doctoral Manuscript Supplemental**Semester Credits: 3 Weeks: 8**

This course provides additional time for you to complete all relevant subsections of Section 3: Findings, Implications, and Recommendations, finalize your manuscript, and disseminate your findings. You will use your school-specific template and guidance from your chair to determine which subsections apply to your individual work. The final manuscript, which includes Section 3 and the dissemination of findings, must be approved by your committee in order to pass the course and be eligible to graduate. If you do not receive committee approval of all components, you will be dismissed from the program.

Doctoral Sequence – Business**CMP-9601B - Pre-Candidacy Prospectus****Semester Credits: 3 Weeks: 8**

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

CMP-9701B - Pre-Candidacy Prospectus**Semester Credits: 3 Weeks: 8**

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

CMP-9701HR - Pre-Candidacy Prospectus**Semester Credits: 3 Weeks: 8**

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

CMP-9701L - Pre-Candidacy Prospectus**Semester Credits: 3 Weeks: 8**

The Pre-Candidacy Prospectus is intended to ensure you have mastered knowledge of your discipline prior to candidacy status

and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. You will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

Doctoral Sequence – Education

CMP-9601E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The doctoral comprehensive assessment is your opportunity to demonstrate your preparation for entering the dissertation phase as a doctoral candidate. You will synthesize discipline-specific content with research designs and methods as you create a prospectus for a problem of applied practice within an educational context. This prospectus will likely become the foundation of your dissertation. Note that you will take this course only after all foundation, specialization, and research courses have been completed.

CMP-9602E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The doctoral comprehensive assessment is your opportunity to demonstrate your preparation for entering the dissertation phase as a doctoral candidate. You will synthesize discipline-specific content with research designs and methods as you create a prospectus for a problem of applied practice within an educational context. This prospectus will likely become the foundation of your dissertation. Note that you will take this course only after all foundation, specialization, and research courses have been completed.

CMP-9603E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The doctoral comprehensive assessment is your opportunity to demonstrate your preparation for entering the dissertation phase as a doctoral candidate. You will synthesize discipline-specific content with research designs and methods as you create a prospectus for a problem of applied practice within an educational context. This prospectus will likely become the foundation of your dissertation. Note that you will take this course only after all foundation, specialization, and research courses have been completed.

CMP-9701E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

Prerequisites: Completed all foundational, research, and specialization courses as required by program.

The doctoral comprehensive assessment is intended to give you the opportunity to demonstrate that you have mastered knowledge of your discipline and have the ability to design empirical research as an investigator before moving on to the dissertation research course work and earning candidacy status. You will demonstrate the ability to synthesize empirical, peer-reviewed research in support of all assignments in this course. You will take this course only after all foundation, specialization, and research courses have been completed.

CMP-9702E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

Prerequisites: Completed all foundational, research, and specialization courses as required by program.

The doctoral comprehensive assessment is your opportunity to demonstrate your preparation for entering the dissertation phase as a doctoral candidate. Throughout this course, you will synthesize discipline-specific content with scholarly literature as you create a prospectus for a theoretically based research study focused on furthering knowledge in the field of education. Ph.D. research has a focus on contribution to theory, whereas EdD research focuses on addressing a researchable problem that has practical applications. The two are similar in that they both apply the scientific method to collect data, analyze data, and present results. However, the results are given greater emphasis in terms of theory for the Ph.D. In the Ph.D. degree, you will therefore conduct research that contributes to the broader discipline rather than a specific problem rooted in an applied, professional practice. This prospectus will likely become the foundation of your Ph.D. dissertation. Note that you will take this course only after all foundation, specialization, and research courses have been completed.

CMP-9703E - Doctoral Comprehensive Assessment: Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

Prerequisites: Completed all foundational, research, and specialization courses as required by program.

The doctoral comprehensive assessment is your opportunity to demonstrate your preparation for entering the dissertation phase as a doctoral candidate. Throughout this course, you will synthesize discipline-specific content with scholarly literature as you create a prospectus for a theoretically based research study focused on furthering knowledge in the field of education. Ph.D. research has a focus on contribution to theory, whereas EdD research focuses on addressing a researchable problem that has practical applications. However, the results are given greater emphasis in terms of theory for the Ph.D. In the Ph.D. degree, you will therefore conduct research that contributes to the broader discipline rather than a specific problem rooted in an applied, professional practice. This prospectus will likely become the foundation of your Ph.D. dissertation. Note that you will take this course only after all foundation, specialization, and research courses have been completed.

Doctoral Sequence - Health Administration

CMP-9701HA - DHA Pre- Candidacy Prospectus

Semester Credits: 3 Weeks: 8

In this course, you will begin to assimilate the knowledge and skills gained throughout your program as you formulate your applied health administration/healthcare management dissertation project. Your faculty mentor for this course will also be your applied dissertation committee chair. Working in close collaboration with your Chair, you will develop the pre-candidacy DHA prospectus. The prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design an applied dissertation project as an investigator before moving on to the dissertation coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. A minimum B-grade is required to move to your Applied Doctoral Experience courses.

Doctoral Sequence – Marriage and Family Sciences

CMP-9611M - DMFT Portfolio I

Semester Credits: 1 Weeks: 4

The purpose of this course is for you to document, in the beginning stage of your doctoral program, your academic, scholarly, clinical, and professional knowledge and skills. In this course, you will identify goals you will work to accomplish during the program as well as examine your personal and professional identity as a relational/systemic practitioner. You will refine your professional development plans and provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the doctoral project courses and may only be retaken once.

CMP-9612M - DMFT Portfolio II

Semester Credits: 1 Weeks: 4

The purpose of this course is for you to document, in the middle of your doctoral program, your academic, scholarly, clinical, and professional knowledge and skills. In this course, you will identify goals you will work to accomplish during the program as well as examine your personal and professional identity as a relational/systemic practitioner. You will refine your professional development plans and provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the doctoral project courses and may only be retaken once.

CMP-9613M - DMFT Portfolio III**Semester Credits: 1 Weeks: 4**

The purpose of this course is for you to document, near the end of your doctoral program, your academic, scholarly, clinical, and professional knowledge and skills. In this course, you will identify goals you will work to accomplish during the program as well as examine your personal and professional identity as a relational/systemic practitioner. You will refine your professional development plans and provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the doctoral project courses and may only be retaken once.

CMP-9701M - Doctoral Portfolio I**Semester Credits: 1 Weeks: 4**

The purpose of this course is for you to document, in the beginning stage of your doctoral program, your academic, research, clinical, and professional knowledge and skills. In this course you will identify goals you will work to accomplish during the program, as well as provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the dissertation courses and may only be retaken once.

CMP-9702M - Doctoral Portfolio II**Semester Credits: 1 Weeks: 4**

The purpose of this course is for you to document, in the mid-point of your doctoral program, your academic, research, clinical, and professional knowledge and skills. In this course you will update your progress on the goals you are striving to accomplish during the program, as well as provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the dissertation courses and may only be retaken once.

CMP-9703M - Doctoral Portfolio III**Semester Credits: 1 Weeks: 4**

The purpose of this course is for you to document, in the final stage of your doctoral program, your academic, research, clinical, and professional knowledge and skills. In this course you will update your progress on the goals you are striving to accomplish during the program, as well as provide artifacts indicating you have acquired competencies in several key domains. This course must be successfully completed with at least a B grade prior to beginning the dissertation courses and may only be retaken once.

Doctoral Sequence – Psychology**CMP-9701P - Pre-Candidacy Prospectus****Semester Credits: 3 Weeks: 8**

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

Doctoral Sequence - Public Service

CMP-9601CJ - Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The Pre-Candidacy Prospectus is intended to ensure you have mastered knowledge of your discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. You will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

CMP-9601PA - Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer-reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

Doctoral Sequence - Technology

CMP-9701CS - PhD Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

CMP-9701CY - PhD Cybersecurity Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

Prerequisites: Completion of courses in core sequence.

The Pre-Candidacy Prospectus course is intended to ensure students have mastered knowledge of their discipline within cybersecurity prior to doctoral candidacy status and are able to demonstrate the ability to design empirical research as an investigator before moving on to the dissertation research coursework. During this course, you will demonstrate the ability to synthesize empirical, peer-reviewed research to prepare for the dissertation sequence of courses. This course should be completed only after the completion of all foundation, specialization, and research courses.

CMP-9701DS - PhD Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to doctoral candidacy status and are able to demonstrate the ability to design empirical research as an investigator before moving on to the dissertation research coursework. During this course, you will demonstrate the ability to synthesize empirical, peer reviewed research to prepare for the dissertation sequence of courses. This course should be completed only after the completion of all foundation, specialization, and research courses.

CMP-9701T - Pre-Candidacy Prospectus

Semester Credits: 3 Weeks: 8

The Pre-Candidacy Prospectus is intended to ensure students have mastered knowledge of their discipline prior to candidacy status and demonstrated the ability to design empirical research as an investigator before moving on to the dissertation research coursework. Students will demonstrate the ability to synthesize empirical, peer reviewed research to support all assignments in this course. The Pre-Candidacy Prospectus is completed only after all foundation, specialization, and research courses have been completed.

Early Childhood Education

ECE-5002 - Growth and Development of Young Children

Semester Credits: 3 Weeks: 8

Students will explore theories and research related to early childhood development. Specifically, the intellectual, social, emotional, and physical growth and development of infants, toddlers, and young children will be examined. Implications center on the construction of developmentally appropriate early childhood education instructional programs. Multicultural and anti-bias issues in early childhood settings are also introduced. Students will better understand culturally relevant methods for working with children and their families.

ECE-5003 - Administration of Early Childhood Programs

Semester Credits: 3 Weeks: 8

In this course, students will focus on the administrative development and implementation of early childhood programs for a variety of age groups and purposes. Curriculum development, materials, teaching strategies, evaluation, budgets, hiring procedures, and state guidelines/regulations are also addressed. Skills are gained through practical application of these topics.

ECE-5005 - Children and Families in a Diverse Society

Semester Credits: 3 Weeks: 8

In this course, you will analyze strategies for engaging and communicating with diverse families, guardians, and caregivers of the young child. You will also investigate the development of identity in early childhood and explore culturally responsive, anti-bias attitudes and beliefs in early childhood settings.

ECE-5007 - Children's Literature

Semester Credits: 3 Weeks: 8

In this course, you will examine effective strategies for using literature to support emerging literacy skills. You will consider a variety of criteria for selecting high-quality literature in all genres for infants, toddlers, preschoolers, and primary age children. You will also explore how families and communities support literacy acquisition. Upon completion of this course, you will have a comprehensive understanding of high-quality children's literature and its use as a teaching tool for literacy development in educational settings from infancy to age 8.

ECE-5009 - Early Childhood Education Capstone

Semester Credits: 3 Weeks: 8

This capstone course represents the culmination of your work in the early childhood specialization. In this course, you will reinforce what you have learned about relevant theories, contexts, leadership, and national standards for early childhood education. You will then demonstrate your learning through the creation of an early childhood education program. Throughout

the course, you will consider relationships with all stakeholders, including the children, caregivers, communities, and professional colleagues

ECE-5010 - Foundations of Early Childhood Education

Semester Credits: 3 Weeks: 8

In this foundational course, you will explore early childhood education from multiple perspectives. These roles will include the role of the contemporary early childhood educator and social, economic, and political factors influencing the field, particularly diversity, equity, and inclusion. You will examine theories, research, and internationally recognized standards of quality in early childhood education. You will emerge from the course equipped with a useful overview with which to pursue the remaining courses in the specialization.

ECE-7002 - Topics in Early Childhood Growth, Development, and Educational Programs

Semester Credits: 3 Weeks: 8

In ECE-7002, students will explore theory and research related to the education of young children including societal changes and their influence on early childhood programs, the growth and the typical and atypical development of young children, and methods of studying children's behavior. Emphasis will be placed on the intellectual, social, emotional, and physical development of infants, toddlers, and young children and the impact of these factors on the development and management of quality early childhood education instructional programs.

ECE-7005 - Early Childhood Curriculum and Assessment

Semester Credits: 3 Weeks: 8

In this course, students explore the theory, research, and trends related to the curriculum and assessment of young children enrolled in early childhood education programs. Developmentally appropriate early childhood lesson plans and activities will be explored and analyzed. Standardized and classroom assessments will be researched and evaluated.

ECE-7007 - Early Childhood Literacy and Literature

Semester Credits: 3 Weeks: 8

In this course, students will discuss literacy development in early childhood education. Balanced literacy instruction including a comprehensive set of strategies designed to meet individual needs will be explored. Methods for developing reading and writing skills that are developmentally appropriate will also be investigated. Emphasis will be placed on writing, spelling, and literacy development; motivating reading and writing; language and vocabulary development; the importance of family literacy partnerships; and analyzing, selecting, and responding to children's literature.

ECE-7009 - Families, Communities, and Schools as Partners in Early Childhood Education

Semester Credits: 3 Weeks: 8

In this course, students will focus on the development of partnerships between early childhood educators, families, and communities. Encouraging involvement and communicating with families and communities in early childhood education programs will be researched and analyzed. Topics include child abuse, child advocacy, formulating effective strategies for working with families of special needs children, and societal trends and issues specific to diversity.

ECE-7010 - Principles of Early Childhood Education

Semester Credits: 3 Weeks: 8

This course presents an overview of early childhood education, which includes children from Pre-K through Grade Three. You will explore the basic tenets, theories, and standards relevant to the field, particularly developmentally appropriate practices and principles of diversity, equity, and inclusion. The important role of parents, caregivers, and communities is also discussed. This

course should be the first in the course sequence If you are pursuing a specialization or post-master's certificate in early childhood education.

ECE-7030 - Topics in Early Childhood Program Administration

Semester Credits: 3 Weeks: 8

The focus of this course is the administration of early childhood programs. You will examine program models, relevant theories, state expectations, educator competencies, and the role of leadership in developing and implementing early childhood programs. You will pay particular attention to diversity, equity, and inclusion in program administration. Finally, you will demonstrate your ability to formulate administrative plans that synthesize your learning.

Education

ED-5001 - Contemporary Issues in Education

Semester Credits: 3 Weeks: 8

In this Master's level course, students will examine the major contemporary issues impacting education. Students evaluate the issues, attempt solutions, and develop personal and professional positions. In a broader context, the education profession is affected by numerous and diverse issues that are highly political, emotional, and complex. It is imperative that students understand the issues, the effects the issues have on the profession, and can formulate a personal response to the issues.

ED-5008 - Teaching Diverse Students

Semester Credits: 3 Weeks: 8

This course addresses the meaning and importance of diversity within the school environment, with an emphasis on adapting instruction to meet the unique needs of diverse students. Additional supporting topics include understanding issues related to multicultural education as well as the roles of teachers, school administrators, parents, and the broader community in cultivating a positive school culture and reducing achievement gaps.

ED-5012 - Leadership in Educational Organizations

Semester Credits: 3 Weeks: 8

This course is about effective leadership in educational organizations. The course is particularly relevant for practicing school administrators, those who desire to become administrators, and classroom teachers who recognize the importance of leadership in positively impacting schooling across the United States. As you consider your own leadership theories and philosophies, you will explore the influence of national standards and local school culture, climate, and performance.

ED-5013 - School Finance

Semester Credits: 3 Weeks: 8

In this course, students will develop practical experience with the major concepts and tools in school finance. The course will cover the three distinct components of education finance: (1) evaluating revenue sources, including school aid; (2) developing and defending budgets; and (3) managing the finances and business operations of a school district. The objective is to provide students with an understanding of the general principles of education finance that can be applied in any setting.

ED-5015 - School Safety

Semester Credits: 3 Weeks: 8

In this course, students will be introduced to a set of standards that educators can use to evaluate their school's safety plan and procedures. The course also addresses several theoretical perspectives through which students can come to understand school safety. Topics include: positive cultures and climates, emergency/crisis management plans, bullying, safety partnerships, and strategic safety planning.

ED-5016 - Instructional Supervision and Leadership**Semester Credits: 3 Weeks: 8**

The purpose of this course is to examine the theoretical framework and practical applications of instructional leadership within the economic, social, political, and educational context of schooling. This course proposes a concept of supervision and leadership designed to help educational leaders build a repertoire of approaches and strategies that will enhance professional growth while showing the importance of sensitivity to individual needs. Emphasis is placed upon you gaining a clear understanding of the interrelatedness among supervision and leadership, instruction, and assessment.

ED-5022 - Educational Policies and Practices**Semester Credits: 3 Weeks: 8**

In this Master's level course, students will focus on research and theory in developing effective schools. Topics include aligning contemporary educational practice with Interstate School Leaders Licensure Consortium Standards, collaboration, communication, decision-making, and conflict management. Students explore current educational trends in policy and practice to promote the establishment of effective educational climates for teaching and learning.

ED-5023 - Multicultural Relationships in Educational Organizations**Semester Credits: 3 Weeks: 8**

The effects of cultural diversity on organizational behavior in an educational environment are complex and powerful. In this course, you will explore multicultural relationships from multiple perspectives within educational organizations. These perspectives include historical and legal events, characteristics of culture, and the role of culture in learning. You will also examine diversity, equity, and inclusion as interconnected aspects of multicultural education.

ED-5029 - Measurement and Assessment in Education**Semester Credits: 3 Weeks: 8**

In this course, students will acquire the fundamental concepts, principles, and techniques of educational measurement and classroom assessment. Students acquire competence in the planning and development of informal classroom assessments and the evaluation of standardized tests. Topics include: criterion-referenced tests, norm-referenced tests, informal observations, portfolios, and alternative means of assessment.

ED-5031 - Policy and Politics in the Administration of Education**Semester Credits: 3 Weeks: 8**

Students enrolled in this course will explore the latest in research in the politics and policies in education. Special emphasis is placed on governance, curriculum and standards, accountability, community relations, finance, and school choice. Students will address topics in this class such as how to interact with business leaders, local institutions of higher education, boards of education and community leaders, parents, and other stakeholders. Internal and external issues such as relationships with colleagues and team members will also be explored.

ED-5034 - School Community Relations

Semester Credits: 3 Weeks: 8

In this course, students will be introduced to essential competencies and considerations needed to build and sustain positive, productive relationships with members of school communities and the external communities in which schools reside. Emphasis is placed on the development of effective communication policies and practices to assist educational leaders as they strive to instill public confidence in community schools, improve school quality, and improve student learning.

ED-5036 - Innovation and Change**Semester Credits: 3 Weeks: 8**

In this course, students will explore various change theories, and best practices for successful implementation in the workplace. Issues of visioning, coalition building, creating and promoting change agenda, and building capacity for change are also examined. Opportunity to investigate one's personal reaction and response to change is highlighted.

ED-5038 - The Art and Science of Adult Education**Semester Credits: 3 Weeks: 8**

In this course, students will gain a knowledge base organized around four domains: professional attitudes; historical, social, and philosophical context; adult learning and development; and, organization and administration of adult programs. Topics include: adult learning theory, training and development, motivation, and learning modalities.

ED-5040 - Leadership for Learning Communities**Semester Credits: 3 Weeks: 8**

In this course, students will explore current and future leadership strategies and current trends and issues. Students will also analyze their own and others' paradigms and leadership styles, and determine best practices to promote positive social change. Topics include: change theory, change agents, and leadership in learning organizations.

ED-5041 - Adult Learning Strategies to Improve Organizational Efficacy**Semester Credits: 3 Weeks: 8**

In this course, students will gain a knowledge base of professional strategies to use in the organization and administration of adult learning experiences. Students will identify the differences between traditional and adult learners and evaluate factors that facilitate adult learning. In addition, students will understand how strategies applied based on adult learning theory ultimately improve organizational effectiveness.

ED-5042 - Intercultural Communication**Semester Credits: 3 Weeks: 8**

In this course, students will examine communication theory, cultural history, cultural identity, worldviews, and values. Topics include intercultural communication, stereotypes, nonverbal communication, workplace communication, cultural structure, and diversity.

ED-5044 - Technology and a Vision for the Future**Semester Credits: 3 Weeks: 8**

In this course, you will explore the application of both existing and emerging technologies to the learning needs of educational organizations. As you grow as a leader, you will need to plan for technology integration through the evaluation, selection, funding, and adoption of specific hardware and software that meet your organization's needs. This course will help you to tackle these challenges and more.

ED-5045 - Technology and a Vision for the Future - MEd

Semester Credits: 3 Weeks: 8

In this course, you will explore the application of both existing and emerging technologies to the learning needs of educational organizations. As you grow as a leader, you will need to plan for technology integration through the evaluation, selection, funding, and adoption of specific hardware and software that meet your organization's needs. This course will help you to tackle these challenges and more.

ED-5100 - Scholarly Writing and Using Research

Semester Credits: 3 Weeks: 8

Two key measures of proficiency for any professional are information literacy and written communication. You will focus on these competencies in this course, which blends your need to identify and use credible research with your development as a scholarly writer. With applied activities in areas of interest to you, this course will establish the foundation of your success in the remainder of your graduate work.

ED-5204 - Ethics in Sport

Semester Credits: 3 Weeks: 8

Sport is big business, from elite professional leagues to big-time college athletics - and even down at the smaller local level. Sport plays a major role in American society, even for individuals who are not sport enthusiasts. In this course, you will explore ethics and morality in the context of sport. You will consider the moral and ethical challenges that exist across the field of sport as well as the value of professional codes of conduct in promoting ethical and moral practice. You will also be prepared to respond to ethical and moral issues in recent and future events.

ED-6500 - MEd Capstone

Semester Credits: 3 Weeks: 8

This course represents the culmination of your master's degree. In this course, you will synthesize the knowledge, skills, and attitudes developed throughout your program into a proposal that addresses an identified need in an organization related to your specialization. Within your selected organization, you will identify, examine, and justify a specific need or problem. Using your recently developed competencies, you will propose a practical, comprehensive solution to mitigate the need or problem.

ED-6600 - MEd-EdL Capstone

Semester Credits: 3 Weeks: 8

This course represents the culmination of your master's degree. In this course, you will synthesize the knowledge, skills, and attitudes developed throughout your program into a proposal that addresses an identified need in an organization related to your specialization. Within your selected organization, you will identify, examine, and justify a specific need or problem. Using your recently developed competencies, you will propose a practical, comprehensive solution to mitigate the need or problem.

ED-7005 - Language Arts and Reading

Semester Credits: 3 Weeks: 8

In this course, students are introduced to research-based instruction that effectively prepares each candidate to deliver a balanced, comprehensive program of instruction in reading, writing, and related language arts. A balanced approach to reading/language arts instruction includes explicit instruction in basic reading skills and comprehension strategies for all students, including students with varied reading levels and language backgrounds.

ED-7015 - Safety Issues for Educators

Semester Credits: 3 Weeks: 8

The content of this doctoral level course provides educators with the skills and information to analyze safety data, plan for both school safety interventions and procedures and to manage crises in an educational setting. Topics include: school safety, crisis management, intervention plans and community safety partnerships.

ED-7017 - Systems Dynamics**Semester Credits: 3 Weeks: 8**

In Systems Dynamics, doctoral students will explore the knowledge, skills, values and attitudes needed to manage public service organizations strategically. Using a systems theory perspective, students will examine organizational structures and processes for organizational change. In this course, students will be prepared to be current and future managers of public educational organizations in leadership roles.

ED-7053 - Education Specialist Capstone Project**Semester Credits: 3 Weeks: 8**

This course is the culmination of the Education Specialist (EdS) program. You will conclude your program by working with a specific educational problem relevant to your current or future context. You will review the related literature and evaluate data that will help you to develop potential solutions and future areas of research related to your identified problem. Finally, you will reflect on your personal learning journey throughout your program.

ED-7055 - Capstone Project in EdS-EdL**Semester Credits: 3 Weeks: 8**

This course is the culmination of the Education Specialist-EdL (EdS-EdL) program. You will conclude your program by working with a specific educational problem relevant to your current or future context. You will review the related literature and evaluate data that will help you to develop potential solutions and future areas of research related to your identified problem. Finally, you will reflect on your personal learning journey throughout your program.

Education Foundation**EDU-5000 - Foundations for Graduate Study in Education****Semester Credits: 3 Weeks: 8**

The foundational course is designed to give you an introduction to the field of education with particular emphasis on information literacy and graduate-level skills such as self-reflection, time-management, academic integrity, effective use of the University Library, comprehensive understanding of complex scholarly texts, and critical writing. You will complete the course with a roadmap to navigate your way to the completion of your educational aspirations through research.

EDU-8050 - Foundations of Advanced Graduate Study and Research**Semester Credits: 3 Weeks: 8**

This foundational course will introduce you to the concepts and practices of advanced graduate study. You will examine concepts and expectations of advanced graduate study and academic integrity as well as investigate best practices of scholarship and research. You will explore university resources and supports associated with student success, including technologies for learning and research. You will also evaluate the program process and requirements for success. Finally, you will advocate for self-care and reflection during your studies.

EDU-8060 - Foundations of Academic Writing, Conceptual & Theoretical Frameworks

Semester Credits: 3 Weeks: 8

Academic writing is at the heart of scholarly writing. How you explore and navigate your topic of interest is both a personal and professional matter. In this course, you will integrate effective research and writing skills, and evaluate standards of academic writing, honesty, and integrity. Literature and writing are closely related, so this course also offers you a first chance to examine the elements of conceptual and theoretical frameworks and critique the role of supporting literature and inquiry with conceptual and theoretical frameworks. Finally, you will synthesize the frameworks commonly used in educational research.

Education Leadership

EDL-5004 - School Law

Semester Credits: 3 Weeks: 8

Students in educational leadership roles need a working knowledge of school law, especially as it pertains to the rights of students and teachers. Concepts addressed in this course focus on a history of the legal system and the federal government's role in setting public school policy. Topics include student rights regarding free speech, search and seizure, due process, and discipline. Policies regarding teacher certification, academic freedom, due process rights, anti-discrimination, and employment considerations will also be addressed. The course "School Law" is critical to understanding the basic structure and guidance that governs school boards, schools, administrators, teachers, and students.

EDL-5013 - School Finance

Semester Credits: 3 Weeks: 8

In this course, you will examine school finance at multiple levels, including individual schools, local education authorities, states, and federal agencies. You will examine sources of school funding, fiscal control, and accountability at the local, state, and federal levels. You will also consider how school budgets reflect stakeholder priorities and principles of equity and inclusion. The implications of school choice and other factors are considered, as well.

EDL-5033 - School Based Leadership

Semester Credits: 3 Weeks: 8

In this course, students are provided the leadership concepts and skills needed to be dynamic, innovative, and adaptive school leaders. Activities include: developing a culture that promotes student-centered schools, sharing the responsibility of leadership, creating authentic learning communities, and exploring leadership from a shared - school based leadership perspective.

EDL-5035 - Supervision of Curriculum

Semester Credits: 3 Weeks: 8

This course provides students with the skills and knowledge required to design and manage curricula resources and delivery to ensure congruence among the written, taught, and tested curricula. The course also provides students with the skills and knowledge required to examine, review, evaluate, and select consistent and equitable instructional programs, materials, and products that support student achievement and institutional goals.

EDL-7040 - Leadership in Instructional Technology

Semester Credits: 3 Weeks: 8

In this course, students will explore a leadership role involving the integration of technology within instructional practices by teachers. As the use of technology by students continues to advance and has often become a preferred method for their interaction and learning, educational leaders need to ensure teachers are effectively integrating technological advances as

facilitators for student achievement. Topics will involve understanding technology integration trends, supporting teachers to effectively integrate technology within their instructional practices, developing technology integration evaluation criteria, and supporting parents with technology integration for student learning at home.

EDL-9000 - Educational Leadership Theories

Semester Credits: 3 Weeks: 8

In this foundational course, you will examine major theories and practices of organizational development and improvement in educational settings. You will also critique educational leadership competencies related to ethical behavior in educational organizations and synthesize various leadership theories using an educational approach to leadership. Finally, you will utilize educational leadership theories as they apply to real-world leadership situations in education and explore self-evaluation and personal reflection techniques supportive of leadership improvement within educational organizations.

EDL-9100 - Leadership for Diversity, Equity, Inclusion, and Social Justice

Semester Credits: 3 Weeks: 8

In this course, you will review current literature and theories related to diversity, equity, inclusion, and social justice. You will also relate knowledge and personal experiences, and examine the educator dispositions necessary for effective diversity, equity, inclusion, and social justice practices. Finally, you will justify the role of and recommend practices for diversity, equity, inclusion, and social justice in the context of educational leadership.

EDL-9200 - Leadership, Supervision, and Personnel in PK-12 Education

Semester Credits: 3 Weeks: 8

In this course, you will explore models of supervision and evaluation of personnel and analyze policies and practices supporting diversity and inclusion in PK-12 settings. Additionally, you will determine the effects of culture on interpersonal and group communication and evaluate policies and programs for effectiveness. Finally, you will evaluate the role of leadership in managing change and conflict and examine strategies for talent development of instructional and organizational leadership.

EDL-9300 - Legal Issues in PK-12 Education

Semester Credits: 3 Weeks: 8

In this course about legal issues in education, you will explore legislation and regulation in PK-12 education and evaluate institutional liability and risk management policies. You will investigate procedural due process and administrative remedies policies and explain the implications of different status such as PK-12 public, private, charter, for-profit, non-profit schools, and homeschooling. Finally, you will synthesize education case law supporting diversity in the workplace.

EDL-9400 - PK-12 Curriculum, Instruction, and Assessment

Semester Credits: 3 Weeks: 8

In this course, you will learn to evaluate leadership skills for effective instructional planning and critique professional learning strategies for curriculum, instruction, and assessment in PK-12 environments. You will examine trends in instructional leadership and curriculum development as well as how to analyze data-driven decision-making processes for continuous improvement. Finally, you will recommend assessment practices for and of learning and review multi-tiered systems of support in PK-12 environments.

EDL-9500 - Innovation for Change in Educational Organizations

Semester Credits: 3 Weeks: 8

In this course, you will determine the conditions necessary for innovation as well as recommend change theories to promote innovation in educational organizations. You will assess major barriers to and opportunities for change. You will also critique organizational resources to promote innovation and change. Finally, you will evaluate the effects of culture and climate and advocate for ethical decision-making practices in organizational innovation and change.

EDL-9600 - Policy Development & Implementation in PK-12 Education**Semester Credits: 3 Weeks: 8**

In this course, you will examine the relationships among policy, leadership, accreditation and research and critique the processes related to operations and policy development in PK-12 education. You will evaluate the impact of educational policies on school operations and practices and synthesize how the policies and practices facilitate effective school performance. Finally, you will evaluate methods for strategic planning and policy implementation in PK-12 education.

EDL-9700 - Finance & Budgeting in PK-12 Education**Semester Credits: 3 Weeks: 8**

In this course, you will assess components of funding formulas and critique budgeting and auditing processes in PK-12 education. You will review categorical funding policies and explain fiscal accountability in PK-12 education. Finally, you evaluate funding challenges and recommend sources of grant funding for initiatives in PK-12 education.

Education Research**EDR-8200 - Scholarly Literature Review****Semester Credits: 3 Weeks: 8**

During this course, you will develop effective search and scholarly writing strategies to create a scholarly review of literature. This course emphasizes how to: (a) use effective literature search strategies; (b) develop a scholarly synthesis of research literature; (c) organize research literature around identified research themes, including a study problem, purpose, and theoretical perspectives for an empirical research study; and (d) focus on developing a scholarly exposition that reflects divergent viewpoints and contrasting perspectives. The overarching goal of this course is for you to understand strategies to survey scholarly empirical and theoretical literature to avoid bias, focus on educational practice-based research problems, and address the required components of a scholarly literature review.

EDR-8201 - Statistics I**Semester Credits: 3 Weeks: 8**

This course offers foundational knowledge to become a critical consumer of statistical-based research literature. The emphasis will be on understanding non-inferential and inferential statistical concepts, the conventions of quantitative data analysis, interpretation, and inferences from statistical results. Statistical computations will be completed using statistical software applications for quantitative data analysis. The course culminates in a synthesis project to demonstrate statistical skills and aligned with APA guidelines for presentation of statistical results.

EDR-8202 - Statistics II**Semester Credits: 3 Weeks: 8**

You will learn advanced statistical principles and how to apply them to quantitative research. You will be provided an overview of advanced statistical concepts used in empirical research, including inferential analyses. Advanced computations will be performed using SPSS. The focus involves helping you build independent scholarly skills with an emphasis on understanding

multivariate data; the use, comprehension, and evaluation of sophisticated statistical concepts; and presentation of statistical results.

EDR-8206 - Applied Qualitative Analysis

Semester Credits: 3 Weeks: 8

This course builds on a foundational understanding of qualitative designs and measurements to focus on analyses of the data. The weekly exercises take you deeper into the skills and techniques necessary to ensure the appropriate analyses of qualitative data, including integrating relevant frameworks and selecting suitable methods to organize and present the analyses and findings. In your dissertation study, you will be expected to describe in detail your analytic approach and explain clearly how you got from your raw data to your conclusions. This transparency is essential to enhance the trustworthiness of your study. Throughout the course, all of the qualitative analysis components (theoretical, conceptual, and practical) are explored in preparation for the dissertation research process.

EDR-8300 - The Research Process

Semester Credits: 3 Weeks: 8

In this introductory research course, you will explore the underpinnings of the research process, examine research paradigms, and investigate theoretical and practical foundations of qualitative and quantitative research methodologies used within educational research. You will identify criteria for the development of a quality research study that is ethical, accurate, comprehensive, cohesive, and aligned. Specific course topics will involve the ethics of conducting research; data collection and analysis techniques; and issues of feasibility, trustworthiness, validity, reliability, generalizability or transferability, and rigor. This course is intended to familiarize you with concepts and skills associated with conducting theoretical and applied research.

EDR-8400 - Advanced Qualitative Methodology and Designs

Semester Credits: 3 Weeks: 8

This course focuses on qualitative research methodology and designs and the methods used to collect and analyze data in educational research. You will examine the principles of qualitative research and explore commonly used designs (also referred to as qualitative traditions or genres) with a focus on application and feasibility. Qualitative data collection and analysis methods will be examined for their suitability with regard to the research design selected. Alignment between qualitative designs and research methods, issues of trustworthiness pertaining to qualitative research, and the role and responsibilities of the qualitative researcher will also be explored.

EDR-8500 - Advanced Quantitative Methodology and Designs

Semester Credits: 3 Weeks: 8

This course explores the quantitative research methodology and associated designs and methods. You will examine paradigmatic perspectives along with the tenets and conventions of quantitative research. This examination of designs and methods will include topics such as feasibility, validity, reliability, variable operationalization, inferential designs, and analytic software applications used within the quantitative research paradigm. You will also explore the components of aligned and coherent quantitative research designs that support meaningful research within the field of education.

EDR-8501 - Introduction to Multi-Level Modeling

Semester Credits: 3 Weeks: 8

Prerequisites: EDR-8201, EDR-8202, EDR-8300, EDR-8500

In this advanced statistics course, you will be introduced to multilevel modeling. You will examine the six types of multilevel data as collected in education and engage with common types of multilevel modeling. You will also investigate statistical theory

of multilevel modeling as applied in education and cultivate knowledge of statistical concepts underlying methods of multilevel modeling. Finally, you will discern between myth and important rules and techniques of multilevel modeling in research in making decisions related to the use of multi level modeling and utilize multilevel modeling analyses to draw meaningful conclusions from the results.

EDR-8502 - Introduction to Instrumentation and Psychometrics

Semester Credits: 3 Weeks: 8

Prerequisites: EDR-8201, EDR-8202, EDR-8300, EDR-8500

In this course, you will examine the concepts related to psychometrics. You will identify concepts related to the development of an instrument (i.e., concept identification, standardized instruments), and critique published studies for reliability and validity, and quality of instrument development. Then, you will engage in item construction and conduct reliability and validity testing. Finally, you will examine confirmatory factor analysis (CFA) and exploratory factor analysis (EFA).

Educational Psychology

PSY-6115 - Psychology of Learning

Semester Credits: 3 Weeks: 8

This course addresses learning and learning theory in a variety of contexts. Basic learning principles are explained, including behaviorist and cognitive approaches. Learning is considered as it impacts behavior change and as it takes place in the classroom, in problem solving for community or civic problems, and in electronically mediated social learning. The special ways that learning occurs in later ages are also examined.

PSY-6802 - Educational Psychology for Diverse Populations

Semester Credits: 3 Weeks: 8

This course focuses on the notion that people have different backgrounds, perspectives and values, including different approaches to learning. This course covers research and theory on cultural differences, social groups, attitudes, beliefs, and biases regarding diverse populations. You will discuss current conceptual, theoretical, and methodological work in education and psychology. You will consider the role of race and ethnicity in school experiences. You will also research academic achievement and development in multicultural settings.

PSY-6803 - Gifted and Talented Education for Diverse Populations

Semester Credits: 3 Weeks: 8

Working with children and families who have diverse developmental and learning needs requires not only a deep understanding of and respect for the individual child, but also research-based knowledge. Theories of giftedness, talent development, instructional strategies, diversity and technological issues, implications for educational practices and psychological inquiry. In this course, students will develop and assess practical strategies and tools needed in educational settings to plan curriculum, teach, assess and if necessary, refer young children. Using the child's unique characteristics, students will learn to help create supportive, challenging, and experiences environments.

E-Learning

EL-5001 - Introduction to Principles and Practices in E-Learning

Semester Credits: 3 Weeks: 8

Students will receive an introduction to the teaching and learning strategies in the e-learning environment. Students will examine the basic foundations of e-learning, instructional principles used to develop effective online courses and materials, and the assignments and assessments that are used in e-learning. Students will design a professional development or corporate training activity based on best practices in e-learning.

EL-5002 - Introduction to E-Learning Instructional Strategies**Semester Credits: 3 Weeks: 8**

Instructional strategies are those techniques instructors and facilitators use to guide learners through the learning activities. In this course, you will examine instructional strategies that facilitate effective teaching and learning practices in the e-learning environment. This examination will include differentiating teacher-centered and learner-centered approaches. You will also review high-impact practices in traditional classrooms that can be transformed for the online environment.

EL-5006 - Adult Learning Theories**Semester Credits: 3 Weeks: 8**

Students will examine and develop the skills involved in identifying, analyzing, and planning for the diversity in adult learning behaviors. Students will assess strategies for developing critical thinking and reflective practice in adult students. Students will evaluate the principles of adult learning theory and how they can be used in the design of technology based instruction to make it more effective.

EL-5007 - Ethics and Legal Issues**Semester Credits: 3 Weeks: 8**

In this course, you will examine potential legal, ethical, and social issues involved in teaching and learning using online technologies in the classroom and supporting academic programs. Ethical principles that relate to copyright, intellectual property, and personal rights and privacy will be explored. Concepts in this course provide educators with a general framework for understanding and addressing issues such as ownership of online course materials, determining whether a work is in the public domain, and the proper use of copyrighted works. Prevention of plagiarism in the digital environment will also be addressed.

EL-5009 - Mobile Devices for Teaching and Learning**Semester Credits: 3 Weeks: 8**

In this course, you will receive an introduction to teaching and learning using mobile devices. This course will present a conceptual and theoretical foundation for implementing mobile devices into the curriculum, including exploration, examination, and evaluation for the efficacious use of mobile devices in the classroom. You will analyze related mobile technology processes and techniques for effectively using these devices. You will also explore the structural aspects, pedagogical issues, curriculum design, psychological and group dynamics, ethical and social issues, as well as the practical issues of using mobile devices.

EL-7001 - Principles and Practices in E-Learning**Semester Credits: 3 Weeks: 8**

In this course, you will be introduced to the essential elements in the field of e-learning, including foundational philosophies, principles, and models. You will consider technologies that increase student success and examine assessment practices and tools specific to the e-learning environment. The goal of this introductory course is to prepare you to use research-based best practices in creating positive e-learning experiences for learners and instructors.

EL-7002 - E-Learning Instructional Strategies

Semester Credits: 3 Weeks: 8

This course serves as an introduction to instructional learning strategies using information and communication technologies. Students will develop effective online learning facilitation skills such as establishing a safe learning environment for learners, accommodating various learning styles, conducting effective online class discussions, monitoring the progress of learners, guiding collaborating online learning activities, and administering online assessment and evaluations.

EL-7003 - Instructional Design and Engaging E-Learning Activities**Semester Credits: 3 Weeks: 8**

In this course, you will explore instructional design and its role in creating engaging e-learning experiences. In particular, you will interpret existing standards related to learner engagement and instructional design, explore instructional design models that support the design of engaging e-learning activities, and actually design instructional content for e-learning experiences. You will also evaluate measures of learner engagement and recommend strategies for increasing learning engagement within e-learning experiences within education and training contexts.

EL-7004 - The Online Learner**Semester Credits: 3 Weeks: 8**

In this course, you will consider key issues and practical guidance for working with students in an e-learning environment. The course includes an examination of the basic characteristics of online students and the factors that are critical to their success. You will explore student-centered approaches, engagement supportive of equity and inclusion, and assessment strategies.

EL-7006 - Facilitating Adult Learning Online**Semester Credits: 3 Weeks: 8**

Adult learners have unique needs, and this course will prepare you to facilitate online learning to meet these unique needs. You will examine adult learning theories, principles, and pedagogies with particular consideration of diversity, equity, inclusion and adult motivation. You will consider the design of online learning experiences that create opportunities for effective facilitation of adult learning.

EL-7007 - Developing Online Content Ethically and Legally**Semester Credits: 3 Weeks: 8**

In this course, you will examine ethical and legal implications of multiple aspects of developing online content. You will consider different ways that use of existing content is distributed and protected as well as individual and collective implications arising from failure to adhere to laws and best practices. You will also consider ethical challenges and the need to consider multiple aspects of content accessibility. At the conclusion of the course, you will be prepared to use strategies to support ethical and legal development of online content across e-learning contexts.

EL-7700 - Leading Online Learning for K-12 Students**Semester Credits: 3 Weeks: 8**

This course offers a broad overview of e-learning in K-12 education. You will examine opportunities, challenges, and best practices, including communication tools, necessary technologies, and related resource implications. You will consider needs related to equity and accessibility, including the opportunity to modify content for online delivery.

English Second Language**ESL-5001 - Foundations of Instruction for Non-English Language Background Students**

Semester Credits: 3 Weeks: 8

This master's level course establishes the rationale for English as a second language and bilingual education, preparing reflective practitioners and educational leaders to address issues and concerns critically and analytically in the classroom. It provides a comprehensive survey of bilingual/ESL strategies for students with a non-English language background while expanding the student's understanding of best educational practices. Students will explore models of bilingual education and language development.

ESL-5003 - Assessment of Linguistically Diverse Students**Semester Credits: 3 Weeks: 8**

In this course, you will focus on the assessment of linguistically diverse students, particularly assessment of their English language proficiency and multiple measures for academic assessment of reading comprehension and mathematical proficiency. Both formal and informal assessments will be reviewed, including modifications, portfolios, and graphic organizers.

ESL-5005 - English Language Learning**Semester Credits: 3 Weeks: 8**

In this course, students gain knowledge of traditional and current identification and assessment practices in bilingual and English as a Second Language (ESL), and English for Speakers of Other Languages (ESOL) in education. The course also analyzes and synthesizes methods and techniques for language, academic assessment, and placement through speaking, reading, interpersonal, and technology of linguistically diverse students in English and native language.

ESL-5006 - Instructional Methodologies for English Language Learning**Semester Credits: 3 Weeks: 8**

This course focuses on instructional strategies and methodologies for learners of the English language. You will discriminate among the requirements for teaching oral communication versus written communication and then analyze the principles and instructional methods appropriate for instruction to diverse learners of the English language. You will analyze the influences of multiple demographic variables, including multiple sociocultural characteristics. By the end of the course, you will be prepared to recommend instructional accommodations and develop sheltered content across multiple curricular areas.

ESL-7100 - Second Language Foundations**Semester Credits: 3 Weeks: 8**

In this course, you will analyze how learning a new language differs from learning a first language, including how learner experiences and processes that occur during second language acquisition. As you examine theories related to second language acquisition, you will also consider the role of reading, writing, speaking, and listening skills in acquiring the second language. You will assess best practices and principles in various learning environments and create instructional plans and materials based on those principles.

ESL-7200 - Teaching English Language Learners**Semester Credits: 3 Weeks: 8**

This course offers a deeper exploration of theories, models, practices, and strategies related to teaching English language learners. You will consider knowledge and skills related to the acts of listening, speaking, reading, and writing English and develop sheltered content lessons for diverse learners. Given the collaborative nature of teaching, you will also assess opportunities to collaborate with other professionals around effective instruction for English language learners. Throughout the course, you will consider diversity, equity, and inclusion as you design culturally responsive instructional materials and accommodations.

ESL-7300 - Assessing Diverse Learners

Semester Credits: 3 Weeks: 8

In this course, you will explore the assessment of diverse English language learners in various educational contexts with consideration for the perspectives of leader-practitioners and research scholars. Your exploration will include assessment differences, tools, and strategies for assessment in both language learning and content-area learning contexts. You will also evaluate the role of technology in the assessment of diverse English language learners as well as examine the roles of teachers and other professionals in the evaluation and accountability of English language learning services and programs.

ESL-7400 - Developing Curriculum for English Language Learners**Semester Credits: 3 Weeks: 8**

In this course focused on developing curriculum for English language learners, you will explore frameworks for curriculum development, including the development of unit plans for both content area and language learning outcomes related to reading, writing, listening, and speaking English. You will also consider strategies for differentiating curricula and evaluate standards and guidelines related to proficiency outcomes for English language learners.

ESL-7600 - Issues in ELL Education**Semester Credits: 3 Weeks: 8**

In this course, you will analyze historical contexts for English language learning as well as the current political, social, and educational implications of teaching English language learners. You will consider research regarding the education of students from culturally and linguistically diverse backgrounds as well as different ways within the learning environment to affirm students' cultural identities. Along the journey, you will also evaluate strategies for teaching English language learners within contexts of English as a foreign language, English as a second language, and bilingual education contexts.

Entrepreneurship**ENT-5000 - Innovation - The Entrepreneur and Intrapreneur****Semester Credits: 3 Weeks: 8**

This is the initial course in the entrepreneurship specialization and serves as the prerequisite for all future courses within the specialization. Prior to the start of this course, it is recommended that students enter the course with a well thought out product or service venture. Students will explore many facets of the potential venture to include new venture feasibility, an analysis of strengths, weaknesses, opportunities and threats (SWOT), and identification of potential investors to determine if the new venture is needed within the marketplace.

ENT-5001 - Strategic Market Assessments**Semester Credits: 3 Weeks: 8**

In this course, you will learn how to identify and analyze internal and external factors affecting the development of effective marketing strategies in both a domestic and global marketplace for a new venture. This will include but is not limited to, governmental, business, technological, and political challenges and opportunities that exist when operating within emerging national and international markets. You will assess market conditions, economic history, and tradition as they relate to competitive advantage. You will apply research-based marketing strategies and delve into the advanced exploration of current topics, marketing of innovations for early-stage technologies, the entrepreneurial dimensions of market research and analysis, intellectual property protection and management, and other potential new market topics for meeting stakeholder and investor needs. Finally, you will design a marketing plan for generating support and allocation of resources and will evaluate marketing situations for the ethical and legal operation of a new venture in a domestic and international setting.

ENT-5002 - New Venture Formation

Semester Credits: 3 Weeks: 8

The formation of a new venture is an evolutionary process which requires research, analysis, assessment, and reevaluation of a new product or service in a competitive environment. Students will assess various leadership styles and how the styles might enhance venture performance. Students will examine the many business models available and determine how the models may possibly be incorporated into the new venture plan. A cursory analysis of personnel to define needs for skill types and sets will also be performed. Students will evaluate funding and financing options as well as market strategies based on an initial competitive analysis of the marketplace. At the conclusion of the course, students will have completed steps to solidify and clarify their new venture plan through research and analysis.

ENT-5003 - Venture Capital and Private Equity**Semester Credits: 3 Weeks: 8**

You will develop a plan to research, identify, and acquire the financial resources required for successfully funding a new entrepreneurial or intrapreneurial venture. Funding the new venture will require students to examine business valuation, deal development, dept planning and structure, and the acquisition of venture capital from government agencies (Small Business Administration for example) or interested investors. A clear and succinct plan for funding the new venture will be paramount to the successful acceptance of the new venture business plan by interested parties such as investors, stakeholders, bankers, or angel funds. Upon completion of the course, students will have a detailed financial plan that can be presented to investors and other interested parties.

ENT-5100 - Foundations of Entrepreneurship**Semester Credits: 3 Weeks: 8**

This course gives the student an overview of the entrepreneurial process. In this course the student will look at entrepreneurship as a mindset—a way of looking at things differently that is opportunity-focused and creative. Topics covered include characteristics of successful entrepreneurs, techniques for finding and screening ideas, entrepreneurial finance, the politics of new ventures, valuation and deal making, understanding writing a business plan and business canvas model, buying a business, family business/ lifestyle business dynamics, and managing crisis and failure. The student will learn the fundamentals and challenges of entrepreneurship - from conceptualizing new ventures and opportunities to developing and managing them.

ENT-5105 - Ideation and Opportunity Identification**Semester Credits: 3 Weeks: 8**

In this course, students will apply the principles of entrepreneurship or intrapreneurship toward the formation of a new venture. Students will evaluate business plan structures to determine the best approach to support a new venture. Students will then select business practices for efficiency of operation for the new venture. Next, they will evaluate the feasibility of the new venture utilizing the University Small Business Incubator community. Documenting strengths, weaknesses, opportunities, and threats (SWOT analysis) will follow. Finally, the student will determine timelines, presentations, and other deliverables for potential investors or stakeholders.

ENT-5110 - Environmental Analysis**Semester Credits: 3 Weeks: 8**

In this course the student will investigate the concepts and methods for an environmental analysis in entrepreneurial environmental problem-solving. The student will prioritize concepts and methods of economic, political, and social analysis for the design and evaluation of environmental opportunities and problems. The student will critique the roles and identities of business owners and the various roles played in an interconnected world. The student will classify the transnational character of environmental problems and ways of addressing them within a new venture. Finally, the student will assess the relevant environmental issues and the links between success and failure in a new or growing venture.

ENT-5115 - New Venture Resource Development and Analysis

Semester Credits: 3 Weeks: 8

In this course the student will recommend a list of new venture resources, analyze strategic choices for new venture resources, evaluate challenges relating to the acquisition and management of necessary resources for new ventures. The student will validate a strategy for developing tools and skills with growth of a new venture. Finally, the student will demonstrate proficiency in searching for and locating resources needed at different stages of venture creation and operational efficiency.

ENT-5120 - Financial Management**Semester Credits: 3 Weeks: 8**

In this course the student will examine the value of budgets in new venture creation and growth. The student will assess the steps in creating and managing the budget processes for organizational efficiency and agility. The student will apply effective techniques for managing money in business software applications. The student will prepare monthly financial reports and conduct analysis of costs and their associated benefits. The student will also audit common money management mistakes of early business development and operation.

ENT-5125 - Business Plan Creation**Semester Credits: 3 Weeks: 8**

In this course the student will analyze how a business plan helps companies make decisions with the future in mind. The student will explore the difference between a business plan and a business canvas model and then diagram the parts of a business plan. The student will next develop a business plan and then validate the use of a business plan for ensuring success and meeting stakeholder needs.

ENT-5130 - Legal Structure and Organization**Semester Credits: 3 Weeks: 8**

In this course the student will illustrate the most common types of legal structures available to startups. The student will dissect the most common legal errors made by startups and in early operation. The student will assess how legal considerations can add value to entrepreneurial ventures. Next the student will explore Intellectual Property and how it affects entrepreneurs and their decisions. Then the student will assess the impact of Intellectual Property theft in a local and global market. Finally, the student will document the legal requirements of hiring employees for startup, growth, and organizational agility to meet stakeholder needs.

ENT-5135 - Entrepreneurial Strategy and Decision Making**Semester Credits: 3 Weeks: 8**

In this course the student will document an entrepreneurial business strategy for startup and growth. The student will explore the function of the entrepreneur in successful, commercial application of innovation. The student will investigate personal attributes that impact entrepreneurial decision making for agility and change. The student will also evaluate entrepreneurial leadership and management styles concerning strategy and decision making. Finally, The student will examine the nature of entrepreneurship thinking from startup to expansion in a constantly changing business environment.

ENT-5140 - Pricing, Marketing, and Expansion**Semester Credits: 3 Weeks: 8**

In this course the student will investigate the contribution of marketing to a business. The student will justify the use of primary and secondary sources of information for marketing data while identifying the advantages and disadvantages of each. The student will apply the four steps of target marketing: mass marketing, market segmentation, concentrated marketing, and micro market toward competitive advantage. The student will also dissect the stages of the product life cycle in the competitive market environment addressing the importance of measuring return on marketing investment. Finally, the student will critique types of

consumer buying behaviors and the stages of buyer decision making processes as they relate to the components of the marketing mix.

ENT-5200 - Capstone

Semester Credits: 3 Weeks: 8

In this capstone course the student will demonstrate an entrepreneurial mindset through the creation of a prototype for a new business opportunity from market analyses. The student will analyze other businesses and indicators for the success of your new venture. The student will demonstrate collaborative opportunities for your new venture. The student will explain the marketing concept of your new venture and then optimize your business plan with an Incubator.

Finance

FIN-5012 - Corporate Finance

Semester Credits: 3 Weeks: 8

This course examines the most important components of corporate finance. The course starts with an examination of the financial statements and the related financial ratios. The financial statements include the balance sheet and the income statement while the financial ratios make use of financial statement metrics to assess such issues as profitability, short term solvency, management of current accounts and debt structure choices. The course then studies some fundamental concepts on using present value and future value to solve business and personal financial problems. The differences between debt and equity securities are examined including the important role of interest rates in valuing debt securities, i.e. government and corporate bond values. This course will examine the benefits and costs of employing debt versus equity with the objective to maximize the value of the firm.

FIN-5013 - Investment Management

Semester Credits: 3 Weeks: 8

This course examines investment management with an emphasis on topics in relation to academic research. The course includes an examination of advanced content as well as relevant academic papers. You are required to develop in-depth papers and presentations on the primary academic topics within financial institutions. Moreover, you will review and access relevant academic papers and pertinent information to be better prepared to write papers and create presentations within this area of finance and investment management. The course begins with an exploration of wall street's investing environment. It continues with an examination of various securities and debt instruments. It provides an examination of the Capital Asset Pricing Model and Arbitrage Pricing Theory as well as an overview of the 2008 Financial Crisis.

FIN-5014 - Financial Institutions

Semester Credits: 3 Weeks: 8

This course takes a broad approach in studying financial institutions such as commercial banks, savings and loan associations, investment banks and insurance companies. The central theme involves examining the risks facing financial institutions and the methods and markets through which these risks are managed.

FIN-6100 - Topics in Financial Management

Semester Credits: 3 Weeks: 8

The topics covered in this course include strategic financing decisions such as capital structure and dividend policy decisions; tactical financing decisions such as initial public offerings, financial restructuring, and lease financing; short-term financial management such as cash, inventory, and receivables management; and special topics such as risk management, bankruptcy, reorganization and liquidation, corporate mergers, and multinational financial management.

FIN-6310 - Security Analysis & Portfolio

Semester Credits: 3 Weeks: 8

This course is an analysis leading to the appraisal and pricing of securities. It discusses the income generating ability of securities, forecasts of trends in the stock and bond markets, fundamental and technical analysis, application of Modern Portfolio Theory (MPT), analysis of active and passive investment strategies, and measurement of portfolio performance.

FIN-6350 - International Finance

Semester Credits: 3 Weeks: 8

An examination of the international aspects of corporate finance and investing, this course covers the international balance of payments and foreign exchange. It emphasizes exchange rate determination, exchange risk, hedging, and interest arbitrage, international money and capital markets, international financing, and international portfolio management.

FIN-6890 - Financial Management

Semester Credits: 3 Weeks: 8

A study of corporate financial management, through problem solving, case studies and/or term projects, this course covers issues such as sources of long-term financing, cost of capital, capital budgeting, dividend policy, globalization of finance, ethical standards, information technology, and financial strategy.

FIN-7012 - Corporate Finance

Semester Credits: 3 Weeks: 8

This course is an introduction to the role of finance, the operating environment of the firm, analysis of financial statements, the term structure of interest rates and yield curves. It has been said that to really understand a business, one must understand the financial numbers. This course, building upon a basic understanding of accounting, serves as the springboard for understanding the financial health of a corporation. Central to this understanding is the concept of cash flow, where it comes from and what affects it. While knowledge of accrual accounting is important, one pays bills from cash, not receivables. Preparing financial statements, something learned in accounting, is not the same as understanding what they are telling us. This course provides the initial building blocks for understanding the financial strengths and weaknesses of a corporation.

FIN-7013 - Investment Portfolio Analysis

Semester Credits: 3 Weeks: 8

This course is an introduction to investment portfolio management. Central to this understanding is the concept of risks and return, futures, swaps, valuation, and risk portfolio performance. Additional examination will be on the advanced components of investments with an emphasis on financial markets, option market valuations, international diversification, and pricing models. This course will help students gain financial knowledge that can be used to make sound investment decisions. Shareholders, stakeholders, financial managers, and investors will be able to further identify key sources of funding to grow their business or gain a greater return on investments.

FIN-7014 - Managing Financial Institutions

Semester Credits: 3 Weeks: 8

This course examines the advanced components of financial institutions with an emphasis on topics in relation to academic research. The course includes an examination of advanced content as well as relevant academic papers. You are required to develop in-depth papers on the primary academic topics within financial institutions. Moreover, you will review and assess relevant academic papers to be better prepared to write papers within this area of finance. The course begins with an analysis of the global financial system and financial institutions. It continues with an examination of financial statements for financial

institutions. It provides a careful examination of interest rate and credit risks as well as the course studies derivative securities utilized by financial institutions.

FIN-7015 - Advanced Financial Statement Analysis

Semester Credits: 3 Weeks: 8

The student will examine the most important advanced components of financial statement analysis with an emphasis on topics more closely related to academic research. The course includes an examination of advanced content as well as relevant academic papers. The student will be required to develop some in-depth papers on the primary academic topics within financial statement analysis. Moreover, the student will be reviewing and assessing relevant academic papers to better prepare the student to potentially write papers within this area of finance. The course begins with an analysis of the balance sheet and income statement. It continues with an examination of financial ratios. It provides a careful examination of a common size statement. The course studies the decomposition analysis and the impacts of financial leverage.

FIN-7018 - Accounting and Control for Nonprofit Organizations

Semester Credits: 3 Weeks: 8

This course is important for the advanced financial and accounting professional to better understand the planning and control systems within nonprofit organizations. In this course, students are provided a complete review of the accounting principles and practices used in Not-for-Profit organizations with a heavy focus on governmental accounting practices. The course materials on accounting principles and practices can be applied to hospitals, colleges and universities, health and welfare agencies, and other similar organizations. The course includes topics on appropriations, budgetary accounting, financial conditions, auditing, fund accounting, and ethics. The course assessments include cases, problem solving, and written research narratives.

Forensic Psychology

PSY-5112 - Theories of Criminal Behavior

Semester Credits: 3 Weeks: 8

This 8 week course is focused on prominent theories of criminal behavior relevant to forensic psychology. Emphasis is placed on the practical application of theory and corresponding research across various types of criminal behavior. You will examine the interaction of individual, social, and environmental factors related to criminal involvement and implications for work within forensic settings. You will also explore the impact and relationship between the legal system and human behavior.

PSY-5113 - Psychological Evaluation and Treatment in Correctional Settings

Semester Credits: 3 Weeks: 8

In this 8-week course, you will explore the use and application of psychological principles in correctional settings. This includes a review of the use of psychological evaluation and treatment strategies of offenders. Other topics covered will include violence within correctional settings, the offender-authority relationship, suicidology, and implications of rehabilitation, reunification, and recidivism.

PSY-5114 - Policy and Justice in Forensic Psychology

Semester Credits: 3 Weeks: 8

In this 8-week course you will examine the integration of forensic psychology and the legal system related to both criminal and civil law. Criminal justice theories and practice related to incarceration and the justice system will be explored as well as the impact of law on the practice of forensic psychology. In this course you will also review the history of psychology and law in public policy, ethical issues, relevant case law, victimology, and restorative justice. In addition, modern day social justice issues as they relate to the field of forensic psychology will be covered, such as psychology in law and the media.

PSY-5501 - Principles of Forensic Psychology

Semester Credits: 3 Weeks: 8

This course is an introduction to graduate studies in Forensic Psychology. This area of psychology involves the application of psychological principles to the justice system, which includes law enforcement, the courts, corrections, and victim services. Current models, theories, and research in Forensic Psychology will be explored. In addition, graduate-level skills, such as academic integrity, effective use of the University Library, comprehending complex scholarly texts and research articles, and use of APA form and style in professional communication are also introduced. Students will complete the course with a roadmap to navigate their way to completion of their educational aspirations.

PSY-5502 - Psychology of Law and Justice

Semester Credits: 3 Weeks: 8

This course examines the integration of forensic psychology and the legal system. Psychological implications of criminal justice will be explored. Students also will review psychological theories and research related to criminal behavior and victimization as well as the impact and relationship between the legal system and human behavior. The history and ethics of remediation also will be addressed.

PSY-5504 - Social Psychology and Aggression

Semester Credits: 3 Weeks: 8

This course is focused on the psychological theories of aggression. Students will examine principles of social psychology including the frustration-aggression hypothesis, cognitive dissonance, cognition and arousal as well as heuristics. Psychosocial factors in aggression as well as gender differences and cultural influences on aggression expression also will be explored.

PSY-5505 - Diversity in Forensic Psychology

Semester Credits: 3 Weeks: 8

This course is focused on diversity within forensic settings. You will develop an awareness of your own personal identities, cultural values, and biases as they relate to work in forensic psychology. In addition, you will explore differences in crime, victimization, and criminal justice outcomes based on sociodemographic factors including race, ethnicity, gender, age, disability, social class, sexual orientation, and religion. You will also examine implications of diversity-related issues on assessment and intervention with forensic populations.

PSY-6506 - Psychological Evaluation and Treatment of Offenders

Semester Credits: 3 Weeks: 8

This course reviews the use of psychological evaluation and treatment strategies of offenders. Students will review the history of treatment in the forensic setting, including clinical definitions of deviant behavior and therapeutic treatment models for both offenders and victims. Common assessments in forensic studies will be examined. Other topics to be covered include therapeutic follow-up, recidivism and contemporary trends in treatment in forensic settings.

PSY-6507 - Criminal Profiling

Semester Credits: 3 Weeks: 8

This course will examine criminal behavior from a psychological perspective. Topics covered include foundations of criminal profiling, victimology, behavioral patterns and behavioral analysis. Alternative methods of profiling and analytical reasoning skills required of an effective profiler will be explored.

PSY-6510 - Capstone in Forensic Psychology

Semester Credits: 3 Weeks: 8

The Capstone course in Forensic Psychology is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MS program in Forensic Psychology. The Capstone course culminates in a review of the evidence based practices related to a specific issue of interest to the student in Forensic Psychology.

PSY-6511 - Internship in Forensic Psychology**Semester Credits: 3 Weeks: 12**

Students seeking a master's degree in forensic psychology may opt to complete their degree by taking an internship in forensic psychology instead of the Capstone course. Students interested in this option are required to submit paperwork approving their internship site prior to enrolling in this course and no later than their eighth course in the program. During the internship experience, students will meet weekly with their assigned NCU professor as well as their approved internship site supervisor to discuss their experiences. Weekly assignments include submission of required evaluations and preparation for the final theoretically grounded presentation summarizing the internship experience. Internship experiences are designed to guide candidates through specific standards-aligned experiences with resulting growth in competencies demonstrated through application in practice. This course is graded using an A, B, F grading scale.

PSY-6512 - Threat Assessment**Semester Credits: 3 Weeks: 8**

In this 8-week course you will learn the essential foundations of threat assessment. This will include the examining key theories, concepts and research relevant to identifying, assessing and managing threats of targeted violence. The course will cover the pathway to targeted violence, risk factors and warning behaviors for targeted violence, use of different assessment tools, interviewing, information gathering, and beginning the development of a multidisciplinary threat assessment team. In addition, the course will include information on the legal and ethical implications of threat assessment and management for those practicing in the field by reviewing key components of the body of knowledge for the exam to become a Certified Threat Manager (CTM) for the Association of Threat Assessment Professionals (ATAP).

PSY-6513 - Threat Management**Semester Credits: 3 Weeks: 8**

In this 8 week course you will learn about threat management principles and procedures by developing a deeper understanding of risk factors and mitigation strategies related to the pathway to violence. You will examine how threat assessment informs threat management responses and interventions. You will also examine the use of threat management teams as a process to manage risk for different types of threats including workplace violence, intimate partner violence and stalking, school violence, or other areas of targeted violence. Finally, you will explore the ethical implications of threat management.

PSY-6514 - Special Topics in Threat Assessment and Management**Semester Credits: 3 Weeks: 8**

In this 8 week course, you will further develop threat assessment and management concepts and integrate relevant areas into your analysis and planning while learning from additional research in the field. You will examine information on behavioral and mental health, investigative and interview strategies, and a deeper look at ethical and legal challenges while focusing on several specific types of threat assessment contexts and environments in various settings. You will be able to apply assessment and threat management techniques, focused on one of these contexts and environments in the signature assignment. Deeper understanding of this specialized field will prepare you to pursue possible certification as a threat assessment and management professional.

PSY-6515 - Capstone in Threat Assessment and Management

Semester Credits: 3 Weeks: 8

The Capstone course in the Threat Assessment and Management Specialization in Forensic Psychology is your opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity. You will also demonstrate an appreciation of research that has been acquired during the MS program in Forensic Psychology. To do this, you will be required to use evidence-based practices and the ATAP body of knowledge to complete a real world example of a threat assessment case.

PSY-6516 - Fundamentals of Risk and Threat Assessment**Semester Credits: 3 Weeks: 8**

This 8-week course will explore the fundamentals of risk and threat assessment. This will include the history and evaluation of the field as well as an understanding of the current body of research and practice. You will review a broad scope of risk and threat assessment areas including the pathway to violence, threat assessment, and threat management, and risk related to sexual dangerousness, arson, violence, stalking and intimate partner violence, and workplace violence. You will develop a basic understanding of risk assessment in various contexts, assessment tools, and how they may be used in juvenile and adult population.

PSY-6517 - Investigative Psychology: Application of Offender Profiling and Characteristics**Semester Credits: 3 Weeks: 8**

In this 8-week course you will examine investigation of criminal behavior from a psychological perspective. Topics covered include foundations of criminal profiling, victimology, behavioral patterns and behavioral analysis. The role of psychologists in the investigative process, such as psychological approaches to interviewing suspects and witnesses, will also be explored.

Global Business Management**GBM-5001 - Global Leadership and Change****Semester Credits: 3 Weeks: 8**

In this course you will investigate leadership roles, styles, philosophy, and behaviors in globally diverse organizations. The course explores leadership through the challenge and implementation of change in global organizations. It focuses on realistic managerial situations and the techniques involved in managing change and responses to opportunities and threats.

GBM-5002 - Global Business Strategic Management**Semester Credits: 3 Weeks: 8**

In this course you will examine the strategic management of multinational corporations (MNCs) and outline Foreign Direct Investment (FDI) trends and its economic determinants. You will appraise global business strategies that MNCs have used in emerging economies and challenges they confront in different regions by using real life case studies. The course will also identify factors contributing to foreign debt crisis and its prevention.

GBM-5003 - Global Marketing Management**Semester Credits: 3 Weeks: 8**

In this course, you will examine the issues involved in entering global markets and conducting marketing activities. Specific topics include evaluating opportunities in foreign markets, developing and adapting marketing strategies to specific national and global market's needs, and coordinating strategies across global markets. Students will diagnose the real-world experiences of global corporations using case studies and up-to-date knowledge from relevant current resources.

GBM-7001 - Global Business Environment

Semester Credits: 3 Weeks: 8

In this course you will examine the impacts of economic, social, ethical, and political changes of different countries on the global business environment. The emphasis is on developing higher-level thinking skills with an ability to critically evaluate, and explore, differences in conducting business in different global markets. You will be assessed for your critical thinking skills to resolve complex research issues and problems. You will develop decision-making skills required for managers to conduct business in different global markets.

GBM-7002 - Global Strategic Leadership**Semester Credits: 3 Weeks: 8**

In this course you will explore the role of decision making related to the strategy and leadership of firms doing global business. Specifically, you will focus on corporate governance, characteristics of the contemporary leader in a global/technological age, and actions the strategic leader must take to overcome challenges, which impede their organization from achieving success.

GBM-7003 - Global Business Management**Semester Credits: 3 Weeks: 8**

In this course you will address the management decisions of multinational enterprises (MNEs) to enhance success in a global economy. You will evaluate decisions-making skills and situations faced by managers of MNEs to meet changes in global business environments. The course examines global strategy, structures, and global strategic management knowledge.

GBM-7004 - Global Marketing Management**Semester Credits: 3 Weeks: 8**

As a global marketer, you will have to address the needs and wants of global consumers, gain a competitive advantage by strategically positioning the value proposition, and focus on other global business issues. You may become a global citizen and broaden your tool kit. This course explores the application of market research, market entry, new product design, product positioning, and competitive analysis while paying close attention to the role of culture, environmental, and market conditions, including governmental regulations and economic systems. As a global marketer, you will also explore emerging trends in host countries in response to the growth of the global marketplace.

GBM-7005 - Advanced Topics in Global Organizational Behavior**Semester Credits: 3 Weeks: 8**

In this course, you will investigate organizational behavior and the impact individuals, groups, and structure have on behavior within a global organization. You will focus on how to improve productivity, reduce absenteeism and turnover, and increase employee global citizenship and job satisfaction. You will also study the tools for guiding the productivity of others, predicting human behavior at work, and the perspectives needed to manage individuals from diverse backgrounds.

Global Training**GTD-5000 - Human Performance and Improvement****Semester Credits: 3 Weeks: 8**

In this course, students will examine human performance and improvement. Topics include: performance improvement analysis, needs assessment, models of change, and performance models and interventions.

GTD-5005 - Introduction to Successful Global Training Techniques

Semester Credits: 3 Weeks: 8

In this course, students will explore basic principles of global training and development in corporate and educational settings. Students will examine best practices in training that link to organizational strategy. Topics will include the training function, processes, design, diversified methods of instruction, implementation, and evaluation that can be utilized successfully in a global context.

GTD-5007 - The Role of Technology in the Global Training Marketplace**Semester Credits: 3 Weeks: 8**

In this course, students will explore the impact of rapidly changing technology and the challenges of integrating these technological tools into the global training marketplace. This course will prepare students to identify strategic reasons to implement web-based training, provide tools for best-practices evaluation, and synthesize diverse elements of technology-driven training.

GTD-5011 - Introduction to Best Practices for Training and Presenting to International Audiences**Semester Credits: 3 Weeks: 8**

In this course, students will investigate best practices for training and presenting to international audiences. There will be opportunities to analyze the role of culture and best practices. In addition, global training skills will be honed through application of practices relative to international training and presentation.

GTD-5013 - Evaluating Training Programs**Semester Credits: 3 Weeks: 8**

In this course, students gain knowledge of fundamental concepts, principles, theories, and techniques of training evaluation. The underlying value of such knowledge for global trainers is the ability to understand how and why particular training programs are effective or ineffective. Students will identify and clarify the training needs of organizations; select appropriate training approaches; and evaluate training outcomes.

GTD-5019 - Trainer as Consultant in the Global Marketplace**Semester Credits: 3 Weeks: 8**

In this course, students will develop an understanding of ways to create value, improve productivity, and deliver change to global organizations. Models of consulting are presented for consideration and topics including management, ethics, tools, and techniques are addressed. Activities will focus on the process of consultation and the various approaches to assisting global organizations as an inside or outside professional.

Health Administration**DHA-7000 - The United States Healthcare Delivery System****Semester Credits: 3 Weeks: 8**

This course provides a comprehensive overview of the United States (U.S.) healthcare delivery systems with emphasis placed on historical perspectives, characteristics, the various sectors, and functions. You will analyze current issues related to access, cost, and quality; financing and reimbursement; public policy and regulations; as well as the future of the healthcare delivery systems in the U.S.

DHA-7001 - Healthcare Financial Management and Economics

Semester Credits: 3 Weeks: 8

This course provides an overview of approaches and processes involved in managing the health enterprise including value analysis, financial risk and required return. You will explore the roles of prices, production of health, demand for health care, theory of health insurance, health insurance and hospital markets, the market for physician services, and the role of government in the U.S. healthcare system.

DHA-7002 - Health Leadership and Systems Thinking**Semester Credits: 3 Weeks: 8**

This course provides an introduction to the health sector as it currently operates in the US. Through a historical review of this industry, you will learn how it has evolved and implications for its future. The complex structure of the health sector and dynamic interrelationships between various participants will also be explored. In addition, topics such as cost, quality, access, the financing of the healthcare system, and the uses of technology and data management will be investigated.

DHA-7003 - Human Resource Management for Healthcare Administrators**Semester Credits: 3 Weeks: 8**

This course provides an overview of Human Resource Management in Healthcare Administration. You will examine pertinent employment and workplace safety laws used in healthcare organizations. You also will consider the impact of employee performance on the organization and its stakeholders. The challenges of effective recruitment and retention will be explored. In addition, you will learn the management skills needed by administrators and how to implement related policies.

DHA-7004 - Communications, Marketing, and Public Relations for Healthcare Administration Leaders**Semester Credits: 3 Weeks: 8**

In this course you will gain an understanding of mass communication, public relations, and marketing principles used in healthcare organizations. You will explore management oversight as it relates to marketing projects and strategies that support an organization's image and mission. Areas to be examined include media relations, internal communications, crisis communications, and government and community relations. You also will examine how these elements assist in developing strategic partnerships in a global health marketplace.

DHA-7005 - Healthcare Quality Management**Semester Credits: 3 Weeks: 8**

This course will prepare you to understand theories, and develop, implement, and evaluate quality performance strategies within a healthcare organization. You will gain insights into indicators used to measure quality, in addition to exploring how quality assurance, measurement, and continuous quality improvement is implemented in healthcare organizations.

DHA-7006 - Health Law, Ethics, and Policy**Semester Credits: 3 Weeks: 8**

In this course, you will critique legal mandates and subsequent managerial responses within a healthcare setting. You will build knowledge and skills required to implement and impact policy development. This course will also explore ethical and non-ethical behaviors of health administrators. Key topics include professional and institutional liability, ethical decision making, and legal issues regarding fraud and abuse.

DHA-7007 - Trends and Issues in Executive-Level Management for Healthcare Administrators

Semester Credits: 3 Weeks: 8

In this course you will assess trends and issues affecting senior healthcare administration management. You will evaluate how these trends/issues affect leadership at the highest organizational levels of healthcare settings.

DHA-7009 - Quantitative Reasoning and Analysis**Semester Credits: 3 Weeks: 8**

In this course, you will examine the principles of quantitative reasoning and analysis used in healthcare research. You will explore quantitative research designs and techniques that can be used to support evidence-based decision making. Topics to be covered include data presentation, statistical analysis, description and testing of relationships, and survey research. Common challenges within quantitative healthcare research will be explored.

DHA-7010 - Project and Resource Management in Integrated Systems**Semester Credits: 3 Weeks: 8**

The course covers key components of project management within integrated health systems. You will review concepts of project integration, project scope, project timeline and cost management. You also will examine leadership skills used in project management for healthcare. These include human resource considerations, marketing and communications, and risk and procurement management.

DHA-7011 - Advanced Application of Practice-Based Research in Health**Semester Credits: 3 Weeks: 8**

Using implementation science as a framework to disseminate research in clinical and community-based healthcare, this course you will examine study designs and methods used in this translational research approach that considers how to transfer evidence-based research into practice. You will learn how successful integration of this research, into contemporary application, requires both involvement and input from the end user.

DHA-7012 - Data-Driven Decision Making**Semester Credits: 3 Weeks: 8**

This course examines how qualitative and quantitative research data informs decision-making in healthcare management. You will review statistical techniques used to analyze healthcare data. You will also evaluate and interpret findings of published research and technical reports to assess application in healthcare settings. Additionally, you will review the need to and methods used to protect health information when conducting and interpreting research.

DHA-7100 - Applied Doctoral Studies in Healthcare Administration**Semester Credits: 3 Weeks: 8**

In this course, students will begin their formal doctoral journey by examining what it means to be a scholarly practitioner in healthcare administration. Students will apply relevant skills to be successful in the DHA program, including critical thinking, researching, comprehending, and interpreting complex scholarly texts and research articles, applying relevant theoretical and conceptual frameworks within the context of applied healthcare administration topics and problems, and communicating at the doctoral level. Essential resources and relevant academic support services will be introduced to guide the student toward developing professional standards and doctoral-level expectations to succeed in the program. Student's will identify and begin to explore potential research topics for an applied doctoral dissertation and will complete the course with a roadmap to navigate the way to degree completion.

DHA-7108 - Applied Research Projects in Healthcare

Semester Credits: 3 Weeks: 8

Applied research projects in healthcare focus on using current evidence to address an identified problem. In this course, you will gain an understanding of the process healthcare leaders use to respond to problems by learning how to integrate research skills with professional practice. This course introduces you to research processes and methods, including quantitative and qualitative designs. You will critically analyze and determine conceptual models and theoretical frameworks, as well as appropriate secondary data sources. Throughout the course, you will refine a possible topic for your applied doctoral project.

DHA-7110 - Literature Review for Healthcare Administration**Semester Credits: 3 Weeks: 8**

In this course, you will engage in the process of scholarly literature reviews and academic writing. With an emphasis on how to (a) conduct effective literature searches, specifically in preparation for the dissertation, (b) develop a plan for writing comprehensive, critical, and synthesized reviews of research literature, and (c) critically review and write about underlying theory/conceptual frameworks, you will develop a foundation for future research. The overarching goal of this course is for you to conduct an exhaustive search of the peer-reviewed research literature in your topic area and identify potential areas of inquiry for your dissertation. The Signature Assignment will be to develop a scholarly literature review manuscript suitable for publication in a professional or academic journal.

MHA-5000 - Introduction to Healthcare Management**Semester Credits: 3 Weeks: 8**

This course offers a macro view of the delivery of healthcare services in the United States. An introduction to healthcare leadership competencies, management skills, and the challenges faced by healthcare leaders today is also provided. In this course, you will have the opportunity to examine your own healthcare leadership competencies, interview a healthcare executive, and explore the socio-ecological influences on healthcare organizations. You will also learn concepts and theories that will help you better understand the structures, policies, processes, and the role of information technology in the contemporary healthcare leadership environment.

MHA-5002 - Health Management Leadership Seminar**Semester Credits: 3 Weeks: 8**

In this course you will explore management and leadership theories within the healthcare industry. You will focus on leadership skills and strategies necessary in a healthcare setting and inventory your own personal management style and leadership traits for areas of improvement. Within the scope of healthcare management, you explore the professional and ethical standards of the field.

MHA-5004 - Health Policy & Analysis**Semester Credits: 3 Weeks: 8**

In this course, you will explore health policy as it applies to the context of the United States healthcare system. As a healthcare leader and advocate, understanding how policy decisions are made and the impact of those decisions in healthcare settings is a vital tool. You will analyze the legal basis of existing policies as well as the processes of development and implementation for new policies. You also will evaluate stakeholder needs in healthcare policy development and implementation.

MHA-5005 - Healthcare Quality Management**Semester Credits: 3 Weeks: 8**

In this course, you will investigate quality management within healthcare organizations. You will gain familiarity with the tools and models used in the healthcare industry, as well as the processes necessary to implement quality management techniques within various health organization settings.

MHA-5010 - Health Law and Ethics

Semester Credits: 3 Weeks: 8

In this course, you will examine the legal structures and policies found within the healthcare industry. You will also investigate the legal and ethical issues common to managers and providers in healthcare organizations. Strategies for ethical decision making as well as for communicating with stakeholders also will be discussed.

Health Psychology

PSY-5301 - Foundations in Health Psychology

Semester Credits: 3 Weeks: 8

This course is an introduction to graduate studies in health psychology. Health psychologists use the scientific method to understand the interaction of biological, psychological, and social factors to determine both health and illness. This area of psychology involves the application of psychological principles to prevent illness, improve personal health outcomes, and impact healthcare systems at large. Health psychologists work in helping professions, hospitals, social services, industry, government, and nonprofit organizations for which clinical training is not necessary. Current models/theories, subspecialties, history, ethical concerns, issues related to diversity, and research in health psychology will be explored.

PSY-5302 - Stress and Coping

Semester Credits: 3 Weeks: 8

This course examines sources, manifestations, and coping models for stress. A special emphasis is put on the role of thought and cognition in mediating stress. Students will develop an array of tools for dealing with stress in themselves and others.

PSY-5303 - Behavioral Nutrition

Semester Credits: 3 Weeks: 8

This course introduces the student to evidence-based knowledge on the interaction between nutrition, behavior, and mental health. Various theoretical perspectives on nutrition and health-related behavior change will be introduced. Key behavioral nutrients are identified and the current research on how these nutrients interact with brain functioning and mental health will be assessed. Ethical issues in applying sound scientific knowledge on behavioral nutrition to diverse gender, ethno-cultural and age groups will also be addressed.

PSY-5304 - Collaborative Care and Mental Health Policy

Semester Credits: 3 Weeks: 8

This course will provide an overview of the Collaborative Care Model: its benefits in the delivery of care as well as unique considerations that should be acknowledged while implementing this approach in healthcare settings. Students will explore the fundamentals of the Collaborative Care Model as well as unique mental health policies and practices applicable to that model.

PSY-6104 - Positive Psychology

Semester Credits: 3 Weeks: 8

The course focuses on the positive psychology principles of positive subjective experience, positive traits, and positive institutions. It is an emerging shift within the field of psychology. The emphasis includes a scientific investigation of the latest research of positive psychology focusing on positive human strengths such as optimism, gratitude, hope, and justice. The course offers an opportunity for theoretical exploration and practical application.

PSY-6107 - Adult Psychopathology

Semester Credits: 3 Weeks: 8

This course explores the concept of psychopathology and perspectives on what distinguishes mental health from mental illness and how research and assessment is applied to this field. Various diagnostic categories will be examined as well as the origins, prevention, and interventions related to psychopathology.

PSY-6117 - Psychology of Trauma**Semester Credits: 3 Weeks: 8**

In this course, you will consider trauma as a threat to the meaning system of individuals, a threat that occurs in a cultural and ethnic background and has different meanings for diverse individuals. You will consider how individuals can prevent or prepare for traumatic events, the special situation of trauma in the military, and the role of meaning reconstruction in trauma recovery.

PSY-6304 - Coaching for Health and Wellness**Semester Credits: 3 Weeks: 8**

This course focuses on evidence based approaches for coaching others in the prevention of illness, promotion of health, and living optimally with chronic illness. Key processes such as goal setting, identification of obstacles, and use of personal support systems will be addressed.

PSY-6305 - Capstone in Health Psychology**Semester Credits: 3 Weeks: 8**

The Capstone course in Health Psychology is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MS program. The Capstone course culminates in a review of the evidence based practices related to a specific issue of interest to the student in Health Psychology.

PSY-6311 - Internship in Health Psychology**Semester Credits: 3 Weeks: 12**

Students seeking a master's degree in Health psychology may opt to complete their degree by taking an internship in Health Psychology instead of the Capstone course. During the internship experience, students will meet weekly with their assigned University professor as well as their approved internship site supervisor to discuss their experiences. Weekly assignments include submission of required evaluations and preparation for the final theoretically grounded presentation summarizing the internship experience. Internship experiences are designed to guide candidates through specific standards-aligned experiences with resulting growth in competencies demonstrated through application in practice.

Homeland Security**HS-5101 - Introduction to Homeland Security****Semester Credits: 3 Weeks: 8**

This course introduces students to the contemporary aspects of homeland security and retraces the series of significant changes implemented following the terrorist attacks on September 11th, 2001. Students will gain a broad understanding of a number of multi-faceted homeland security topics relevant to America's present-day domestic and international environments. An overarching analysis of the highly integrated and operationally collaborative nature of modern-day contingency-driven emergency responses by federal, state, local, and (Native American) tribal-level governments, private for-profit corporations, and non-profit organizations are also examined.

HS-6002 - International Crime and Terrorism

Semester Credits: 3 Weeks: 8

In this course, you will address the linkage of terrorism to criminal activity and the effect on the proper response. You will explore the implications for political, law enforcement, and military institutions. Included in this exploration are the global drug trade, human trafficking, and associated criminal activities such as money laundering and arms deals.

HS-6003 - Homeland Security Risk Management**Semester Credits: 3 Weeks: 8**

This course provides students with a comprehensive introduction to the major issues essential for understanding homeland security and its foundation in all-hazard emergency management. Assignments provide the students with the opportunity to examine the use of risk analysis in homeland security operations. Students will examine risk analysis processes in situations from mitigation to recovery.

HS-7000 - Homeland Security and Terrorism**Semester Credits: 3 Weeks: 8**

This course serves as an introduction to the study of homeland security and will provide an overview of the practical discipline, including readings on the various government agencies involved in different aspects of homeland security. The course will also include an overview of the terrorist threat faced today and an examination of how that threat came into being.

HS-7004 - Local Emergency Management and Civil Preparedness**Semester Credits: 3 Weeks: 8**

In this course, students will analyze the operations and preparedness of local emergency management systems and their ability to respond to natural and manmade disasters. Students will learn how the National Incident Management System functions and use it to plan the use of emergency response organizations. Students will explain and assess local community capabilities to maintain the safety of their populations and the processes through which local emergency response agencies can request assistance.

HS-7010 - Transportation Security**Semester Credits: 3 Weeks: 8**

In this course, students will closely examine transportation networks with regard to the security demands now required. The course assignments include the exploration of the threats to each industry and measures needed to secure the networks from a domestic and global perspective. Regulatory agencies, both domestic and international, will be subjects of study as well as national and international agreements.

HS-7013 - Intelligence and Law Enforcement**Semester Credits: 3 Weeks: 8**

In this course, students will take a critical look at the integration of intelligence operations and law enforcement in the realm of homeland security. Topics will also include the composition of the U.S. intelligence community, roles of various U.S. intelligence agencies, and issues facing the U.S. intelligence community. The course provides the knowledge necessary to utilize strategic intelligence effectively in the law enforcement and public safety realm.

HS-7014 - Strategy, Resiliency, and Coping with Fear**Semester Credits: 3 Weeks: 8**

In this course students will have an opportunity to gain a conceptual understanding of the meanings of strategy, national interests, elements of power, and asymmetric threats. Students also will explore the meaning of the concept of resiliency as well as how terrorists use fear to their advantage. An understanding of these concepts will aid any homeland security professional in performing their duties and protecting the populace.

Human Resources Management

HRM-5005 - Introduction to Global HR

Semester Credits: 3 Weeks: 8

The Introduction to Global Human Resources Management is a comprehensive course that provides students with a thorough understanding of how human resource functions integrate throughout organizations and contribute to achieving optimal organizational effectiveness. This course explores the challenges, strategies, and best practices associated with effectively managing a diverse workforce across borders. With a focus on both national and global business environments, students will explore foundational concepts, theories, and effective practices in human resource management. By acquiring this knowledge and developing essential skills, students will be equipped to navigate the dynamic global business landscape with confidence.

HRM-5006 - Global Talent Acquisition Metrics and Analytics

Semester Credits: 3 Weeks: 8

This course is designed to equip students with the knowledge and skills to effectively measure, analyze and optimize talent acquisition strategies and outcomes in a global context. Combining a comprehensive staffing model with a data-driven approach, this course explores the key components of staffing, external influences, and effective staffing system management within a global context. Students will learn how to apply data-driven approaches and utilize key performance indicators (KPIs) to enhance talent acquisition processes and make informed decisions. The course emphasizes the use of metrics and analytics techniques to assess the effectiveness of recruitment strategies, evaluate candidate quality, and optimize workforce planning in multinational organizations. By leveraging data and analytics, students will be equipped to optimize talent acquisition practices, adapt to dynamic global environments, and contribute to organizational success.

HRM-5007 - Global Compensation and Benefits

Semester Credits: 3 Weeks: 8

This course provides a comprehensive understanding of the complexities and strategies involved in designing and managing compensation and benefits programs in a global context. Global compensation and benefits management is a critical link between a multinational enterprise (MNE) and achieving its global strategies. Globalization has impacted the field of Human Resources, particularly in terms of researching, understanding, designing, developing, and assessing compensation and benefits programs. These programs attract and motivate home, host, and third-party nationals for internal assignments. Students in this course will examine the impact of compensation and benefits on an organization's global strategies. They will also learn how to manage compensation and benefits that support the organization's strategies. Global HR professionals need to consider factors that influence global compensation and benefits. This entails a comprehensive understanding of the customs, labor market, legal regulations, labor regulations, economic conditions, political environment, cultural factors, and taxation systems where the organization operates.

HRM-5011 - Global Talent Development and Management

Semester Credits: 3 Weeks: 8

In this course, you will explore the foundations for global talent development and management as well as the strategic role that training and development plays in the management of an international workforce. Roles and practices of HR in the context of global corporations and organizations will be discussed with consideration of cultural issues. Techniques on assessing the organizational needs and designing the appropriate programs for training and development will be analyzed. Also, HR practices and programs in various national and regional contexts will be reviewed to help you develop core competencies necessary for global assignments.

HRM-5012 - Global Employee Relations

Semester Credits: 3 Weeks: 8

This course provides students with a comprehensive understanding of the dynamics and strategies involved in managing employee relations in a global context. Students will examine the history, theories, and practices of labor relations, including the structure and impact of labor unions. They will evaluate the factors influencing employee decisions to organize or participate in union activities, considering cultural, legal, and economic aspects that shape labor relations globally. The course emphasizes risk management strategies in employee relations, including conflict resolution techniques and ensuring compliance with international labor standards. By examining global issues, students will gain insights into the intersection of unionization and the influence of international labor organizations on domestic companies and their employees.

HRM-5013 - Global Cultural Effectiveness**Semester Credits: 3 Weeks: 8**

This course is designed to equip students with the necessary knowledge and skills to navigate the complexities of today's global workplaces. By exploring current trends and issues in employment laws, regulations, and HR policies, students will gain a comprehensive understanding of the global context of employment relationships. Students will examine the cultural and legal aspects that shape HR practices on a global scale. They will delve into the legal and ethical considerations associated with managing HR practices worldwide, including compliance with international labor laws, anti-discrimination regulations, and ethical guidelines. An integral part of the course involves developing a global and cultural perspective on HR management. Students will learn strategies to foster diversity and inclusion and enhance cross-cultural communication. The course emphasizes the importance of aligning HR practices with global business objectives and fostering a supportive and inclusive work culture.

HRM-5014 - Managing a Global & Diverse Workforce**Semester Credits: 3 Weeks: 8**

This course will help you acquire the essential skills to be an effective manager in today's global workplace. You will examine concepts and apply strategies necessary for managing diverse teams and individuals, ethical decision-making, and creating an organizational culture that fosters an accepting culture for a diverse workforce.

HRM-5020 - Capstone**Semester Credits: 3 Weeks: 8**

In this course, you will synthesize the foundational knowledge and skills needed to be an effective human resources leader in a global business environment. The knowledge of main HRM areas will highlight critical roles of managers in terms of utilizing diverse human capital in consideration of improving organizational performance as well as employee satisfaction and well-being.

HRM-6030 - Legal, Ethical & Safety Issues**Semester Credits: 3 Weeks: 8**

A comprehensive analysis of the laws and regulations, both federal and state, that impact human resources management. The course emphasizes equal employment opportunity affirmative action, health and safety, privacy of information and methods of liability prevention in employment matters. Integrated into the course are aspects of ethical considerations as related to Human Resources Management, including employer use of power, organizational business practices, and safety concerns.

HRM-6370 - Workforce Plan, Dev & Outsource**Semester Credits: 3 Weeks: 8**

A comparison and evaluation of planning, organizing, directing and monitoring of human resources planning processes, including recruiting, selecting, placing and integrating individuals within organizations. A key aspect of the course is the selection process (testing and assessment of skills and traits that influence work performance), employee orientation and integration (employee

development and career planning), and aspects of performance management. The course also covers current trends in employee outsourcing.

HRM-6670 - Compensation & Benefits

Semester Credits: 3 Weeks: 8

This course provides an overview of the latest technology as it applies to the human resources function and its impact of human resource management administration and organizational development. The course also integrates and assesses fundamental aspects of wage, salary, benefit administration, and employee rewards and incentives as they are becoming increasingly supported by automated systems.

HRM-7000 - Human Resources Management in the 21st Century

Semester Credits: 3 Weeks: 8

In this course, you will focus on the development of the human resource function in organizations. From exploring employee recruitment, motivation, performance and various forms of compensation and benefits packages, you will view the human resource function in a strategic role that enhances global business environments.

HRM-7002 - Compensation and Benefits

Semester Credits: 3 Weeks: 8

In this course, you will explore the concepts of extrinsic and intrinsic compensation in the management of today's diverse and global workforce. The decisions made in these areas, related to compensation and benefits at the Executive and the employee level, can directly impact the strategic nature and direction of the organization.

HRM-7003 - Labor Relations

Semester Credits: 3 Weeks: 8

In this course, you will explore all aspects of labor relations from a human resources perspective. This will include the history, structure, politics, processes, and relationships associated with bargaining units (unions). You will examine how unions can change attitudes and behaviors of both management and employees, as well as the benefits and challenges to working in a human resources position in a unionized environment.

HRM-7004 - Supervising in the 21st Century

Semester Credits: 3 Weeks: 8

Prerequisites: *Fundamental requirement in General Management

In this course, you will examine supervisory concepts, laws, regulations and HRM practices used in the 21st Century. You will explore techniques for motivating employees as a supervisor of diverse workforces and evaluate the role of supervisors in organizational planning.

HRM-7007 - Cultural Issues

Semester Credits: 3 Weeks: 8

This doctoral course examines the uniqueness of culture and its impact on all areas of organizational operations. This includes such aspects as diversity, global transitioning, accommodations, and cross-national teamwork. The Twenty-First century Human Resources professional must have an open mind and a willingness to suspend judgments, ask questions, and listen to answers.

HRM-7008 - Legal Issues in Human Resources Management

Semester Credits: 3 Weeks: 8

In this course, you will explore multiple levels of employment, including management, full-time employees, part-time employees, temporary employees, and contracted employees based on the passage and interpretation of laws, whether at the federal, state, or local level. Policies such as employment-at-will, right to work, or termination, and other regulations can change with an act of Congress or a state legislature.

HRM-7009 - Organizational Behavior in Human Resource Management**Semester Credits: 3 Weeks: 8**

In this course, you will examine how organizational behavior is relevant to HRM. You will explore theories that support and explain causes and outcomes of typical issues in HRM. In addition to individual behaviors in organizations, team dynamics in relation to organizational structures will be discussed in consideration of organizational goals and employee well-being.

HRM-7010 - Human Resource Management Policy and Implementation**Semester Credits: 3 Weeks: 8**

In this course, you will review policy development processes, how these are implemented and the outcomes resulting from policies being deployed. You will consider various forces that affect HR policies including the needs of global environments, organizations, and employees. You will develop policy implementation plans that include the necessary steps, resource allocations, and measurement of outcomes.

HRM-7020 - Workforce Management**Semester Credits: 3 Weeks: 8**

In this course, you will explore how to manage human resources to optimize organizational effectiveness as well as individual outcomes in a global context. You will consider current laws, public policies, recruitment and retention strategies. In addition, you will determine how employees' concerns and complaints are incorporated into organizational decision-making.

HRM-7022 - Diversity and Inclusion**Semester Credits: 3 Weeks: 8**

In this course, you will explore how the HRM function creates a more inclusive culture by valuing diversity of its workforce. During the course, you will review organizational decisions on diversity issues in order to learn how to avoid discrimination while improving organizational effectiveness. To gain an awareness of corporate best practices, you will examine HRM's role in diversity and inclusion cases.

HRM-7026 - Strategic Human Resource Management**Semester Credits: 3 Weeks: 8**

In this course, you will explore the strategic role of human resources in organizations. Through an examination of HRM functions, you will determine how these align with the strategic direction of organizations. In addition, you will consider the potential contributions and challenges that HRM might face, especially during organizational change processes. You will then develop HRM initiatives that help achieve organizational goals.

Inclusive Leadership**INL-5000 - Developing Competencies for Global Inclusive Leadership****Semester Credits: 3 Weeks: 8**

Inclusive leaders are committed to strategies that promote diversity, equity, inclusion, social justice, and cross-cultural

competencies in the workplace. In this course, you will learn the key competencies, principles, theories, and practices of inclusive leaders. Leaders of global organizations and companies must navigate cultural and interpersonal differences and know how and when to leverage human capital to sustain organizational growth. Developing skills in interpersonal relationships, conflict management, intersectionality, systems thinking, as well as emotional, social, and cultural intelligence are some of the foundational elements of inclusive leadership. By the end of this course, you will understand the business case for inclusiveness and be able to practice the skills of equity-minded leaders.

INL-5010 - Leveraging Global Diversity for Results

Semester Credits: 3 Weeks: 8

Inclusive leaders engage talent acquisition and retention strategies to increase the talent pool and encourage diverse perspectives to drive individual and team performance. Creating an inclusive workplace eliminates impediments so that employees are respected and their endeavors are valued. As organizational leaders engage various stakeholders, the ability to leverage the power of diverse teams is critical. In this course you will learn the use of empowerment, accountability, and collaboration to lead high-performing groups and to champion diversity, equity, and inclusion in their organizations. You will also learn why team members engage and how to recognize patterns of disengagement.

INL-5020 - Leading the Inclusive Organization: Empathy, Equity, and Accountability

Semester Credits: 3 Weeks: 8

In this course you will gain awareness and tools for successfully building and leading inclusive organizations. You will assess and gain insights into your strengths and identify opportunities for targeted growth on selected inclusive leadership skill dimensions. You will learn how to improve your cross-cultural competence and exercise moral courage to challenge false assumptions, and the roles that mentorships, sponsorship programs, and affinity groups play in developing inclusive teams to create allies within the organization. Through this course, you will learn how to use one-on-one strategies such as emotional intelligence, active listening, courage, humility, and curiosity, to lead the inclusive organization with trust, fairness, and consistency.

Information Technology

TIM-5000 - Principles of Information Technology for the IT Professional

Semester Credits: 3 Weeks: 8

Information technology is an evolving profession where professionals must remain current with emerging technologies to reliably support enterprise or organizational operations. During this introductory course, you will learn about the evolution of information technology, the primary IT components and functions, the IT solutions development process, and the role of technical policies and IT protocols to provide a baseline of knowledge to support you through the program. You will also explore relevant legal, ethical, privacy, and security issues affecting information technology in today's technology environments.

TIM-5025 - Networks, Clouds and Mobile Computing

Semester Credits: 3 Weeks: 8

This course introduces the networks, and the accommodation of cloud, IoT, and mobile computing environments that are essential components of today's successful organizations. During this course, you will study the features, topologies, protocols, and services that contributed to the evolution of global communications and data exchange. You will also explore the architectures, components, and structures for telecommunications related devices, and examine the tools and methods used to configure and manage remote and virtual environments. By the end of the course, you will model a network architecture with basic network security considerations to support all devices and services.

TIM-6350 - Network Modeling and Design

Semester Credits: 3 Weeks: 8

Network design is a dynamic endeavor that constantly changes to accommodate the increasing demands of cloud, mobile, and virtual environments. This course provides a detailed study of the hardware appliance configuration and parameter setting requirements of network design models. During this course, you will create a network model and evaluate the configuration settings for safety and performance using network modeling tools. You will also study addressing schemes and capacity planning techniques to increase network performance by reducing the probability of collisions and congestion.

TIM-6360 - Advanced Network Risk Management**Semester Credits: 3 Weeks: 8**

As the industry and networking landscape evolves, technology experts must take proactive measures to manage the risks that threaten IT networking. This course provides a detailed study of applied strategies and tools for mitigating risks that threaten networks and connected technologies. During this course, you will measure the impact of threats and vulnerabilities and apply risk identification, modeling, and analysis tools to manage and control network performance. You will also create risk reduction solutions that comply with legal requirements, support operations and services, and ensure a reliable technology platform.

TIM-6370 - Network Governance, Control and Assurance**Semester Credits: 3 Weeks: 8**

Legal requirements and standards require compliance with specific statutes and control measures. Thus, network and data administrators must be able to write and update network management standards and procedures. During this course, you will explore the concept of network governance and identify the requirements needed to configure and implement a reliable IT installation. You will also explore high-level IT policies and ways to translate them into measurable controls to enforce data and process integrity. This is the foundation of secure physical and cloud-based electronic working environments.

TIM-6445 - Wireless Networking**Semester Credits: 3 Weeks: 8**

Today's networking landscape has been transformed with the inclusion of cloud and mobile computer platforms. These additional platforms, along with the internet of things (IoT), neural networking, and AI, require the need for stronger network configurations, management, standards, and practices. This course provides an in-depth examination of wireless networking devices and tools (hardware and software). During this course, you will apply network standards and protocols to enhance a networking landscape to improve wireless communications in support of multiple IT platforms.

TIM-6450 - Advanced Network Administration**Semester Credits: 3 Weeks: 8**

In this advanced network administration course, you will be immersed in the critical considerations needed for a strong networking platform, with a focus on the physical layers of the Open Systems Interconnection (OSI) model. During the course, you will study advanced topics about the effective design, implementation, and administration of networking hardware and software. By the end of the course, you will develop an advanced standard protocol for device configuration that avoids collisions and improves network security.

TIM-6590 - Strategic Management of IT Systems and Services**Semester Credits: 3 Weeks: 8**

Effective information technology professionals must be able to assess, plan, implement, and manage technical systems and services to ensure their integrity. During this capstone course, you will demonstrate the knowledge and skills gained throughout the Master of Science in Information Technology program by creating and presenting a comprehensive IT implementation plan. The strategic implementation plan should integrate strategies for improvement, including industry standards, metrics, procedures,

and tools. It should also integrate hardware and software configurations, multiple operating systems, applications, and data protection rules to support organizational operations.

Industrial/Organizational Psychology

IOP-8400 - Industrial/Organizational Psychology

Semester Credits: 3 Weeks: 8

This course focuses on how psychological principles are applied in work settings. Current models, theories, and research in industrial/Organizational (I/O) Psychology will be explored. The role of attitude and motivation, as well as group factors and leadership in forming a social context for work will also be addressed.

IOP-8404 - Consulting in Business, Education, and Health

Semester Credits: 3 Weeks: 8

Consulting in businesses, schools, and mental health settings requires an array of personal skills, knowledge and information, and techniques. In this course you will learn how to develop the personal skills and understanding of consulting to give you a basis to develop a successful consulting program.

PSY-5111 - Applied Statistics in I/O PSY

Semester Credits: 3 Weeks: 8

This course introduces theories and concepts of applied statistics in I/O Psychology. Students will learn about commonly used statistical tests in I/O research, their creation, and interpretation. The role of ethics and diversity in the application of statistical testing also will be explored.

PSY-5401 - Foundations in I/O Psychology

Semester Credits: 3 Weeks: 8

This course is an introduction to graduate studies in Industrial/Organizational (I/O) Psychology. This area of psychology involves the application of psychological principles to work settings, which includes personnel selection, training and development, performance management, stress and motivation, work attitudes, leadership, teams, and work-life balance. Current models, history, ethical and legal concerns, and research in I/O Psychology will be explored. In addition, graduate-level skills—such as academic integrity, effective use of the University Library, comprehension of complex scholarly texts and research articles, and use of APA format and style in professional communication—are also introduced. Students will complete the course with a roadmap to navigate their way to completion of their educational aspirations.

PSY-5402 - Organizational Development

Semester Credits: 3 Weeks: 8

This course explores the role of the Organizational Development (OD) practitioner in supporting and/or leading change in individual, group, and organizational settings. In order to facilitate change so that it enhances productivity, students will learn about the evolution of organizational development, the process of change, and the many types and components appropriate in different OD situations. Student will also examine the principles, theories and ethics of organizational development and change. The goal of this course is for students to be able to both manage and implement interventions to remake the way an organization functions.

PSY-5403 - Personnel Selection and Recruitments

Semester Credits: 3 Weeks: 8

This course introduces personnel recruitment and selection as an evidence-based practice used to identify and recruit qualified candidates to apply for jobs with an organization. Students will focus on theories and principles of personnel recruitment and selection from an I/O perspective. Students will evaluate the personnel recruitment and selection methods and assessment tools. Personnel selection strategies and decisions also will be discussed.

PSY-6411 - Internship in I/O Psychology

Semester Credits: 3 Weeks: 12

Students seeking a master's degree in I/O psychology may opt to complete their degree by taking an internship in I/O psychology instead of the Capstone course. During the internship experience, students will meet weekly with their assigned University professor as well as their approved internship site supervisor to discuss their experiences. Weekly assignments include submission of required evaluations and preparation for the final theoretically grounded presentation summarizing the internship experience. Internship experiences are designed to guide candidates through specific standards-aligned experiences with resulting growth in competencies demonstrated through application in practice

PSY-6414 - Small Group Theory and Team Processes

Semester Credits: 3 Weeks: 8

This course examines the small group and team processes in the workplace. Topics include team development, effectively leading teams, the establishment of group norms and goals, group problem solving and decision making, and resolving group conflict. Both research and application of concepts are highlighted.

PSY-6421 - Psychology of Leadership

Semester Credits: 3 Weeks: 8

Students in this course will examine leadership in the modern global workplace, emphasizing the elements of a good leader. Trait, behavior, contingency, and contemporary theories of leadership and management will be explored. Legal and ethical/moral issues as well as gender and sociocultural challenges will also be highlighted throughout the course. Additional topics include: leadership skill development, managing conflict, developing a leadership vision, leading groups and teams, and leadership versus management. Students in this course will gain an understanding of their own leadership style and improve their leadership self-awareness.

PSY-6422 - Work Motivation and Employee Engagement

Semester Credits: 3 Weeks: 8

This course reviews motivational theories and evaluates their application to employees and groups within the workplace. Aspects of employment engagement to be covered include job enrichment, employee voice, employee empowerment, and employee satisfaction.

PSY-6423 - Training and Evaluation

Semester Credits: 3 Weeks: 8

In this course, students will develop an understanding of employee development and performance improvement by examining methods of workforce training and program evaluation in organizations. Topics include adult instruction strategies, competency modeling for professional development, job retraining, skills-gap and needs analysis, return on investment, transfer of training, and organizational change. The role of training in organizational health will be highlighted and emerging trends in training methods for a global, virtual workplace will be discussed.

PSY-6425 - Survey Methods and Organizational Behavior

Semester Credits: 3 Weeks: 8

This course covers development and usage of organizational surveys and related topics, such as attitude measurement, job satisfaction, and the evolving uses of surveys in organizations. Students will examine the challenges faced by consultants in designing and implementing organizational surveys, such as potential sources of bias, respondent recruitment, data collection methods, and ethical issues related to privacy.

PSY-6429 - Capstone in I/O Psychology**Semester Credits: 3 Weeks: 8**

The Capstone course in I/O Psychology is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MS program. The Capstone course culminates in a review of the evidence based practices related to a specific issue of interest to the student in I/O Psychology.

Instructional Design

EL-5004 - Designing for E-Learning**Semester Credits: 3 Weeks: 8**

The focus of this course is instructional design for e-learning. You will use established frameworks and models as platforms for interpreting front-end analyses through recommending assessment strategies, all from the perspective of digital modalities. You will also explore professional standards and competencies related to instructional design generally and digital environments, in particular.

ID-5040 - Design Principles for Multimedia Learning**Semester Credits: 3 Weeks: 8**

In this course, you will explore different design principles for multimedia learning. You will not only evaluate factors that impact the effectiveness of multimedia for various learning contexts and audiences, you will also measure the effectiveness of such multimedia learning. You will then be able to provide stakeholders with methods for selecting and designing multimedia as well as ways to optimize existing multimedia solutions. Based on your learning, you will use different tools to design your own multimedia assets.

ID-5045 - Design Principles for Multimedia Learning - MEd**Semester Credits: 3 Weeks: 8**

In this course, you will explore different design principles for multimedia learning. You will not only evaluate factors that impact the effectiveness of multimedia for various learning contexts and audiences, you will also measure the effectiveness of such multimedia learning. You will then be able to provide stakeholders with methods for selecting and designing multimedia as well as ways to optimize existing multimedia solutions. Based on your learning, you will use different tools to design your own multimedia assets.

ID-5060 - Authoring Tools for Design and Development**Semester Credits: 3 Weeks: 8**

This course allows you to evaluate authoring tools for the design and development of instructional and training solutions. You will investigate the benefits and limitations of different authoring tools and use these tools to sketch storyboards and produce authentic products for instruction and training. Throughout the course, you will examine ethical, legal, and political influences on the selection and use of authoring tools. You will continue to showcase your developing competencies through your digital portfolio.

ID-8900 - Foundations of Instructional Design

Semester Credits: 3 Weeks: 8

This course explores the current best practices and the future of instructional design. Students will examine instructional solutions and recommend procedures for collaboration projects that are based on relevant assessment and evaluation data. Students will produce media-rich learning assets that are appropriate for specific design projects.

ID-8910 - Models of Instructional Design

Semester Credits: 3 Weeks: 8

This course will explore various models of instructional design. Students will evaluate instructional design models using an evaluation method that will validate the use of the models for future educational trends. Students will generate research-based recommendations for evaluating instructional and training solutions and develop strategies that address resistance to these solutions.

ID-8920 - Theoretical Foundations of Instructional Design Practice

Semester Credits: 3 Weeks: 8

This course will explore the theoretical foundations of instructional design and their influence on design projects. Students will generate theory-based solutions that address design project needs, justify theoretical foundations used in design practices, and integrate these foundations for performance improvement.

ID-8930 - Interactive Media Design

Semester Credits: 3 Weeks: 8

This course explores the design and appropriate use of interactive media in current and future instructional and training solutions. Students will evaluate delivery systems for interactive media and utilize design methods based on audience and learning context. Students will explore gaming theory and the use of inclusionary practices in designing interactive media.

ID-8940 - Accessible Design in ID

Semester Credits: 3 Weeks: 8

This course will explore the various considerations and challenges to developing culturally relevant and inclusive pedagogical practices in design projects. Students will examine various laws, populations, and responsibilities related to inclusion in instructional design and will evaluate instructional design models and frameworks that work best for these practices. Students will recommend media and assistive technology for use in instructional design projects.

ID-8950 - Project Management

Semester Credits: 3 Weeks: 8

This course explores the various components of project management and establishes best practices in the field of instructional design. Students will examine the role of key stakeholders in the project management team and will identify optimal communication strategies for all stakeholders. Students will examine all stages of project management including formulating a project plan and implementation strategy, creating a process to monitor progress and maintain quality control, and evaluate the efficacy of the completed project.

ID-8960 - Applied Design & Development

Semester Credits: 3 Weeks: 8

This course will provide application of the topics covered in previous courses for use in design and development projects.

Students will reflect on professional growth in the instructional design program and will compile relevant theory to make design choices and justify chosen design models. Students will specify project management processes and produce media-based portfolio supported by theory and practice in instructional design.

Instructional Leadership

IL-5000 - Instructional Leader as Creator of Learning Culture

Semester Credits: 3 Weeks: 8

In this course, students explore the knowledge, skill sets and behaviors that enable instructional leaders to establish and sustain professional learning cultures. Students will have the opportunity to expand their knowledge base per curriculum and its function(s) in educational settings. Students pursuing a specialization in instructional leadership will take this as their first course.

IL-5001 - Instructional Leader as Advocate and Decision Maker

Semester Credits: 3 Weeks: 8

In this course, students examine the role of instructional leader as decision maker. The importance of this particular role is grounded in the realization that the instructional leader articulates the vision that reflects the mission, core values, beliefs, and purpose of the educational enterprise. Additionally, the instructional leader's role as advocate is to support the development and maintenance of high standards of performance and achievement. As decision maker and standard bearer for the enterprise, the instructional leader models the way and leads by example.

IL-5002 - Instructional Leader as Community Conduit

Semester Credits: 3 Weeks: 8

In this course, students will investigate diverse leadership approaches to effective community engagement. Mastery is attained by creating a needs assessment to evaluate the strength of family, school, and community partnerships. Topics include: Professional Learning Communities, public relations, mission and vision, and instructional leadership roles and responsibilities.

International Business

IBU-6370 - Comparative International Management

Semester Credits: 3 Weeks: 8

This course studies the impact of country-specific cultural, economic and legal factors on the theory and practice of managing multinational corporations. Case studies focusing on North American, Latin American, European and Asian settings are used to illustrate the feasibility of adapting and combining different national management styles in the operations of domestic and multinational corporations.

International Education

IE-5001 - Introduction to Global and Comparative Education

Semester Credits: 3 Weeks: 8

In this course, students will develop the skills needed to be effective educators in a global society. Students will explore the connections between diverse education systems and evaluate various theories of comparative education. Topics include: comparative and global education, cross-national comparative analysis, global educational transfer and borrowing, and tools and instruments used in global education.

IE-5003 - International Education Concepts and Theory

Semester Credits: 3 Weeks: 8

In this course, students will explore concepts and theories of education systems around the world, including the cultural and historical bases of these systems and the spread of educational trends across the globe. Alternative theories and definitions of development, as expressed in international education institutions, will be evaluated. Students will be required to consider the challenges of reform and unique practices in international contexts. In addition, students will integrate an understanding of diverse educational perspectives through the evaluation of worldwide educational systems.

IE-5005 - International Organizations in Global Education

Semester Credits: 3 Weeks: 8

In this course, students will be introduced to global education organizations. Students will explore diverse organizations engaged in international education, ranging from the International Baccalaureate Program to UNESCO to NGOs, and examine key guiding initiatives and policies. This course also provides a good orientation to students who anticipate working with or for international organizations.

IE-5007 - Conflict Resolution in an International Context

Semester Credits: 3 Weeks: 8

In this course, students will examine the conceptual underpinnings of peace and conflict resolution and the paradigmatic models of conflict resolution. Substantive inquiry into a variety of peace building approaches on local, national, and global levels will also be explored. Students will develop the knowledge and appreciation of the theoretical, conceptual, and methodological breadth of the conflict resolution in an international context.

IE-5013 - Globalization and Educational Change

Semester Credits: 3 Weeks: 8

In this course, students will explore the theories and practices to effect positive global educational change. With a focus on pre-primary, primary and secondary education, students will examine practices that reflect how globalization is impacting learning and teaching. This includes gaining research practice in conducting interviews. Ultimately, students will be encouraged to act as change agents ready to examine education from a global perspective.

IE-5021 - Education and National Development

Semester Credits: 3 Weeks: 8

In this course, students will explore the development of education nationally and internationally, and will make cross-national comparisons. Students will examine education in developed and emerging nations with a comparative perspective, including comparisons of school practice, teacher training, and policies that influence the provision of education, and challenges of educating citizens in transitional societies.

International Education and Globalization

IEG-7100 - Introduction to International and Global Education

Semester Credits: 3 Weeks: 8

In this first International Education and Globalization course, you will analyze the practices of international and global education and investigate instructional and technological practices. You will also evaluate current education theories, critique comparative analyses, and assess the benefits and challenges of international and global education. Finally, you will synthesize the concepts of culture, diversity, equity, and inclusion in international and global education.

IEG-7200 - Perspectives on Culture, Society, and Education

Semester Credits: 3 Weeks: 8

In this course, you will evaluate comparative education trends and cycles in global education and explore the influence and relevancy of culture on international and global education. Further, you will assess methods to promote culturally responsive pedagogy and andragogy in educational research and practices. You will also analyze intercultural and multicultural education issues with respect to diversity, equity, inclusion, and opportunity in educational systems and appraise the quality of international education programs. Finally, you will evaluate global competitiveness in education.

IEG-7300 - Educational Conflict, Mediation, and Resolution

Semester Credits: 3 Weeks: 8

In this course, you will review the concepts of conflict, mediation, and resolution related to diverse educational environments and investigate strategies for mediation and resolution with respect to diversity, equity, inclusion, and social justice. Additionally, you will evaluate various initiatives addressing educational conflict, mediation, and resolution. You will critique mediation techniques used during conflict resolution situations for achieving collaborative educational environments. Finally, you will synthesize the concepts of conflict, peace, and citizenship with regard to international and global education.

IEG-7400 - Globalization and International Education Policy

Semester Credits: 3 Weeks: 8

This course offers you a chance to evaluate international and global policy initiatives and analyze the influence of globalization on educational change. You will also determine organizational policy practices for implementing international and global education and relate policy development to organizational growth and change in international and global education. Finally, you will critique organizational strategic planning concerning globalization and international education.

IEG-7500 - Ethical Issues and Responsibilities in International and Global Education

Semester Credits: 3 Weeks: 8

In this course, you will critique theories relating to ethical practices and interpret the ethical implications of international and global educational practices. You will also assess the ethical implications of technology in international and global education. You will validate how culture contributes to the ideas of truth and values and develop ethical practices affecting diversity, equity, inclusion, and social justice within international and global education.

IEG-7600 - Capstone: Theory and Leadership in International Education and Globalization

Semester Credits: 3 Weeks: 8

In this capstone course, you will synthesize leadership skills and behaviors fostering the enhancement of professional leadership competencies. You will evaluate leadership theories relevant to international and global education. You will also promote leadership skills for effective organizational functioning and assess international and global education leadership practices. Finally, you will advocate for leadership practices supporting diversity, equity, inclusion, and social justice in international and global education.

Leadership in Higher Education

LHE-5004 - The Organization of Higher Education

Semester Credits: 3 Weeks: 8

Students will receive an introduction to the classical theories, traditional models, and historical/contemporary approaches and

structures relative to organizational governance in higher education. Topics to be covered include organizational theory, governance models, campus climate, institutional change, and diversity.

LHE-5005 - Exploring Legal Issues in Higher Education

Semester Credits: 3 Weeks: 8

Students will develop a fundamental understanding of the importance of legal issues in higher education and their impact on individual rights and responsibilities as well as those of institutions of higher education. Topics include academic freedom, liability for student behavior, separation of church and state, antidiscrimination statutes, and academic discipline.

LHE-5008 - Financial Issues in Higher Education

Semester Credits: 3 Weeks: 8

In this course, students will receive an overview of financial issues applicable to higher education in the United States. Students will engage a broad foundation of theory, practice, research, and policy of higher education economics. Topics will include societal investment in higher education, methods of finance, costs of higher education, and budgeting concepts.

LHE-5009 - A History of Higher Education

Semester Credits: 3 Weeks: 8

In this course, students are introduced to the historical origins of higher education in the United States. Significant periods in the development of higher education in this country are covered, as well as the evolution of today's contemporary and complex system of higher education. Topics include: education models, progressive movements, federal higher education acts, community colleges, access, diversity and opportunity.

LHE-5010 - Topics in Higher Education

Semester Credits: 3 Weeks: 8

In this course, students will explore areas of interest in higher education. Often these areas are new topics in higher education. At times, areas of higher education that are receiving attention nationally will be highlighted through this course. Students will work with instructors to create a self-directed study plan on a topic appropriate for master's-level study.

LHE-5011 - Leadership for Higher Education

Semester Credits: 3 Weeks: 8

Students are provided an introduction to higher education leadership and theories. Emphasis will be given to the practical application of higher education leadership for administrative roles in an institution of higher education. Theoretical implications of the administrative role will support the applied approaches.

LHE-5013 - The Community College

Semester Credits: 3 Weeks: 8

In this course, students are provided general and introductory understanding of curricular and leadership issues in a community college setting. Topics to be explored include all issues related to the community college curriculum relative to program development, student services, and leadership as well as assessment.

LHE-7100 - Leadership, Management, and Supervision in Higher Education

Semester Credits: 3 Weeks: 8

In this course, you will explore the differences between leadership, management, and supervision as a context for the entire Leadership in Higher Education (LHE) specialization. You will ground your exploration in historical leadership trends and the importance of diversity, equity, and inclusion in higher education. You will examine the role of shared governance as well as managing change and conflict. Theoretical and applied considerations are included in the course.

LHE-7200 - Student Services in Higher Education**Semester Credits: 3 Weeks: 8**

There are many functions within the area of higher education student services. You will explore these functions across the student lifecycle in a variety of delivery modalities. Some of the functions you will explore in this course include enrollment, advising, academic support, accommodations and modifications, as well as persistence and retention through to graduation. You will have the opportunity to examine these functions generally within higher education as well as specifically related to the context of your individual interests.

LHE-7300 - Legal Issues in Higher Education**Semester Credits: 3 Weeks: 8**

Higher education institutions in the United States are bound by different legislation and regulation. There are also different types of institutional and programmatic accreditation that leaders must consider. In this course, you will explore the implications of these different accreditations, regulations, and legislation with specific attention to institutional self-studies and issues of copyright and fair use across different types of institutions.

LHE-7400 - Academic Program and Curriculum Development in Higher Education**Semester Credits: 3 Weeks: 8**

The facilitation of learning is the core function of all institutions of higher education. As a leader in higher education, you need to know how this core function is designed and maintained. In this course, you will explore academic program planning and evaluation, theories and principles of curriculum development, assessment of student learning, and the value of open educational resources and co-curricular activities. You will be able to tailor your work in this course to your current or future institutional contexts.

LHE-7500 - Financial Considerations in Higher Education**Semester Credits: 3 Weeks: 8**

Financial considerations in higher education can be complex. While accounting departments may be responsible for most of the details, higher education leaders need to understand the scope of the financial considerations across the institution. In this course, you will examine budget cycles and specific budgets of higher education institutions. You will explore sources of revenue, including financial aid, grants, and fundraising, and the regulations that govern these activities within higher education institutions in the United States. Throughout your examination, you will consider the role of fiscal accountability and related challenges.

LHE-7600 - Strategic Planning and Operations in Higher Education**Semester Credits: 3 Weeks: 8**

The operational complexity of higher education institutions grows exponentially with the size of the institution. In this course, you will investigate the typical departments and processes before examining more specific operational aspects of higher education institutions, such as human resources, data-based decision making, institutional effectiveness, environmental scanning, strategic planning, and continuous improvement. Your exploration will consider your specific interests in these topics and types of institutions.

Law and Business

MLB-5000 - Introduction to U.S. Law and Legal Systems

Semester Credits: 3 Weeks: 8

In this course students will examine how the legal system in the United States was created, and how it has changed over time. Students will be oriented to the sources and types of law, the process of creating and enforcing laws, and the methods of resolving legal conflicts. The course will introduce students to various substantive areas within the law and they will have the opportunity to read and interpret primary legal sources.

MLB-5010 - Legal Research, Writing, and Analysis

Semester Credits: 3 Weeks: 8

In Legal Research, Writing, and Analysis, students will learn the fundamentals of legal research, writing, and analysis. Students develop and execute research strategies and conduct searches through dedicated legal search engines to locate primary authority. Along with research methods, students will analyze legal concepts, and apply them through the process of legal writing. Students gain the skills and resources needed to communicate their research effectively.

MLB-5020 - Ethics and Professional Conduct

Semester Credits: 3 Weeks: 8

This course will examine the fundamental ethical and legal theories and issues that impact the business environment. This course will focus on specific ethical and legal rules that govern business practices, including whistleblower laws, privacy, technology, diversity, product liability, contracts, and intellectual property. In addition, the course will examine and analyze case studies that assist in identifying relevant ethical and legal standards within a business environment.

MLB-5030 - Civil Procedure and Litigation

Semester Credits: 3 Weeks: 8

Civil procedure is the roadmap that litigants, lawyers and judges use to navigate the civil legal system. Whether they are state-specific, or contained in the Federal Rules of Civil Procedure, the rules describe, among other things, how to commence a case, what the time frames are for answering a complaint or responding to a motion, and how to conduct a trial. This course explores how the rules provide guidance on all aspects of the civil case from pre-action filings through post-trial procedures. In this class, you will learn that civil procedure and litigation are inextricably intertwined because only by following proper procedure can one successfully commence a case, perform discovery, prepare for trial, pick a jury and then try the case.

MLB-5040 - Contract Law: Analysis and Drafting

Semester Credits: 3 Weeks: 8

In this course students will be introduced to the legal issues and fundamental building blocks related to contract formation, enforcement, avoidance and termination. Students will also examine the drafting and interpretation of certain common contractual provisions and the analysis of basic contract language.

MLB-5050 - Strategic Professional Communication

Semester Credits: 3 Weeks: 8

This course is offered to increase understanding and develop appreciation of communication processes in law and business. Topics covered include effective writing and speaking methodologies for a variety of audiences, interpersonal communication techniques within global legal and business environments, the utilization of effective tone and language in virtual and non-virtual

settings and so on. Students will be expected to prepare and present business and law-related written assignments and oral presentations.

MLB-5100 - Healthcare Legal Compliance

Semester Credits: 3 Weeks: 8

This course will serve as an advanced study of leading-edge concepts and laws concerning the interaction and business between health care providers and those served in compliance. Topics will include ethical considerations, patient record requirements, confidentiality and informed consent, access to public health information, risk management, and health care fraud and abuse. Law cases in healthcare compliance will be examined. Readings will include the textbook and web-based resources.

MLB-5200 - Law and Organizational Management

Semester Credits: 3 Weeks: 8

In this course students will learn the fundamental questions and issues relating to the formation and organizational structure of a variety of business entities commonly used in the United States. Further, students will explore substantive areas of law and the regulatory environment that are often needed and encountered in operating a business.

MLB-5300 - Spanish for Professionals in Law and Business

Semester Credits: 3 Weeks: 8

This course provides a knowledge of basic Spanish terminology to assist professionals in the business and legal profession communicate with clients and other professionals, including a focus on Spanish vocabulary used in a range of legal and business situations. The course will be taught in English and will explore Spanish basic terminology, both in written and oral format, that deals with a range of professional and legal situations, including seeking employment, business travel, business, and legal correspondence, gathering client information, immigration law, real estate transactions, employment law, criminal and personal injury law, telephone, and office etiquette.

MLB-5310 - Immigration Law

Semester Credits: 3 Weeks: 8

In this course students will learn basics of immigration law in the United States. Students will learn about the historical development of U.S. immigration law from the founding to today and about the structure of the federal government and its role in establishing and implementing U.S. immigration law. Students will examine the sources of immigration law, the process of creating and enforcing it, and how it is applied in the workplace. Students will learn about important immigration concepts, such as admissibility, visas, citizenship, protection from harm, and removability. The course will introduce students to the various ways people come to the U.S., whether through nonimmigrant or immigrant visas, employment-based or family-based visas, or through entrepreneurship.

MLB-5400 - Intellectual Property

Semester Credits: 3 Weeks: 8

This course is a study of core areas of the business and legal aspects of intellectual property: trademark, trade secrets, patents and copyrights. It examines fundamental principles of these bodies of law, their underlying policies, and how the laws inter-relate. Specific focus will be upon ethical situations involving intellectual property. Students will also read cases and prepare briefs on areas related to the subject matter.

MLB-6000 - MLB Capstone

Semester Credits: 3 Weeks: 8

The capstone course is designed not as an end to a journey but the beginning. It is a case-based approach, grounded in business

and legal literature and study that allows the student to come full circle in his/her scholastic journey. The student will research and provide written analyses on various topics in legal and business fields including but not limited to contracts, torts, etc. In this way the student will demonstrate his/her ability to integrate practical skills and theoretical knowledge obtained in earlier courses. Activities include the drafting of case briefs.

PAC-5010 - Privacy Law and Data Protection

Semester Credits: 3 Weeks: 8

This course will help students acquire a solid knowledge of the statutory landscape in the U.S. Students will explore the practical aspects of navigating complex privacy requirements to better understand privacy laws and data protection. Students will evaluate best practices and historical context to protect an organization and safeguard P.I.

PAC-5020 - Internal and External Compliance

Semester Credits: 3 Weeks: 8

This course will explore the strategies for assessing risks and managing compliance functions. Students will be introduced to compliance programs that address an organization's specific risk profile. The impact of a robust and ethical compliance program will be explored. Students will evaluate formal compliance programs and recommend practical strategies to create compliance policies and procedures that address and prevent corruption.

MBA Courses

MBA-5102 - Changing Times - Business in the 21st Century

Semester Credits: 3 Weeks: 8

In this course, you will consider the impact of current trends such as 21st century leadership related to globalization and sustainability through the utilization of management and technology tools. The subsequent core courses will provide a greater in-depth knowledge of business concepts and areas in an integrated fashion.

MBA-5110 - Managing People and Teams

Semester Credits: 3 Weeks: 8

This course is designed to prepare you to lead in today's global environment. You will examine concepts and strategies regarding global leadership. You will acquire skills relevant to managing human capital and teams, ethical decision-making, navigating organizational change, and budgeting/allocating resources across borders and cultures.

MBA-5121 - Managerial Decision-Making

Semester Credits: 3 Weeks: 8

This course is designed to help you develop the understanding, skills, and cognitive processes that managers utilize for effective decision-making. This includes assessing the factors that influence effective business decisions in the global business environment. You will learn practical problem-solving and critical thinking in their analysis of real-world business scenarios, selection of tools and techniques, and identification of problems, opportunities, and solutions. You will also explore how information technology can provide effective decision support for complex business issues.

MBA-5130 - Managing Business Finances

Semester Credits: 3 Weeks: 8

In this course, you will review procedures, process, and tools to effectively manage business finances. You will apply and practice these concepts in a wide range of simulated business and managerial situations. Topics include; Business and managerial

economics, profit and loss, understanding financial reports, financial risk analysis, asset valuation, budgeting, managerial and financial accounting, financial ethics, and cost management. You will practice using financial tools and case studies to aid in your analysis and financial decision-making.

MBA-5140 - Operations Management

Semester Credits: 3 Weeks: 8

In this course, you will be introduced to operations management principles, including planning, organizing, coordinating, and controlling all the resources needed to produce a company's goods and services related to business strategy. You will learn how to assess effective business operations utilizing a global supply chain with diverse and geographically-dispersed suppliers and customers. You will also examine how information systems affect operational productivity, competitiveness, automation of business processes, and Internet-based commerce.

MBA-5150 - Innovation and Marketing

Semester Credits: 3 Weeks: 8

The competitive marketplace gives consumers choices. Marketers need to understand the dynamic nature of consumers' needs and wants, gather relevant data, conduct analyses of both consumers and the competition. To maintain their competitive edge, marketers need to launch innovative products at opportune times. In this course, you will research what makes a product innovative and the challenges marketers face to make innovative products available in the marketplace with the right marketing mix and effective marketing strategies. You will study the need for performance measures to determine if marketing objectives will be met in a timely manner.

MBA-6010 - Strategic Planning

Semester Credits: 3 Weeks: 8

You will develop skills to effectively formulate strategic plans utilizing R&D, marketing, production, finance, human resources, and TQM to determine strengths and weaknesses. This will include the use of SWOT and PEST analysis techniques for assessing market position and direction for growth.

MSOL Courses

MSOL-5000 - Leadership Development and Practice

Semester Credits: 3 Weeks: 8

In this course, you will begin to develop and enrich your leadership skills, while exploring historical trends in management through the lens of leadership theories and behaviors. In the leadership role, you will analyze and apply concepts and models to real organizational situations. Through self-assessments, explore your own leadership style, skills, and goals to create a personal leadership profile that will grow throughout the program.

MSOL-5102 - Ethics and Decision Making

Semester Credits: 3 Weeks: 8

In this course, you will continue your journey of leadership development through introspective reflection, examining your personal/organization values in business and societal settings. You will develop skills in ethical decision making to further enhance organizational performance and goal achievement.

MSOL-5103 - People, Processes, and Organizational Health

Semester Credits: 3 Weeks: 8

Today's organization is immersed in a competitive and dynamic environment requiring adaptive organizational structures to increase capacity and create a framework for development and growth. Within the organizational environment, leaders must be equipped to resolve conflict. The emphasis in this course is on leadership and relationship styles among individuals within the organization. You will develop skills needed to lead diverse teams, develop others, and apply strategies to create a culture of continuous improvement.

MSOL-5104 - Leadership: Change, Crises, and Communication**Semester Credits: 3 Weeks: 8**

Leading change is one of the most important and difficult challenges facing any leader. This course is an introduction to the role of leadership in managing change and responding to organizational crises. As a leader, you will analyze strategies for managing change as a constant state, evaluate situations for potential crises, and develop proactive approaches for crisis management. Effective communication strategies are key to successfully leading through these situations.

MSOL-5105 - Leadership and Organization Strategy**Semester Credits: 3 Weeks: 8**

Organizational strategy is impacted by increasing globalization, uncertainty in the marketplace, and disruptive innovation. Leaders must respond by creating an organizational learning culture to promote strategic innovation, and adapt and grow in a constantly changing environment. This course helps you build the capacity for strategic leadership to meet organizational challenges. In the role of leader, you will learn to develop leadership strategies, skills, and tools required for creating a plan to reinforce organizational strategies and competitive growth.

MSOL-5106 - Understanding Data**Semester Credits: 3 Weeks: 8**

You will learn to use data analytics that can be used for leadership development to guide your decisions, set priorities, and determine where to invest your times and resources. You will also utilize data analytics to assess an organization's ability to effectively use data to compete in the 21st century marketplace.

MSOL-5110 - Capstone Professional Project**Semester Credits: 3 Weeks: 8**

In this capstone course, you will have the opportunity to apply the concepts and principles that you have learned throughout your Master of Science in Organizational Leadership program, after you first identify a challenge or issue that you choose to investigate, utilizing an organization that you are familiar with. This can include issues of diversity and awareness, communication problems, leadership issues, and conflict, to name a few. You will begin by recognizing the applicable stakeholders and then use relevant knowledge and data to construct a plan for addressing and resolving the challenge. The project will culminate in the creation of an assessment strategy for evaluating plan results. An important component of this course is a comprehensive self-analysis of your preparedness to act in a leadership role including an understanding of your own bias', through the finalization of your Personal Leadership Profile that you have been working on throughout your degree program.

MSOL-5801 - The Nonprofit Sector: History, Trends, and Theories**Semester Credits: 3 Weeks: 8**

The nonprofit sector in the U.S. dates back to the 1970s, but charitable organizations have a much richer history. An overview of the nonprofit sector, its origins and connection to public policy in the U.S., current trends and the future of the sector, and the concepts of nonprofit theory are explored in this course.

MSOL-5802 - Nonprofit Strategic Management and Leadership

Semester Credits: 3 Weeks: 8

Strategic management is the discipline of ongoing planning, implementation, and measurement across an organization to fulfill its mission and goals. Nonprofit leaders engage in strategic management to navigate through dynamic internal and external environments and serve their stakeholders. In this course, you will explore the purpose and process of strategic management to analyze the leadership and planning that needs to be done, explain viable ways to do the work, and determine how the accomplishment of goals can be measured.

MSOL-5803 - Philanthropy and Fundraising in Nonprofits

Semester Credits: 3 Weeks: 8

Nonprofit sustainability requires complex fundraising programs and effort, and the philanthropy of individuals and organizations, public and private. The dynamic nature of today's donor markets, the impact they have on philanthropic behavior, and the ethics and accountability required of nonprofits and their fundraisers are explored in this course.

Management

MGT-6030 - Business Operations Management

This course presents a customer-oriented view of operations within an organization. Guided by the organization's strategic plan, operations deliver the products and services to the customers. This course explores how this delivery is accomplished with efficiency and effectiveness. Components of the course include issues of quality, physical design, and systems management.

MGT-6080 - Info & Supply Chain Systems

Semester Credits: 3 Weeks: 8

Students focus on major corporate applications of information technology, learning how business decisions are facilitated by these tools. Specific applications include the effective and efficient management of projects, inventory and transportation. The course concludes with the evolution of logistics into the broader scope of supply chain management, focusing on how enterprise-wide information systems enable this cross-functional, inter-firm collaboration that leads to new competitive advantages.

MGT-7006 - Advanced Topics in Organizational Behavior

Semester Credits: 3 Weeks: 8

Doctoral students will investigate organizational behavior (OB) and the impact individuals, groups, and structure have on behavior within an organization. Students will specifically focus on how to improve productivity, reduce absenteeism and turnover, and increase employee citizenship and job satisfaction. Students will also study OB and the tools for guiding the productivity of others, predicting human behavior at work, and the perspectives needed to manage individuals from diverse backgrounds.

MGT-7019 - Ethics in Business

Semester Credits: 3 Weeks: 8

Organizations can no longer ignore ethics and social responsibility, including the green movement. Ethics are required by local, state, and federal legislation, and today, more than ever, stakeholders at organizations are being held accountable for their actions and societal harm. Therefore, academic integrity must be carried out from the classroom to the place of business. In a case study format, students in this course will learn about current laws, their applications to business, and how to maintain an ethical perspective within the context of a global framework.

MGT-7022 - Advanced Topics in Organizational Development

Semester Credits: 3 Weeks: 8

Students in this course will synthesize and assess present theories and research results related to organizational development. Among many topics identified, students will assess organizational behavior in all sized businesses, evaluate group think and group behavior, and weigh structure and design of businesses for success.

MGT-7110 - Leadership in Organizations

Semester Credits: 3 Weeks: 8

Prerequisites: Fundamental requirement in General Management or fundamental Psychology courses

You will increase your understanding, comprehension, and synthesis of leadership constructs. You will also learn how to investigate leadership roles, styles, philosophies, and behavior in organizations. You will explore the qualities of leadership through the presentation of new models dealing with high-performance leadership. This course presents a broad survey of leadership theory and research on informal organizations. You will ultimately learn what makes a person an effective and influential leader.

Management of Virtual Organizations

MVO-5001 - Virtual Leadership & Team Management

Semester Credits: 3 Weeks: 8

In this course you will acquire skills and gain knowledge of how to become a virtual team leader by examining concepts of leadership, team dynamics, and effective management in a virtual environment.

MVO-5002 - Building Virtual Teams & Trust

Semester Credits: 3 Weeks: 8

In this course you will continue your journey of learning to lead virtual teams through strategies of building trust and cohesiveness. You will learn about the role of emotional intelligence and methods of assessing accountability, as well as exploring cross-culture and diversity issues, and managing conflict. In the role of virtual leader, you will analyze and apply concepts and knowledge gained through course resources to real virtual organization situations to create a climate of trust that promotes shared respect, honesty, and open communication.

MVO-5003 - Legal & Other Implications in a Virtual Organization

Semester Credits: 3 Weeks: 8

In this course, you will evaluate legal and other implications that exist in the virtual environment. This course builds on the fundamentals of virtual teams and individual and group behavior to examine how virtual teams and organizations can be affected by laws, policies, regulations, and other legal considerations. You will assess different risk mitigation strategies and examine specific cases regarding virtual organizations. You will engage in virtual exercises to experience ethical and mindful ways to engage in the virtual environment. You will also explore performance measures and productivity in virtual organizations.

Marriage and Family Therapy

MFS-6000 - Foundations of Trauma Studies

Semester Credits: 3 Weeks: 12

You will examine the history of the study of psychological trauma. You will learn about historical and current definitions of psychological trauma. You will examine the prevalence of traumatic events in the general population as well as among diverse subgroups. You will explore the various types of traumatic events and the potential impact of experiencing traumatic events. You will examine the intersections between trauma and culture and implications for trauma treatment. You will learn about physical and mental health conditions that may co-occur with trauma. You will also explore core competencies in providing trauma treatment. Finally, you will learn from accounts of recovery from trauma.

MFS-6001 - Assessment and Treatment Planning of Trauma**Semester Credits: 3 Weeks: 12**

In this course you will learn how to incorporate assessment for psychological trauma into your clinical assessment. You will examine instruments and tools used in trauma assessment. You will learn about evidence-based approaches for the treatment of children and adults impacted by trauma as well as couple and family therapy for the treatment of trauma and traumatic stress. Finally, you will explore cultural considerations in the assessment and treatment of trauma and traumatic stress.

MFS-6002 - Global Implications of Trauma**Semester Credits: 3 Weeks: 12**

In this course you will examine trauma as a global issue and explore the influence on relationships, communities and the world. You will describe various types of trauma including global terrorism, natural disasters, and genocide. You will also consider how cultural and historical trauma result from these incidents. You will evaluate models of trauma-informed care that are being implemented worldwide. You will also examine global dialogue and collaboration amongst mental health professionals. You will illustrate how resiliency factors and preventative care are coping variables. Finally, you will critique how access to social media affects perception and response to global trauma.

MFS-6003 - The Neurobiology of Trauma and Art-Based Interventions**Semester Credits: 3 Weeks: 12**

In this course you will learn about functions of different brain areas that are involved while responding to various traumatic events and how body responds to traumatic events. You will appraise how memory processes are affected in response to a trauma. You will examine common emotional and behavioral responses to trauma and how these responses needed to be considered while working with survivors of trauma. Art-based interventions pertaining to the treatment of trauma will also be addressed.

MFS-6004 - Somatic Approaches/Vicarious Trauma and Self-care**Semester Credits: 3 Weeks: 12**

In this course you will examine the intricacies of somatic therapy, which focuses on the mind-body connection for holistic healing and overall well-being. You will explore incorporation of somatic principles and philosophy in the assessment and treatment of individuals, couples and families, specifically who have experienced trauma. You will analyze examples of modalities including meditation practices, yoga and various physical processes, and grounding techniques. You will learn how to distinguish and incorporate different somatic therapies and how they are utilized within various cultures, demographics and social locations. You will examine how vicarious trauma, compassion fatigue and resilience affect MFT's working with trauma and learn how MFTs can apply somatic healing practices to their own self-care. Finally, you will investigate ethical issues pertaining to the incorporation of somatic therapy in trauma work.

MFS-6005 - Working with Trauma in Family Systems, Systemic Trauma: Self, Culture, and Society**Semester Credits: 3 Weeks: 12**

This course focuses on understanding how systemic, social and historical trauma affects the family. Students will examine the

difference between these types of trauma. Special emphasis will be given to the ways in which these types of trauma intersect with power, privilege, and oppression. Particular attention will be given to self-of-the-therapist exploration.

MFT-5101 - Foundations for Graduate Study in Marriage and Family Therapy

Semester Credits: 3 Weeks: 12

Students will complete the course with a better understanding of systems theory concepts and the role of systemic dynamics within diverse populations. This course is also an orientation to the University and to the essential skills needed to pursue a Master of Arts degree in Marriage and Family Therapy. Graduate-level skills, such as goal building, time management, academic integrity, effective use of the University Library, the use of APA form and style in professional communication, and critical thinking skills are introduced.

MFT-5102 - Legal, Ethical and Professional Development in Marriage and Family Therapy

Semester Credits: 3 Weeks: 12

This course focuses on legal and ethical issues in the profession of marriage and family therapy and the practice of individual, couple, and family therapy. It is designed to assist students in developing their professional identity and to facilitate appropriate decision-making when faced with legal and ethical dilemmas in their future clinical work.

MFT-5103 - Systemic Evaluation and Case Management

Semester Credits: 3 Weeks: 12

This Master's level course provides you with an opportunity to review various assessment and evaluation tools utilized by marriage and family therapists for clinical and research purposes. You will receive an overview of psychological test construction, administration, and interpretation in both traditional and telehealth settings. In addition to systemic evaluation measures for individuals, couples, and families, you will learn how to conduct a needs assessment and standard case management methods, including identifying and aligning clients with appropriate community resources. You are also invited to consider diversity as one of the fundamental components of a successful and productive evaluation.

MFT-5104 - Treatment Planning and Traditional Family Therapy

Semester Credits: 3 Weeks: 12

This Master's level course provides students with a strong foundation in classic and intergenerational models in the field of Marriage and Family Therapy. To deepen this understanding of these models, the course also focuses on their application through theory-based treatment planning. The course is designed to allow students to gain a deeper awareness of the important relationship between theory and practice through the study and application of theory to client situations. The two primary areas of focus in this course are: 1) understanding the Classic Models of the field and; 2) the development of theoretically consistent treatment plans that include attention to the diversity of influences on family life using therapeutic models that purposefully address such influences.

MFT-5105 - Recovery-Oriented Care and Postmodern Family Therapy

Semester Credits: 3 Weeks: 12

This Master's level course focuses on post-modern models and treatment trends in marriage and family therapy including the philosophy of social constructionism and the narrative, solution focused, and collaborative models, and the recovery model. Course content will enable you to conceptualize and distinguish recent epistemological issues and address contemporary conceptual directions in the field of marriage and family therapy. You will complete short essays, case studies, and assorted assignments to address a wide variety of presenting clinical problems and issues such as gender and racial diversity and discrimination, feminism, substance abuse, and recovery from mental illness.

MFT-5106 - Research Methods and Evidence Based Practice

Semester Credits: 3 Weeks: 12

This course provides students with an understanding of clinical research methods and design. In addition, it addresses the relevance of research to students' clinical work. Students will investigate existing research and research methods used in marriage and family therapy, both quantitative and qualitative. Ethical issues and considerations in research will also be addressed, as well as learning to critically evaluate existing research. A primary aim of the course is to help students become evidence-based practitioners.

MFT-6101 - Human Development and Family Dynamics Across the Lifespan**Semester Credits: 3 Weeks: 12**

This course will include content on individual and family development across the lifespan. This human development course has specific emphasis given to developmentally appropriate and atypical transitions related to common concerns in marriage and family therapy. Students will assess the issues related to human development and lifespan using a systems-based perspective.

MFT-6102 - Psychopathology, Diagnosis, and Systemic Treatment**Semester Credits: 3 Weeks: 12**

Using a relational/systemic perspective, this course will address the traditional psychiatric diagnostic categories as outlined in the Diagnostic and Statistical Manual of Mental Disorders (DSM-5). The focus of the course content is on the assessment and treatment of major mental health issues outlining the comparison between the psychiatric diagnostic classification system and relational systems-based approaches.

MFT-6103 - Cultural Diversity, Gender, and Family Development**Semester Credits: 3 Weeks: 12**

This course addresses issues related to diversity, equity, power, privilege, and oppression as they relate to culture and social location, including but not limited to ethnicity, gender, nationality, race, religion, sexual orientation, disability, and spirituality. Each of these characteristics is examined with respect to the relevance they have to the profession and practice of marriage and family therapy. You will examine systemic therapeutic approaches, as well as self of the therapist contexts that influence their ability to address diverse issues presented by a variety of clients. In addition students will appraise ethical dilemmas in the framework of cultural competency.

MFT-6104 - Family Therapy with Children**Semester Credits: 3 Weeks: 12**

This course provides an overview of systems-based theories and models that could be utilized by MFTs while working with children and their families. Course material will also address specific topics necessary to consider while providing therapeutic services, such as ethical dilemmas related to minors, opportunities of collaboration with extra-therapeutic systems, and possibilities of developing parenting strategies sensitive to the diverse population served by MFTs. Facilitating child involvement in the therapeutic process for families will be addressed as well.

MFT-6105 - Couple and Sex Therapy**Semester Credits: 3 Weeks: 12**

This Master's level course provides students with an opportunity to develop their personal model of therapy for working with couples with a variety of issues, such as differing values and sexual dysfunction. Through the study of several models of couples therapy and sex therapy, students will focus on assessment of couples' dynamics, goal setting, and potential interventions. Special consideration will be given to diversity and ethical issues throughout the course.

MFT-6106 - Families in Crisis

Semester Credits: 3 Weeks: 12

This course will examine contemporary crisis-related issues in marriage and family therapy to include the intersections of gender, violence, trauma, substance abuse, suicide, chronic illness, infidelity and infertility. The focus will be on the effects of trauma and stress on family life and relationships and the assessment and treatment of individuals, couples, and families from a relational/systemic perspective with respect to these issues. Collaborative care, referral process, and community networking will be addressed considering the unique needs of the trauma population. Vicarious trauma and resilience will also be examined, with an emphasis on self-care for MFTs working with families in crisis. Ethical issues pertaining to the trauma work will be addressed.

MFT-6107 - Adult Psychopathology and Systems Thinking**Semester Credits: 3 Weeks: 12**

The course explores the concepts of psychopathology. Students will study different perspectives on what constitutes mental health, mental illness, and abnormal behavior and consider how research and assessment are applied to the field of abnormal psychology. Various diagnostic categories will be examined as well as the etiology dynamics, prevention, and treatment of abnormal behavior, including systems-based family interventions.

MFT-6109 - Sex Therapy in MFT**Semester Credits: 3 Weeks: 12**

This course provides an overview of systems-based theories and models that can be utilized by MFTs in the assessment and treatment of sexual disorders and dysfunction. The course materials will address physiological and psychological aspects of human sexuality, along with relevant issues such as ethical dilemmas in sex therapy and implications of diversity for sex therapy.

MFT-6111 - Systemic Interventions in Addictions**Semester Credits: 3 Weeks: 12**

This course provides an overview of a variety of systemic approaches which can be used to treat addiction. Students will be expected to consider self-of-the-therapist issues and diversity concerns as it relates to exposure to and treatment of addiction. A variety of addictive substances will also be introduced to help students understand the issues related to long-term and short-term effects of various classes of substances and the withdrawal symptoms which may be experienced by clients. Ethical issues, which present themselves when working as an MFT within the field of addictions, will also be explored.

MFT-6112 - Fundamentals of Psychopharmacology**Semester Credits: 3 Weeks: 12**

This Master's level course is designed to teach the basics of clinical psychopharmacology for marriage and family therapists. Students will consider how psychotropic medications affect specific populations such as children and older clients. Students will draw from DSM-5 diagnostic criteria as it applies to treatment decision-making and medications. Neuroscience research on psychopharmacology treatment will be reviewed and ethical implications will be discussed.

MFT-6113 - Assessing and Treating Family Violence**Semester Credits: 3 Weeks: 12**

This course provides an overview of systemic and trauma-informed models for treating family violence. Theories and research on the causes and consequences of family violence will also be explored. Additionally, students will consider how to approach family violence with cultural sensitivity and reflect on ethical dilemmas that commonly present when treating family violence.

MFT-6115 - Emotionally Focused Couples Therapy**Semester Credits: 3 Weeks: 12**

This Master's level course will familiarize students with the theory, concepts, and application of emotionally focused couple

therapy (EFT). Theoretical and conceptual emphasis will be placed on the role that attachment and attachment injuries play in couple interaction and how interactional cycles of the relationship are impacted by individual fears, unmet needs, and trauma. The application will focus on the steps of emotionally focused therapy and the interventions that a therapist uses in the process. Students will also review how EFT prompts clinicians to address the questions related to the diversity and ethical dilemmas potentially encountered in clinical practice.

MFT-6116 - Systemic Treatment of Infidelity and Sex Addiction

Semester Credits: 3 Weeks: 12

This course will examine the individual, family, and societal issues pertaining to infidelity and sex addiction. Assessment and treatment in the context of marriage and family therapy will be explored. In addition, attention will be given to the effects of the Internet on infidelity and sex addiction, as well as ethical and diversity considerations in the framework of the systemic treatment of addictions.

MFT-6118 - Gerontology and Systemic Intervention Master's

Semester Credits: 3 Weeks: 12

This course provides a foundation for the practice of marriage and family therapy with older adults and their family members. Students will review the biological, psychological, and social aspects of aging. In order to apply systemic assessment and interventions with this population. Attention is given to the unique concerns for aging clients including long-term care, caregiver relations, end-of-life decisions, and socioeconomic stress. Ethical practices related to these contexts will be discussed, such as how to address ageism and ensure the safety of older clients.

MFT-6201 - California Law and Professional Ethics

Semester Credits: 3 Weeks: 12

The course focuses on legal and ethical issues related to the profession of marriage and family therapy and the practice of individual, couple, and family therapy in the state of California. In this course, you will examine contemporary professional ethics and laws regarding the scope of practice, therapeutic, and clinical considerations involving the legal and ethical practice of MFTs. You will also review mandated reporting laws, current legal trends in the mental health profession, psychotherapist-patient privilege, confidentiality, risk assessments for patients, and the treatment of minors with and without parental consent. In addition, you will explore topics pertaining to professional identity, including the relationship between the sense of self and human values and one's professional behavior and ethics, legal and ethical standards for different types of work settings, and the licensure laws and process.

MFT-6203 - Human Sexuality

Semester Credits: 3 Weeks: 12

Students in this course will examine how social, psychological, biological, and cultural influences shape sexual practices, expressions, identities, and representations. Additional topics covered include theoretical perspectives on sexuality, issues in sex research, attraction, intimacy, love, sexuality education, and legal issues related to sexuality. Students will apply this information to the practice of Marriage and Family Therapy.

MFT-6510 - Couple Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

This course involves a look at the development of couples and their relationship cycle. The course will incorporate an overview of different issues that present in couples relationships and examine the couple's dynamics through a lens of diversity. Students will learn about different models of couple's therapy and assessments pertaining to couple therapy. In addition, the students will learn about the importance of creating a therapeutic alliance with the couples.

MFT-6511 - Couple Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

This course involves an in-depth study of specific issues pertaining to the couple therapy and couple sexuality. Topics will focus on the issue of sexual addiction, sexual violence, domestic violence, and infidelity considered through various cultures lenses, such as religiosity and spirituality, ethnicity, and socio-economic status. Specific attention will be also paid to the examination of diverse couples contexts, including LGBTQ and military couples. After finishing the course, students will be able to appraise diverse system-based therapy approaches and theoretical frameworks that could be used while addressing the presented topics.

MFT-6520 - Military Family Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

In this Master's level course, the learner will understand the importance of mental health professionals providing psychotherapy to active duty service members, veterans, and their families. Participants will gain knowledge of military culture and organization. The students will focus on characteristics of the military family that distinguish it as a separate cultural entity. Students will explore military culture from multiple perspectives including service members, military families, and health care providers. Students will receive an overview of issues experienced by this population and familiarize themselves with theories and evidence-based models developed to address challenges experienced by military families. In addition, students will learn about the larger system of service provision including TRICARE and Veterans Administration.

MFT-6521 - Military Family Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

This Master's level course involves in depth study of specific issues faced by military service members, veterans, and their families and specific systems-based treatments used by MFTs to address these challenges. Course topics include: influence of combat deployment on service members and veterans, including issues such as post-combat traumas (e.g., PTSD, TBI, sexual assault), risky behaviors (suicidality and substance abuse), and consideration of mental health issues that develop prior to or after deployment. Challenges involving the whole military family, such as demands of deployment, and domestic violence will also be explored. While studying these topics, students will pay particular attention to the issues of confidentiality and consider ethical dilemmas pertaining to military family therapy practice. In addition to being engaged in learning about various challenges present in military families, students will also explore the resilience framework and systems-based understanding of the military families environment.

MFT-6530 - Medical Family Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

This course is an introductory survey of professional literature and resources related to the MFT sub-specialty of medical family therapy (MedFT) as well as the practice of integrated/collaborative behavioral healthcare. The course includes an emphasis on the theoretical basis for MedFT, the clinical skills necessary to practice in integrated/collaborative healthcare settings, as well as contextual factors unique to medical family therapy.

MFT-6531 - Medical Family Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

In this course students will be oriented to the broad spectrum of influences and implications of health, illness, and healthcare relevant to the practice of medical family therapy (MedFT). An understanding of biopsychosocial assessment and intervention, patient and families' experiences of illness, understanding of pertinent medical issues, comparing of medical ethics and AAMFT Code of Ethics, attuning to sociocultural issues, and collaborating with medical professionals will be explored. In addition, the emphasis is placed on the exploration of the illness stories of the patients, families, and therapists working in the realm of the medical family therapy practice.

MFT-6540 - LGBTQ Couple and Family Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

This course is designed to increase clinical awareness and understanding of LGBTQ couples and families. Historical background on LGBTQ families in the United States, information on LGBTQ couples and families' unique experiences, and a connection to systemic understanding will be addressed in the course.

MFT-6541 - LGBTQ Couple and Family Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

This course is designed to be an in-depth exploration of providing marriage and family therapy models, techniques, case conceptualizations, and practice to the LGBTQ populations. Clinical applications and practice resources for MFT will be addressed.

MFT-6542 - Transgender Individuals in Families: Clinical Perspectives

Semester Credits: 3 Weeks: 12

This course is designed to provide a basic clinical understanding for working with transgender individuals and/or individuals who do not identify as cisgender from a systemic lens. Lessons will examine non-cisgender individuals' experiences within their family, cultural, and community contexts. Further, this course will integrate MFT clinical applications when working with transgender and/or non-cisgender individuals and their families. Ethical challenges, social policies, and family dynamics will also be explored.

MFT-6550 - Child and Adolescent Family Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

In this course students examine theory and research on physical, cognitive, emotional, and social development from infancy through adolescence. Students also explore the contextual factors that influence developmental outcomes to inform a systemic approach to clinical assessment and intervention. Diagnostic criteria of psychological disorders that present in childhood and adolescence are also reviewed and critiqued for their cultural sensitivity and manifestation in context.

MFT-6551 - Child and Adolescent Family Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

This course reviews individual and family systems-based interventions for psychological disorders that present in childhood and adolescence. Adaption of interventions to individual developmental stage and cultural context will be emphasized. Course materials will further inform treatment decisions about what level of the ecological system needs intervention based on presenting issue.

MFT-6610 - Trauma and Family Therapy: Historical and Theoretical Foundations

Semester Credits: 3 Weeks: 12

You will examine the historical and theoretical foundations of trauma and how your understanding of these concepts can be applied systemically to the field of Family Therapy. You will examine key trauma theorists and researchers and the evolution of conceptualizing trauma across time. You will be developing an overall understanding of the theoretical applications of trauma at its foundation and how current day clinical applications consider Trauma Informed Care. Also, you will gain experience applying and integrating specific Family Therapy approaches with the Trauma Informed Care framework in order to demonstrate your knowledge of clinical application informed by historical considerations and key theorists.

MFT-6611 - Trauma and Family Therapy: Clinical Applications

Semester Credits: 3 Weeks: 12

You will examine the prevalence, nature, and impact of psychological trauma (e.g., sexual violence, combat and exposure to war zones, life threatening illness and injury, natural disasters), including posttraumatic stress disorder and the human capacity for healing. You will also gain a working knowledge of how to examine and discuss trauma systemically, exploring the impact on individuals, families, communities, and diverse groups, and potential ethical issues in treatment of psychological trauma. Finally, you will examine evidence-based practices in the field of psychological trauma as well as vicarious trauma, posttraumatic growth, and clinician self-care.

MFT-6710 - Systemic Sex Therapy: Historical and Theoretical Foundations**Semester Credits: 3 Weeks: 12**

This course examines the foundations of the health and development of couples' sexual relationships from the perspectives of diversity, ethics, and MFT research. The course will provide an overview of different issues that present in couples' sexual relationships and examine how historical religious, cultural and social mores have informed sexual behaviors and satisfaction. You will also learn about different models of systemic sex therapy and assessment. In addition, you will learn about the importance of creating a non-judgmental therapeutic alliance with your clients.

MFT-6711 - Systemic Sex Therapy: Clinical Applications**Semester Credits: 3 Weeks: 12**

This course features an exploration of specific issues pertaining to the clinical practice of systemic sex therapy. Topics will focus on issues of sexual disorders, sexual satisfaction, and the concept of sexual positivity. Sexual expressions such as polyamory, kink, and LGBTQ+ will be considered from the perspectives of religion, spirituality, and ethnicity. You will learn how to develop a variety of system-based models that will encourage sexual health and satisfaction.

MFT-6712 - Diversity of Sexual Expression in MFT**Semester Credits: 3 Weeks: 12**

In this course, you will review the diversity of sexual expression an MFT could encounter when working with clients. Using a sex-positive attitude, you will engage in a systemic exploration of clinical and ethical implications of treatment pertaining to diverse sexual preferences and experiences of clients. Emphasis will be placed on clinical awareness and practitioner comfort with relevant, current, diverse sexual values and behaviors.

MFT-6713 - Techniques for Treating Sexual Functioning and Behavior in MFT**Semester Credits: 3 Weeks: 12**

In this course, you will be provided with an overview of various presenting issues pertaining to sexual functioning and behavior. From a sex positive approach, you will systemically evaluate many factors that contribute to the development and presence of a problem in sexual functioning and behavior. You will learn specific techniques to use as an MFT for providing treatment.

MFT-6810 - Addictions: Historical and Theoretical Foundations**Semester Credits: 3 Weeks: 12**

This course will give an overview of the treatment of addiction to substances and the integration of family therapy as a treatment modality. You will be exposed to a variety of theories of addiction etiology and corresponding theoretical approaches to treat addiction. Addiction has historically been seen through an individualistic lens, so the course will provide a historical context for addiction treatment throughout the 19th and 20th centuries as well as the movement to integrate systemic thinking and treatment into the treatment of addiction to substances. You will be exposed to traditional approaches to conceptualizing the problem addiction as well as more holistic ways of seeing substance abuse.

MFT-6811 - Addictions: Clinical Applications

Semester Credits: 3 Weeks: 12

In this course, you will examine methods for assessing substance-related and addictive disorders in the context of family therapy and explore evidence-based practice for the treatment of addictive disorders in Family Therapy settings. In addition, you will demonstrate cultural competence in preparing treatment plans to address substance use and addictive behaviors for individuals and families. Finally, you will respond to potential ethical issues that may arise in the treatment of addiction.

MFT-6812 - Systemic Treatment of Co-occurring Disorders**Semester Credits: 3 Weeks: 12**

In this course, you will develop a foundational and multidisciplinary understanding of co-existing disorders, or mental health issues that "co-occur" with substance abuse disorders. Medical, mental health, and substance abuse professionals are increasingly recognizing how their respective fields intersect when it comes to co-existing disorders, and a systemic perspective is uniquely suited to conceptualize and incorporate these elements in effective treatment. In this course, you will acquire an understanding of contextual factors behind the traditional separation of medical care, mental health, and substance abuse treatment. You will learn how to use the current literature to evaluate the nature and effectiveness of current treatment practices. You will also learn how to integrate systemic perspective, evaluation, and treatment models into multidisciplinary treatment approaches.

MFT-6930 - MFT Practicum I**Semester Credits: 2 Weeks: 12**

This course provides you with an opportunity to start acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on building foundational clinical skills and learning the skills needed to operate effectively and ethically when providing telehealth. Additionally, there will be a focus on furthering your systemic thought and application to clinical cases. You will be reintroduced to general systems theory as a foundation for exploring your personal theory of therapy. There is also a focus on cultural humility with diverse populations and ethical decision making, as well as an exploration of the self of the therapist and personal growth. A majority of the work in this course will occur in the weekly 2-hour group supervision sessions with other University students.

MFT-6931 - MFT Practicum II**Semester Credits: 2 Weeks: 12**

In this course, you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on solidifying your ability to both apply and explain systems theory in relation to your clinical cases. You will be asked to apply general systems theoretical concepts and assumptions to your cases and conceptualize from multiple MFT models. Cultural humility with diverse populations, ethical decision making, and self of the therapist exploration will also be focused on. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other University students.

MFT-6932 - MFT Internship I**Semester Credits: 2 Weeks: 12**

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on extending the systemic foundations gained in the Practicum courses to explore the MFT model that fits your own personal theory of therapy and explore research available about your model of choice. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other MFT students.

MFT-6932CA - MFT Internship I**Semester Credits: 2 Weeks: 12**

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on extending the systemic foundations gained in the Practicum courses to explore the MFT model that

fits your own personal theory of therapy and explore research available about your model of choice. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other MFT students.

MFT-6933 - MFT Internship II

Semester Credits: 2 Weeks: 12

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on building off of the systemic understanding and application gained in the prior courses to explore the MFT model that fits your own personal theory of therapy. You will further work on your Capstone presentation by exploring ethical and legal considerations that may come up with your model and that you have managed during your clinical experience. In addition, self of the therapist work will be explored, and your Capstone draft will be presented. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other students.

MFT-6933CA - MFT Internship II

Semester Credits: 2 Weeks: 12

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on building off of the systemic understanding and application gained in the prior courses to explore the MFT model that fits your own personal theory of therapy. You will further work on your Capstone presentation by exploring ethical and legal considerations that may come up with your model and that you have managed during your clinical experience. In addition, self of the therapist work will be explored, and your Capstone draft will be presented. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other students.

MFT-6934 - MFT Internship and Capstone

Semester Credits: 1 Weeks: 4

In this final clinical course, you will need to successfully meet the graduation hour requirements and pass your Capstone presentation, as well as review the licensing application process for your jurisdiction. The emphasis of this course is on integrating feedback from the prior courses so that you can identify and explain the MFT model of therapy that best fits your personal theory of therapy. The final Capstone presentation will require you to identify how your chosen model is systemic, discuss research associated with your chosen model, and demonstrate your competency in the model via a case presentation. Additionally, you will discuss your cultural humility with diverse populations, ethical considerations you have encountered, and reflections on your self of the therapist exploration and growth.

MFT-6934CA - MFT Internship and Capstone

Semester Credits: 1 Weeks: 4

In this final clinical course, you will need to successfully meet the graduation hour requirements and pass your Capstone presentation. The emphasis of this course is on integrating feedback from the prior courses so that you can identify and explain the MFT model of therapy that best fits your personal theory of therapy. The final Capstone presentation will require you to identify how your chosen model is systemic, discuss research associated with your chosen model, and demonstrate your competency in the model via a case presentation. Additionally, you will discuss your cultural humility with diverse populations, ethical considerations you have encountered, and reflections on your self of the therapist exploration and growth.

MFT-6935 - MFT Internship Extension I

Semester Credits: 1 Weeks: 4

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this 4-week course is on ensuring you are able to demonstrate your clinical competency and that you are fully prepared for your Capstone Presentation before you enter the final clinical course, Internship and Capstone. A majority of the

work in this course will occur in the weekly two-hour group supervision sessions with other University students (Student Learning Outcomes 1, 2, 3, 4).

MFT-6936 - MFT Internship Extension II

Semester Credits: 1 Weeks: 8

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this 8-week course is on ensuring you are meeting all hour requirements needed before you enter the final clinical course, Internship and Capstone. Additionally, you will continue to work on your final Capstone Presentation. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other University students (Student Learning Outcomes 1, 2, 3, 4).

MFT-6937 - MFT Internship Extension III

Semester Credits: 1 Weeks: 12

In this course you will continue acquiring direct client contact and supervision hours towards graduation requirements. The emphasis of this 12-week course is on ensuring you are meeting all hour requirements needed before you enter the final clinical course, Internship and Capstone. Additionally, you will continue to work on your final Capstone Presentation. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other University students (Student Learning Outcomes 1, 2, 3, 4).

MFT-6938 - MFT Practicum III

Semester Credits: 3 Weeks: 12

In this course, you will continue to acquire direct client contact and supervision hours towards graduation requirements. The emphasis of this course is on solidifying your ability to both apply and explain systems theory in relation to your clinical cases. You will be asked to apply systems theory concepts and assumptions to your cases and use MFT models to demonstrate your understanding in your own case presentation. You will also focus on cultural humility with diverse populations, ethical decision making, and self of the therapist exploration and growth. A majority of the work in this course will occur in the weekly two-hour group supervision sessions with other students.

MFT-6953 - MFT Practicum III

Semester Credits: 3 Weeks: 12

This course provides students with an opportunity to engage in ongoing, supervised therapeutic practice. Emphasis is placed on the development of therapy and assessment skills, theoretical integration, and personal growth. It is expected that students will accrue at least 100 client contact hours during each of the practicum courses. The accumulation of clinical and supervision hours must be tracked by a University-approved vendor and approved by the local clinical supervisor and the University clinical faculty member. The local clinical supervisor will provide weekly individual supervision of the student and assist the student in managing cases. The University clinical faculty member will maintain contact with student and local clinical supervisor and will facilitate the process of learning and knowledge integration. Additionally, students are required to participate in weekly online University group practicum sessions. Throughout practicum and internship, students remain accountable to follow the Clinical Training Handbook requirements. (Student Learning Outcomes 1, 2, 3, 4)

MFT-6993 - MFT Internship III

Semester Credits: 1 Weeks: 12

Upon completion of Practicum I and II, students are required to enroll in three 1-credit Internship courses. Prior to the completion of the final Internship course, students are expected to complete all therapy and supervision hours required for graduation. In addition to the completion of required client contact hours and supervision, students are required to take the national licensing practice exam and present their theoretically-grounded model of therapy to the MFT faculty. Consistent with expectations in the

Practicum courses, throughout the Internship experience students are required to meet weekly with the local supervisor and with the University faculty member; this supervision should involve direct observation or video/audio- recorded observation of the student's sessions. Furthermore, students remain accountable to follow the Clinical Training Handbook requirements. (Student Learning Outcomes 1,2, 3, 4)

MFT-6994 - MFT Internship IV

Semester Credits: 1 Weeks: 12

Upon completion of Practicum I and II, students are required to enroll in three 1-credit Internship courses. Prior to the completion of the final Internship course, students are expected to complete all therapy and supervision hours required for graduation. In addition to the completion of required client contact hours and supervision, students are required to take the national licensing practice exam and present their theoretically-grounded model of therapy to the MFT faculty. Consistent with expectations in the Practicum courses, throughout the Internship experience students are required to meet weekly with the local supervisor and with the University faculty member; this supervision should involve direct observation or video/audio- recorded observation of the student's sessions. Furthermore, students remain accountable to follow the Clinical Training Handbook requirements. (Student Learning Outcomes 1,2, 3, 4)

MFT-7101 - Foundations for Doctoral Study in MFT

Semester Credits: 3 Weeks: 8

This course supports your transition to a marriage and family therapy doctoral student at the University. You will examine the purposes and future of MFT doctoral education, and explore possible dissertation topics. You will articulate the essential theoretical and practical components of MFT, as well as document the key role that diversity plays in your life and in the field of MFT. The importance of goal setting, time management, navigating the University library, and critiquing articles will be emphasized. You will examine various facets of a relational/systemic approach, including ethical issues, competence in domains beyond the therapy room, and research.

MFT-7102 - Scholarly Writing in MFT

Semester Credits: 3 Weeks: 12

In this course, you will refine skills for reviewing literature in preparation for your career as a researcher in the marriage and family therapy field. You will determine what strategies and tools will be most helpful for organizing the review process. In the assignments, you will be expected to evaluate and synthesize research findings using conceptual frameworks, professional ethics, and a culturally sensitive lens. Faculty will support you in the key process of evaluating academic writing skills and integrating feedback into future work. Through the steps provided in this course, you will develop an area of interest on which to build your career as an MFT researcher.

MFT-7103 - Research Methods in MFT

Semester Credits: 3 Weeks: 12

This graduate-level, introductory research methods course builds on the Scholarly Literature Review course. In addition, it provides a foundation for subsequent research courses in preparation for successfully completing a dissertation at the University. You will practice some of the skills learned in the Scholarly Literature Review course, such as how to critically analyze the work of others, but now with a focus on methods utilized. In addition, you will learn to critically discuss the primary research methodologies used in scholarly research, determine the steps to collect data, and begin to explore techniques used to analyze original data relating to marriage and family therapy. You will also identify what criteria are needed for a quality research project and be able to recognize whether the various elements of a research study are aligned and cohesive. These topics and others will be examined with the goal of enhancing your independent scholarly skills and preparing you for your own dissertation research and future scholarly endeavors.

MFT-7103U - Research Methods in MFT

Semester Credits: 3 Weeks: 8

This graduate-level, introductory research methods course builds on the Scholarly Literature Review course. In addition, it provides a foundation for subsequent research courses in preparation for successfully completing a dissertation at the University. You will practice some of the skills learned in the Scholarly Literature Review course, such as how to critically analyze the work of others, but now with a focus on methods utilized. In addition, you will learn to critically discuss the primary research methodologies used in scholarly research, determine the steps to collect data, and begin to explore techniques used to analyze original data relating to marriage and family therapy. You will also identify what criteria are needed for a quality research project and be able to recognize whether the various elements of a research study are aligned and cohesive. These topics and others will be examined with the goal of enhancing your independent scholarly skills and preparing you for your own dissertation research and future scholarly endeavors.

MFT-7104 - Statistical Design for MFT Research**Semester Credits: 3 Weeks: 12**

This course provides an introductory exploration of statistics for the graduate student. It includes instruction on the calculation, use, and interpretation of descriptive statistics, and introduces inferential statistical analysis. The emphasis of this course is on providing a working knowledge of basic statistical concepts to help the student understand statistical methodology used in family therapy research, and also more generally, developing a working knowledge of statistical usage in everyday life.

MFT-7105 - Advanced Assessment in MFT Research and Intervention**Semester Credits: 3 Weeks: 12**

In this course, students are trained to administer assessment instruments as an evaluative component of clinical practice and research in marriage and family therapy. Students will become familiar with the use of a wide variety of assessment instruments and clinical assessment procedures relating to children, individuals, couples, and families. Students will also identify specific measurement and evaluation tools or methods for potential use in their own dissertation research.

MFT-7106 - Quantitative Research Design in MFT**Semester Credits: 3 Weeks: 12**

This course provides students with the skills essential in the critique and execution of quantitative research methods relating to marriage and family therapy. Course content will cover evaluation and critique of research processes, research problems, research designs, selection of appropriate methods of data collection, data analysis strategies, interpretation of findings, and research/evaluation report writing. Students will develop a preliminary methodological design for potential use with their envisioned dissertation research.

MFT-7107 - Qualitative Research Design in MFT**Semester Credits: 3 Weeks: 12**

This course provides students with the skills essential in the critique and execution of qualitative research methods relating to marriage and family therapy. The particular focus of this methodological course is on the application of qualitative research to understanding human phenomena (clinical and non-clinical individuals, families, and social groups). Course content will cover evaluation and critique of research processes, research problems, research designs, selection of appropriate methods of data collection, data analysis strategies, interpretation of findings, and research/evaluation report writing. Students will develop a preliminary methodological design for potential use with their envisioned dissertation research. There is an emphasis on clinical research and students will be expected to take a learning-through-doing/experiential approach.

MFT-7108 - Advanced Data Analysis Strategies in MFT**Semester Credits: 3 Weeks: 12**

This course is an intermediate examination of statistical analyses commonly used in the field of marriage and family therapy

(MFT). It prepares doctoral MFT students with the skills required to plan, conduct (using SPSS), report, and interpret quantitative statistical analyses. Topics include: basic statistical knowledge, probability theory, exploratory data analysis, assumptions for statistical tests, parametric, and nonparametric tests. Specific analyses include: correlation, regression (simple, multiple, and logistic), basic ANOVA, and advanced ANOVA techniques.

MFT-7109 - Planning Dissertation Research in MFT

Semester Credits: 3 Weeks: 12

Students in this course will begin the process of writing a dissertation. The course will address the University dissertation process and aids to successfully completing a dissertation, including self-care and time management.

MFT-7110 - Quantitative Analysis in MFT

Semester Credits: 3 Weeks: 12

In this course, you will learn how to use statistical analyses in research. You will explore key aspects of descriptive and inferential statistics and learn how to use statistical software to analyze data. You will gain skills as an independent scholar by enhancing your scientific and statistical literacy. Therefore, emphasis will be on comprehending statistical concepts, analyzing, interpreting, and critically evaluating data and statistical information, and communicating statistical information and knowledge.

MFT-7111 - Quantitative Measurement and Design in MFT

Semester Credits: 3 Weeks: 12

In this course, students are trained to develop and evaluate research studies in behavioral sciences. Students will become familiar with sampling, research design, reliability, validity, and the creation and interpretation of measures in marriage and family therapy. Students will also identify and critique specific measures and evaluation tools and methods for potential use in their own research projects.

MFT-7112 - Qualitative Measurement and Design

Semester Credits: 3 Weeks: 12

This course will provide you with the philosophical foundation of interpretive qualitative inquiry and addresses beginning skills essential to the critique and execution of qualitative research in marriage and family therapy. You will become familiar with the major research paradigms and the assumptions inherent to qualitative inquiry. You will learn to identify elements critical to the credibility of a qualitative study and apply this knowledge by evaluating selected published research. You will also develop basic skills in qualitative data analysis, and develop a research purpose statement and research question that can be addressed qualitatively while incorporating contextual knowledge and ethical guidelines promoted by the AAMFT Code of Ethics.

MFT-7113 - Advanced Qualitative Design and Analysis

Semester Credits: 3 Weeks: 12

This course will provide students with an overview of the major types of qualitative inquiry and advance their skills toward the execution of qualitative research in marriage and family therapy. Students will practice multiple types of data collection and analysis. In addition, they will develop a paper that lays the foundation for their dissertation proposal. This process will require application of the assumptions inherent to the qualitative research paradigm: select an appropriate study type, and design a qualitative methodology appropriate to the research question developed in the framework of the qualitative design.

MFT-7114 - Advanced Quantitative Design and Analysis

Semester Credits: 3 Weeks: 12

This course will introduce you to the uses and techniques of advanced quantitative design and analysis in marriage and family therapy and related fields. You will become competent consumers of quantitative research by learning how quantitative

information is generated, summarized, evaluated, and represented. You will be prepared to design studies using methodology associated with multivariate analysis, regression, latent variable modeling, factor analysis, and structural equation modeling. The course provides a theoretical and practical basis for choosing and employing the wide range of current analysis techniques available to social science researchers.

MFT-8101 - Advanced Theories in MFT

Semester Credits: 3 Weeks: 12

The completion of this course will strengthen your understanding of theoretical literature along with your understanding of therapeutic models in the practice of marriage and family therapy. The importance of developing a personal and professional theory of therapy and identifying your preferred approaches to supervision will be emphasized. A strong emphasis is placed on the role of culture and diversity in clinical practice and training.

MFT-8102 - Dynamics of Family Interaction

Semester Credits: 3 Weeks: 12

In this course, you will examine the theoretical and empirical contributions to the understanding of diverse couple and family systems. The specific focus of the course is on the processes and dynamics of interaction within these relationships, highlighting that from a life course perspective these dynamics change over time. You will examine content on the history of family life and diverse family types, exploring various family structures and roles. You will also review legal processes related to families, as well as will be able to explain family law and policy issues associated with various family crises and transitions.

MFT-8103 - Assessing and Treating Family Violence

Semester Credits: 3 Weeks: 12

This graduate-level course offers an overview of treatment/clinical approaches for MFTs working in the context of family violence. Theory and research related to definitions, causes, consequences, and characteristics of affected family members will be explored. The course will also include the examination of family violence in diverse contexts, as well as consideration of ethical dilemmas associated with situations pertaining to family violence and abuse.

MFT-8115 - Family Systems Approaches to Addiction

Semester Credits: 3 Weeks: 12

This course provides an overview of a variety of addictive substances and how a systemic therapist approaches treatment of addiction. Students will be expected to consider self-of-therapist issues and diversity concerns as it relates to exposure to and treatment of addiction. A variety of approaches to treating addiction will also be addressed.

MFT-8208 - Child and Adolescent Assessment and Diagnosis

Semester Credits: 3 Weeks: 8

In this course, you will evaluate the scholarly literature on clinical assessment and diagnosis of childhood and adolescent disorders. Specifically, you'll view DSM-5-TR diagnostic criteria and assessment procedures through a systemic lens and critique them for their cultural sensitivity as well as examine and discuss ethical concerns related to the assessment and diagnosis of children and adolescents.

MFT-8209 - Family Therapy with Adolescents

Semester Credits: 3 Weeks: 8

This course evaluates theory and research on systemic interventions with adolescents and their families. Students will establish an ethical framework that is developmentally informed and culturally sensitive. This course emphasizes how families can support

adolescents through the difficult transition of increased independence from the family, as well as how to engage an adolescent in the therapeutic process.

MFT-8210 - Early Childhood and Parenting Interventions

Semester Credits: 3 Weeks: 8

This course reviews theory and research on interventions for early childhood, emphasizing play therapy and parenting interventions. Since a developmental-informed approach is critical for early childhood, play therapy theoretical foundations and techniques will be explored in-depth. From a systemic lens, children's emotional and behavioral difficulties are viewed in the context of the couple relationship, family structure, and parenting behaviors. As a result, students will learn to integrate several interventions for changing dynamics and behaviors within the parent system. Issues of cultural sensitivity and ethical practice will be considered for each topic discussed.

MFT-8211 - Neurodevelopmental Disorders in Children and Adolescents

Semester Credits: 3 Weeks: 8

In this course, you will evaluate theory and research on evidence-based, systemic interventions with children and adolescents with neurodevelopmental disorders, including attention-deficit/hyperactivity disorder (ADHD), autism spectrum disorder (ASD), intellectual disabilities (ID), and learning disorders (LD). You will articulate systemic approaches to treating these disorders that are ethical, developmentally informed, and culturally sensitive. This course presents marriage and family therapists as critical members of multidisciplinary treatment teams for ADHD, ASD, and other neurodevelopmental disorders.

MFT-8308 - Emotion and Differentiation Focused Couple Therapy

Semester Credits: 3 Weeks: 8

This course will focus on and emphasize the roles of two major human development forces that influence behavior in relationships: connection (attachment and inclusion) and separation (individuality and differentiation). There are ongoing debates in the MFT world about the role these two forces play in intimate relationships and clinical models differ in how to go about engaging clients in these realms. This course will give you the opportunity to discover more about these life forces and how their principles are applied in therapeutic conversations with couples. You will also be asked to consider both of these influences from a clinical research perspective throughout the course.

MFT-8309 - Cognitive Behavioral Couple Therapy Models and Evidence Based Practice

Semester Credits: 3 Weeks: 8

This course will review couple therapy modalities that have been validated by research and are informed by cognitive and behavioral psychology. Three models will be covered throughout the course: Cognitive Behavioral Couple Therapy, Integrative Behavioral Couple Therapy, and The Gottman Method. While reviewing these models, you will be encouraged to think like scholar-practitioners and consider standards for ethical and culturally sensitive practice.

MFT-8310 - Systemic Sex Therapy

Semester Credits: 3 Weeks: 8

This course focuses on physiological, psychological, and sociocultural variables associated with human sexuality and then maintains a focused emphasis on systemically oriented sex therapy including methods of conducting sexual assessments and both individual and relational therapy designed to help clients with variety of sexual issues, sexual dysfunctions, and sexual challenges within relationships.

MFT-8311 - The Couple Life Cycle in MFT Practice and Supervision

Semester Credits: 3 Weeks: 8

It is important for clinicians and clinical supervisors to be aware of the challenges and critical points of change and/or distress for couples throughout the couple life cycle. Throughout this cycle couples are challenged with how to face difficult circumstances and maintain a strong relationship. This course involves a look at the development of couples and their relationship cycle. The course will incorporate an overview of different issues that present in couples' relationships and examine the couple's dynamics through a lens of diversity. Students will learn about different models of couple's therapy and assessments pertaining to couple therapy. In addition, the students will learn about the importance of creating a therapeutic alliance with the couples.

MFT-8402 - Medical Family Therapy**Semester Credits: 3 Weeks: 8**

This course is designed to introduce you to the theory, concepts, and practice of medical family therapy. You will learn about collaborative healthcare, medical specializations, assessments commonly used in healthcare settings, and the ways in which biopsychosocial components of patients' and families' lives may impact their experience of health and illness.

MFT-8403 - Medical Family Therapy Applications**Semester Credits: 3 Weeks: 8**

This course addresses the many facets of creating and maintaining effective integration of behavioral health and medical care. Through this course, you will gain an in-depth understanding of the practice of medical family therapy (MedFT). You will discover how the clinical and operational components of care intersect and impact psychosocial care delivery.

MFT-8404 - Families, Health, and Illness**Semester Credits: 3 Weeks: 8**

This course addresses the challenges faced by individuals, couples, and families who are experiencing a chronic or acute illness. Throughout this course, students will have the opportunity to identify health complaints and diseases, explore the psychosocial barriers and facilitators to effective treatment, and discover the ways in which cultural beliefs and norms impact the illness experience. Ethical considerations influencing treatment are also explored.

MFT-8408 - Loss and Bereavement**Semester Credits: 3 Weeks: 8**

In this course, students will explore various aspects of grief and loss. The course will include theory and cultural beliefs and values surrounding death and dying and will highlight clinical approaches to assisting people in navigating grief and loss experiences. This course will also focus on self of the therapist experiences and self-care practices of helping professionals.

MFT-8507 - Military and Veteran Cultures Across the Lifespan**Semester Credits: 3 Weeks: 8**

This doctoral-level course focuses on military and veteran cultures, including culturally informed clinical practice, research, and policies across the lifespan.

MFT-8508 - Trauma and Resilience in Military and Veteran Couples and Families**Semester Credits: 3 Weeks: 8**

The experience of trauma is an omnipresent aspect of military service. In this course, you will examine trauma and resilience theories that guide research and practice of family therapists working with military and veteran individuals, couples and their families. You will examine precursors, assessments, diagnoses, indicated treatments, research practices, and policies related to trauma and resilience across military and veteran populations. You will immerse yourself in the research literature related to trauma and resilience as a means of identifying tools and resources to support this population.

MFT-8509 - Ethical Challenges and Moral Injuries Across Military and Veteran Populations

Semester Credits: 3 Weeks: 8

In this course, you will explore some of the ethical challenges associated with treating military and veteran populations, including consent, confidentiality, and dual roles. You will also examine moral injury and some common byproducts of treating this population, including compassion fatigue and burnout. Finally, you will develop strategies for effectively supervising clinicians who work with military and veteran populations.

MFT-8510 - Behavioral Health Care with Military and Veteran Populations

Semester Credits: 3 Weeks: 8

This course focuses on evidence based treatment and research pertaining to behavioral health challenges that are experienced by military and veteran populations. Attention is given to clinical assessments and treatment as well as current evidence based research, including biopsychosocial complications associated with each behavioral health challenge.

MFT-8601 - Gerontology and Systemic Intervention

Semester Credits: 3 Weeks: 12

This course deals with the biological, social, cognitive, and psychological aspects of aging. Ancillary aspects of aging are also explored, including issues related to long-term care, end of life issues, the cultural context of human development, and the impact of socioeconomic status (especially poverty) on older adults. A significant focus of the course is the application of systemic treatment/theory to the older adult population and multigenerational families. Students will explore ethical dilemmas that might arise while working in gerontological settings and examine current research literature addressing systemic work with older adults, their families, and larger social systems.

MFT-8701 - Language of Diversity

Semester Credits: 3 Weeks: 8

This course focuses on the acquisition and understanding of culturally inclusive language when working with diverse populations and organizations. Attention is given to self of the therapist issues and critical analysis of dominant narratives around language and power.

MFT-8702 - A Systemic Evaluation of Global Concerns and Diversity

Semester Credits: 3 Weeks: 8

This course focuses on the acquisition and understanding of meaningful knowledge about issues of diversity and injustice on the global stage, and how this may impact the work we do as MFTs when working with diverse populations and organizations. Attention is given to self of the therapist issues and critical analysis of the dynamics of contextual systems of oppression and privilege.

MFT-8703 - Social Justice Advocacy in the United States

Semester Credits: 3 Weeks: 8

This course focuses on understanding dilemmas and challenges of supervising, teaching and leading as a Marriage and Family therapist from a socially just perspective. You will explore the history of diversity, multiculturalism and social justice in the field of MFT. Special emphasis will be given to issues related to power, privilege and oppression specifically within the United States. Attention is given to self-of-the therapist, self-of-the supervisor and self-of-the educator issues related to systems of power, privilege and oppression.

MFT-8704 - Culturally Sensitive Care in MFT

Semester Credits: 3 Weeks: 8

This course focuses on the acquisition and understanding of specific skills that MFTs can use to provide more culturally sensitive and humble care to patients and clients. The focus of this course will be appropriate treatment planning for diverse populations. Attention is given to self of the therapist issues and critical analysis of the dynamics of contextual systems of oppression and privilege.

MFT-8712 - Leadership Development in Public and Non-Profit Community Organizations**Semester Credits: 3 Weeks: 8**

You will learn the building blocks to cultivating a vision—from dream to service agency from the ground up. The course will focus on how to develop a non-profit counseling agency including financial planning, personnel development, and evidence-based service delivery. This doctoral-level course will also prepare you for leadership in community-based agencies with an emphasis on integrating marriage and family therapy into the larger milieu of behavioral health services. Whether joining an existing agency or creating your own, today's leaders can help create a socially conscious company culture using ethical decision-making models.

MFT-8713 - Public or Corporate Policy Making**Semester Credits: 3 Weeks: 8**

This course invites doctoral students to consider the key role that policy making plays in advancing the profession of marriage and family therapy (MFT). The course will start out by identifying stakeholders who direct and sanction the practice of MFT, from accrediting bodies and universities to state licensing boards and federal legislation. Students will learn about the role of MFTs in public health policies and advocating for MFTs in the larger behavioral health culture. The signature assignment for the course will have students challenging conventional leadership and proposing a relevant piece of legislation that is consistent with the systemic perspective.

MFT-8714 - Leadership in Higher Education**Semester Credits: 3 Weeks: 8**

MFTs today can excel in teaching, communication, and utilizing technology. Universities today need systemic thinkers who can integrate the demands of accreditation standards into traditional and cutting-edge academic and administrative systems. This doctoral level course will prepare students for administrative roles in online and on-ground education systems. Learners will incorporate best practices in teaching through role plays and assignments that develop course and curriculum development.

MFT-8721 - Constructing a Professional Identity**Semester Credits: 3 Weeks: 8**

This course provides an analysis of the means by which trainees acquire their new professional identity as MFTs. Special emphasis is placed on gender, cultural, and socioeconomic factors in professional identity development.

MFT-8722 - Teaching Systemic Theories**Semester Credits: 3 Weeks: 8**

This courses focuses on theories and current best practices for teaching adult learners. One of the key concepts is helping adult learners make best use of their previous experiences to help them on their new journey of learning. A special focus of this course in working with adult learners in e-learning environments.

MFT-8723 - Analyzing Supervision Interventions**Semester Credits: 3 Weeks: 8**

This course builds on the foundation of prior coursework in MFT Supervision. Supervisors have an ethical and legal

responsibility to assess the competence of their trainees. This course examines educational and experiential strategies for assessing trainee competence, and interventions the supervisor can employ to meet the ethical requirement for assessing trainee competence. A special focus of this course is the power differential between supervisor and trainee, and trainee and client, and how working in an e-supervision environment may affect those dynamics.

MFT-8724 - Employing Technology in Supervision

Semester Credits: 3 Weeks: 8

Since its earliest days, the profession of MFT has made use of the best available technology to facilitate training the next generation of therapists. Historic examples include co-therapy, the one-way mirror, and the "bug in the ear." This course examines the relationship between technology and best practices for adult learners, including both ethical and andragogical considerations, with a special focus on emerging digital technology.

MFT-8951 - MFT Doctoral Practicum I

Semester Credits: 3 Weeks: 12

This course provides you with an opportunity to demonstrate your competence in advanced MFT practice. Emphasis is placed on clinical competence in working with diverse populations, advanced application of family and couple therapy models, ethical decision-making, relational/systemic clinical innovations, and professional growth. The course will provide you an opportunity to engage in discussions and practice, enhancing your ability to further develop your identity as an MFT. You must be clinically active during the course and participate in weekly clinical supervision.

MFT-8952 - MFT Doctoral Practicum II

Semester Credits: 3 Weeks: 12

In this course, you will design and complete an individualized clinical experience that facilitates reaching your clinical and professional goals. Emphasis is placed on clinical competence in working with diverse populations, advanced application of family and couple therapy models, relational/systemic ethical decision-making, relational/systemic clinical innovations, and professional growth. You must be clinically active and meet weekly with a local clinical supervisor and four times with your faculty member.

MFT-8961 - MFT Doctoral Internship I

Semester Credits: 1 Weeks: 12

Upon completion of the practicum course, doctoral students are required to complete a 9-month, full-time (i.e., 30 hours per week) clinically focused internship. Prior to beginning the doctoral internship, all students must develop an internship contract approved by the Director of the MFT Doctoral Programs in the PhD MFT Internship Contract DRF in Taskstream. This nine-month experience is organized into three 1-credit courses, each being 12 weeks in duration. The first of these is MFT 8961. All students in this internship must have a local supervisor who has the documented expertise to mentor the PhD student's development in the area of the student's specialty. The supervisor's credentials must be approved by the Director of MFT Doctoral Programs as a part of the internship contracting process in Taskstream. The internship contract will guide both the student's work during the 9-month internship, and the supervisor's evaluations of the student's work. While each student's Internship will be very individualized to provide the best possible growth through experiential learning, each internship will share these characteristics: students will meet regularly with their local supervisor; unless it is required by the student's internship contract, students will not have to attend the weekly supervision groups online; each internship is focused solidly in the student's degree specialty (e.g., military family therapy, medical family therapy, couples therapy); it represents a growth in the student's previous functioning (i.e., it cannot be simply doing more of what you are already doing); and it provides an experiential base for the student to meet the PhD Program Outcomes and Student Learning Outcomes.

MFT-8962 - MFT Doctoral Internship II

Semester Credits: 1 Weeks: 12

Upon completion of the practicum course, doctoral students are required to complete a 9-month, full-time (i.e., 30 hours per week) clinically focused internship. Prior to beginning the doctoral internship, all students must develop an internship contract approved by the Director of MFT Doctoral Programs in the PhD Internship DRF in Taskstream. This nine-month experience is organized into three 1-credit courses, each being 12 weeks in duration. The second of these is MFT-8962. All students in this internship must have a local supervisor who has the documented expertise to mentor the PhD student's development in the area of the student's specialty. The supervisor's credentials must be approved by the Director of Clinical Field Placement as a part of the internship contracting process in Taskstream. The internship contract will guide both the student's work during the 9-month internship, and the supervisor's evaluations of the student's work. While each student's Internship will be very individualized to provide the best possible growth through experiential learning, each internship will share these characteristics: students will meet regularly with their local supervisor; unless it is required by the student's internship contract, students will not have to attend the weekly supervision groups online; each internship is focused solidly in the student's degree specialty (e.g., military family therapy, medical family therapy, couples therapy); it represents a growth in the student's previous functioning (i.e., it cannot be simply doing more of what you are already doing); and it provides an experiential base for the student to meet the PhD Program Outcomes and Student Learning Outcomes.

MFT-8965 - MFT Doctoral Internship and Portfolio**Semester Credits: 1 Weeks: 12**

Upon completion of the practicum course, doctoral students are required to complete a 9-month, full-time (i.e., 30 hours per week) clinically focused internship. Prior to beginning the doctoral internship, all students must develop an internship contract approved by the Director of MFT Doctoral Programs. The 9-month experience is organized into three 1-credit courses, each being 12 weeks in duration. All students in this internship must have a local supervisor who has the documented expertise to mentor the PhD student's development in the area of the student's specialty. The supervisor's credentials must be approved by the Clinical Team as a part of the internship contracting process. The internship contract will guide both the student's work during the 9-month internship, and the supervisor's evaluations of the student's work. While each student's internship will be individualized to provide the best possible growth through experiential learning, each internship will share these characteristics: students will meet weekly with their local supervisor; each internship is focused solidly in the student's degree specialty (e.g., military family therapy, medical family therapy, couples therapy); it represents growth in the student's previous functioning (i.e., it cannot be simply doing more of what the student is already doing); and it provides an experiential base for the student to meet to PhD Program Outcomes and Student Learning Outcomes.

MFT-8970 - MFT Supervision**Semester Credits: 3 Weeks: 12**

In this course, you will be introduced to the fundamentals of systemic supervision with an emphasis on the importance of contextual variables such as gender, culture, socioeconomic status, and race/ethnicity. The design of the course meets the criteria for the 30-hour Fundamentals of Supervision course for the American Association for Marriage and Family Therapy (AAMFT) Approved Supervisor track, which includes 15 hours of live interaction. The 15 hours of live interaction will occur via streaming video. Participants wishing to pursue the AAMFT Approved Supervisor designation should verify their eligibility with AAMFT.

MFT-8971 - MFT Supervision Practicum**Semester Credits: 3 Weeks: 12**

This course was designed to support your development as a relational/systemic clinical supervisor. In this practicum course, you will help MFT students begin their growth toward clinical competence and professional identity as an MFT. You will participate in the supervision of MFT master's students while receiving guidance from the faculty on the development of your supervisory skills. In doing so, you will work to appraise ethical issues, and demonstrate a clear commitment to diversity and social justice. In this course, you will have an opportunity to engage in discussions and practice of supervisory tasks enhancing your ability to further develop your identities as an MFT and future MFT supervisor.

MFT-8991 - MFT Advanced Practical Experience Component (APEC I)

Semester Credits: 1 Weeks: 12

The purpose of this advanced practical experience component (APEC) course is to provide you with a focused opportunity to apply the knowledge and skills you are developing and enhancing during your marriage and family therapy doctoral program. APEC courses involve a focus on two areas of emphasis. After identifying your two areas and receiving approval of your APEC contract, you will participate in weekly activities, and document your progress, related to your chosen emphases for the APEC experience. Your program specialization should also be a recognizable thread in your APEC activities.

MFT-8992 - MFT Advanced Practical Experience Component (APEC II)**Semester Credits: 1 Weeks: 12**

In this second phase of the APEC, you will continue to apply the knowledge and skills you are developing and enhancing during your doctoral program. In accord with your APEC contract, you will continue to participate in weekly activities, and document your progress, related to your chosen emphases for the APEC experience.

MFT-8993 - MFT Advanced Practical Experience Component (APEC III)**Semester Credits: 1 Weeks: 12**

In this third and final phase of the APEC, you will continue to apply the knowledge and skills you are developing and enhancing during your doctoral program. In accord with your APEC contract, you will continue to participate in weekly activities, and document your progress, related to your chosen emphases for the APEC experience. At the conclusion of this course, you will evaluate your performance and accomplishments during the overall APEC experience.

Nursing

DNP-7000 - Leadership and Interprofessional Collaboration**Semester Credits: 3 Weeks: 8**

This course incorporates the study of organizational leadership and interprofessional team development to improve quality of care delivery, health outcomes, and safety of patient populations. You will examine consultative and leadership skills that facilitate intraprofessional and interprofessional collaboration. You will analyze effective strategies for resolving ethical and legal issues in the delivery of care. You will also synthesize knowledge of leadership and communication theories with nursing science as a framework for organizational assessment, diagnosis of systems issues, and facilitation of system-wide practice initiatives. This course will prepare you to develop advanced leadership roles in addressing complex practice and organizational issues.

DNP-7001 - Contemporary Topics in Health Care**Semester Credits: 3 Weeks: 8**

This course involves intensive examination of contemporary topics in healthcare. Emphasis is placed on exploring and evaluating theoretical foundations that influence nursing practice, healthcare systems, and organizational sciences. Key topics include the development of interprofessional competencies, health status and health disparities, ethics, and the meaning of health outcomes related to both quality and safety for population healthcare.

DNP-7002 - Healthcare Economics and Finance**Semester Credits: 3 Weeks: 8**

This course introduces the financial structures that support nursing practice and will focus on economic principles, financial management methods, and business strategies. You will explore the foundation for balancing productivity with quality of care, while learning to design effective and realistic care delivery systems that optimize performance, minimize costs, and enhance outcomes. You will also examine methods to evaluate costs and cost effectiveness of care using health equity and diversity. This

course provides you with the tools to plan, monitor, and evaluate the acquisition, use, and outcomes of fiscal resources for practice and program initiatives.

DNP-7003 - Informatics in Healthcare Delivery

Semester Credits: 3 Weeks: 8

This course incorporates the study of information science concepts, principles, and methods with application in the support, improvement, and evaluation of nursing interventions, outcomes of care, and delivery systems. You will focus on the development of knowledge and technical skills to use data management systems and technological resources for decision-making, implementation of quality improvement initiatives, and evaluation of patient care technologies.

DNP-7004 - Advanced Health Policy & Advocacy

Semester Credits: 3 Weeks: 8

This course focuses on advanced nursing leadership and advocacy for healthcare policy improvement. You will examine the process of healthcare policy development and determine the disparities within the US and international healthcare delivery systems. You will use policy theory to critically evaluate the current and historic policies, laws, and financial incentives that affect healthcare delivery and nursing practice. You will apply principles of organizational change and cultural effectiveness to evaluate components of leadership necessary for public health improvement.

DNP-7005 - Translation of Evidence into Practice

Semester Credits: 3 Weeks: 8

This course will address scientific frameworks for advanced nursing practice including theories from nursing, behavioral and social sciences, quality improvement models, and evidence-based practice models. You will integrate the theme of change throughout this course related to improving patient and healthcare outcomes. You will examine various strategies to develop partnerships with stakeholders, assess quality improvement, and facilitate change based on evidence.

DNP-7106 - Program Planning and Evaluation

Semester Credits: 4 Weeks: 8

Prerequisites: DNP -7005

This course prepares you, to plan for the design, development, implementation, and evaluation of health promotion and disease prevention program initiatives. Within a practice setting, you will work with your mentor, the advanced nurse leader, to analyze practice approaches to quality improvement and evaluate clinical prevention strategies utilized to promote population health. You will discuss various approaches to quality improvement.

*Requires 30 Practice hours

DNP-7107 - Health Outcomes Research

Semester Credits: 6 Weeks: 8

Prerequisites: DNP-7106 - Program Planning and Evaluation

This course introduces various approaches to evaluating health outcomes research, including risk assessment, causation, and principles of measurement. You will evaluate evidenced-based health outcomes research to include instruments and strategies for measuring the economic valuation of healthcare programs. You will examine factors that affect quality and safety and develop strategies to monitor and improve health outcomes.

Within the practice setting, you will appraise factors that increase risks and liability. You will review data using information technology and review the literature addressing a healthcare issue to identify a DNP project topic. Throughout your practice experience, you will seek opportunities to generate evidence-based solutions that address risks and liability.

*Requires 90 practice experience hours.

DNP-7108 - Clinical Analytics and Data Management

Semester Credits: 6 Weeks: 8

Prerequisites: DNP-7107 - Health Outcomes Research

This course focuses on data management skills to measure the use of services and quality of patient care. Within the practice setting, you will incorporate multiple techniques and methods to diagnose system issues and measure quality improvement and program outcomes. You will also assess ethical principles related to data governance and stewardship. Finally, you will work on formulating your problem statement for your DNP Project.

*Requires 90 Practice hours

MSN-5200 - Patient Safety in Nursing

Semester Credits: 3 Weeks: 8

Patient safety focuses on the minimization of errors in treatment and the prevention of adverse effects associated with patient care. In this course, students will be introduced to relevant theories, principles, practices, and operational issues as they relate to patient safety and quality. Patient safety problems and high-risk contexts for error occurrence will be explored, and appropriate tools and evidence-based practices to address these issues will be determined. Students will also examine external drivers and policy initiatives related to quality and patient safety improvement in nursing, including accreditation, and performance. Through the utilization of error theory and systems thinking, as well as methods of risk assessment, students will be challenged to consider the roles of various stakeholders in patient safety.

MSN-5220 - Analytics in Quality and Patient Safety

Semester Credits: 3 Weeks: 8

In the management of healthcare and nursing, the application and utilization of data are critical to achieving better healthcare outcomes and improvement. Nursing analytics encompasses the technology and skills utilized in data analysis and data visualization for enhanced decision-making.

In this course, you will be introduced to how data analytics is utilized in nursing quality and patient safety. You will re-visit Quality Safety Education in Nursing (QSEN) principles for best patient outcomes. This course will provide an overview of data management for effective health systems evaluation and tools utilized for organization, analysis, and presentation of data. Understanding how to develop data collection plans that support continuous quality improvement will also be included.

MSN-5230 - Performance and Process Improvement in Nursing

Semester Credits: 3 Weeks: 8

The tools and techniques utilized for performance and process improvement help nurses identify inefficiencies, ineffective care, and preventable errors, and perform root cause analysis to identify gaps in best practice. In this course, you will explore various processes utilized for quality control and assurance to support performance improvement in the healthcare settings. Performance improvement tools and techniques explored during this course will include Root Cause Analysis (RCA), Plan-Do-Study-Act Cycle, Lean Six Sigma, project management, and process mapping. You will gain an understanding of how to apply effective performance improvement tools in the role of a nurse leader in health systems management.

MSN-5240 - The Nursing Quality Professional

Semester Credits: 3 Weeks: 8

High reliability organizations (HRO) are organizations that operate in complex, high-hazard domains for extended periods without serious accidents or catastrophic failures. The nursing professional is instrumental in ensuring a culture of safety and continuous quality improvement exists within the HRO. In the role of a nursing quality professional, you will contribute to enhancing care delivery, optimizing value, and improving outcomes by leading activities that improve quality and patient safety. In this course, you will explore the nursing quality professional's role and examine the necessary competencies and ethical standards required of today's nursing quality professional. You will focus on collaboration with various healthcare stakeholders to assess and identify quality issues that may impact the healthcare organizations' reputation, safety, security, and financial prosperity.

Nursing Education

NUR-7000 - Nursing Education Theories and Concepts

Semester Credits: 3 Weeks: 8

In this course, you will focus on theories and concepts that provide the foundation for nursing education and adult learning. You will conduct concept exploration and analysis in theory development. You will examine multi-disciplinary concepts applicable to nursing education and nursing research. You will also review seminal and current literature from nursing practice, education, and research, as well as social sciences.

NUR-7001 - Future of Nursing Education - Challenges for the Educational Leader

Semester Credits: 3 Weeks: 8

In this course, you will explore future opportunities and challenges within nursing education as a scholar-practitioner and leader. You will evaluate future trends in technology, intra/interprofessional collaboration, regulatory changes, social and cultural diversity, and employment related to the development and advancement of nursing education.

NUR-7002 - Nurse as Educator

Semester Credits: 3 Weeks: 8

In this course, you will examine the evolving roles of the nurse educator within the ever-changing healthcare system and educational environment. You will also explore the nurse educator from the teacher, leader, researcher, collaborator, mentor, and change agent perspectives. The principles of teaching adult learners applied to classroom and clinical education settings will be examined. A personal and professional philosophy of nursing education will be developed in this course.

NUR-7003 - Evidenced-Based Teaching in Nursing

Semester Credits: 3 Weeks: 8

In this course students will learn the foundational knowledge in the science of nursing education for developing skills and behaviors for contemporary nursing education practice and scholarship. This course explores current evidence-based andragogic practices within the nursing education discipline.

NUR-7004 - Teaching with Technology in Nursing Education

Semester Credits: 3 Weeks: 8

In this course, students will learn the importance of reflection on teaching with technology in nursing education in the classroom and clinical settings. The goal of this course is to ensure that students have an understanding of technology tools that can create diverse and meaningful learning experiences for students. The course is designed to examine current technology trends including simulation, online learning, learning management systems, instructional design, web 2.0 tools, computer assisted learning,

presentation software, EHRs, and videos. Through discussion and sharing, students refine their skills in using these tools to practice as an educator.

NUR-7005 - Assessment and Evaluation in Nursing Education

Semester Credits: 3 Weeks: 8

Students will learn evaluation methods used in nursing education curriculum. Content includes norm referenced and criterion referenced evaluation methods. Students will identify criteria used to develop reliable and valid evaluation measures. Students will explore measures used to identify cognitive, affective, and psychomotor domains as they relate to education and nursing. Current issues and research related to educational testing instruments, alternatives to standardized evaluation methods, and outcome measurement in education will be discussed.

Organizational Leadership

OL-5100 - Resolving Conflict

Semester Credits: 3 Weeks: 8

Conflict management processes and skills are essential for educators to possess. This course focuses on examining the nature of conflict—its origins, sources, and types—as well as the concepts and skills of proactive intervention and conflict resolution/peer-mediation programs. Emphasis is placed on enhancing a leader's approach through focusing on interpersonal relationships and communication skills. Utilizing and applying various conflict resolution strategies and approaches within a school setting are highlighted.

OL-5101 - Organizational Capacity

Semester Credits: 3 Weeks: 8

Organizational leaders are responsible for promoting capacity to improve the performance at all levels within an organization. Students will explore the intersection of leadership skills and organizational capacity. Specific focus will be on motivational theories used in leadership practices, understanding the impact of decision-making and problem-solving skills on an organization, and exploring the influences of culture and the environment on the performance of an organization.

OL-5102 - Applied Research for Organizational Leaders

Semester Credits: 3 Weeks: 8

Students will review and apply research-based leadership methodologies and theories for educational leaders addressing organizational productivity. Students will explore the foundations and applications of applied research in an educational setting as applied to organizational productivity. Students will identify and analyze data in educational organizations to implement realistic and sustainable organizational solutions.

OL-5103 - Leading Change and Organizational Renewal

Semester Credits: 3 Weeks: 8

Students will explore the theoretical and practical underpinnings of educational organizational development. Particular emphasis is placed on examining and understanding the intrinsic role of mission, vision, purpose, and core values in the development of an organization. Students examine the leadership skills required in the development of an educational organization including planning, collaborating, training, and communicating. Students will also be introduced to external influences that impact organizational development.

OL-7100 - Conflict Resolution and Mediation

Semester Credits: 3 Weeks: 8

Conflict is a normal part of living and working together. Conflict can give you opportunities to learn and grow both personally and professionally. Of course, the positive potential of conflict does not eliminate the discomfort we can feel around conflict. In this course, you will examine conflict and mediation within a variety of educational organizations. You will evaluate conflict management skills and practices, including discerning the implications of diversity, equity, inclusion, and cultural responsiveness in the process of conflict interpretation and management within educational organizations.

OL-7102 - Leadership Ethics to Attain Organizational Excellence**Semester Credits: 3 Weeks: 8**

In this course, you will explore the role of ethical leadership in attaining organizational excellence. Given the many types of educational organizations, you will examine leadership competencies that relate specifically to ethical behavior in your choice of educational organizations. Organizational leaders create a culture of ethical behavior. You will critique the techniques leaders use to communicate decisions, manage conflict, and address ethical dilemmas within the educational organization. You will also use case studies as a method of analyzing and responding to ethical dilemmas.

OL-7104 - Leadership in Nonprofit Organizations**Semester Credits: 3 Weeks: 8**

You will learn fundamental concepts about leadership in nonprofit educational organizations. From the basics of board governance to the leader's role in cultivating reciprocal community partnerships, you will consider the unique needs of different types of nonprofit educational institutions. You will also learn about the role of leadership in managing human and financial resources and communicating with internal and external stakeholders.

OLB-7001 - Conflict Resolution and Mediation**Semester Credits: 3 Weeks: 8**

Students must become adept at interpreting conflict and identifying options that result in a favorable outcome for all stakeholders. Constructive responses and mediation skills developed through a focused effort to understand communication patterns, interpersonal relationships, and communication skills can produce successful conflict resolution. Theory, self-reflection, and enhancement of conflict skills, cultural understanding, structure, and practice of collaborative and mediated negotiations are emphasized.

OLB-7002 - Building Organizational Capacity**Semester Credits: 3 Weeks: 8**

Capacity building, an integral aspect of organizational leadership, involves investing in the right people for the right roles, and implementing the necessary systems to optimize their success. In this course, students will learn theories and best practices having to do with leadership's role in building and maintaining organizational capacity.

OLB-7004 - Theory and Practice of Organizational Leadership**Semester Credits: 3 Weeks: 8**

The Theory and Practice of Organizational Leadership course focuses on theories of leadership as they apply to organizational success. In this course, students will learn about various theoretical and applied leadership theories and practices. Students will also identify theories and practices appropriate for their own use in their own organizations.

OLB-7005 - Ethical Leadership**Semester Credits: 3 Weeks: 8**

In this course, students gain a deep understanding of the complexity of organizational ethics and ethical leadership through

critical analysis and research regarding ethical principles. Students will research and evaluate consequences of unethical leadership, and how to build and maintain a culture of ethics. Students will assess ethics as they pertain to the globalization of organizations.

OLB-7006 - Communicating Change

Semester Credits: 3 Weeks: 8

Communication is never more important than during times of change. Leaders play an integral role in leading organizational change by helping others understand the need and purpose of change through effective communication. In this course, you will examine leadership theories which underpin communication strategies and practices to successfully manage organizational change.

OLB-7007 - Leader as Coach/Consultant

Semester Credits: 3 Weeks: 8

Coaches and consultants (internal and external) have become an important part of organizational reality. In this course, students will examine coaching and consulting theories and application. Students will also explore their skills in adapting their styles to particular organizational contexts, through both effective communication and astute analyses and recommendations.

OLB-7008 - Executive Leadership

Semester Credits: 3 Weeks: 8

Leadership strategies are often unique to a specific organizational sector (corporate, governmental, nonprofit, etc.). In this course, you will examine cross-disciplinary leadership theories and strategies for their appropriateness to particular sectors. You will also evaluate the role of leadership in organizational development, organizational culture, and organizational change.

Project Management

PM-6000 - Project Procurement Management

Semester Credits: 3 Weeks: 8

Project Procurement Management includes the processes necessary to acquire the materials necessary for the project team to perform their mission. This course includes contract management and the change control processes required to administer contracts or purchase orders issued by project team members.

PM-6004 - Project Risk Management

Semester Credits: 3 Weeks: 8

Project risk is an uncertain event or condition that can have either a positive or negative effect on a project's objectives. This course includes the processes concerned with conducting project risk management planning, identification, analysis, mitigation and monitoring and control.

PM-6008 - Project Monitoring and Control

Semester Credits: 3 Weeks: 8

In this course, students will explore the components of project monitoring and control measures in project management. Students will monitor project progress in order to identify variances from the initial project plan. Corrective actions will be identified in order to meet project objectives. Students will identify and quantify control concepts, pricing and estimating methodologies in order to incorporate these concepts in to a Quality Management Plan for the project.

PM-6020 - Management, Leadership and Team Building in the Project and Program Environment

Semester Credits: 3 Weeks: 8

This course will explore techniques and skills that can mitigate human resource problems in the project and program environment. Such problems can cause delays, erode quality, increase costs, and result in high levels of stress for everyone on the project team. This course will introduce and investigate soft skills utilized in management, leadership, and team building that can be applied to manage tough human resource issues. Students will examine concepts of leadership and organizational behavior to promote their effectiveness as both project leaders and project managers. Integration of tools and technology such as social media and management of virtual and multi-cultural teams will also be studied.

PM-7000 - Project Procurement Management

Semester Credits: 3 Weeks: 8

Doctoral Learners will examine strategies and materials necessary for a project team to manage procurement processes and issues. The course covers procurement and contracting for products, services, and personnel, as well as legal and ethical implications of procurement and contracting. Students should be able to apply procurement management principles and PMBOK (5th ed) processes to actual contracts and procurement contexts, as well as applying organizational theories to project procurement research.

PM-7004 - Project Risk Management

Semester Credits: 3 Weeks: 8

This course examines project risk management planning strategies. students will identify, analyze, and suggest responses to processes regarding monitoring and control. Students will be evaluated on response to discussion questions, subject matter related to the activity and evaluated based on written research papers.

PM-7008 - Project Monitoring and Control

Semester Credits: 3 Weeks: 8

In this course students will explore the components of project monitoring and control measures to identify variances from the project plan. Students will assess project monitoring and the controls to be applied from a more theoretical viewpoint. The student will be researching theorists and key implementers in the field. Corrective actions will be formulated in a final assessment project.

PM-7012 - Multiple Project Management

Semester Credits: 3 Weeks: 8

This course provides strategies from industries responsible for management of multiple projects. Students will utilize multi-project management tools, techniques and methods need to successfully manage allocated resources across various projects. Students will be evaluated on response to discussion questions, subject matter related to the activity and evaluated based on written research papers.

PM-7016 - Managerial Budgets and Project Management

Semester Credits: 3 Weeks: 8

Budgets provide an accurate measurement of the authorized work physically accomplished plus a status of the management's budget for the completed work. This course presents the budgeting for a project and one tool that can be applied to measure project progress: The Earned Value Management technique. Earned value will be examined in this course as an effective technique to manage project budgets and express project progress.

Psychology

PSY-5101 - Foundations for Graduate Study in Psychology

Semester Credits: 3 Weeks: 8

This course is an introduction to graduate studies in Psychology. Students will have an opportunity to review psychological theories, ethical principles, and history of the field, including the emergence of diversity in the field of Psychology. In addition, graduate level skills, such as academic integrity, effective use of the University Library, comprehending complex scholarly texts and research articles, and use of APA form and style in professional communication will be introduced. Students will complete the course with a roadmap to navigate their way to completion of their educational aspirations.

PSY-5103 - Professional Ethics, Law, and Psychology

Semester Credits: 3 Weeks: 8

The APA Code of Ethics is a comprehensive document. However, its application can be complex. Ethical decision making involves commitment to principles, a comprehensive understanding of the issues involved and the ability to view issues from the viewpoint of different stakeholders. This course provides you with an opportunity to apply the Ethical Principles in a number of settings and to develop an understanding of a number of basic ethical concepts. This course also emphasizes the importance of knowing state laws and regulations which may differ from the ethics standards established by the American Psychological Association or other national organizations.

PSY-5104 - Theories of Human Development and Functioning

Semester Credits: 3 Weeks: 8

In this course, the student will study human development from conception through late adulthood. Students will engage in a variety of activities and applications through which they will explore, understand, and reflect upon key theories and concepts related to physical, cognitive, and psychosocial development across the lifespan. Students will develop an appreciation of the impact of the cross-disciplinary importance of the study of human development.

PSY-5107 - Research Design

Semester Credits: 3 Weeks: 8

This course focuses on the fundamentals of quantitative and qualitative approaches to psychological research. Students will gain an understanding of the strengths and limitations of each approach, and how these methods apply to their areas of research interest. This course also provides students with background on research ethics and skills in conducting critical reviews of peer-reviewed research articles.

PSY-5108 - Cognitive and Affective Basis of Behavior

Semester Credits: 3 Weeks: 8

This course will examine the foundational theories related to cognitive and emotional influences on behavior. Themes to be traced will include process and application of memory, perception, language, problem-solving, decision-making, and creativity. The course will examine how emotion impacts cognition as well as the interactive characteristics of human cognition and affective functioning.

PSY-5109 - Theories of Personality

Semester Credits: 3 Weeks: 8

In this course, students will examine, compare and contrast key personality theories. Drawing on classic and contemporary

sources, students will consider Freudian, post-Freudian, behaviorism, and social learning theories. Students will also examine more contemporary theories on personality, such as those put forth by cognitive, humanistic, and positive psychology.

PSY-5110 - Applied Statistics

Semester Credits: 3 Weeks: 8

This course provides an introduction to descriptive statistics, hypothesis testing, confidence intervals, margin of error, and the visual representation of statistical data. The emphasis in this course is on developing a conceptual knowledge of how statistics are used in psychological research, applied psychology, and everyday life. The student will learn about many of the commonly used statistical tests in psychological research such as t-tests, ANOVA, correlation, regression, and chi-square are along with their interpretation. The application of these concepts to experimental psychological research, applied psychology, and everyday life will be explored in this class.

PSY-5404 - Tests and Measurements in Industrial/Organizational Psychology

Semester Credits: 3 Weeks: 8

This course introduces students to the basic theories, applications, and issues of psychological testing and assessment. Students will review the history and ethics of tests and measurements in Industrial Psychology. Applications such as performance appraisal and employee selection will be examined, as well as the merits of personality and vocational testing.

PSY-6102 - Multicultural Psychology

Semester Credits: 3 Weeks: 8

This course prepares the student to deal with essential issues in a multicultural society from both an individual and professional standpoint. Topics to be covered include the emergence of multicultural psychology, considerations for psychological research and testing, and how multiculturalism promotes a plurality of world views and communication styles. The formation and impact of stereotypes and prejudices in the light of establishing and maintaining a cultural identity in a multicultural society will also be examined. Finally, the student will become familiar with differences in access and views on physical and mental health services in different cultures.

PSY-6103 - Human Communication

Semester Credits: 3 Weeks: 8

Verbal and nonverbal communication and listening skills, as well as the ethics that apply to communication are covered in this course. Communication in the workplace, between couples, and across cultures are also key topics of this course. The student will think critically about what makes public speaking influential and also study the cutting edge in communication, electronic mediated communication.

PSY-6106 - Capstone Course: Psychology

Semester Credits: 3 Weeks: 8

The Capstone course in Psychology is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MA program. The Capstone course culminates in a review of the evidence-based practices related to your specific interests.

PSY-6109 - Career and Lifestyle Development

Semester Credits: 3 Weeks: 8

This course focuses on the theory and skills needed to provide basic career and lifestyle counseling. During this course, students will explore the importance of careers and lifestyle from a developmental point of view. Research and measurement, which are

key to career counseling, will also be evaluated, as well as various career counseling strategies and ethics required in this field. The students will have the opportunity, using scenarios and pilot proposals to exercise skills in career counseling.

PSY-6110 - Clinical Survey of Substance Abuse and Dependence

Semester Credits: 3 Weeks: 8

This course will cover the broad scope of substance use and dependence, and its impact on individuals, families, and society. This includes the costs of substance misuse in terms of lives lost, health problems, and financial losses. You will explore theories and models of both the etiology and treatment of substance use disorders, including the exploration of a variety of both legal and illicit substances, as well as the physiological and psychological processes of dependence. Prescription drug abuse, abuse of over-the-counter (OTC) drugs, and dietary supplements will also be covered, and gender and diversity issues are highlighted.

PSY-6114 - Psychological Tests and Measurements

Semester Credits: 3 Weeks: 8

This course provides students with a fundamental background in assessment and measurement as well as the ability to evaluate the psychometric strengths and weaknesses of individual psychological tests and measurements, using both conceptual and applied. This course focuses on psychometric principles (e.g. validity and reliability), test and items analysis, test construction, and applications of psychological testing in a wide variety of settings.

PSY-6121 - Theories of Psychotherapy and Counseling

Semester Credits: 3 Weeks: 8

This course examines theories and techniques of psychotherapy and counseling in general and their effectiveness when applied to specific diagnoses and special populations. Approaches reviewed include psychoanalytic, client-centered, behavioral, cognitive, existential, Gestalt, contemplative, and integrative. The course also examines proposed models of cultural psychotherapy. Historical bases, underlying personality theories, applications, and case studies for each approach will be considered.

PSY-6201 - Psychology of Sexuality and Sexual Orientation

Semester Credits: 3 Weeks: 8

In this course, you will examine dimensions of human sexuality from physiological, psychological, social, and cultural points of view. You will examine these dimensions via recent empirical research. You will also spend time reflecting upon, and in some cases, debunking preexisting ideas and bias, as personal reflection and growth are critical components of multicultural competence. Topics include an overview of stages of sexual identity development, cultural and individual variations, and stigma and discrimination.

PSY-6202 - Psychology of Gender

Semester Credits: 3 Weeks: 8

In this course, you will explore the way in which gender is understood and how it is informed by socialization, physiology, biology, and stereotyping. Gender differences are often overemphasized; in actuality, there are fewer differences than often assumed. Issues of transgender and intersex variations will be discussed minimally, as these topics are the focus of another course. Central to this course will be an opportunity to rethink and reintegrate ideas about gender differences and gender similarities across cultures. Further, the course will conceptualize gender on a spectrum instead of as a binary construct and explore historical milestones in the gender equality movement.

PSY-6203 - Introduction to Transgender and Non-Binary Studies

Semester Credits: 3 Weeks: 8

In this course you will be introduced to factors that influence and impact individuals who identify as transgender. Terms such as

gender queer, gender variant, intersex, cisgender, and transitioning, among others, will be discussed. Stages of male to female and female to male transitioning and how to offer support at each stage will be explored. Stigma and barriers to care will be examined as well as strengths-based, affirming model of care for assessment, support, treatment, and advocacy. You will learn to conceptualize cases from a holistic, multicultural perspective and acknowledge that all people regardless of group or identity are informed by their larger context and culture.

PSY-6206 - Psychology of LGBTQ+ Studies

Semester Credits: 3 Weeks: 8

In this course you will review the full spectrum of human sexuality and the individual's development of sexual identity and orientation. The full range of identities will be explored including asexuality, gay, lesbian, bisexual, pansexual, and others. Stigma and discrimination as they relate to these groups will be explored in addition to your own bias related to these groups. Historical milestones in the LGBTQ+ movement will be explored. You will examine a strengths-based, holistic, affirming model for treating this community. Your learning will culminate in learning how to educate others on the topics and to advocate for the populations described in this course.

PSY-6207 - Capstone: Gender and Sexual Fluidity

Semester Credits: 3 Weeks: 8

The Capstone course in Gender and Sexual Fluidity is an opportunity to demonstrate a range of professional competencies and communication skills, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the MA program. The Capstone course culminates in a review of the evidence based practices related to a specific issue in the field of Gender and Sexual Fluidity.

PSY-7101 - Foundations for Doctoral Study in Psychology

Semester Credits: 3 Weeks: 8

Students in this course will be prepared for success in the psychology doctoral program at the University. Students are introduced to relevant academic communities, professional standards, and doctoral-level expectations. Essential skills needed to pursue a doctoral degree in psychology are emphasized, including critical thinking, comprehending complex scholarly texts and research articles, and effective written communications. Students will identify and begin to explore potential research topics for use in their doctoral studies and complete the course with a roadmap to navigate their way to degree completion.

PSY-7102 - Scholarly Writing and Professional Communication in Psychology

Semester Credits: 3 Weeks: 8

This course focuses on scholarly and academic writing with an overarching goal of critically analyzing and thoughtfully synthesizing research findings while adhering to APA style and the principles of Academic Integrity. The emphases in this course are on how to (a) conduct effective literature searches; (b) critically review and summarize research studies; (c) write comprehensive, critical, and synthesized reviews of research literature; (d) formulate ideas and convey them in an ethical fashion; and (e) use feedback to revise and improve one's work.

PSY-7103 - Research Methods

Semester Credits: 3 Weeks: 12

In this course you will explore fundamental concepts of research in the social sciences. You will be introduced to key concepts in research methodology and design to encompass quantitative and qualitative approaches to collecting and analyzing data. You will explore issues of conceptualization and measurement, operationalization, validity, reliability, and trustworthiness. You will critically evaluate existing research focusing on key issues that underlie robust, replicable, and rigorous research as well as research ethics. This course provides a foundation for subsequent research courses in preparation for successfully completing a dissertation at National University.

PSY-7103U - Research Methods

Semester Credits: 3 Weeks: 8

This course focuses on understanding the fundamental concepts of rigorous research in the social sciences. Students will be introduced to concepts such as operationalization, validity and reliability and to different research methodology (e.g., quantitative and qualitative approaches to collecting and analyzing data). Students will critically evaluate academic writing on research as well as research ethics. This course provides a foundation for subsequent research courses in preparation for successfully completing a dissertation at the University.

PSY-7104 - Statistics I

Semester Credits: 3 Weeks: 12

This course provides an introductory exploration of statistics for the graduate student. It includes instruction on the calculation, use, and interpretation of descriptive statistics, and introduces inferential statistical analysis. The emphasis of this course is on providing a working knowledge of basic statistical concepts to help the student understand statistical methodology used in psychology, and also more generally, developing a working knowledge of statistical usage in everyday life.

PSY-7105 - Tests and Measurements

Semester Credits: 3 Weeks: 8

This doctoral course in tests and measurements provides the student conceptual as well as practical guidelines in test and scale construction. This course will expose the students to concepts and theories including: the nature of psychological constructs and concepts, measurements and measurement error, item construction and analysis, Classical Test Theory, and the different approaches to establishing instrument reliability and validity. Students will have the opportunity to apply the skills and concepts to a construct relevant to their own research interests.

PSY-7107 - Statistics II

Semester Credits: 3 Weeks: 12

This course is an intermediate examination of statistical analyses commonly used for research in behavioral and health sciences. It prepares the doctoral student with the skills required to plan, conduct (using SPSS), report, and interpret quantitative statistical analyses. Topics include: basic statistical knowledge, probability theory, exploratory data analysis, assumptions for statistical tests, parametric and nonparametric tests. Specific analyses include: correlation, regression (simple, multiple, and logistic) basic ANOVA and advanced ANOVA techniques.

PSY-7108 - Qualitative Research Design

Semester Credits: 3 Weeks: 12

In this course, students will examine the five major qualitative inquiry traditions : narrative research, phenomenology, grounded theory, ethnography, and case study research. Students will gain the critical knowledge of the use of qualitative research methods in psychology and the skills necessary to carry out this kind of research. The course will focus on the steps involved in completing a qualitative research design in preparation for doctoral-level work in qualitative research methods.

PSY-7112 - Research Design Planning

Semester Credits: 3 Weeks: 12

This course focuses on how to conduct effective literature searches, specifically in preparation for the dissertation, develop a plan for writing comprehensive, critical, and synthesized reviews of research literature, and critically review and write about underlying theoretical frameworks that lay the foundation for future research. The overarching goal of this course is for students to conduct an extensive search of the peer-reviewed empirical and theoretical literature in their topic area and identify potential areas of inquiry for their dissertation.

PSY-7113 - Recruitment, Selection, and Training

Semester Credits: 3 Weeks: 8

This course provides a focus on Personnel Psychology topics including recruitment, personnel selection, performance, and training. Specifically, you will review the fundamentals of job analysis and measurement which serve as the foundation of many human resource management systems. In addition, you will explore recruitment, personnel selection, and placement as well as the legal ramifications of these critical staffing decisions. Job performance models will be examined and you will apply criterion theory to understand performance measurement. Key concepts, tools and research related to career development and training will also be addressed in this course.

PSY-7116 - Tests and Measurements in Industrial/Organizational Psychology

Semester Credits: 3 Weeks: 8

The goal of this course is to increase students' understanding in the use of psychological tests and measurements within Industrial/Organizational (I/O) psychology settings. Students will explore the purposes and uses of psychological tests as applied to selection, placement, and training assessment. Students will examine how these tools may be utilized as part of typical I/O psychology activities such as developing and administering psychological tests, selecting the right test type, and understanding statistics as applied to test analysis and interpretation.

PSY-7117 - Advanced Statistics in IO Psychology

Semester Credits: 3 Weeks: 8

This course involves an examination of univariate, bivariate and multivariate statistical analyses commonly used for research in Industrial/Organizational Psychology. It will prepare you with the skills required to plan, conduct (using SPSS), report, and interpret advanced quantitative statistical analyses. Specific analyses include: correlation, regression (simple, multiple, polynomial, and logistic), analysis of variance (ANOVA) and covariance (ANCOVA), multivariate analysis of variance (MANOVA) and covariance (MANCOVA), discriminant analysis, factor analysis, linear modeling, and structural equation modeling.

PSY-7118 - Internship in I/O Psychology

Semester Credits: 3 Weeks: 12

This course provides you an opportunity to complete their doctoral degree by participating in an internship in Industrial/Organizational Psychology. Internship experiences are designed to guide you through specific standards-aligned experiences which will result in competency development that is demonstrated through application in practice. During the internship experience, you will meet regularly with an assigned University professor as well as an approved internship site supervisor to discuss the student's experiences applying I/O Psychology in an organizational setting. Weekly assignments include submission of required evaluations and preparation for a theoretically grounded signature assignment summarizing the internship experience.

PSY-7120 - Overview of the Psychological Concepts

Semester Credits: 3 Weeks: 8

In this course, you will explore the multifaceted world of psychology, the scientific study of mind and behavior. This course will serve as a leveling course for those coming into our psychology programs without the needed background in psychology, or who have earned degrees in psychology many years ago. Through reading, research, and interaction with fellow students and faculty, you will be provided with opportunities to experience various psychology concepts and theories. You will also examine professional ethics.

PSY-7121 - Socio-Contextual Psychology of Gender

Semester Credits: 3 Weeks: 8

In this doctoral-level course, you will critically engage in materials designed to explore the diverse processes in which gender concepts are constructed using biological, psychological, and social lenses. You will explore gender, including transgender, cisgender, genderqueer, gender non-binary, and gender-fluid. Along with studying the many forms of gender, you will identify how gender can be experienced as performative rather than as an essential quality. Additionally, you will discuss the implications of these concepts for research and professional practice.

PSY-7122 - Family Processes and Social Context**Semester Credits: 3 Weeks: 8**

The specific focus of the course is on the processes and dynamics of interaction within family relationships as they relate to concepts of gender identity, sexual orientation, and the intersection of larger social discourses. In this course, you will examine diverse family units (e.g., LGBTQ families, open-relationships), roles, rules, and conflict resolution in families, and an exploration of socio-contextual factors.

PSY-7123 - Key Theories and Concepts in Sexuality and Gender Studies**Semester Credits: 3 Weeks: 8**

In this course you will explore the intellectual and social movements (such as Marxism, post-structuralism, critical race studies, queer studies, indigenous studies, and postcolonial and transnational studies) that have influenced the development of theories and concepts in gender studies as they relate to research and practice in psychology. You will engage critically in deepening understanding of how theories and epistemology influence the constraints and possibilities in the psychology of gender and sexuality. This is meant to be a theory introduction course to set the stage for the remaining courses in this specialization and engage your thinking in how these theories influence research, teaching, and advocacy.

PSY-7124 - Sexuality and Sexual Fluidity**Semester Credits: 3 Weeks: 8**

This course will involve an exploration of human sexuality through a socio-contextual lens regarding the psychological and political influences on sexual identity development, sex, and sexuality. The focus of the course will be upon research and advocacy in relation to issues often arising from oppressive cultural discourses of sex and sexuality. You will address topics including sex, sexual orientations, sexual behaviors, intersexuality, and interpersonal challenges from family and the culture. Using a social-constructionist frame, this class will acknowledge and deconstruct discourses that give rise to the oppressive effects of intolerance, homophobia, sexism, and assumptions of hetero-normativity.

PSY-7125 - LGBTQ Identity and Relationship Development through the Life Cycle**Semester Credits: 3 Weeks: 8**

In this course you will build on the ideas of developmental psychology to further explore how developmental tasks (e.g., LGBTQ identity development, coming out, dating, love, relationships, marriage, parenting, career, aging) unfold and are affected by the developmental stages throughout lifespan and in the context of societal and institutionalized heteronormativity and homo/bi/trans-phobia. Additionally, the intersection of moral and religious/spiritual development will be explored in relation to LGBTQ lifespan development.

PSY-7126 - Special Topics: Research, Policy, & Advocacy from a Global Perspective**Semester Credits: 3 Weeks: 8**

This course will look at the intersection of social, relational, and political dynamics that impact the policies related to LGBTQ individual and family lives from a global perspective. This will include the ways that organizational policies (e.g., APA) and laws across countries impact the psychology profession, research, practices and advocacy. Policies to be covered include

adoption/surrogacy, second-parent rights, marriage, medical transitioning, homelessness/drug policy, divorce/relationship dissolution, HIV, researcher and advocacy bias, social media.

PSY-7220 - Advanced Applied Theory in Sport & Performance Psychology

Semester Credits: 3 Weeks: 8

In this course, you will be exposed to advanced theoretical and applied mental conditioning techniques used in the field of sport and performance psychology. Through case study analysis and a critical review of current research, you will gain competence in conceptualizing and designing mental training strategies when working with athletes and high performers in a variety of diverse settings. You will also develop the appropriate professional skills to be an effective mental performance consultant in high performance environments.

PSY-7221 - Motivation in Sport & Performance Psychology

Semester Credits: 3 Weeks: 8

In this course, you will be exposed to a variety of motivation theories and principles utilized in sport and performance psychology. You will gain competence in understanding different approaches to motivation, categorizing the characteristics of high and low achievers, and developing motivational strategies when working with athletes and high performers in a variety of diverse settings. You will explore the differences in motivational orientations and evaluate appropriate methods to facilitate motivation. You will also examine the relationship between motivation and flow states.

PSY-7222 - Leadership Development in Sport & Performance Psychology

Semester Credits: 3 Weeks: 8

In this course, you will be exposed to a variety of leadership theories used in sport and performance psychology to help athletes and high performers reach their potential. You will gain competence in identifying team and organizational challenges and creating practical strategies to enhance decision-making, communication, and a growth mindset. You will explore a variety of leadership styles that may assist individuals in identifying an ideal leadership identity and philosophy to successfully guide teams.

PSY-7223 - Prof Ethics in Sport Psyc

Semester Credits: 3 Weeks: 8

In this course you will be introduced to different ethical principles, decision-making models and ethical guidelines, and professional issues for the field of Sport Psychology. You will review the guidelines presented by AASP and the APA, explore common ethical issues in sports, military, business, and other high-performance environments. You will also explore ethical challenges related to the technological advances in the field, such as teletherapy. You will critically analyze research articles and case studies that are pertinent to ethical issues in Sport Psychology.

PSY-7224 - Psyc of Sports Injury & Rehab

Semester Credits: 3 Weeks: 8

In this course, you will be exposed to advanced theoretical foundations and interventions of athletic injury and rehabilitation. Through case study analysis and a critical review of current literature, you will enhance your learning on how to create an integrated approach to sport rehabilitation. You will explore an advanced approach to the physical, psychological, and psychosocial nature of injuries as they relate to athletes and high performers.

PSY-7225 - Diversity, Culture, & Society

Semester Credits: 3 Weeks: 8

In this course, you will explore historical and contemporary topics relevant to the understanding of diversity, equity, and

inclusion in sport and high-performance environments. You will learn about various sociological theories and analyze current leadership theories that facilitate acceptance of diversity within sport and high-performance organizations. You will learn to challenge the current state of sport and performance environments by examining its significance in contemporary society through a social, cultural, political, and economic lens.

PSY-7500 - Advanced Quantitative Methods

Semester Credits: 3 Weeks: 12

In this course you will examine the principles of quantitative research methodologies. Specifically, you will take a deep dive into the different types of quantitative research methodologies, when to use each, strengths/weaknesses, associated reliability/validity issues, and sampling methods. You will learn how to identify appropriate statistical analyses based on research questions and data considerations, as well as use SPSS to run, analyze, and interpret statistical results. You will explore how to examine, analyze, and interpret psychometric properties for existing instruments/measures in psychological research. Additionally, you will examine feasibility issues and ethical principles related to quantitative research methodologies. Scholarly writing and appropriate use of scholarly literature will be reinforced throughout this course.

PSY-7501 - Advanced Qualitative Methods

Semester Credits: 3 Weeks: 12

In this doctoral-level course, you will be immersed in the intricacies of qualitative research methods tailored for the psychology field. You will be introduced to a spectrum of methodological approaches and the foundational philosophical premises guiding them. Central to the course is hands-on application: you'll gain the skills to adeptly navigate the stages of problem formulation, method selection, data collection, analysis, and interpretation. We place a strong emphasis on the ethical dimensions of research, ensuring you are well-versed in the ethical considerations intrinsic to qualitative studies. Moreover, we encourage you to adopt a critical lens when assessing study design, execution, and data interpretation. Research is not just about data; it is about sharing discoveries. This course ensures you develop advanced communication skills for disseminating your findings across diverse platforms. Plus, you'll have opportunities to craft and present comprehensive qualitative research proposals. By the course's conclusion, you'll not only be proficient in methodologies but also gain a deeper appreciation for the depth and transformative potential of qualitative research in psychology.

PSY-8100 - Theories of Personality

Semester Credits: 3 Weeks: 12

This course reviews the various theoretical perspectives that have attempted to define and assess personality. Students will trace modern psychology's efforts to explain differences in individual personalities as well as identify universal characteristics. Finally, students will analyze and compare various concepts regarding personality and assess their application in understanding why people act in the manner that they do.

PSY-8107 - Program Evaluation and Monitoring in Psychology

Semester Credits: 3 Weeks: 8

This doctoral-level course focuses on the fundamentals of evaluating and monitoring human services programs. The purpose of this course is to familiarize you with the theory of program evaluation so you can conduct quantitative, qualitative, and mixed methods program evaluations. You will further develop your abilities to collaborate with stakeholders in developing evaluation plans that ensure evaluation processes meet the needs of multiple stakeholders. You will consider the various ethical implications of program evaluation and will identify ethical considerations in implementing an evaluation plan and reporting results.

PSY-8109 - Cognitive and Personality Assessment

Semester Credits: 3 Weeks: 8

This doctoral-level course presents an overview of the assessment of personality and cognition throughout the lifespan. The

course will provide a conceptual base for psychological assessment, define cognition and personality according to current research, review commonly used assessment measures, and discuss the interpretation of findings. DSM-V is used for disorder classifications. Considerations of diversity in assessment practices and ethical issues are highlighted. This course serves as a foundation for further study for individuals planning to assess personality and cognitive functioning.

PSY-8118 - Grant Writing in Psychology

Semester Credits: 3 Weeks: 8

This doctoral-level course will provide an overview of grant writing for dissertation and post-doctoral research on psychology-related topics. Basic grant writing skills such as researching, reading and responding to a Research Funding Proposal (RFP); as well as, developing the grant proposal inclusive of writing the rationale, purpose, problem statement, letters of support, budget and/or plan of work will be discussed. Assignments and projects will be available to engage and strengthen doctoral learners grant writing skills.

PSY-8130 - Multicultural Psychology

Semester Credits: 3 Weeks: 8

This doctoral-level course is designed to increase awareness of multicultural issues in psychology, including some issues of social diversity, with a focus on theoretical models, research, and techniques and interventions for working with culturally diverse populations in various settings from therapy to the workplace.

PSY-8135 - Psychology of Violence

Semester Credits: 3 Weeks: 8

Incidences of violence range from interpersonal violence including domestic violence/spousal abuse to workplace violence to worldwide terrorism. In this course, you will acquire a better understanding of psychopathology of violence by examining violent behaviors in the context of the DSM 5. You will explore the field of victimology by reviewing current research regarding violence and learn prevention and treatment strategies to use in both professional and personal settings. In addition, you will examine violence and its effect on various populations and analyze the impact of media violence on children.

PSY-8137 - Biopsychology

Semester Credits: 3 Weeks: 8

This course takes a biopsychological perspective on key issues in behavior and mental health such as sex and gender, obesity, substance addiction, knowledge, cognition, and learning. The latest research and ethical issues in neuropsychology, such as neurogenesis, degeneration, regeneration, and the relation of adverse childhood events on brain structure and functioning will also be explored.

PSY-8138 - Cognition, Emotion, and Motivation

Semester Credits: 3 Weeks: 8

This doctoral-level course examines the critical concepts of emotion, motivation, and cognition. Topics to be explored include biological, cognitive, cultural, and social influences on emotional development and behavior. The importance of motivation on emotion will be reviewed. The relationship between emotion and cognition will be evaluated as will the concept of emotional intelligence. Emotions and their impact on mental health also will be discussed.

PSY-8139 - Positive Psychology

Semester Credits: 3 Weeks: 8

This course examines the historical and theoretical perspectives of positive psychology. The emphasis includes a scientific investigation of the latest research of positive psychology focusing on subjective well-being, positive emotions, strengths,

resilience, post-traumatic growth, grit, and growth mindset. You will explore how positive psychology is being implemented in the home, workplace, education, and in clinical settings. You will evaluate the challenges faced by the positive psychology field and the potential evolution of this branch of psychology.

PSY-8140 - Community Psychology

Semester Credits: 3 Weeks: 8

This course focuses on the theories, research findings, and applications of community psychology. Relationships between environmental conditions and culture and the development of the health and well-being of all members of a community are also examined. Students will examine key concepts, principles, and values of community psychology. The theoretical frameworks in peer-reviewed research will be examined, assessed, and synthesized.

PSY-8141 - Human Communication- Interviewing Skills

Semester Credits: 3 Weeks: 8

Students in this course will learn, practice, and develop core communication skills that are essential to interviewing in the helping professions. As this is a practice-oriented course, students who plan to use interviewing techniques in their current or future professions will gain experience in essential communication skills such as listening to clients, clarifying concerns, and facilitating appropriate actions. Those students will benefit most from this course who are either currently in a helping profession capacity where interviewing is applied, or who are able to practice their skills as interns or in other settings.

PSY-8144 - Group Therapy

Semester Credits: 3 Weeks: 8

Group work, including group counseling, group therapy, and other type of change-oriented groups, involves special dynamics and processes and requires specific leader behaviors and characteristics. In this course, the student will examine, apply, and analyze these factors of group work. Videotapes of group therapy sessions conducted by expert and beginning therapists will form a basis for learning.

PSY-8145 - Child and Adolescent Psychology

Semester Credits: 3 Weeks: 8

In this course, you will explore child and adolescent psychology including both normative development and psychopathology. Through reading, research, and interaction with fellow students and faculty, you will be provided with opportunities to experience concepts and theories of both healthy and unhealthy cognitive, emotional, and social development from childhood into adolescence. Prevention, intervention, and recovery from unhealthy experiences will be addressed. Professional ethics will also be examined.

PSY-8146 - Theories of Psychotherapy and Counseling

Semester Credits: 3 Weeks: 8

In this course, you will gain an understanding of the different theoretical approaches to counseling and psychotherapy, along with an understanding of how these psychological theories developed and unfolded historically throughout time. Additionally, you will consider some of the newer models and methods of practice, along with the concept of the scholar-practitioner model. After completing this class, you will be able to analyze and consider the different models of treatment, and make the best selection given the unique client needs. Throughout the course, you will apply and reflect on your learning, and begin to develop your own integral and personalized approach to treatment.

PSY-8147 - Psychopharmacology

Semester Credits: 3 Weeks: 12

This doctoral-level course presents an overview of psychopharmacology, alternative therapies, and principles that focus on helping to identify those individuals who can benefit from the use of pharmacologic intervention, as well as useful methods of evaluating treatment efficacy. Research on neurophysiology, and biologic actions and side effects of psychopharmacological and alternative agents will be reviewed. DSM-5 is used for disorder classifications throughout this course. This course may serve as a foundation for further study for individuals planning to prescribe or consult, within their scope of practice, as a non-physician mental health professional.

PSY-8148 - Adult Psychopathology**Semester Credits: 3 Weeks: 8**

This course addresses the way psychopathology is conceptualized as well as how adult psychopathology is diagnosed. You will make critical appraisal of current diagnostic systems and consider the cultural and social contexts of psychopathology and its clinical application.

PSY-8150 - Human Sexuality**Semester Credits: 3 Weeks: 8**

You will be introduced to the history of sex and sexuality through the ages, including modern women, gay rights, and queer movements as well as sexual health. You will address key theories of gender, sex, and sexuality. You will also learn about sexual and reproductive attitudes, values, and behavior using developmental, social, and cultural lenses.

PSY-8151 - Lifespan Dynamics**Semester Credits: 3 Weeks: 8**

The specific focus of the course is on the processes and dynamics of interaction within human relationships, particularly from a life course perspective. You will examine how these dynamics change over time and with special attention given to aging and long-term care in the field of psychology. You will also explore the stages of family life and diverse family types, as well as information about various family structures and roles. You will study conceptualizations of effective functioning in couples and families and address various factors that impact couple and family systems. In addition, you will learn about existing assessments, detection strategies, and interventions pertaining to partner and spousal abuse.

PSY-8152 - Co-occurring Substance Related and Addictive Disorders and other Mental Conditions**Semester Credits: 3 Weeks: 8**

In this course you will acquire essential knowledge for effective integration of treatment services and ancillary support to individuals with co-occurring substance-related and other addictive disorders and other mental conditions. Specific focus will be placed on leadership responsibility in accurate assessment, treatment planning, and follow up services. Attention will be placed on developing a balanced treatment approach to adequately address the unique needs of the individuals receiving services.

PSY-8153 - Family Systems Approaches for Substance-Related and Addictive Disorders**Semester Credits: 3 Weeks: 8**

This course connects the issues of substance-related and addictive disorders with family systems dynamics. You will use foundational knowledge regarding substance-related and addictive disorders to understand addictive behaviors. You will also learn about family systems, including family roles, rules, and patterns. Understanding the connection of family relationships and generational patterns of addiction is key to facilitating successful recovery. You will review major theoretical frameworks for successful intervention with family systems as well as with individual who demonstrates addictive behaviors.

PSY-8154 - Substance Related and Addictive Disorder Assessment and Treatment Planning

Semester Credits: 3 Weeks: 8

This course provides an overview of substance-related and addictive disorder assessment and treatment planning. One overarching goal of the course is to give you exposure to various screening and assessment measures used in the process of assessment of substance-related and addictive disorders. A second overarching goal is to develop skills related to treatment planning for substance-related and addictive disorders including clinical interview, knowledge of addictive processes, diagnosis, and treatment planning. Finally, you will use the results of the assessment measures to inform diagnostic considerations and decision making around treatment goals and interventions.

PSY-8155 - Group Counseling in the Treatment of Substance Use Disorder**Semester Credits: 3 Weeks: 8**

In this course, you will evaluate strategies for developing groups for addictive disorders and explore how to assess goodness of fit and readiness for group therapy. While therapeutic substance abuse groups will be explored most directly in the course, you will also explore other approaches such as support groups and alcoholics anonymous. Additionally, you will compare different theoretical approaches to care. A discussion of client needs across settings such as inpatient and outpatient rehabilitation centers will be covered, as well as managed care and possible barriers to treatment. You will also discuss factors related to long-term success and relapse prevention.

PSY-8156 - Research in Substance-Related and Addictive Disorders**Semester Credits: 3 Weeks: 8**

This course provides an overview of research and theory in the field of substance-related and addictive disorders. You will examine theories of disorder development, maintenance, treatment and relapse. You will learn about research methods for studying disorders and treatment efficacy across diverse populations. You will select appropriate research designs to address specific issues related to substance abuse and addiction. Considerations for incorporating research into treatment will be explored. You will also examine potential ethical issues that can arise in research and how to address them.

PSY-8157 - Clinical Survey in Substance-Related and Addictive Disorders**Semester Credits: 3 Weeks: 8**

In this course you will explore substance-related and addictive disorders from theoretical, socio-cultural, biological, and legal/ethical perspectives. Topics covered include: classification and pharmacological properties of major abused substances, recognizing signs and symptoms of substance abuse and addiction, physiological and psychological processes of use and dependence, theoretical explanations of use and abuse, prevention of substance abuse, treatment approaches to substance abuse and addictive disorders, and the impact of substance abuse and addictive disorders on individuals, families and society.

PSY-8306 - Health Psychology**Semester Credits: 3 Weeks: 8**

This doctoral-level course examines psychological influences on physical health and well-being. Key topics to be explored include health behavior change, diversity in healthcare, social support, chronic illness management, illness prevention, and wellness. The role of health psychologists will be discussed, including how they contribute to healthcare policy.

PSY-8307 - Psychosocial Factors in Health**Semester Credits: 3 Weeks: 8**

The body-mind connection continues to be a popular research topic in the field of medicine and psychology. This course will help the student become aware of the body of research surrounding the impact of behavior, personality, and social factors on physical health. Further, it will explore how diversity issues, such as gender, age, and ethno-cultural factors influence health-related behaviors. Lastly, it will help students identify the ways in which psychosocial factors affect our health and health behaviors.

PSY-8308 - Behavioral Nutrition

Semester Credits: 3 Weeks: 8

Behavioral nutrition investigates the relationship between healthy diet and behavior. In this course, you will learn about what constitutes good nutrition, malnutrition, and under-nutrition. The physiological impact of nutrition will be examined. Psychosocial factors influencing nutrition and behavior will be reviewed.

PSY-8309 - Eating Disorders and Obesity

Semester Credits: 3 Weeks: 8

This course surveys topics related to eating disorders and obesity, including etiology, assessment, diagnosis, treatment, and prevention. Specific focus is given to the dispositional, social, and cultural factors associated with the development and maintenance of disordered eating patterns. Implications for psychological and physical health are examined.

PSY-8310 - Complementary and Alternative Medicine

Semester Credits: 3 Weeks: 8

This course takes an evaluative look at complementary and alternative medicine (CAM) from a health psychology perspective. Evidence-based practice in the application of CAM methods to managing physical health needs will be explored. Strategies and techniques leading to successful treatment outcomes will be assessed. Usage of CAM methods for diverse populations including children, older adults, ethnic groups and other minority populations will be examined.

PSY-8311 - Consultation and Interventions in Health Care Settings

Semester Credits: 3 Weeks: 8

Consulting in health settings requires an array of personal skills, knowledge, information, and techniques. In this course, the student learns practical skills for consulting. The student also becomes familiar with typical programs offered by consultants in healthcare settings.

PSY-8312 - Concepts of Trauma and Resiliency

Semester Credits: 3 Weeks: 8

In this course you will explore the individual and systemic predictors, types, and impacts of trauma across various personal, family, and community settings and disasters types. You will also examine the cumulative effects of trauma and theoretical approaches to supporting resiliency in individual, family, and community contexts. You will also explore methods to assess resiliency at various levels.

PSY-8313 - Trauma across the Developmental Continuum

Semester Credits: 3 Weeks: 8

In this course students will learn how to identify and assess the effects of trauma on the emotional, cognitive, neurological, and physical human systems, as well as the possible short- and long-term effects of trauma across the lifespan (infancy, child, adolescent, adult). In addition, students will examine how diverse cultural backgrounds influence trauma response across the lifespan. You will review pertinent theory, research and evidence-based practices.

PSY-8314 - Disaster Response and Trauma Responsive Practices

Semester Credits: 3 Weeks: 8

In this course you will examine crisis and disaster and the impacts they have on individuals, families and communities. You will explore how a crisis can lead to a catastrophic event or result in trauma. Pre-crisis, crisis and disaster response and management will be explained. Trauma responsive theories and evidence-based practices will be explored. You will also review the symptoms and impacts of compassion fatigue, secondary trauma and vicarious trauma. You will be able to mitigate and respond to natural and human-made crises and disasters via recognition of pre-crises and disaster signs.

PSY-8315 - Community Trauma and Resilience**Semester Credits: 3 Weeks: 8**

In this course you will examine how trauma may manifest at the community level, where symptoms may appear in the physical, economic, social, and cultural environments and subsequently become barriers to solutions that promote health, safety and well-being. Different evidence-based approaches to building trauma-informed, resilient communities will be explored, and post-traumatic growth will be examined. You will also explore theory and current research in the area of community trauma and resilience.

PSY-8316 - Diversity in Trauma and Disaster Response**Semester Credits: 3 Weeks: 8**

In this course, you will examine how constructs of culture, ethnicity, gender, and sexual orientation influence the experience and effects of trauma from a multitude of contexts, including natural disasters. In addition, you will explore the role of historical and intergenerational trauma as a means to develop cultural competency when responding to trauma. Finally, marginalized populations such as refugees, children of war, and survivors of torture will be examined relative to specific variables that impact trauma or disaster response.

PSY-8317 - Research Ethics in Trauma and Disaster Response**Semester Credits: 3 Weeks: 8**

This course provides an overview of ethical issues that may arise when working with disaster and trauma survivors. You will learn about ethical principles, such as APA and emergency responders' codes of conduct, and theoretical decision-making frameworks used to make sound ethical decisions in difficult situations. You will also examine potential ethical issues that can arise when conducting research and choosing appropriate evidence-based therapeutic interventions for trauma and disaster survivors.

PSY-8335 - Psychology of Aging**Semester Credits: 3 Weeks: 8**

In this doctor-level course you will explore the biological and psychological changes that occur within adults over time (intra-individual changes) and the extent to which these changes occur at different rates among different individuals (inter-individual differences). Theory and current research will be examined.

PSY-8336 - Mental Health and Aging**Semester Credits: 3 Weeks: 8**

In this course you will review the psychology of aging and related mental health considerations, areas often misunderstood by older adults, family, caregivers, and medical professionals. Common mental health issues such as depression, addiction, and anxiety faced by older adults will be addressed. Neurological changes, including Mild Cognitive Impairment (MCI) and dementia spectrum disorders, will be examined. Symptoms, assessment and treatment options for mental health issues in this population are complicated by the presence by the physical problems and associated medications and treatment. Other topics to discuss include risk factors for non-medication compliance, neglect, and abuse of older adults in residential homes, loneliness, and cross-cultural differences in coping strategies and social support.

PSY-8337 - Aging, Families, and Elder Care

Semester Credits: 3 Weeks: 8

In this course, you will examine the gamut of helping services known as elder care. These services include basic assistance with activities of daily living (ADLs), rehabilitation care, aging in place, familial caregiving, long-term care and hospice. This course focuses on the concepts, theories and strategies related to the care of older adults. Common concerns related to elder care needs will be discussed including the emotional strains families and older adults may face. A key component of the course will be identification of caregiver strategies, including support groups, respite care and other community resources.

PSY-8338 - Multicultural Perspectives of Aging

Semester Credits: 3 Weeks: 8

In this course, you will examine multicultural influences on the aging process on individuals. Topics to be covered include attitudes toward aging and well-being, social support, elder care, and end of life issues. Gender and cultural differences in aging experiences will be discussed. Concerns related to special populations also will be addressed.

PSY-8339 - Psychological Practice in Gerontology

Semester Credits: 3 Weeks: 8

In this course, you will examine the psychologist's role in assisting older adults and their families to address psychological, emotional, and other challenges during later life. Topics to be covered include an overview of psychological assessment and evaluation as applied to older adults as well as therapeutic techniques and interventions related to older adults on individual, group and family levels. Ethical considerations in geropsychology practice also will be discussed. Areas of practice such as clinical settings, government and nonprofit agencies, and long term care facilities will also be reviewed.

PSY-8340 - Death and Dying

Semester Credits: 3 Weeks: 8

In this course, students will consider the psychological aspects of death and dying in modern society. Students will also explore attitudes toward death and theories related to the stages of death and dying, along with coping strategies for dealing with impending death, the aftermath of suicide, and end of life decisions. This course will also address assisted dying, grief, and survivor's guilt.

PSY-8341 - Positive Aging

Semester Credits: 3 Weeks: 8

In this doctoral-level course, you will focus on healthy aging practices and interventions, and explore aging as a stage in lifespan development with unique opportunities for growth and fulfillment. You will explore the practical application of research, research ethics, and the role of diversity in evidence-based interventions for older adults. In this course, you will consider issues related to advocacy, accessibility, and fostering healthy aging in culturally-sensitive approaches. You will discover how to recognize and foster the interrelated psychological, spiritual, social, and physical aspects of healthy aging.

PSY-8406 - Multivariate Statistical Analysis

Semester Credits: 3 Weeks: 12

The central theme of this course is the general linear statistical model and its derivative methods including multivariate analysis of variance (MANOVA), MANCOVA, factor analysis, discriminant analysis, cluster analysis, linear modeling, path analysis and structural equation modeling. The course covers theoretical, computational, and interpretive issues of multivariate exploratory and inferential statistical procedures.

PSY-8407 - Industrial/Organizational Psychology

Semester Credits: 3 Weeks: 8

The course provides an overview of Industrial/Organizational Psychology (I/O), which involves application of the specific method to investigate issues of critical relevance to individuals, business, and society. Key concepts, tools, and research related to I/O psychology will be addressed in this course. Specifically, you will review the historical foundation of the field as well as explore topics of significance to industrial psychology (e.g., personnel selection, training and development, performance) and organizational psychology (e.g., employee motivation and attitudes, leadership, organizational development, and psychological health and well-being).

PSY-8408 - Leadership and Management

Semester Credits: 3 Weeks: 8

In this course, you will gain an appreciation of leadership and how it differs from management. You will approach these topics through a review of the literature and an evaluation of effective leadership competencies such as communication, managing conflict, and leading groups or teams. Self-assessment on leadership will help you understand their own profiles as leaders, as well as gain additional insight in the characteristics of leaders.

PSY-8409 - Work Motivation and Attitudes

Semester Credits: 3 Weeks: 8

This course focuses on contemporary theories and research surrounding job attitudes and motivation in the workplace. You will explore the methods used to measure job attitudes and motivation. You will also examine strategies for increasing motivation and improving job attitudes. In addition, important issues such as generational diversity, affectivity, occupational stress, and organizational withdrawal will be addressed.

PSY-8410 - Organizational Development

Semester Credits: 3 Weeks: 8

This course provides an overview of theory, research, and practice related to the implementation and management of change in organizations. Specifically, you will learn about the primary steps involved in the change management process. In addition, you will examine specific types of interventions aimed at facilitating change at the individual, group, and organizational levels. You will also evaluate the role of culture, strategy, design, and leadership in planned organizational change. The impact of contemporary change approaches designed to improve diversity and inclusion, workplace wellness, and employee involvement will also be addressed.

PSY-8412 - Organizational Training and Development

Semester Credits: 3 Weeks: 8

This course provides an in-depth look at how organizations train and develop employees. You will explore how training content is developed and how content relates to organizational strategy. You will also examine the importance of needs assessment, the effectiveness of training evaluation, and appropriate instructional methods. Fundamental psychological theories impacting organizational training and development are highlighted.

PSY-8413 - Consulting in Business, Education, and Health

Semester Credits: 3 Weeks: 8

This course provides an overview of how psychologists may provide their expertise to assist individuals, agencies, corporations and other types of organizations dealing with problems involving human behavior in the workplace. In this course you will learn how to develop the personal skills and understanding of consulting to give you a basis to develop a successful consulting program.

PSY-8506 - Ethics and Cultural Diversity in Mental Health and Wellness

Semester Credits: 3 Weeks: 8

Students seeking a PhD in Psychology with specialization in Social Policy and Behavioral Health Administration are required to take this course. This course covers ethics and cultural diversity as it relates to mental health and wellness. The history of ethics as well as how ethics relates to legal standards are addressed. Cultural diversity, sensitivity, and competence are also covered.

PSY-8507 - Comparative Analysis of Evidence-based Interventions

Semester Credits: 3 Weeks: 8

Students seeking a PhD in Psychology with a specialization in Social Policy and Mental Health Administration are required to take this course. In this course, you will analyze various evidence-based practices used by behavioral health practitioners in the treatment of mental illness and behavioral challenges. Methods of therapeutic accountability, clinical feedback, and outcome monitoring which can be used across all therapeutic approaches will be examined. You will analyze and evaluate treatment approaches in regards to moral, empirical, and political criteria. You will also evaluate considerations for best practice and appraise and select appropriate instruments for behavioral health evaluation.

PSY-8508 - Internship in Social Policy and Mental Health Administration

Semester Credits: 3 Weeks: 8

Students seeking a PhD in Psychology with a specialization in Social Policy and Mental Health Administration may opt to complete their degree by taking an internship as an elective. During the internship experience, you will meet weekly with your assigned University professor as well as your internship site supervisor to discuss your experiences. Weekly experiences include submission of required evaluations and preparation for the final theoretically grounded presentation summarizing the internship experience. Internship experiences are designed to align with social policy and/or mental health administration, which result in growth in competencies demonstrated through application in practice.

PSY-8509 - Behavioral Health Services Policy

Semester Credits: 3 Weeks: 8

In this course you will explore the historical and current treatment of those who suffer from mental and substance use disorders as well as the various treatment settings. This course will review the role of social stigma of mental illness and substance use disorders, and take a deeper examination of how the health care system is experienced by individuals who are historically underrepresented including persons of color, person who identify as LGBTQIA+, and those who are economically disadvantaged. Finally, this course will provide an overview of how local and federal policies regarding mental and behavioral health play a critical role in healthcare financing and the accessibility of appropriate quality treatment services.

PSY-8511 - Behavioral Health Administration and Management

Semester Credits: 3 Weeks: 8

Effective development, integration, and maintenance of a mental health organization are necessary in today's market in order to have sustainability. Beginning with problem analysis you will transform an idea into a feasible program plan. How an organization adapts to change will also be discussed. In this course you will be asked to analyze strategic management factors such as how to best create a multidisciplinary team that will coordinate roles within the organization and maximize supervisory capabilities.

PSY-8604 - Addiction Treatment and Special Populations

Semester Credits: 3 Weeks: 12

This course examines the diverse intervention approaches that have been used effectively in special populations, including women, the elderly, veterans, LGBT, and ethnic minorities. Focus will be placed on phases of the therapeutic process from

intake/assessment to treatment planning and implementation. The heterogeneity of and within the special populations and the need to ensure appropriate care is provided to this individuals will be emphasized.

PSY-8605 - Evidence-Based Practice in Addictions and Rehabilitation

Semester Credits: 3 Weeks: 12

This course provides an overview of evidence-based practices essential to effective treatment, rehabilitation and sustained recovery for substance use disorders. Emphasized are models of addiction (including biological, psychological, and sociological perspectives); diagnostic criteria and its relevance to treatment; patient placement criteria; and modes and models of addiction treatment. Included is an exploration of clinical trials leading to the use of empirical evidence in treatment modalities and recognition of the significance of maintaining fidelity in the implementation of evidence-based practices. Other considerations include the assessment and treatment of co-occurring disorders, family involvement, multicultural factors and the importance of individualizing care as a means toward relapse prevention and sustained recovery.

PSY-8606 - Clinical Supervision

Semester Credits: 3 Weeks: 8

The purpose of this course is to provide evaluation, examination, and exploration of what contributes to effective clinical supervision in psychology. Through the course, several key areas are reviewed in focus, to include: The role of clinical supervision and its relationship to practice, including an in-depth review of how it functions, the factors present that may create issues as well as strengthen its purpose, significant diverse and multicultural perspectives within clinical supervision, and the necessary legal and ethical considerations and responsibilities for its practice and the nature of risk management.

Public Administration

PUB-7000 - Public Administration

Semester Credits: 3 Weeks: 8

In this course, you will explain issues and challenges in managing resources in public organizations while analyzing concepts and theories that are relevant to the practice of public organizations, including government agencies and non-profit or non-governmental organizations. You will also explore the values that guide the practice of public administration. Finally, you will assess the challenges of ethical conduct and behavior as a public administrator working in a dynamic and changing environment.

PUB-7002 - Administrative Law

Semester Credits: 3 Weeks: 8

The framers deliberately structured a constitutional republic to constrain the potential abuse of power through federalism and checks and balances. The growth of agencies and administrative law stress these notions of the limited role of government. In this course, students develop practical knowledge about administrative agencies and laws that govern their behavior, examine administrative law in the context of accountability to prevent governmental abuse of power, and apply critical thinking in a variety of case studies.

PUB-7005 - Public Budgeting and Finance

Semester Credits: 3 Weeks: 8

Prerequisites: Fundamental requirement in General Management

Budgets and financial resources are integral components of management decisions, especially within governmental entities. This course will examine budget formulation, implementation, and execution systems, including governmental financial statements, the use of modern financial management technology, and analysis and recommendation for improvements in governmental

financial management. Budgeting and finance at the federal level differ from processes at the state, county, and local levels. Students will evaluate both managerial practices and politics that form budgeting and finance at the federal, state, and local levels of government.

PUB-7008 - Principles of Organization and Management

Semester Credits: 3 Weeks: 8

The management of public sector organizations presents unique challenges to public administrators due to the nature of work done in the public good. In this course, you will learn to navigate the unique attributes of public organizations and the people who work within them. You will critique the principles and techniques of management and organizational behavior, assess the challenges of supervising public employees, and learn the levels of organizational planning in public organizations.

PUB-7017 - Public Personnel Administration

Semester Credits: 3 Weeks: 8

People who choose to work for the public good are often motivated by different incentives than employees in private organizations. There are specific challenges you will learn to navigate throughout this course including the assessment of external environmental changes related to politics and policy that influence public personnel administration. Additionally, you will learn to evaluate the legal and policy framework associated with public personnel management and to critique the practices and trends unique to public sector personnel administration. Finally, you will learn the various management strategies that enhance human capital in the public sector.

PUB-7019 - Public Policy Administration

Semester Credits: 3 Weeks: 8

The practice of public administration operates as part of the administration-policy dichotomy. In this course, you will develop the skills needed to explain models of public policy analysis and assess how different participants and stakeholders in the policy process impact decision-making. You will also explore and learn to evaluate how court decisions shape public policy. Finally, you will examine how the media influences public policy decisions that inform the work of public administrators.

PUB-7020 - Public Management Theory

Semester Credits: 3 Weeks: 8

The management of public sector organizations introduces unique challenges to leaders. In this course, you will learn to categorize management concepts and theories as they relate to public organizations and assess the applications of theory that contribute to efficiency improvements in public organizations. You will learn to develop management models designed to address public sector issues. Finally, you will formulate positions on public policy that represent rational and independent thinking in order to contribute to the success of public agencies and nonprofit organizations.

PUB-7021 - Strategic Management in the Public Sector

Semester Credits: 3 Weeks: 8

Success in the public sector requires deliberation and planning in order to support leadership roles and stewards of the public trust. In this course, you will learn and apply those skills that will help you devise plans that strengthen operations in public sector organizations. You will also learn to apply strategic management techniques and skills to public organization operations that are guided by applied and theoretical knowledge. Finally, you will incorporate strategic planning as an integral component of performance development for government and other public organizations.

PUB-7022 - Executive Leadership in Public Administration

Semester Credits: 3 Weeks: 8

In this course you will gain executive, high-level skill in differentiating leadership from management in government and other public organizations. You will explore the theories and strategies related to leadership in the public sector and develop methods for creating a vision for public sector organizations that contributes to mission-fulfillment.

Reading Education

RDG-5000 - Theoretical and Research Foundations of Language and Literacy

Semester Credits: 3 Weeks: 8

In this course, students will study the theoretical and research foundation of language and literacy. Students will explore current research concerning language and literacy and how that research can guide current literacy instruction and educational practice. Students will use research to inform others and promote continuous professional development.

RDG-5001 - Essential Elements of Elementary Reading and Writing Instruction

Semester Credits: 3 Weeks: 8

In this course, students will study the essential elements of elementary (K-8) reading and writing instruction. Students will explore evidence-based best practices in phonological awareness, phonics, fluency, vocabulary, and comprehension. Students will learn how comprehensive literacy lessons that include reading, writing, and oral language processes can improve literacy learning. Finally, students will use these best practices in literacy instruction to develop a comprehensive lesson that addresses individual student needs and keeps students motivated and engaged.

RDG-5002 - The English Language: Etymology, Elements, and Implications for Instruction

Semester Credits: 3 Weeks: 8

Students will receive an overview of the influences of history, geography, and culture on the development of the English language as well as information on its grammar, including phonology, morphology, syntax, phonetics, semantics, and pragmatics. There will be an examination of best practices in phonics instruction that support cognitive, cultural and linguistic differences in readers and writers.

RDG-5003 - Vocabulary Instruction and Development for PK12

Semester Credits: 3 Weeks: 8

Students will explore the research and theories that describe the process of vocabulary acquisition, vocabulary development through the use of strategies and skills in K-12 classroom, and the assessment of vocabulary. After understanding, analyzing, and synthesizing information about vocabulary acquisition and development, students will select a topic to research and produce a research proposal. Concurrently, students will increase their skills in using the Internet to locate relevant resources, explore technology tools that can enrich vocabulary instruction and conduct research using the online library. Critical thinking will be required throughout the course as students will be encouraged to think beyond what is presented and available each week as they consider how knowledge is communicated through vocabulary and how that knowledge can be taught and measured.

RDG-5004 - Reading Comprehension Instruction and Development: Skills and Strategies for PK12

Semester Credits: 3 Weeks: 8

In this course, you will gain an understanding of multiple strategies used in reading comprehension. Levels of meaning in text and textual structures in narrative and expository writing will be studied. There will be an exploration of critical-thinking skills and behaviors as well as strategies for effective studying. Finally, there will be an exploration of the wide range of resources for children's and adolescent literature, including recently published fiction and nonfiction, as well as electronic texts and non-print materials.

RDG-5005 - Assessment of Reading and Writing Proficiency for PK12

Semester Credits: 3 Weeks: 8

In this course, students will learn to use a variety of assessment tools and practices to plan and evaluate effective reading and writing instruction. Formative and summative reading and writing assessment instruments will be explored in terms of their purposes, strengths, and limitations. Current information on state as well as national movements to standardize or individualize assessments will be researched. Means of communication of assessment results to students, parents, caregivers, colleagues, and administrators will be explored.

School Safety, Security, and Emergency Management

SEM-5100 - Fundamentals of School Safety, Security, & Emergency Management

Semester Credits: 3 Weeks: 8

In this first course, you will examine within a whole community approach the relationships among safety, security, and emergency management within K-12 schools across diverse settings. You will analyze plans from the perspectives of both certified and classified personnel after examining the related criteria and processes. You will also consider the overall importance of a positive school culture as you explore the role of social justice and related themes within the safety, security, and emergency management of K-12 schools across diverse settings.

SEM-5200 - School Safety and Security Technologies

Semester Credits: 3 Weeks: 8

This course offers a unique opportunity to explore different technologies available for enhancing the safety, security, and emergency management of K-12 schools in diverse settings. You will inventory existing technologies, document their purpose and utility, and prioritize the needs of specific K-12 schools based on their unique characteristics within diverse settings. You will then examine the costs of purchasing and maintaining typical technologies based on the priorities. Throughout the course, you will consider the reciprocal influences of diversity, equity, inclusion, and social justice with school safety, security, and emergency management.

SEM-5300 - Threat Assessment Fundamentals

Semester Credits: 3 Weeks: 8

In this course, you will explore the fundamental concepts related to threat assessment in K-12 schools. Your exploration will include types of threats, functions of threat assessments, and the processes involved in conducting threat assessments. As you explore the roles of stakeholders in the conduct, analysis, and interpretation of threat assessments, you will consider the most effective dispositions of those individuals to contribute to the effort, including the use of threat assessments as decision-making tools. You will consider legal, regulatory, and ethical boundaries and examine your work through the lens of educational equity and social justice.

SEM-5400 - School Safety Plans for Practitioners

Semester Credits: 3 Weeks: 8

This course offers a practitioner's perspective on the content and structure of safety plans for K-12 schools in a variety of contexts. You will consider the responsibilities and effective dispositions of individuals who might serve on school safety teams, including opportunities to collaborate with other local stakeholders of school safety and emergency management. You will examine legal, regulatory, and local guidance as well as the integration of diversity, equity, inclusion, and social justice. Finally, you will explore the relationship between school safety plans and trauma-informed educational practices.

SEM-5500 - Restorative Justice and Other Alternatives to Student Discipline

Semester Credits: 3 Weeks: 8

This course offers a distinct opportunity to investigate restorative justice paradigms available for enhancing the safety, security, and emergency management of K-12 schools. You will discover ways in which restorative justice practices can prevent safety and security issues by promoting positive values and relationships. You will examine alternatives to student discipline such as PBIS, SEL, and trauma-informed classrooms and how they enrich safe school objectives as well as keeping students in schools. You will also investigate social justice in education and the school to prison pipeline. Throughout the course, you will consider the reciprocal influences of restorative justice paradigms and social justice with school safety, security, and emergency management.

SEM-5600 - Capstone for School Safety, Security, and Emergency Management**Semester Credits: 3 Weeks: 8**

This course is the capstone of your specialization or certificate in school safety, security, and emergency management. You will use the foundational principles and approaches you have learned to create a capstone project. In that project, you will analyze responses to incidents, review threat assessments and safety plans, recommend relevant technology, justify the use of restorative practices, and critique restorative justice plans for students. Throughout the course and in your capstone project, you will apply the principles of diversity, equity, inclusion, and social justice.

SEM-7100 - Risk Analysis: Threat and Hazard Identification and Risk Assessment**Semester Credits: 3 Weeks: 8**

In this course, you will learn about risk analysis through the lens of threat and hazard identification and risk assessment. You will examine the relationships among assessment, planning, and training, as well as prepare risk-benefit analyses, focused on safety, security, and emergency management in K-12 schools across diverse settings. Further, you will evaluate physical risks and review the ways in which diverse settings impact the realization of threats, all the while exploring how diversity, equity, inclusion, and social justice relate to evolving threats. Finally, you will critique all-hazards emergency operations plans that consider diversity, equity, inclusion, and social justice in K-12 schools across diverse settings.

SEM-7200 - Communicating, Collaborating, and Planning for Safety, Security, and Emergency Management**Semester Credits: 3 Weeks: 8**

This course offers a unique opportunity to explore how communicating, collaborating, and planning of school safety, security, and emergency management come together and operate. To do so, you will determine ways in which Incident Command Systems can be modified for use in K-12 schools and relate Incident Command Systems to communication during crisis incidents. You will also examine ways in which administrators collaborate and communicate with community partners and first responders to help prepare for and manage crisis events in K-12 schools and explain the importance of school-community cooperation in the recovery of whole community crisis events. Critical to this course is explaining ways in which diversity, equity, inclusion, and social justice impact communication during crisis incidents in K-12 schools. Finally, you will construct Incident Command Systems while championing diversity, equity, inclusion, and social justice in K-12 schools across diverse settings.

SEM-7300 - Leadership Paradigms in Safety, Security, and Emergency Management**Semester Credits: 3 Weeks: 8**

This course allows for a deep dive into the leadership paradigms in school safety, security, and emergency management. As you develop leadership support strategies for staff and students before, during, and after a crisis incident and advocate for team approaches in planning for prevention-mitigation, preparedness, response, and recovery of crisis incidents in K-12 schools, you

will also assess current legal and political issues in K-12 school safety, security, and emergency management. Further, you will evaluate leadership responses to ethical issues in school safety, security, and emergency management and create risk assessment plans for evaluating physical risks within K-12 schools. Finally, you will determine school emergency manager responsibilities in the planning of systems to prevent and mitigate crisis incidents at K-12 schools across diverse settings.

SEM-7400 - Violence Prevention and Response

Semester Credits: 3 Weeks: 8

This course offers a practitioner's perspective on violence prevention and response. You will examine violent acts and the impetus behind them in K-12 schools, evaluate responses to violence in K-12 schools, and synthesize behavioral assessment plans that evaluate behavioral risks in K-12 schools across diverse settings. Additionally, you will explore restorative justice systems for preventing violence in K-12 schools. You will justify the need for trauma-informed educational practices and social-emotional learning and their application in preventing violence in K-12 schools. Finally, you will create violence response plans that consider diversity, equity, inclusion, and social justice in K-12 schools across diverse settings.

SEM-7500 - All-Hazards Response and Recovery

Semester Credits: 3 Weeks: 8

This course focuses on the response to, and recovery from, school safety, security, or emergency management events. You will assess the roles of administrators before, during, and after crisis incidents and evaluate school family reunification plans in K-12 schools across diverse settings. You will also compose continuity of operations and physical recovery plans for K-12 schools following crisis incidents, and recommend ways in which school administrators should consider diversity, equity, inclusion, and social justice in K-12 schools when facilitating the preparation of emergency operations plans. Finally, you will design and develop academic recovery and psychological recovery plans in K-12 schools across diverse settings.

SEM-7600 - Capstone: Developing Strategies and Policies to Further Safety, Security, and Emergency Management Practices

Semester Credits: 3 Weeks: 8

This course is the capstone of your specialization or certificate in school safety, security, and emergency management. You will use the foundational principles and approaches you have learned to create a capstone project. In that project, you will review crisis response policies and critique crisis recovery policies for K-12 schools across diverse settings. You will also justify the use of threat and hazard identification and risk assessment (THIRA) prior to developing K-12 school emergency operations plans and create crisis communication and collaboration strategies for K-12 schools across diverse settings. Finally, you will advocate for safety and security prevention strategies and recommend strategies for considering diversity, equity, inclusion, and social justice in K-12 schools when facilitating the preparation of emergency operations plans.

Special Education

SE-5001 - Assessment in Special Education

Semester Credits: 3 Weeks: 8

In this course, you will investigate the processes involved in identifying students who may need special education services. You will examine formal and informal assessments used to determine student needs and eligibility for services, including applying assessment data to the development of Individual Education Plans (IEPs) and/or Section 504 plans when necessary. Your work will be guided by regulations and policies of relevant federal, state, and local education authorities.

SE-5002 - Instructing Students with Specific Learning Disabilities

Semester Credits: 3 Weeks: 8

In this course, you will focus on instructing students with specific learning disabilities. Based on the common educational and behavioral needs of students with specific learning disabilities, you will examine relevant accommodations, modifications, and differentiation of instruction as well as monitoring student progress. The context of this course includes both inclusive and separated educational settings.

SE-5003 - Instructing Students with Emotional and/or Behavioral Disorders

Semester Credits: 3 Weeks: 8

This course will focus on instructing students with emotional and/or behavioral disorders. Major emphasis will be placed on: 1) the assessment and identification of emotional and/or behavioral disorders among at-risk students, 2) individual education plan (IEP) development and progress monitoring for students with emotional and/or behavioral disorders, 3) understanding the learning needs of students with emotional and/or behavioral disorders, 4) applying strategies to address students' emotional and/or behavioral disorders, and 5) providing effective instructional practices for students with emotional and/or behavioral disorders in both inclusive and special education classrooms.

SE-5004 - Instructing Students with Intellectual Disabilities

Semester Credits: 3 Weeks: 8

This course will focus on instructing students with intellectual disabilities. Major emphasis will be placed on: 1) assessing and identifying intellectual disabilities among at-risk students, 2) developing Individual Education Plan (IEP) for students and monitoring the progress of students with intellectual disabilities, 3) understanding the educational and behavioral needs of students with intellectual disabilities, and 4) providing effective instructional practices for students with intellectual disabilities in both inclusive and special education classrooms, and in the community.

SE-5005 - Special Education Law

Semester Credits: 3 Weeks: 8

In this course, students will focus on the basics of the law and legal issues facing special educators and administrators. Topics include: The Individuals with Disabilities Education Improvement Act, Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, discipline, appropriate educational decisions, procedural due process, and privacy issues

SE-5006 - Teaching Strategies in Special Education

Semester Credits: 3 Weeks: 8

In this course, students will work with teaching strategies that are useful in assisting students with mild disabilities. The latest information on Response to Intervention (RtI) is covered, with information on practical applications to promote success in the classroom. Participants will develop an understanding of how to monitor individualized education programs and select instructional strategies to improve student performance. Analyzing, selecting, and adapting strategies for students with special needs will be addressed. The ability to differentiate instruction utilizing current methods of embedded and explicit strategy instruction will also be explored.

SE-5010 - Introduction to Students with Disabilities

Semester Credits: 3 Weeks: 8

In this course, you will explore key concepts at an introductory level related to students with disabilities. These concepts include historical, contemporary, and legal issues related to the field of special education. You will investigate various disabilities that affect students and explore research and collaborative practices for supporting those students.

SE-7100 - Advanced Topics in Special Education

Semester Credits: 3 Weeks: 8

This is the first course in your specialization or certificate in special education. The focus of this course is beyond individual students and classrooms; rather, this course explores special education at the programmatic level, such as an entire school or district. Another focus of the course includes educational equity, social justice, inclusion, and ethical nuances within the context of special education programs. You will also consider teacher retention and the implications of high and low-incidence disabilities on special education program planning and implementation. Throughout the course, you will cultivate communications skills, particularly around conflict management and collaboration.

SE-7200 - Analyzing Data and Monitoring Student Progress

Semester Credits: 3 Weeks: 8

This course will support your understanding of collecting, analyzing, interpreting, and using individual and aggregated student data for the purposes of monitoring student progress and improving special education programs. You will consider historical perspectives, different techniques, and coding systems for students who use a behavior plan. Throughout the course, you will prioritize considerations for equity, fairness, and bias in the collection, analysis, interpretation, and use of student data.

SE-7300 - Leadership, Law, and Finance in Special Education

Semester Credits: 3 Weeks: 8

The areas of finance, law, and leadership are deep topics in special education. This course will touch on each of these topics at a higher level. You will explore the various funding models for special education programs and services. This exploration will include the legal considerations related to special education programs with specific references to service delivery models. Related examinations include specific leadership scenarios and reporting obligations. Throughout the course, you will consider the role of leadership in cultivating culturally responsive relationships with all stakeholders to ensure equity and fairness.

SE-7400 - Implementing Programs for Students with Intellectual and Learning Disabilities

Semester Credits: 3 Weeks: 8

This course focuses on implementation of special education programs at school and district levels for students with intellectual and specific learning disabilities (SLDs). You will investigate necessary supports, service delivery models, and quality assurance approaches. You will synthesize research for evidence-based practices, including strategies for promoting equity, inclusion, and social justice. While some of the concepts in this course apply to other categories of disability, this course uses the lens of intellectual and specific learning disabilities.

SE-7500 - Implementing Programs for Students with Emotional and Behavioral Disorders

Semester Credits: 3 Weeks: 8

This course focuses on implementation of special education programs at school and district levels for students with emotional and behavioral disorders. You will investigate necessary supports, service delivery models, and quality assurance approaches. You will synthesize research for evidence-based practices, including strategies for promoting equity, inclusion, and social justice. While some of the concepts in this course apply to other categories of disability, this course uses the lens of emotional and behavioral disorders.

SE-7600 - Advanced Capstone in Special Education

Semester Credits: 3 Weeks: 8

In this final course of the special education specialization, you will synthesize your work across all courses into a capstone project of your own design. This project will integrate theory and practice within a specific topic of your choosing related to special education programs at the school or district levels. As you prepare your project, you will evaluate the impacts of current

trends, technologies, and issues of bias, fairness, and social justice within special education programs. Your capstone project will reflect not only your knowledge and skills related to the course learning outcomes, but also your overall preparation to influence special education programs at the school or district levels.

Social Emotional Learning

SEL-7100 - Foundations of Social Emotional Learning

Semester Credits: 3 Weeks: 8

Your examination of the fundamentals of social emotional learning (SEL) will begin with theoretical support for the foundational concepts and how existing models and curricula reflect those theories, including the principles of equity, diversity, and inclusion. You will also explore essential questions around the relevance of SEL to all stages of human growth and development and the role of SEL within or external to the core curriculum. You will identify general data needs suggested by these essential questions.

SEL-7200 - Implementing SEL in the Modern Classroom

Semester Credits: 3 Weeks: 8

This course offers the opportunity for you to examine what social emotional learning (SEL) looks like in the modern classroom. Your examination will include ways to collaborate within professional learning communities around specific models and curricula, classroom organization and management, discipline, and technology that support SEL within and beyond the classroom. Throughout the course, you will consider what data are needed for implementation and student assessment and how those data can be collected, analyzed, and applied at multiple levels of aggregation.

SEL-7300 - Integrating SEL into School Culture and Climate

Semester Credits: 3 Weeks: 8

Social emotional learning (SEL) is for everyone, including adults, and should be more than an isolated activity that happens within individual classrooms. A true SEL learning environment permeates the entire school, including its culture and climate, and reflects the principles of equity, diversity, and inclusion. In this course, you will explore the distinctions between culture and climate and the role that SEL plays in each. You will investigate your potential roles in integrating established SEL into school culture and climate and consider what data you need to assess SEL in the culture and climate.

SEL-7400 - Incorporating SEL with Policy Development and Implementation

Semester Credits: 3 Weeks: 8

In this course, you will examine strategies to integrate social emotional learning (SEL) in the processes of policy development and implementation in addition to the policies themselves. Such policies and processes could exist at multiple levels, including school, local education agency, region, state, or nation. As you examine alignment with established models for SEL, you will also investigate how policies, their development, and their implementation benefit from the application of data analyses and reflect the principles of equity, diversity, and inclusion.

SEL-7500 - Involving Caregivers and Communities

Semester Credits: 3 Weeks: 8

Opportunities for social emotional learning (SEL) exist throughout the human lifespan. While other courses have considered the roles of caregivers and communities, this course focuses on these roles and how SEL initiatives should reflect the principles of equity, diversity, and inclusion across environments. You will examine available models and specific strategies for extending SEL beyond the classroom, explore community benefits from SEL, and consider partnerships that could support SEL efforts. You will also investigate the types of data you would need to assess SEL initiatives beyond the classroom.

SEL-7600 - Comprehensive Planning for SEL Initiatives

Semester Credits: 3 Weeks: 8

This course supports your efforts to propose or support social emotional learning (SEL) initiatives. You will synthesize your work in the previous courses for the purpose of planning, implementing, and assessing social emotional learning at the school level or beyond. In this course, you will develop comprehensive proposals and plans for implementing and assessing SEL initiatives based on needs analyses, organizational climate and culture, and other relevant factors. By the end of the course, you will be ready to propose new SEL initiatives or revise existing SEL initiatives.

Social Work

MSW-5000 - Introduction to Social Work

Semester Credits: 3 Weeks: 8

This course presents an introduction to the practice of contemporary social work. You will review concepts and theories to better understand populations at risk and to enhance awareness of personal values. You also will examine the individual, familial and community context of social work. Finally, you will evaluate professionalism, ethics, communication, and key skills in social work practice.

MSW-5001 - Human Behavior and the Social Environment

Semester Credits: 3 Weeks: 8

This course exposes you to the concepts of diversity, cultural competency, human rights, and justice. You will explore social work practices with diverse populations and assess advocacy approaches to ensure clients and constituents receive justice. You also will examine multidisciplinary frameworks of social work to gain a better understanding of human behavior in social environments. You will be presented with specific theories relevant to diverse client systems. This course emphasizes behaviors of individuals and families of diverse and oppressed populations.

MSW-5002 - Professional Practice with Individuals and Families

Semester Credits: 3 Weeks: 8

In this course, students will focus on the social worker-client relationship development with both individuals and families. Students will be exposed to client assessment techniques and principles of professional client relationship building. Evidence-based practice and service delivery will be explored. Elements of justice from the social work perspective as they apply to individuals and families also will be reviewed.

MSW-6002 - Social Welfare Policy

Semester Credits: 3 Weeks: 8

In this generalist course, students will explore historical and current social welfare policies, programs, and institutions in the United States as well as the social, racial, economic, and environmental justice issues that shaped these responses to identified social problems. You will learn the legislative process by which social welfare policies are enacted and understand the relevance of policy to social service delivery and social work practice. The course also provides a framework for the critical analysis of social welfare policy including recognition of how such policies contribute to oppression, marginalization, and injustice.

MSW-6003 - Professional Practice with Organizations and Communities

Semester Credits: 3 Weeks: 8

In this course you will focus on evidence-based social work practice with organizations and communities. You will assess and apply the Generalist Intervention Model (GIM) and related social work roles at the mezzo level in organizations and

communities. You will evaluate best practices for service delivery in organizations and communities. You will examine how economic policies impact social welfare and the important role of social justice and anti-racist social work practice. You will also assess and apply best practices for ethical use of technology with organizations and communities.

MSW-6004 - Social Work in Behavioral Health

Semester Credits: 3 Weeks: 8

In this course you will be introduced to social work in behavioral health practice with individuals and groups. You will be introduced to laws and regulations that define mental health services and the scope of practice. You will be introduced to evidence-based practices and service delivery models used in behavioral health with individuals and groups. You will also explore individual and group intervention plans and strategies social workers use in behavioral health. Knowledge and skill development for multi-systems practice in mental health settings will be explored. You will examine and apply the General Intervention Model (GIM) and other conceptual frameworks for social work practice at the micro, mezzo, and macro levels.

MSW-6005 - Ethics and Diversity in Social Work

Semester Credits: 3 Weeks: 8

Models of ethical decision making in social work will be discussed in this course. Students will assess the need for ethics in working with diverse populations and constituents, as well as analyze governmental policy that guides social work practice with diverse clients. Students also will examine the ethics of social workers as advocates to ensure justice for constituents.

MSW-6007 - Research Methods in Social Work

Semester Credits: 3 Weeks: 8

The focus of this course is on the fundamentals of quantitative and qualitative approaches to social work research. You will gain an understanding of the strengths and limitations of each approach and how these methods apply to social work research. This course also provides you with a foundation in research ethics and skills in conducting literature reviews and scholarly writing. You will also conduct a critical analysis of existing research on diverse and oppressed populations.

MSW-6008 - Social Work in Interdisciplinary Settings

Semester Credits: 3 Weeks: 8

This course introduces you to the process and practice of social work engagement and collaboration with other professionals as a team to deliver services to diverse populations. You will explore communications styles that comprise interdisciplinary therapeutic interventions. Practice interventions supported by research for integrated care settings will also be examined.

MSW-6009 - Generalist Practicum I

Semester Credits: 3 Weeks: 12

This course is designed to provide supervised, individual, experiential learning within the setting of a social service/social work agency. Students will gain exposure to the generalist practice of social work with individuals, families, and communities in an agency. Emphasis is placed on the introduction and development of therapy and assessment skills, theoretical integration, and personal and professional growth.

MSW-6010 - Generalist Practicum II

Semester Credits: 3 Weeks: 12

The Generalist Practicum II emphasizes the knowledge and processes basic to all social work interventions. The course will

introduce students to various intervention models designed to effect change in social systems and specific social problems, and provides an opportunity to examine the integration of research, knowledge, and skills regarding a diverse client base.

MSW-6101 - Advanced Social Work with Children and Families

Semester Credits: 3 Weeks: 8

In this course you will apply evidence-based practice to client system problems. You will gain an understanding of their personal and professional values as a social worker engaged with clients who have complex needs. You will be exposed to unique ethical considerations regarding practice interventions with both individuals and families. You will assess the application of regulations and standards in working with diverse populations. You will also evaluate the effectiveness of specific practices and explore the adjustment of interventions based on client needs. You will also explore various family types and dynamics, cultural factors, and other factors influencing family interaction within the family system, with organizations, and the community. You will also integrate DSM-5 guidelines.

MSW-6102 - Advanced Social Work Practice with Marginalized Populations

Semester Credits: 3 Weeks: 8

In this course, you will examine what is meant by marginalized populations such as those experiencing homelessness, natural disaster, veterans, and those with severe and persistent mental illness. You will learn how discrimination and oppression impacts the lives of marginalized populations. You will also gain an understanding of the needs and services of diverse populations and the problems they face in accessing social services. You will also develop skills to advocate for oppressed populations regarding social, political, legal and economic justice. You will gain an understanding of the role research plays, to include the minority stress model, in understanding the needs of marginalized and oppressed populations and in generating the assets that increase the resilience and options of oppressed populations.

MSW-6103 - Advanced Social Work in Medical Practice

Semester Credits: 3 Weeks: 8

In this course, you will examine current and emerging health behavior theory, research, and practice, and interventions, specific to various health-related settings used by diverse populations. You will explore theories of behavior change, including resilience orientation, to assist in your continuous professional growth. You will also gain insight into the ethics of social worker facilitation of transitions and endings in medical care. You will develop knowledge of community resources to assist with social work consultation, advocacy, referral and networking on behalf of clients, to include working with DSM-5 guidelines.

MSW-6104 - Advanced Social Work Practice in Mental Health

Semester Credits: 3 Weeks: 8

In this course, you will examine DSM-5 inclusion with facets of mental health intervention needs for individuals with severe and persistent mental illness from a social work perspective. Of particular focus for you in this course will be distinguishing between evidence-based practice, best practices, and areas with emerging research knowledge. You will also examine strategies that evaluate and monitor client progress and treatment outcomes as well as the recovery paradigm for individuals with severe and persistent mental illness. You will also critically analyze the impact of health/mental health policies on populations-at-risk.

MSW-6105 - Forensic Clinical Social Work Practice

Semester Credits: 3 Weeks: 8

In this course, you will examine the core clinical skills in forensic social work practice. You will explore contemporary and complex social problems, including health and justice disparities. Common populations and issues regarding forensic social work, including children and families, adults, and older adults, as well as theories integral to forensic social work practice will be evaluated. You will also explore the diverse roles and careers in forensic social work along with the collaborative relationships

that forensic social workers engage in with physicians, nurses, psychiatrists, legal professionals, law enforcement, and correctional officers.

MSW-6106 - Advanced Leadership Skills for Clinical Practice

Semester Credits: 3 Weeks: 8

In this course, you will explore the skills needed to cultivate leadership and professional behavior and work effectively with multi/interdisciplinary teams. You will examine the delivery of supervision, leadership development, strategic planning, and transitioning from clinician to a leadership position. The role of leader at the organizational level will also be evaluated, including legislative advocacy and a review of jurisdictional regulations and requirements related to licensure and practice. You will examine the expectations of administrative leadership for the daily operation of social work service delivery systems, including the functions of management, team-work, decision-making, use of authority, program planning, and staffing.

MSW-6901 - Advanced Practicum I

Semester Credits: 3 Weeks: 12

Advanced Practicum consists of two courses with a focus on experiential learning, offered within a community social service agency, or practice, and supervised by approved community practitioners. In this course, you will apply practice skills with families, groups, and individuals in their social contexts. The emphasis for this first advanced practicum is on developing professional roles and relationships, engaging in interactions with clients, and applying multi-systems assessment and interventions. This course also teaches competencies (A-G) regarding California Law and Ethics for social workers.

MSW-6902 - Advanced Practicum II

Semester Credits: 3 Weeks: 12

In this second advanced practicum course, you will implement practice skills to differentially assess the strengths and capacities of interacting with individuals, families, groups, organizations, and communities. Application of social work ethics in professional practice will be utilized. You will also practice interventions and models of evidence-based therapies to evaluate and problem-solve client issues from a generalist practice perspective. This course also teaches competencies A, B, C, F and G regarding California Law and Ethics for social workers.

MSW-6903 - Capstone

Semester Credits: 3 Weeks: 8

The capstone course is designed to provide you with the opportunity to consolidate what has been learned in the social work program and effectively apply concepts to real-world social work practice. You will collaborate with your field placement to identify a project in which you will evaluate a selected aspect of the organization or agency work. You will also evaluate your ability to integrate social work knowledge, values, and practice skills in your professional role as a social worker. The capstone is a course at the end of the MSW process that provides you the opportunity to demonstrate key social work competencies at an advanced level with the potential to engage in research-informed practice which may lead to publications.

MSW-6903CA - Capstone

Semester Credits: 3 Weeks: 8

The capstone course is designed to provide you with the opportunity to consolidate what has been learned in the social work program and effectively apply concepts to real-world social work practice. You will draw on your practicum placement experience to evaluate a selected aspect of the organization or agency work. You will also evaluate your ability to integrate social work knowledge, values, and practice skills in your professional role as a social worker. The capstone is a course at the end of the

MSW process that provides you the opportunity to demonstrate key social work competencies at an advanced level with the potential to engage in research-informed practice.

SWR-300 - Introduction to Social Work

Semester Credits: 3 Weeks: 8

Students will explore the history and current practice of social work through a critical anti-racist, equity-focused lens. This course integrates the profession's knowledge, values, and skills in the study of systems-based generalist social work practice aimed at promoting social and economic justice, advancing human rights, alleviating critical social problems, and promoting well-being. Students will reflect upon and compare the congruence of their values and perspectives with those of the social work profession to evaluate their interests in and potential for a career in social work. In-class learning is supplemented with a ten-hour social service-oriented volunteer experience.

SWR-350 - Social Welfare Policy I

Semester Credits: 3 Weeks: 8

In this foundational course, students explore historical and current social welfare policies, programs, and institutions in the United States as well as the economic, social, and political forces that shaped these responses to identified social problems. Students explore the legislative process by which social welfare policies are enacted and understand the relevance of policy to social service delivery and social work practice. The course also provides a framework for the critical analysis of social welfare policy including recognition of the ways in which such policies contribute to oppression, marginalization, and injustice.

SWR-355 - Documentation in Social Work

Semester Credits: 3 Weeks: 8

This course focuses on writing as a social work skill essential to providing competent and ethical services to clients. The materials and assignments address professional writing for students who come to the BSW program with experience speaking and writing in various dialects and languages, and with varying experience with academic and professional writing. Common forms of social work writing will be practiced, and resources on academic and professional writing in standard academic English will be provided.

SWR-360 - Diversity, Rights, & Justice

Semester Credits: 3 Weeks: 8

The course examines the dynamics of diversity, equity, and inclusion with the focus on the consequences of privilege, power, oppression, and discrimination for populations who are marginalized. Building on standard models of multicultural competence that emphasize knowledge, awareness, and skills, students will be introduced to micro, mezzo and macro perspectives that emphasize anti-racist, anti-oppressive, and equity-focused paradigms.

SWR-365 - HBSE I

Semester Credits: 3 Weeks: 8

This course examines biological, psychological, social, spiritual, and cultural facets of human development across the lifespan from conception through death. Traditional and alternative theories for understanding human behavior as well as the pressure racism and oppression exert on human behavior will be examined. Framed from a systems perspective, these paradigms contribute to understanding the reciprocal relationship between human behavior and the social environment emphasizing implications for human rights and social justice.

SWR-370 - The Helping Process

Semester Credits: 3 Weeks: 8

In addition to extending the knowledge of the Generalist Intervention Model presented in Introduction to Social Work, this course focuses on the roles of social workers in the helping process and the skills necessary to carry out those roles in anti-oppressive practice. Students will practice and demonstrate skills by recording and submitting role-play scenarios.

SWR-375 - Generalist Practice I**Semester Credits: 3 Weeks: 8**

This course integrates theory and practice in implementing the Generalist Intervention Model with individuals and families. Theories, concepts, and ethical models are presented as a framework for equity-focused generalist social work intervention at the individual and family level. Client assessment, engaging in professional relationships, and evidence-based practice will be explored.

SWR-380 - Social Work Practicum I**Semester Credits: 3 Weeks: 12**

This course includes both a 100-hour entry-level field experience and an integrative seminar. In the educationally-directed field practicum, students observe and put into practice the social work competencies they've been introduced to through coursework. This experience offers students the opportunity to begin developing a professional social work identity. The integrative seminar is a once-weekly virtual meeting with a faculty member and other students who are also in their first field practicum that introduces knowledge and skills related to professional social work practice and offers an interactive forum for discussion of relevant topics.

SWR-391 - Social Work in Child Welfare**Semester Credits: 3 Weeks: 8**

This course examines the history of governmental intervention in families to protect at-risk children. It focuses on child maltreatment, the development and evolution of child protective services in the United States, and emerging practices for treating and preventing child neglect and abuse. The role of social workers, alone and as members of interdisciplinary teams, in developing and providing services for dependent, abused, and neglected children will be explored.

SWR-392 - Social Work & Human Sexuality**Semester Credits: 3 Weeks: 8**

This course is a survey of issues and attitudes associated with human sexuality. It introduces common sex-related issues as well as the particular sexual needs and expressions of various sexually oppressed groups such as the aged, persons with disabilities, gay, lesbian, bisexual, and transgender individuals, and rape and incest survivors. Using a biopsychosocial perspective, emphasis will be placed on the social, cultural, familial, and individual differences in sexual and reproductive attitudes, values, and behavior. Students will explore their own values and attitudes toward sex and sexuality. Laws and policies that impact sex and sexuality will also be discussed.

SWR-393 - Intimate Partner Violence**Semester Credits: 3 Weeks: 8**

This course begins with examining the root causes and scope of the problem of intimate partner violence. It will discuss theoretical, ideological, and political perspectives on intimate partner violence and historical and contemporary societal responses to this problem. This course will examine theories, social policies and services, social movements, activism, and research regarding intimate partner violence. Students will be introduced to how the strengths perspective is a lens through which to guide their work toward social justice with people affected by intimate partner violence.

SWR-394 - Social Work & Substance Use

Semester Credits: 3 Weeks: 8

This course begins with an overview of historical and contemporary trends in how society views addiction, responds to people affected by addiction, and the systems used to try to eradicate addiction to illegal substances. Students will gain an understanding of the physiological and psychological effects of drugs and will learn the diagnostic criteria for substance use disorders, models of etiology, and treatment approaches. The course builds on prior knowledge of individual, family, and group counseling strategies with information specific to the treatment of people with substance use disorders.

SWR-395 - Generalist Practice & Mental Health**Semester Credits: 3 Weeks: 8**

This course introduces students to the knowledge, values, and skills necessary for generalist social work practice in mental health settings. It provides introductory knowledge of assessment based on criteria in the current Diagnostic and Statistical Manual of Mental Disorders. Evidence-informed treatment for people with mental health diagnoses, and practice evaluation will be explored with an emphasis on the role of the social worker alone and as a member of an interdisciplinary team.

SWR-450 - HBSE II**Semester Credits: 3 Weeks: 8**

This second course in the Human Behavior & the Social Environment series focuses on human behavior and development from a mezzo and macro perspective. Students learn theories relevant to groups, organizations, and communities with special attention to groups that are marginalized and oppressed. It explores ways in which the social, cultural, economic, and political systems promote or hamper individual achievement and maintenance of well-being throughout the life cycle. Issues of outcome evaluation and ethical practice in groups, organizations, and communities will also be considered.

SWR-455 - Generalist Practice II**Semester Credits: 3 Weeks: 8**

This course continues the study of generalist social work by integrating theory and practice for implementing the Generalist Intervention Model with groups, organizations, and communities. Theories, concepts, and ethical models are presented as a framework for equity-focused generalist social work intervention at the mezzo and macro levels. Engagement, assessment, planning, intervention, evaluation, termination, and follow-up with groups, organizations, and communities will be explored.

SWR-460 - Social Welfare Policy II**Semester Credits: 3 Weeks: 8**

The focus of this course is policy analysis, practice, and advocacy. It builds on student understanding that policy practice is central to social work practice. This class will introduce frameworks for policy analysis using critical and intersectional theories. Students will also be introduced to policy document writing, including policy briefs, memos, factsheets, op-eds, and public comments. This course seeks to deepen students' understanding of the role of advocacy in the pursuit of social and economic justice. The reciprocal relationship between race, gender, and class in the policy process is emphasized throughout the course.

SWR-465 - Social Work with Families**Semester Credits: 3 Weeks: 8**

This course builds on and integrates the inclusive definition of family and introduction to family concepts presented in HBSE I with the model for working with families presented in Generalist Practice I. Family structure, communication patterns, and coping behavior will be studied from multiple family theoretical perspectives. Evidence-based models of assessment and intervention with families will be presented. The family will also be considered as it functions in larger social systems. Policy and advocacy work related to families will also be discussed.

SWR-470 - Social Work Research Methods

Semester Credits: 3 Weeks: 8

This course prepares students with basic knowledge of social work research methods. Students will learn the processes of quantitative and qualitative social work research and understand the relevance of scholarly inquiry to advancing the professional knowledge base and improving social work practice. Attention to issues of race/ethnicity, gender, sexuality, age, and class are integrated throughout all stages of the research process. Ethical issues in research will be discussed. This course is not intended to prepare students to conduct independent research. It focuses on teaching students to be critical consumers of social work research, evaluators of their work, and active participants in empirical inquiries.

SWR-475 - Small Group Theory & Practice**Semester Credits: 3 Weeks: 8**

This course builds on student knowledge of generalist practice with groups presenting theories and skills for social group work. Theoretical and practical approaches to social work with small groups including developmental stages, small group processes, and appropriate worker interventions will be taught. The course will explore task and treatment groups, including committees, teams, and advisory boards, as well as groups for education, socialization, and remediation. There is an emphasis on ethical group practice, and understanding, affirming, and respecting groups and group members with diverse backgrounds.

SWR-480 - Organizational Theory/Behavior**Semester Credits: 3 Weeks: 8**

This course examines major perspectives in organization theory and how they are used to understand organizations by generalist social practitioners who are working to create socially just and inclusive organizations. Students will explore the organizational aspects of human service agencies including how they function, develop, and modify themselves to reflect the needs of their internal and external environments as well as factors that affect organization and worker effectiveness, service delivery, and the procurement and allocation of resources.

SWR-485 - Social Justice & Macro Practice**Semester Credits: 3 Weeks: 8**

This course expands the "person in environment" perspective by considering the environment as a focus for practice. It introduces students to evidence-based models of assessment and emerging interventions that address macro-level social issues emphasizing principles including social and economic justice and empowerment through an examination of racism and other intersecting oppressions. This course examines the role of social workers in policy change within political, organizational, and community contexts, specifically community organization, management, and policy advocacy with a focus on constituent-led change efforts and a strengths-based orientation to practice.

SWR-490 - Social Work Practicum IIa**Semester Credits: 3 Weeks: 12**

This course includes a 150-hour field experience and an integrative seminar that build on the beginning-level knowledge and skills gained in Social Work Practicum I. In this educationally-directed field practicum, students put into practice the social work competencies introduced and demonstrated in their coursework and first practicum. This experience offers students the opportunity to continue developing their professional identities as anti-oppressive social work practitioners. The integrative seminar is a once-weekly virtual meeting with a faculty member and other students who are also in their second field practicum which is focused on putting social work knowledge, skills, and values into practice.

SWR-491 - Social Work Practicum IIb**Semester Credits: 3 Weeks: 12**

A continuation of Social Work Practicum IIa, this course includes a 150-hour field experience and an integrative seminar that build on the knowledge and skills demonstrated in prior practica. In this educationally-directed field practicum, students put into

practice the social work competencies introduced and demonstrated in their coursework and previous practica. This experience offers students the opportunity to continue developing their professional identities as anti-oppressive social work practitioners. The integrative seminar is a once-weekly virtual meeting with a faculty member and other students who are also in their second field practicum which is focused on mastering social work knowledge, skills, and values.

SWR-495 - Social Work Capstone

Semester Credits: 3 Weeks: 8

This Capstone course allows students to reflect on their social work education and look forward to their social work careers. The course will provide an opportunity for students to integrate and apply learning through the process of creating an e-portfolio of work produced throughout their time in the BSW program. This Capstone Portfolio provides students the opportunity to demonstrate mastery of social work competencies. Students will develop a cover letter and resume and explore the skills necessary to secure a social work position upon graduation.

Sports Management

SM-5000 - Leadership and Administration of Athletic Programs

Semester Credits: 3 Weeks: 8

You will explore the methods, principles, and decision-making responsibilities of a university athletic administrator. Through readings and independent activities, you will have the opportunity to equip yourself with skills in leadership and management related to regulatory compliance, budgeting, scholarships, fundraising, and relationships with the broader university. You will apply these skills by taking on the role of an athletic director and tackling some of the problems involved in the development and supervision of intercollegiate athletic programs.

SM-5002 - Legal Aspects in Athletics

Semester Credits: 3 Weeks: 8

Students will develop the knowledge, skills, and awareness of the law and how legal precedence relates to interscholastic sport settings. Students will discuss, explore, analyze, and create solutions to specific dilemmas found in athletics at the high school level. An emphasis will be placed on current events and practical applications.

SM-5006 - Sports Governance and Policy Development

Semester Credits: 3 Weeks: 8

Students will learn the governance and policy development of interscholastic athletic programs. The roles of the National Federation of State High School Associations (NFHS), National Interscholastic Athletic Administrators Association (NIAAA), the state athletic/activity associations, and federal/state guidelines will be examined. Local board of education governance and the structure of local athletic programs will be reviewed. The course will also address sample athletic program philosophies and departmental organizational structure and procedures.

SM-5010 - Marketing in Athletics

Semester Credits: 3 Weeks: 8

In this course, students will learn how the dynamics of marketing and consumer behavior apply to sports organizations. Beginning with an overview of basic marketing theories and concepts, students will gain insight into the ethics of sport marketing, fundraising, and sponsorship while analyzing leagues, teams, and events. Students will apply this insight by developing a marketing plan for an athletic program.

SM-5012 - Issues in Athletic Administration

Semester Credits: 3 Weeks: 8

In this course, students will learn the role of contemporary issues in athletic administration and how these issues affect those who desire to become professionals within interscholastic athletic administration. This course provides a basic overview of sociology and sports, including an analysis of sports' impact on society, society's impact on sports, and the governance of sports programs.

SM-7100 - Development of Human Resource Strategies in Intercollegiate Athletics**Semester Credits: 3 Weeks: 8**

Students are presented with the latest human resource strategies to successfully address everyday problems that may arise with coaches, staff, and personnel of an intercollegiate athletic department. Students develop a working knowledge of human resource policy and procedure in complex organizations and how this may affect the employees that they supervise. Topics addressed include recruitment, hiring, retention, planning, Title IX compliance, and related management strategies.

SM-7103 - Intercollegiate Sport Governance**Semester Credits: 3 Weeks: 8**

Students will gain the knowledge of governance and politics of sport organizations that govern intercollegiate athletics. Students will analyze how people involved in governance set the tone of an organization and how individual sport bodies fit into the greater industry. Emphasis will be placed upon the development of a working knowledge of what organizations do and what their purpose is in the administration of an intercollegiate department.

SM-7106 - Legal Aspects of Equity in Intercollegiate Athletics**Semester Credits: 3 Weeks: 8**

In this course, students will study Title IX's structure and requirements applied to intramural, recreation, interscholastic, and intercollegiate athletic programs. The philosophical, historical, and conceptual account of this law will be explored and its effects upon these programs. Students will examine the historical account of the social, legislative, and judicial environments involving the growth of Title IX to maturity in the last three decades. Students will also explore how current trends in campus demographics have affected sports programs throughout the nation. Students will be able to use their personal experiences when researching the legal aspects concerning equity in interscholastic and intercollegiate athletics as they are known today.

SM-7109 - Sport Compliance**Semester Credits: 3 Weeks: 8**

Students will study rules and regulations associated with intercollegiate athletics at the NCAA I, II, and III level, NAIA, and NJCAA. Students will examine key components of compliance including recruiting, eligibility, amateurism, and financial aid. Topics include: strategies used by institutions across the country to maintain institutional control, the differences and similarities of the 5 different groups (NCAA I, II, III, NAIA, and NJCAA), and the groups which govern NCAA legislation.

SM-7112 - Advising the Student Athlete**Semester Credits: 3 Weeks: 8**

Students explore the role and function of the academic advisors in the lives of students-athletes. Students will examine existing student-athlete retention programs in college and universities to understand their components and effectiveness. Recognizing learning differences in students with learning disabilities or disorders will also be explored in this course. The goal of this course will be to find academic services and counseling programs to help students that are in need, reach their greatest potential.

SM-7115 - Facility Management and Programming

Semester Credits: 3 Weeks: 8

Students will explore the principles, responsibilities, and issues involved with the management of athletic facilities. Activities include personnel and risk management, merchandising, quality assurance, and issues affecting the community. Additional components include environmental issues, and factors in operating facilities and sporting events.

SM-7118 - Financial Administration of Sports Facilities and Programs**Semester Credits: 3 Weeks: 8**

In this course, students are presented with basic financial principles and concepts in interscholastic athletic programs. Course activities include marketing, revenue management, documentation and technological practices, and strategies for long-range planning. Course mastery is demonstrated by developing a fundraising plan as a sports administrator.

Sport Psychology

PSY-6904 - Foundations of Sport Psychology**Semester Credits: 3 Weeks: 8**

In this course, you will study theoretical foundations and empirical research of psychological factors related to performance and participation in athletic settings. You will learn about the physical, affective, and cognitive behaviors associated with sport participation and will also examine the psychological theories and research related to sport performance. You will be introduced to performance enhancement techniques and strategies. You will also learn about injury in sports, team dynamics, youth sport and athletic coaching. The topics covered in this course are designed to increase your understanding of the psychological makeup of athletes and how psychological factors influence involvement and performance in sport.

PSY-6905 - Professional Ethics in Sport Psychology**Semester Credits: 3 Weeks: 8**

In this course you will be introduced to different ethical principles, decision-making models and ethical guidelines, and professional issues for the field of Sport Psychology. You will review the guidelines presented by AASP and other professional organizations. You will explore common ethical challenges and situations that arise when working in the field and critically analyze research articles that are pertinent to ethical issues in Sport Psychology. You will explore Sport Psychology as a professional identity.

PSY-6906 - Research Methods in Sport Psychology**Semester Credits: 3 Weeks: 8**

In this course you will gain an overview of various qualitative and quantitative research methods, learn about basic concepts in descriptive and inferential statistics, parametric and non-parametric statistical tests, and be exposed to different types of experimental research methodologies. You will develop critical-thinking skills and an understanding of the methodological tools necessary for functioning as an applied sport psychology consultant.

PSY-6907 - Kinesiology**Semester Credits: 3 Weeks: 8**

This course will introduce you to each of the major biophysical sub-disciplines of kinesiology:

Anatomy

Biomechanics

Exercise Physiology

Motor Control

You will gain insight into the integrated study of human movement and learn how to apply this knowledge to human performance and physical activity.

PSY-6908 - Psychopathology in Sport

Semester Credits: 3 Weeks: 8

In this course, you will be familiarized with the major classifications of psychopathology and their impact upon individual performance. You will be introduced to the Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5). Emphasis will be placed on assessing for mental health conditions that require referrals to appropriate treating professionals. The course will focus on recognizing the classification of mood and anxiety disorders, impulse control disorders, eating disorders, sleep disorders, organic brain disorders, thought disorders, personality disorders, and substance abuse disorders. You will become familiar with counseling strategies in psychology.

PSY-6909 - Applied Sport Psychology

Semester Credits: 3 Weeks: 8

In this course, you will be exposed to a variety of performance enhancement techniques used in sport psychology to help athletes. You will gain competence in performance enhancement skills and techniques for use in working with athletes in a variety of diverse settings while also developing the foundation for your own personal consulting style. You will explore the process of becoming an applied practitioner in the field and begin creating a binder of performance enhancement activities to be used in your fieldwork experience and in professional practice.

PSY-6910 - Counseling Skills for Sport Psychology

Semester Credits: 3 Weeks: 8

In this course, you will be provided with a fundamental overview of the helping relationship provided within the context of applied sport psychology. You will gain a broad understanding of the philosophic bases of helping processes: counseling theories and their application, basic and advanced helping skills, consultation theories and their application, client and helper self-understanding and self-development, and facilitation of client change.

PSY-6911 - Psychological Foundations of Human Behavior

Semester Credits: 3 Weeks: 8

In this course you will be exposed to an overview of the cognitive, social and affective bases of behavior in sport psychology. You will be familiarized with theories of personality and individual difference. You will then be required to integrate theoretical knowledge with practical strategies and interventions appropriate for athletes to reflect on how to integrate concepts of positive psychology and factors that enhance meaning and well-being.

PSY-6912 - Diversity, Culture and Society

Semester Credits: 3 Weeks: 8

In this course, you will be given an overview of historical and current topics relevant to the understanding of diversity and culture in sport. You will be exposed to various sociological theories and how diversity issues have impacted the development of sport. You will gain an understanding of the complex nature of gender, ethnicity, socioeconomic status, sexual orientation, race, age, and disability as it relates to current sport practices. You will also be exposed to culturally-competent counseling and consulting strategies for facilitating acceptance of diversity within individual and team sports. You will learn to challenge the idea of sport as an innocent leisure pursuit, to consider its social, cultural, political and economic significance, and its rise to significance, in contemporary society.

PSY-6913 - Team Building and Group Dynamics

Semester Credits: 3 Weeks: 8

In this course you will learn how to facilitate team building, through interactive experiences, in an effective way. You will learn ways of working with a team in order to build necessary skills including cohesion, communication, trust, and respect. Emphasis will be placed on activities, skills and strategies that will enable students to effectively work with teams and groups of many kinds. You will gain an understanding of group behavior and dynamics and will be able to use this knowledge with diverse populations. You will learn to recognize ethical issues in relation to working with groups and will examine their interpersonal and professional style through hands-on application of ideas.

PSY-6914 - Psychology of Athletic Injury

Semester Credits: 3 Weeks: 8

In this course you will learn how to work with an injured athlete as part of an integrated approach to sport rehabilitation. Using mental training strategies for rehabilitation, this course will address the principles of Sport Psychology, which will assist injured athletes, as well as those working with injured athletes, in identifying variables responsible for hindering and enhancing performance. The complex physical and psychological nature of injuries will be discussed, including theoretical foundations of behaviors, psychological intervention of performance problems, and psychosocial strategies/ mental health issues related to injury.

PSY-6915 - Field Work I

Semester Credits: 3 Weeks: 12

In this fieldwork placement, you will gain applied experience in sport psychology consulting. The fieldwork-placement aspect will require you to intern at a site where you will be working with athletes and applying knowledge and skills learned in the classroom. Under the supervision of a faculty member, you will be provided with weekly one-on-one meetings to discuss your experiences, challenges, and ethical issues. The supervision will provide you with a supportive environment for discussions exploring issues that pertain to the fieldwork experience.

PSY-6916 - Field Work II

Semester Credits: 3 Weeks: 12

In this fieldwork placement you will gain applied experience in sport psychology consulting. The fieldwork-placement aspect will require you to intern at a site working with athletes and applying knowledge and skills learned in the classroom. Under the supervision of a faculty member, you will be provided with weekly one-on-one meetings to discuss your experiences, challenges, and ethical issues. The supervision will provide you with a supportive environment for discussions exploring issues which pertain to the fieldwork experience.

PSY-6917 - Capstone in Sport Psychology

Semester Credits: 3 Weeks: 8

The Capstone course in Sport Psychology is an opportunity to incorporate your knowledge and understanding of educational concepts and processes that have been learned throughout the program. You will demonstrate a range of competencies, reflecting the knowledge, critical thinking, sensitivity to ethics and diversity, and appreciation of research that has been acquired during the program. The final product for the course will include a written document summarizing this work.

Strategic Knowledge Studies

SKS-5001 - Comprehensive Strategic Knowledge Studies

Semester Credits: 3 Weeks: 8

In this course, students have the opportunity to gain foundational knowledge in 15 different areas important to business and management including accounting, finance, law, ethics, marketing, global business, information systems, research, leadership, strategic management, operations management, human resources, organizational behavior, and micro and macroeconomics. This course serves as a foundation for success in future courses.

SKS-7001 - Doctoral Comprehensive Strategic Knowledge Studies**Semester Credits: 3 Weeks: 8**

In this course, students have the opportunity to gain foundational knowledge in 15 different areas important to business and management including accounting, finance, law, ethics, marketing, global business, information systems, research, leadership, strategic management, operations management, human resources, organizational behavior, and micro and macroeconomics. This course serves as a foundation for success in future courses.

Strategic Marketing

MKT-5021 - Strategic Marketing Management**Semester Credits: 3 Weeks: 8**

This course is an overview of Marketing Leadership, the core of business operations. You will learn not only the vocabulary of marketing and its guiding principles, but how to develop and implement change leadership methods in marketing strategy. This includes developing a fundamental understanding of marketing leadership as it pertains to proactively identifying market changes and thereby marketing opportunities. In light of this understanding, you will learn how to predictively and proactively create an appropriate segmentation and marketing mix strategy culminating in the ability to develop a marketing plan.

MKT-5022 - Advanced Digital Marketing**Semester Credits: 3 Weeks: 8**

Students in this course will examine the creative and strategic process of advertising and promotion. The emphasis is on current practices and research in advertising and promotion, focusing on consumer behavior theories. The objective is to examine advertising and promotion methods and the ethical practices of designing, developing, and implementing an integrated marketing communication program. Students will also evaluate the challenges and opportunities of advertising and promotion in a global environment. The intent of the course will help you build marketing knowledge that will prepare you to achieve a marketing certification if you wish.

MKT-5023 - Global Product Management**Semester Credits: 3 Weeks: 8**

Product Management is a critical activity that develops strategies and plans for building winning products, increasing market share, improving customer appeal, and beating the competition. This course provides the marketing foundations required to develop, using various analytical tools, a focused product marketing strategy. Students will develop sound product strategies through a series of building exercises that requires careful construction of a valuable Product Marketing Plan. The course includes critical marketing activities presented from the Product Management's (PdM) vantage point.

MKT-7021 - Marketing Change Leadership**Semester Credits: 3 Weeks: 8**

In this doctoral course, you will examine the comprehension, evaluation, and synthesis of concepts that are the underlying foundation at the intersection of leadership, disruptive innovation, change management and marketing theories for the modern

marketing leader. These strategic leadership and change attributes are built around environmental research; marketing strategy differentiation, the product life cycle, segmentation strategies, the marketing mix (4 Ps), and the new product cycle.

MKT-7022 - Marketing Economics Innovation

Semester Credits: 3 Weeks: 8

In this course, you will prepare to understand, apply, and expand marketing economics theory and Practice. This course examines the consequences of an economy undergoing major transformation whereby human attention becomes the new scarcity and currency is being redefined. The marketing manager must thoroughly understand the implications of the new economy before initiating, developing, and maintaining a customer relationship management strategy and analyzing the impact of profitable, long-term customer relationships. Through investigative research, opportunities for theory development and expansion can be identified. The research work developed through this course is suitable for the initial concept paper, research study, or for journal publication in order to further prepare you as a doctoral student.

MKT-7023 - Marketing Science

Semester Credits: 3 Weeks: 8

In this course you will explore the emerging role of data, machine learning, and artificial intelligence on the modern marketing manager. The emerging fourth industrial revolution (4IR) is expanding greatly as a result of platform technologies. As such, the marketing manager needs to become more scientific from a data science perspective, when evaluating and implementing strategic planning and tactical execution imperatives, in the ever changing global marketplaces. This course will include the analysis of the interaction of technical, business, and human aspects of the trend toward personalized marketing driven by biometric focused artificial intelligence. In addition, the cultural, diversity, ethical, and legal responsibilities of emerging marketing managers will be examined.

MKT-7024 - Strategic Marketing Communication

Semester Credits: 3 Weeks: 8

In this course you will focus on the effective formulation of strategic integrated marketing communication (IMC) programs and processes covering areas such as, but not limited to; the social media as an IMC tool in conjunction with the seminal use of advertising, promotion, public relations. You will develop dynamic strategic marketing communications by analyzing the elements and impact of integrated marketing communication including current trends, technology, and other macro-environmental issues.

MKT-7025 - Global Product Strategy

Semester Credits: 3 Weeks: 8

In this course you will incorporate product and brand strategies into a comprehensive management platform and will gain an understanding of how to create the best marketing plans using an optimal marketing mix. Brand development focuses on image and equity coupled with product management. Creating new concepts and constructs requires best practices and a balance between strategic marketing plan requirements and brand needs in order to develop optimal marketing results.

Technology & Innovation Management

TIM-5002 - Principles of Information Technology for IT Managers

Semester Credits: 3 Weeks: 8

To be successful, technology managers require a broad set of applied skills and knowledge. These skills include a functional understanding of the critical elements of information technology and their application in organizations of different sizes with diverse missions. During this course you will be introduced to the salient elements of IT systems, the processes for technical

solutions and development, and consider the legal, ethical, and privacy issues that affect the development and management of technology. At the end of this course you will develop technology management solutions for a global organization.

TIM-5030 - Managing Risk, Security, & Privacy in Information Systems

Semester Credits: 3 Weeks: 8

Data forms the foundation of all automated systems within an organization. The assessment of risk and approaches to achieve risk reduction must address internal systems, cloud services, mobile and user devices, including the latest networking capabilities. In this course you will investigate the implications of data, networking, hardware, software, and people on the organization's ability to succeed. The combination of technology assets, vulnerabilities, and threats require proper preparation and viable countermeasures to enable success. You will study how to assess, preempt, and obtain the resources to defend the organization. Your learning includes the implications of governance, compliance, policy, and privacy.

TIM-5035 - Cybersecurity, Risk Management and Policy for IT Professionals

Semester Credits: 3 Weeks: 8

As more applications and data are migrated to the cloud and mobile environments, risks, threats, and vulnerabilities are on the rise. IT professionals must be able to establish protection mechanisms to support secure hardware configurations and implementations. During this course, you will study the concepts and application of cybersecurity, privacy, and information protection frameworks in IT environments. You will also explore the standards, mechanisms, tools, and policies needed to protect data and network infrastructures from internal and external cybersecurity threats.

TIM-5040 - Systems and Architectures for IT Professionals

Semester Credits: 3 Weeks: 8

Computers and information technology are present in all layers of today's modern organizations and are vital to business success. Thus, IT professionals must be able to implement and manage every component in the technical landscape. During this course, you will explore computing platforms and peripherals, identify the internal components and functions of a computer, and examine the internal architecture and systems configuration of real and virtual servers. You will also evaluate different operating systems and examine some of the best ways to configure and manage patches and upgrades.

TIM-5050 - Principles of Project Management

Semester Credits: 3 Weeks: 8

This introductory course provides an overview of the principles of project management. The course is aligned with international principles, standards, and methodologies that are used to support project teams as they work to achieve projects' objectives. You will learn about the role of a project manager, project management scope, schedule management, cost management, resource manage, identify risks and opportunities, and communications with stakeholders. The course will culminate with an integrative project where you will apply the concepts and techniques to develop and present a project plan.

TIM-5100 - Management and Governance in Technology

Semester Credits: 3 Weeks: 8

Management and governance in technology make unique demands on managers. This course examines the important aspects of these elements including the ability to recruit and retain skilled technical professionals in an evolving technical environment. During this course, you will learn how to manage the employee lifecycle including recruitment, development, evaluation, and retention to become a transformational leader. You will also acquire the skills and knowledge necessary to determine policies and procedures associated with ethical governance and administration.

TIM-5110 - Finance and Planning in Technology

Semester Credits: 3 Weeks: 8

Finance and planning are critical elements for technical managers. The fiscal skills and knowledge associated with managing budgets, resources, and cost centers are critical for success in a technical environment of changing needs and priorities. This course provides you with a working knowledge of line items commonly found on a ledger and discusses methods for building and managing a financial plan. The course concludes with an examination of the processes for building and implementing strategic and operational plans.

TIM-5120 - Technical Communication**Semester Credits: 3 Weeks: 8**

The need for quality communication underlies nearly every aspect of technical management. This course will review the critical elements of style in written communication. Specific attention is given to the recommended formats in technical documents. During this course, you will also learn and apply the principles of design of slides and other visual media. The course concludes with an examination of the tabular and visual communication of data.

TIM-5221 - Quantitative Research Design for Technology Professionals**Semester Credits: 3 Weeks: 8**

The results of technical research are frequently used to support informed management decisions. This course provides technology professionals with the skills needed to analyze quantitative research studies that support specific types of data. During this research course, you will analyze different types of quantitative research methods and statistical techniques. You will also examine the instrumentation, data collection, and data analysis tools and techniques used to create aligned, ethical, and substantive research designs.

TIM-6010 - Strategic Management of Technology & Innovation**Semester Credits: 3 Weeks: 8**

Effective technology information management professionals must be able to assess, plan, implement, and manage technical systems and services to promote value creation. During this capstone course, you will demonstrate the knowledge and skills gained throughout the Master of Science in Technology Information Management program by implementing technology-based improvements and innovation for a global organization in its competitive environment. As part of your signature assignment, you will integrate strategies for improvement, including industry standards, ethics, measurement, procedures, and tools for planning.

TIM-6011 - Strategic Management of Technology**Semester Credits: 3 Weeks: 8**

Effective technology information management professionals must be able to assess, plan, implement, and manage information technology systems and services to promote organizational improvement. During this capstone course, you will demonstrate the knowledge and skills gained throughout the Master of Science in Technology Information Management program by planning strategies for improvement in diverse and globally reaching organizations. As part of your signature assignment, you will integrate strategies for improvement, including industry standards, ethics, measurement, procedures, and tools for planning.

TIM-6121 - Distributed Algorithms and Parallel Computing**Semester Credits: 3 Weeks: 8**

Organizations depend on distributed systems and parallel computing to achieve the performance and reliability required by their systems. These systems provide organizations with the ability to leverage hardware and software platforms to improve efficiency. During this course, you will learn computing concepts at single system and organizational levels, such as instruction level parallelism, task level parallelism, multicore computing, and distributed algorithms. You will complete the course by developing distributed solutions that include fault tolerant applications.

TIM-6210 - Quality Management

Semester Credits: 3 Weeks: 8

The effective implementation of quality management practices for process improvement is necessary for organizations to be successful. During this course, you will explore systematic approaches to Total Quality Management to improve organizational performance and meet management and customer expectations. You will study quality assessment models and Lean Six Sigma tools, such as business process modeling and business process reengineering, to eliminate waste, increase performance, and meet standard requirements. You will also develop and present a quality management plan.

TIM-6220 - Engineering Law

Semester Credits: 3 Weeks: 8

Innovative new ideas are often brought to fruition by talented engineers. Protecting those ideas requires close attention to laws regarding intellectual property; and engineers are bound by regulations that help ensure the safety of their work. In this course, students will study the legal implications of innovation and engineering.

TIM-6301 - Principles of Cybersecurity

Semester Credits: 3 Weeks: 8

This course will introduce you to the concepts of security and cybersecurity, using the (ISC)2 CISSP Common Body of Knowledge to build a foundation to succeed in completing the degree. You will examine the full range from governance through compliance with laws, through people risks, to technology. Various mitigation options are considered to reduce vulnerabilities, counter threats, and to protect an organizations data and system assets. You will study the need to protect organizations from future exposures and the ability to motivate the resources needed to defend an organization.

TIM-6320 - Contingency Planning & Incidents

Semester Credits: 3 Weeks: 8

Due to the continued demonstration of weaknesses in most information systems and cloud environments because of malicious computer attacks, natural disasters, and human error, the demand has increased for information security practitioners to develop contingency plans, incident response plans, disaster recovery plans, and business continuity plans. During this course, you will study the management of events to trigger appropriate actions. You will also learn to analyze risks, evaluate and develop recovery strategies, and manage issues associated with rapid response and recovery activities.

TIM-6331 - Cloud and System Certification, and Accreditation

Semester Credits: 3 Weeks: 8

Federal and other large computing or information technology systems require greater precautions before their release into production. You will explore the techniques and processes for certification and accreditation of large systems, including federal systems. This includes project planning, system inventory, system security plans, risk assessment, security procedures, certification testing, documentation of accreditation decisions, and coordination of security for interconnected systems. You also will learn about regulatory changes designed to address the safety of cloud computing.

TIM-6410 - Cloud Computing

Semester Credits: 3 Weeks: 8

Cloud computing has transformed the way industry does business, government offers services, and academia moves to online learning. In this interconnected world, the office has gone mobile and data is managed over the cloud by services like software as a service, data as a service and security as a service. In this course, you will study how to implement and use application program interfaces and services that are structured to support application management over the internet. You will study strategies for managing and securing data handled over remote connections.

TIM-6420 - Data Warehousing & Decision Support

Semester Credits: 3 Weeks: 8

This course introduces the fundamentals of data warehousing architecture and decision support systems. This course also provides you with the opportunity to explore the systems, tools, and techniques used to create and manage enterprise data warehouses, as well as use those repositories for informing business decisions. It also explains the various ways of extracting and analyzing data to support the decision-making process. This course intended to develop your ability to extract information from data, identify patterns and evaluate data warehouse trends.

TIM-6430 - Systems Analysis & Design

Semester Credits: 3 Weeks: 8

This course introduces the systematic process of software development life. You will explore different software methodologies and best practices to ensure the high quality of the applications in the competitive environment. This project-driven course introduces you to the essential practices and tools required for systems analysis and design. You also will practice using various software tools and resources to create designs and deliverables for simulated real-world projects. Ethical issue and security concerns in information systems design and implementation will be discussed.

TIM-6500 - Principles of Data Science

Semester Credits: 3 Weeks: 8

Data science is a dynamic subject, with new techniques of analysis and visualization of data to provide insights continually under development. During this introductory course, you will learn about data science applications such as supervised, unsupervised, and reinforcement learning, statistical models, data visualization, and the data science life cycle. This course introduces you to commonly used data science technologies and platforms. You will also explore relevant legal, ethical, and privacy issues affecting data management, analysis, and reporting in today's technology environments

TIM-6510 - Data Visualization and Communication

Semester Credits: 3 Weeks: 8

Building and communicating graphical representations of data are critical tasks assigned to data scientists. In this course you will learn to design and create interactive and static visualizations using the appropriate formats based on the principles of composition. You will gain the understanding of how to represent curated and transformed data to tell a story of insights to a targeted audience of stakeholders. The data will be based on tabular models selected from industry. In the signature assignment, you will deliver an effective communication of insights to stakeholders you must sway using your skills gained in data visualization and communication.

TIM-6530 - Big Data Integration

Semester Credits: 3 Weeks: 8

Big data integration is a set of processes used to accumulate and aggregate data from disparate sources for future transformation into valuable insights. You will gain knowledge of the 4 V's of big data (volume, velocity, variety, veracity), along with aspects of data governance and its role in data quality. The course will focus on techniques employed in integrating big data and making well integrated data ready for analysis. You will learn the practical and ethical considerations involved in big data integration and analytics. The course will culminate with the creation of an enterprise level big data integration plan.

TIM-6540 - Interpreting and Reporting Data

Semester Credits: 3 Weeks: 8

Data are of little meaning unless transformed into insights. In this course, you will explore the methods and processes through which data are reviewed for the purpose of arriving at an informed decision making or insights. The interpretation of data assigns

a meaning to the information analyzed and determines its signification and implications. Reporting of data is the art around data science that establishes the best format alternative for the audience set to receive the insights.

TIM-6550 - IT Asset Management

Semester Credits: 3 Weeks: 8

Information technology professionals must have an understanding of the IT lifecycle and asset management principles to support organizational goals. This course covers the processes and services that enhance IT asset management practices leading to cost-effective decisions. During this course, you will study the best ways to manage hardware, software, and data assets. You will also examine the legal requirements affecting data retention and disposal and the provisions needed to control mobile, BYOD, and cloud operations.

TIM-6601 - IT Project Management

Semester Credits: 3 Weeks: 8

This course provides an overview of the principles, guidance, and technologies for the practice of information technology project management. Emphasis is given to primary processes, deliverables, and knowledge groups involved in project management. You will practice project management specifically as it relates to managing and developing new technologies and ideas by applying tools and technologies in demand and use by the industries. The course is aligned to professional and international recognized standards.

TIM-6610 - Leadership in Project Management

Semester Credits: 3 Weeks: 8

Project managers must be able to create project plans that ensure the effective management of resources and communications. This course provides an examination of theories applied to leadership, resource, communications, procurement, and stakeholder management as they relate to information technology project management. During this course, you will examine project management theories and explore the differences between project management theory and reality as applied to different organizational cultures and dynamics. You will also explore conflict resolution strategies and develop a project communications plan.

TIM-6615 - Agile Project Management

Semester Credits: 3 Weeks: 8

This course provides an overview of agile principles aligned with internationally recognized standards and methodologies that are commonly used to support information technology efforts. During this course, you will explore agile approaches including Scrum, Crystal, Dynamic Systems Development Method, Lean, Kanban, and Feature-Driven frameworks. You will gain knowledge of Scrum processes and leadership, including teams and collaboration within technology projects. In addition, you will learn important techniques managing Sprints, user testing, and releasing usable code output. The course culminates with you managing the project to a successful close while adapting to changing needs.

TIM-6620 - Project Management Systems & Technology

Semester Credits: 3 Weeks: 8

Project management consists of a set of tools and techniques used to conduct a set of tasks and manage inputs to produce outputs or deliverables in a timely fashion. These days, project managers and teams have a wide range of tools available to facilitate interaction and complete project milestones within time and budget. In this course you will study the project tools, methodologies, and techniques that can aid the project manager in ensuring the project's success.

TIM-6630 - Managing Risk in Project Management

Semester Credits: 3 Weeks: 8

Successful managers identify and manage risk within their organization and projects. In this course you will learn the Project Management Institute Standard for Risk Management. You will identify the principles of the Risk Management Framework within your organizations and projects. This includes ways to recognize and reduce exposure to risk. At the conclusion of this course, you will develop risk classification along with a list of known risks by reviewing project artifacts within your organization to plan for risk occurrences.

TIM-6640 - Program & Portfolio Management**Semester Credits: 3 Weeks: 8**

Portfolio and program managers must be proficient in simultaneously managing multiple projects and leveraging resources. This course covers various techniques for the management of project portfolios and programs involving diverse technical cross-functional teams. During this course, you will explore the challenges and risks associated with managing multiple projects, analyze different ways to successfully allocate resources across multiple projects, analyze the value and alignment of projects with strategic goals, and design a project management office (PMO) to add value to an organization.

TIM-7001 - Principles of Technology Innovation Management**Semester Credits: 3 Weeks: 8**

Fundamental approaches to the breadth and depth of technology and its societal proliferation are important aspects of technology management. In this course, the technology life cycle from inception to obsolescence will be researched. Technology management includes ethical, economic, and financial aspects of technological research, development, and emergence. You will examine strategic, operational, and tactical aspects of technology management. You will conduct discovery on technology assessment and frameworks for managing technology in organizations. Finally, you will recommend a strategy including research questions, from an applied perspective, to underline potential technology doctoral topic areas.

TIM-7010 - Computer Networks & Mobile Computing**Semester Credits: 3 Weeks: 8**

In this course, students will explore emerging issues in computer network design and management. Of particular attention will be topics on how mobile computing has changed the way networks are designed and managed.

TIM-7011 - Management of Computer Networks**Semester Credits: 3 Weeks: 8**

In this course, students are prepared for an understanding of networks and related theory to support computer science, cybersecurity, and technology management needs. Students will learn network concepts, as well as designing networks for reliability, availability, confidentiality, and network monitoring. Content will include high-level design of networks, evaluation of service providers, and strategies to prepare an organization for future communication needs (such as multi-cloud, satellite, 5G & 6G, and quantum data communications, plus related security techniques). Students will learn network design, planning, the role of network data communication devices, global access, and safe third-party data exchange.

TIM-7020 - Databases & Business Intelligence**Semester Credits: 3 Weeks: 8**

Data and databases are the foundation of all business systems. Organizations that do not understand the importance of data management are less likely to survive in the modern economy. During this course, you will study advanced concepts of database management systems and data warehouses. You will also research processes and techniques used to improve data repositories, manipulate data, and prevent data corruption. By the end of the course, you will be able to construct, assess, and transform data to improve business intelligence to support informed business decisions.

TIM-7030 - Managing Risk, Security, & Privacy in Information Systems

Semester Credits: 3 Weeks: 8

With more application systems and data processed, together with mobile, cloud, and virtual environments all technology system risks increase for security, privacy, compliance issues. While expectations for safety rise, increased complexity and threats make the provision far more difficult and expensive. Record tampering and accidental or intentional exposure are also among the internal risks every enterprise face. During this course, you will learn how to assess, mitigate, and manage risks, threats, and vulnerabilities. You will also study theories, models, standards, and frameworks that aid the effective design, protection mechanisms, practices, and procedures to implement and manage operations within information systems.

TIM-7031 - Managing Risk, Security, & Privacy in Information Systems

Semester Credits: 3 Weeks: 8

This course explores data and various systems, risks, and policies in organizational settings. Topics include risk, policy, and ethics for tangible and intangible domains. You will explore methods for assessing, mitigating, and managing risks, threats, and vulnerabilities. This course presents theories, models, standards, and frameworks that comprise the basic tenets of risk, and guide the design, protection mechanisms, practices, and procedures for managing and leading organizations. The course explores the risk concepts that contribute toward long-term strategic management, executive leadership organizational perspectives, and emerging threats, while incorporating short-term project risk and policy concerns.

TIM-7040 - Technology Policy & Strategy

Semester Credits: 3 Weeks: 8

This course is an advanced examination of the frameworks, theories, concepts, and strategies for managing technology policies and implementing emerging technology in business organizations. During this course, you will research the legal, technical, and managerial considerations needed to design an information technology governance structure. You will also formulate a policy and strategy proposal, including research problems, and questions to facilitate applied research in the domain.

TIM-7101 - Statistics with Technology Applications

Semester Credits: 3 Weeks: 8

This course serves as an extensive exploration of statistics for the technology leader. Included in the course, is an advanced examination of statistical analyses commonly used for information systems and technology research. During this course, you will use different statistical tools to enhance your advanced analytical skills. These statistical analysis skills are required to plan, conduct, and interpret quantitative data to inform enterprise decisions. You will also learn to illustrate and produce technical output reports.

TIM-7211 - Introduction to Research Design and Methodology for Technology Leaders

Semester Credits: 3 Weeks: 8

This course provides a survey of the different methods used to conduct technology-based research. During this course, you will learn about the research principles and methodologies that guide scientific inquiry in order to develop an understanding of the effects of research on individuals and organizations. Specifically, you will study the scientific research lifecycle, data collection methods, and research design methodology. You will finish the course by selecting a research design methodology to support your research interests through the remainder of your program.

TIM-7221 - Quantitative Research Design for Technology Leaders

Semester Credits: 3 Weeks: 8

The results of technical research are frequently used to support informed management decisions. This course provides technology leaders and professionals with the skills needed to design and conduct quantitative research studies to support specific types of data. During this advanced course in research, you will explore and apply different types of quantitative research methods and statistical techniques. You will also explore instrumentation, data collection, and data analysis tools and techniques to create aligned, ethical, and substantive research designs.

TIM-7225 - Directed Quantitative Research**Semester Credits: 3 Weeks: 8**

A quantitative research design includes objective analysis using experimental, quasi-experimental, and related techniques. Technical quantitative research involves statistical analysis of data collected from a larger number of participants to determine an outcome that can be applied to a general population. During this course, you will work through the scientific research process and apply your knowledge of quantitative research design to develop a technical research proposal in which you can use to support your research interests through the remainder of your program.

TIM-7231 - Qualitative Research Design for Technology Leaders**Semester Credits: 3 Weeks: 8**

The results of qualitative research are frequently used to support informed management decisions. This course provides technology leaders with an in-depth introduction to qualitative methods for studying human behavior, including grounded theory, narrative analysis, and case studies. During this advanced course in research, you will apply qualitative research methods to an information technology-based study. You will also deepen your research knowledge and skills by conducting interviews, collecting and coding data, producing ethical data conclusions, and creating objective research reports.

TIM-7235 - Directed Qualitative Research**Semester Credits: 3 Weeks: 8**

A qualitative approach to research of a technical nature integrates theoretical, conceptual, and empirical constructs with common practices and experience to gain an understanding of performance and functionality, develop an applied and testable model for improvement, or provide insights into problems to develop new ideas. During this course, you will work through the scientific research process and apply your knowledge of qualitative research design to develop a technical research proposal to support your research interests through the remainder of your program.

TIM-7241 - Constructive Research Design for Technology Leaders**Semester Credits: 3 Weeks: 8**

The results of technical research are frequently used to develop new products and services. This course provides technology leaders and professionals with the skills needed to design and conduct constructive research studies based on theory. During this advanced course in research, you will examine the methods and measurements used to design constructive research studies to develop sound technical solutions or prototypes. You will also explore software and security testing tools and user acceptance testing methods in order to create aligned, ethical, and substantive research designs.

TIM-7245 - Directed Constructive Research**Semester Credits: 3 Weeks: 8**

Technical constructive research focuses on models, frameworks, tools, and software used by industry to improve value creation. A constructive approach to research of a technical nature integrates theoretical and empirical constructs with common practices and experience to develop an applied and testable model to improve the fields of computer science and information technology. During this course, you will work through the scientific research process and apply your knowledge of constructive research

design to develop a technical research proposal in which you can use to support your research interests through the remainder of your program.

TIM-8101 - Principles of Computer Science

Semester Credits: 3 Weeks: 8

In this course, students will study how computer science concepts and theories can be applied and used to solve real-world problems. Students will also be introduced to research in computer science and become acquainted with venues for sharing knowledge in the field.

TIM-8110 - Programming Languages & Algorithms

Semester Credits: 3 Weeks: 8

Programming languages and algorithms evolve due to changes in technology, needs, security, and other environmental adjustments. Programming must therefore adjust solutions quickly while limiting the use of resources. This course is an advanced study of the practical and theoretical principles behind the design, analysis, and implementation of algorithms and programming languages for research and professional practice. During this course, you will evaluate the practical and theoretical principles behind language development and the use of different programming languages to address programming problems. You will also examine current algorithms and their evolution for resolving common and anticipated computational problems.

TIM-8121 - Distributed Algorithms and Parallel Computing

Semester Credits: 3 Weeks: 8

Organizations depend on distributed systems and parallel computing to achieve the performance and reliability required by their systems. These systems provide organizations with the ability to leverage hardware and software platforms to improve efficiency. During this course, you will research the latest developments in computing concepts, such as instruction level parallelism, task level parallelism, multicore computing, and distributed algorithms. You will complete the course by predicting evolving trends in distributed algorithms and parallel computing.

TIM-8122 - Distributed Algorithms and Parallel Computing

Semester Credits: 3 Weeks: 8

This course explores the latest developments and applications of parallel and distributed computing in various domains. The course delves into advanced concepts and techniques related to algorithm optimization, solution-driven architectures, and the impact of parallel and distributed computing on advanced technologies and solutions. You will focus on the specific considerations for parallel computing in Internet of Things (IoT) solutions, advancements in modern parallel computing, applied parallel computing in cybersecurity, and the application of distributed computing in Blockchain technology. Through research, analysis, and assignments, students will gain a deeper understanding of these topics and their real-world applications.

TIM-8130 - Data Curation

Semester Credits: 3 Weeks: 8

This course includes methods, means, and processes involved in transforming raw data into useable form for a multitude of analytics. Data curation is a set of processes that transforms, manages, stores, and democratizes data for use for analysts and data scientists through the lifecycle of data. The curation of data enables an organization or researcher to maximize the value of the data and effectively use the transformed data to produce and deliver insights. This course considers data that have been already acquired and integrated into useable repository and focuses on teaching techniques to make those data usable for next steps in developing analytics models.

TIM-8131 - Data Mining

Semester Credits: 3 Weeks: 8

This course addresses needs in industry, business, and academia to improve performance and advance scientific knowledge. You will learn data mining techniques that help discover patterns, trends, anomalies, and associations that are otherwise hidden or unknown. In addition, this course introduces the fundamentals, principles, implementation techniques, and applications of data mining. Learning also includes data curation techniques, focuses on exploratory data analysis, prediction, classification, association analysis, similarity assessment and clustering, outlier, and anomaly detection. Interpreting and evaluating data analysis/data mining results is explored. Additionally, data mining experience for applications in computer vision, big data, and social networks will be provided.

TIM-8140 - Software Engineering**Semester Credits: 3 Weeks: 8**

Business processes change continually and require new technology solutions to improve production. Improved technology solutions can speed up processes, increase service delivery speed, and reduce the number of defects. This project-driven technical research course explores the principles and processes needed for the efficient development of software solutions with a focus on software quality design and development. During this course, you will research and suggest models and frameworks to improve software development processes based on different business problems and needs.

TIM-8150 - Artificial Intelligence**Semester Credits: 3 Weeks: 8**

Artificial intelligence is becoming more and more useful in helping solve everyday problems. Intelligent agents and natural language processing have become common in the marketplace. During this course, you will evaluate the impact of artificial intelligence on performance and enterprise resources. You will also expand your ability to improve an artificial intelligence application to address varied user specifications. Finally, you will be able to produce a complete artificial intelligence project plan that will integrate with current and proposed IT solutions for process improvement.

TIM-8210 - Quality Management**Semester Credits: 3 Weeks: 8**

This advanced course in quality management provides IT professionals and researchers with the skills to evaluate the impact of quality management principles on organizations. During this course, you will evaluate current processes and applications, suggest measures and provisions for improvement, and propose enhancements to current enterprise quality management models. You will also devise methods to support team integration, positive communication techniques, and dynamic learning approaches for strong collaboration and organizational sustainment.

TIM-8220 - Engineering Law**Semester Credits: 3 Weeks: 8**

Innovative new ideas are often brought to fruition by talented engineers. Protecting those ideas requires close attention to laws regarding intellectual property; and engineers are bound by regulations that help ensure the safety of their work. In this course, students will study the legal implications of innovation and engineering. In addition, students will learn to use the patent system as a research tool in developing new technologies.

TIM-8301 - Principles of Cybersecurity**Semester Credits: 3 Weeks: 8**

This course will consolidate a foundation of concepts relating to security and cybersecurity, enabling the successful examination of greater detail and complexity in later courses. You will examine the full range from governance through compliance with laws, through people risks, to technology. Various mitigation options are considered to reduce vulnerabilities, counter threats, and to

protect an organization's data and system assets. You will study the need to protect organizations from future exposures and apply critical thinking and synthesis to motivate the resources needed to defend an organization.

TIM-8310 - Cyber Forensics

Semester Credits: 3 Weeks: 8

In this course, you will be introduced to the field of advanced cyber forensics. You will review various tools, techniques, and steps needed for a successful forensic investigation. In addition, you will examine various legal regulations that impact the collection of data, the importance of federal rules of evidence, and the critical requirement of evidence admissibility in a court of law.

TIM-8320 - Contingency Planning & Incidents

Semester Credits: 3 Weeks: 8

Organizations dependent on information systems and solutions to enable the effective operation and survival. Malicious acts, accidental errors, and natural risks threaten the continuous availability of those systems. In this course you will develop the knowledge and skills needed to develop business continuity and disaster recovery plans after the proper analysis of events and incidents. You will help the organization prioritize exposures, identify threats, define appropriate defenses, prepare related processes, and identify resources needed to provide appropriate continuity solutions. Your knowledge will include planning, preparation, training, testing, and updating the incident detection, contingency plans, and crisis management for the organization.

TIM-8330 - Advanced Risk Management

Semester Credits: 3 Weeks: 8

Risk management is the foundation of defending organizations from information security, cyber threats, compliance, audit, and privacy exposures. To address risk and assurance, this course builds an integrated approach solution leading to the prioritization of resources for an organization. You will extend your knowledge and skills for global protection within and beyond the perimeter. This course positions the importance of risk management within a cybersecurity program and its role within Enterprise Risk Management (ERM). You will also assess theories and practices concerning risk management, compose a risk strategy, and leverage maturity models to improve the protection of organizations.

TIM-8340 - Secure Software Development

Semester Credits: 3 Weeks: 8

Knowledge of security principles and practices in software engineering is vital to provide quality software solutions. This course is an application-based examination of software engineering for the security professional. During this course, you will explore the foundations that support secure software development and analyze different secure software design and development practices. You will also select and defend a secure software architecture and technology approach and then design a secure software deployment and maintenance solution strategy.

TIM-8350 - Cyber Critical Infrastructure, Threats, Terrorism, & Warfare

Semester Credits: 3 Weeks: 8

Global integration and broad alliances between criminal elements and nation-states frequently lead to rapidly changing and significant threats to all nations, organizations, and citizens. During this course, you will study current and predictable threats, target critical infrastructure, and determine risks implied in new technology. You will also learn to recognize the risks originating from cybercriminals, terrorism, hacktivism, and nation-state, and other significant threat actors. You will devise and work to get funding for viable strategies to defend critical infrastructures, organizations, and the citizens of the nation.

TIM-8410 - Cloud Computing

Semester Credits: 3 Weeks: 8

Cloud computing has transformed the way industry does business, government offers services, and academia moves to online learning. In this interconnected world, the office has gone mobile and data is managed over the cloud by services like software as a service, data as a service, and security as a service. During this course, you will study how to implement and use application program interfaces and services that are structured to support application management over the internet. You will plan strategies for managing and securing data handled over remote connections.

TIM-8420 - Data Warehousing & Decision Support**Semester Credits: 3 Weeks: 8**

This course provides an advanced study of the theories and trends related to creating and managing enterprise data warehouses. The course will explore the emerging concepts and theories to determine decisions required to plan, design, and implement data warehouse and decision support systems. Additionally, the course will provide an overview of effective policies for decision support systems and data warehousing maintenance. You will gain a detailed understanding of how to implement and overview data warehouse improvements.

TIM-8430 - Systems Analysis & Design**Semester Credits: 3 Weeks: 8**

This course is an advanced study of the theories and concepts related to systems analysis and design. Special focus is given to the role of the Business Analyst's role for investigating current systems and identifying business needs, process reengineering, and how to move an organization toward the desired future state. Theories and models are discussed for break-through thinking, using technology to improve operations and as a competitive advantage. Students will apply what they are learning to solving real-world problems to identify areas of improvement and develop solutions to them. The course culminates with the presentation of findings that includes the proposed systems design and how to implement the new system in the organization.

TIM-8440 - Knowledge Management**Semester Credits: 3 Weeks: 8**

This course provides an advanced study of theories and concepts about knowledge management systems (KMS) and trends to evaluate the gaps between theory and practice in knowledge management. Additionally, the course will provide an overview of a comprehensive and methodological approach to support managers in their implementations of KMS. You will also gain the concepts related to capturing, storing, managing, recalling, and reusing organizational knowledge. This course also includes the process to measure results and enable managers to improve their KMS implementations and identify key future issues.

TIM-8501 - Exploratory Data Analysis**Semester Credits: 3 Weeks: 8**

This course includes analytics methods to understand how data is shaped in relation to how it can be analyzed. This is a foundational skill for data scientists and important to apply prior to creating confirmatory (final) models that predict and deliver end-user insights for decision making. The focal points in this course are descriptive statistics and exploratory data analysis. Specific attention is given to measures of central tendency, clustering, variability, and frequency. You will learn identification of the appropriate univariate analysis for use in applied research in a business context. You will also learn to apply clustering analysis in relation confirmatory models.

TIM-8510 - Data Visualization & Communication**Semester Credits: 3 Weeks: 8**

Evaluating the accuracy and effectiveness of graphical representations of data is a critical skill required of experienced data scientists. This advanced course in data visualization will help you identify the appropriate questions required to evaluate the validity of the insights provided by others and develop the skills needed to influence other decision makers. During this course,

you will synthesize research on the best practices associated with communicating through data visualization. You will also study techniques and processes you can use to dynamically communicate your interpretations of effective graphic interactive representations of data.

TIM-8530 - Big Data Integration

Semester Credits: 3 Weeks: 8

This course focuses on modern tools and methods to develop and work with large datasets. Some course concepts include the exploration of relational databases, distributed storage software, distributed computing methods, analytics and algorithms. You will explore current topics in the area of big data and potential future problems. You will investigate appropriate architectural techniques associated with big data. You will also evaluate the constructs of ethics in data science, propose techniques for application, and design a system to produce insights.

TIM-8550 - Data Preparation Methods

Semester Credits: 3 Weeks: 8

Data preparation is the process in which data from one or more sources is cleaned and transformed to improve its quality before its use in data analysis. This process requires the majority of the time required to complete the data science lifecycle. During this course, you will learn the tools and techniques used during data preparation and the role they play in delivering quality data for making informed decisions. You will end the course by gathering and preparing data sets for future analysis.

TIM-8601 - IT Project Management

Semester Credits: 3 Weeks: 8

This course is an advanced examination of the processes, deliverables, and knowledge areas of project management. In this course, you will research project management concepts, tools, and techniques as proposed by standards and methodologies. You will investigate strategies for balancing scope, schedule, and budget in project management. You will explore effective management of resources by assuring quality and controlling risks. You will also explore tools, methods, and trends to respond to industry demands, needs and expectations.

TIM-8610 - Leadership in Project Management

Semester Credits: 3 Weeks: 8

This course is an advanced examination of leadership, human capital management, and technical resources as they relate to information technology program and project management. In this course, you will examine models for managing programs and projects aligned with organizational dynamics, culture, governance and environment as part of the program and project lifecycle. You will develop the skills and knowledge needed to effectively manage the portfolio of programs and projects aligned with the organization's capital investments and strategic goals for process and operations improvement.

TIM-8620 - Project Management Systems & Technology

Semester Credits: 3 Weeks: 8

Effective project management requires a precise allocation of resources to complete tasks and deliverables within time and schedule while guaranteeing quality results. Various tools and techniques exist to schedule tasks, manage, and control budget, to produce outputs or deliverables in a timely fashion. In this course, you will research project tools, methods, and techniques available to aid the project manager during project execution and monitoring to ensure project success.

TIM-8630 - Managing Risk in Project Management

Semester Credits: 3 Weeks: 8

Risk plays a central role in projects, big investments, and other enterprise endeavors. A sound risk management process

integrated with enterprise risk management improves the probability for project success. Constantly assessing potential issues with risk management provides an opportunity to implement controls and provisions to minimize negative impacts on project execution. During this course, you will explore the constructs of project risk management standards applied to information technology projects and methodologies, from traditional to agile and hybrid. By the end of the course, you will be able to improve risk management approaches for quality and effectiveness.

TIM-8640 - Program & Portfolio Management

Semester Credits: 3 Weeks: 8

Portfolio and program managers must be proficient at simultaneously managing multiple projects and optimizing resources. This course presents proven methods for leading and managing a portfolio of projects in a cross-section of industries. During this course, you will analyze the methods and techniques successful organizations use to setup and manage portfolios and programs. You will also study resource allocation and the challenges, opportunities, and risks associated with managing multiple projects. Finally, you will create a portfolio and program framework for the project management office (PMO).

Trauma-Informed Educational Practices

TRA-5100 - Fundamentals of a Trauma-Informed Approach to Education

Semester Credits: 3 Weeks: 8

In this foundational course about trauma-informed educational practices, you will explore trauma generally from your own individual experiences and perspectives as well as those perspectives held by our collective society. Part of the foundations you will examine include the differences in how children and adults respond to trauma and how different types of trauma might manifest in learners, instructors, and administrators across multiple educational environments. You will also consider what behaviors and dispositions demonstrated within an educational environment might reflect underlying trauma and what principles can guide appropriate responses.

TRA-5200 - Trauma Across Educational Populations and Settings

Semester Credits: 3 Weeks: 8

You will examine the different educational settings in which trauma can occur or manifest among different populations. You will consider issues of diversity, equity, inclusion, and social justice as you investigate specific groups of learners and instructors who are more likely to experience trauma as well as identify practices that can minimize the risk of secondary trauma. You will also explore the impact of trauma within specific educational settings, paying particular attention to those educational practices that can exacerbate trauma.

TRA-5300 - Trauma-Informed Strategies for Educational Environments

Semester Credits: 3 Weeks: 8

In this course, you will explore several aspects of classrooms across educational environments. You will examine the intersection of social emotional development and trauma-informed educational practices that support a nurturing environment for educators and learners alike. This examination will include specific classroom elements, the language of the educators interacting with the learners, and the content of the curriculum and other learning materials selected for instructional use. The course also provides an opportunity to modify instructional strategies for alignment with trauma-informed educational practices and recommend instructional tools that support learners who may have been exposed to trauma. You will also determine effective techniques for de-escalating behaviors that may be rooted in trauma.

TRA-5400 - Strengthening Resilience Among Learners and Educational Professionals

Semester Credits: 3 Weeks: 8

In this course, you will explore how the general concepts of individual and community resilience relate to broader trauma-informed practices across different educational settings. Understanding this relationship includes comparing the theoretical foundations of resilience and strengths-based approaches to teaching, training, and learning. You will interpret characteristics that reflect resilience, explore how self-care can strengthen resilience, and recommend instructional strategies that strengthen resilience among learners. You will also examine some challenges to resilience from the perspectives of educational equity and social justice.

TRA-5500 - Trauma and Support Systems in Educational Environments**Semester Credits: 3 Weeks: 8**

There are many different frameworks and models used across different educational environments to form support systems for individuals who have experienced trauma. In this course, you will examine these frameworks, models, and support systems, including their theoretical foundations, their alignment across organizational and community supports, and how systems typically used in one educational environment can be applied to other environments. You will assess opportunities to create or improve formalized support systems for learners and educators who have experience trauma, including an evaluation of these system through the perspectives of equity, inclusion, and social justice.

TRA-5600 - Capstone in Trauma-Informed Educational Practices**Semester Credits: 3 Weeks: 8**

In this capstone course, you will synthesize your work throughout the specialization to evaluate trauma-informed educational practices through the lenses of educational equity, diversity, inclusion, implicit bias, and social justice. You will assess the effects of different types of trauma and subsequent supports needed for educators and learners who may have experienced trauma as well as those educational practices that can either exacerbate trauma or mitigate its effects. You will demonstrate your expertise related to trauma-informed educational practices by recommending strategies for addressing behaviors or dispositions that may be rooted in trauma and cultivating individual plans for self-care that might minimize the risk of trauma, mitigate its effects, and support resilience after experiencing trauma.

TRA-7100 - Trauma-Informed Educational Practices within Community Contexts and Conditions**Semester Credits: 3 Weeks: 8**

This is an introductory course in which you will analyze community resources and educational organizations related to trauma-informed educational practices. You will explore how historical contexts and practices have influenced current conditions and pedagogy. Additionally, you will examine cultural and economic contexts with respect to local trauma-informed educational practices. Finally, you will create artifacts of learning as a researcher and develop assignments to aid you in a cumulative signature presentation to address professional development for Trauma-Informed Educational Practices.

TRA-7200 - Linking Theory and Practice to Design Trauma-Sensitive Environments**Semester Credits: 3 Weeks: 8**

Understanding how theory influences current policies and practices will allow you to evaluate, integrate, and finally synthesize educational theories relevant to trauma-sensitive environments, and how these theories inform practice within educational and community environments. You will also determine essential elements of trauma-sensitive environments as you review classroom, administrative, curricular, and community practices.

TRA-7300 - Social Emotional Learning and the Ethic of Care in Trauma-Sensitive Environments**Semester Credits: 3 Weeks: 8**

This course focuses on two essential components of trauma-sensitive environments: social emotional learning and the ethic of care. In this course, you will be asked to cultivate an ethic of care related to a trauma-sensitive educational environment and

incorporate the central premises of the ethic of care into a trauma-sensitive educational environment. Further, you will relate social emotional learning to a trauma-sensitive educational environment and recommend related practices. Additionally, you will assess elements of social justice, diversity, equity, and inclusion as trauma-informed educational practices and develop educational strategies built on the central premises of ethic of care and social emotional learning competencies.

TRA-7400 - Relating Educator Dispositions to Learning in Trauma-Sensitive Environments

Semester Credits: 3 Weeks: 8

In this course, you will focus on learning about educator dispositions and how they influence trauma-sensitive environments. To do so, you will assess educator dispositions essential to trauma-sensitive educational environments and develop educator dispositions to learning in trauma-sensitive educational environments. Further, you will explore culturally responsive practices related to trauma-sensitive environments, advocate diversity, equity, and inclusion as central elements in trauma-sensitive educational environments, and promote educator dispositions for strengthening trauma-sensitive educational environments.

TRA-7500 - Culturally Responsive Systems and Restorative Approaches for Building Trauma-Sensitive Environments

Semester Credits: 3 Weeks: 8

Understanding culturally responsive systems and restorative approaches for building trauma-sensitive educational environments is a large undertaking, and in this course, you will determine systems-level, culturally responsive interventions in trauma-sensitive educational environments. You will explain ways in which individuals and systems interact to help build trauma-sensitive educational environments, recommend restorative approaches and related practices for trauma-sensitive educational environments, and incorporate elements of social justice, diversity, equity, and inclusion into culturally responsive systems within a trauma-sensitive educational environment. As a result, you will cultivate an understanding of restorative and trauma-informed practices within a larger educational system.

TRA-7600 - Community-wide Trauma and Learning: Next Steps in Advanced Practice and Research

Semester Credits: 3 Weeks: 8

In this final course, you will work to discern the differences between trauma within communities and community-wide traumas. Further, you will cultivate awareness of community-wide trauma practices and research and deconstruct elements of a system-wide crisis plan in response to community trauma. You will also generate ideas for addressing community-wide trauma and learning, recommend system practices for responding to community-wide trauma, and finally, synthesize the impact of community-wide trauma on practice and research.

Leadership Development

LED-6020 - Developing Groups and Teams

Semester Credits: 3 Weeks: 8

The formation and development of groups through effective leadership is the focus of this course. Team communication styles and roles within teams are examined. Strategies that foster creativity in groups are discussed. The impact of technology on teams and communication styles is evaluated. Students learn experientially about groups and teams and the impact of diverse ethical perspectives by participating in group activities and observing leadership in small groups.

LED-6030 - Leadership in the 21st Century

Semester Credits: 3 Weeks: 8

Examination of emerging forms of leadership, influence and power, chaos and collaboration. The course will analyze multiple organizations within the private and public sectors, and will draw upon diverse perspectives, ethical considerations and applied approaches. Participate in experiential approaches to learning leadership skills which may include the classroom as a temporary organization to be examined in real time.

LED-6050 - Conflict and Power Dynamics**Semester Credits: 3 Weeks: 8**

Integration of the knowledge, skills, and abilities required to design, conduct, and evaluate effective conflict resolution and negotiation practices. Course topics include interpersonal and intra-group conflict resolution; persuasion, problem solving techniques and decision-making in conflict resolution; overcoming bias, anger, and retaliation. Students will develop leadership and dialogue skills used to navigate conflict situations, and begin to detect conflicts as potential clues of organizational challenges.

Supply Chain Management**SCM-6100 - Supply Chain Collaboration****Semester Credits: 3 Weeks: 8**

Supply Chain Collaboration focuses on aligning business processes and goals between firms within the supply chain toward improving the performance of all members. This course presents the eight managerial processes at the strategic and operational levels, first within the firm and then between firms. Successful Supply Chain Collaboration requires cross-functional integration, right-sizing of partnerships and correct adoption of performance measures, which will be studied in depth with attention to practical applications and deployment techniques.

SCM-6300 - Supply Chain Planning**Semester Credits: 3 Weeks: 8**

This course focuses on the fundamentals of planning as a primary input into the conception and execution of a robust supply chain architecture. Core facets of planning such as Resource capacity maximization, Supply and demand balancing, Forecast development, Service requirements, Internal and external plan collaboration, and Inventory optimization are discussed in detail. Using simulation and mathematical models as a basis, coupled with practical real life scenarios, this course connects the individual components of the production and inventory planning functions into an integrated supply chain strategy.

SCM-6400 - Distribution Management**Semester Credits: 3 Weeks: 8**

The ability to deliver the right products to the right customer at the right cost, the right time and the right quantity is mission-critical to any business' success. Successful companies have turned this competency into a key competitive advantage. With most supply chains now spanning the globe several times over, a multitude of service providers, IT systems and distribution systems must all work in concert to deliver excellence. This course will provide the student with an in-depth understanding of the building blocks of transportation modes, warehousing techniques and the strategies companies employ to achieve a competitive advantage in the marketplace.
